**Trade.** — Oporto is the emporium of a large portion of the kingdom of Portugal, and enjoys a pretty considerable foreign commerce. The well known red wine, denominated Port, from its being exclusively shipped at this city, forms by far the largest article of export. The exports vary in different years, from about 26,000 to near 40,000 pipes. England is much the largest consumer of port. The high discriminating duties on French wine originally introduced port into the British markets, and gave it a preference to which, though an excellent wine, it had no just title: this preference first generated, and its long continuance has since so confirmed, the taste for port among the great bulk of the population, that it bids fair to maintain its ascendancy as an after-dinner wine, notwithstanding the equalisation of the duties. At an average of the 8 years ending with 1841, there were shipped from Oporto for England 26,370 pipes a year. Next to England, Brazil, Russia, and the north of Europe are the principal consumers of port; but it appears, from the subjoined account, that the

total exports to them do not amount to a fourth part of those to England. The other exports are oil, oranges and other fruits, wool, refined sugar, cream of tartar, shumac, leather, cork, &c. The imports are corn, rice, beef, salt fish, and other articles of provision; sugar, coffee, &c. from Brazil; cotton and woollen goods, hardware, tin plates, &c. from England; hemp, flax, and deals, from the Baltic, &c.

Besides the British manufactured goods imported into Portugal for the use of the natives, a considerable quantity is destined for the consumption of Spain; being smuggled into that country through Braganza and other towns on the frontier.

*Money, Weights, and Measures* same as those of Lisbon; which see

We subjoin —

An Account of the Wine shipped from Oporto during the 8 Years ending with 1841, specifying the Quantities shipped for the U. Kingdom, and for all other Parts.

	To the U. Kingdom.	To all other Parts.	Total.
1834 - - -	26,303 pipes.	3,150 pipes.	31,254 pipes.
1835 - - -	32,535	8,933	38,468
1836 - - -	30,206	3,079	33,285
1837 - - -	21,110	4,678	25,782
1838 - - -	26,067	11,918	37,975
1839 - - -	26,159	7,046	33,205
1840 - - -	25,678	7,512	33,190
1841 - - -	21,011	5,344	26,355
	210,964	48,654	359,618
Average of 8 years - - -	26,370	6,061	32,432

The comparatively large amount of shipments in 1834, 1835, and 1836, is explained by the fact of the siege of Oporto having continued during the greater part of the two previous years; the obstruction to exportation which it occasioned, by reducing the stocks in this and other countries below their usual level, having necessarily led to a proportional increase of shipments in the two or three following years. The decreased export in 1841 (and the almost total cessation of exportation in 1842) is to be ascribed to the protracted negotiations with Portugal on the subject of a commercial treaty, and to the disinclination of the merchants to import, and of the consumers to order, any considerable quantity of wine, when it was supposed the duties were to be immediately reduced. It is estimated that a vintage in the Upper Douro produces at an average about 70,000 pipes, of which above 32,000 are usually exported, while 30,000 of an inferior sort are consumed in the neighbourhood of Oporto, and the remainder, which is still inferior to the second description, is distilled for brandy.

It is hardly possible to form any estimate of the value of the wine shipped from Oporto; the price varying from 6*l.* to 50*l.* per hoghead. The export duty on wine approved for exportation (*vinho d'embargue*), is about 6  $\text{p}$  500 *rs.* per pipe, or, at the present (July, 1843) rate of exchange, 1*l.* 9*s.* a pipe. Separated wine (*vinho separado*) is not generally allowed to be exported; but at present it may be shipped on paying 18  $\text{p}$  500 *rs.* more, or 6*l.* 9*s.* 3*d.* a pipe. The other expenses are trifling. Freight to this country varies from 1*l.* to 1*l.* 11*s.* 6*d.* per pipe. — For an account of the Oporto Wine Company, see WINE.)

Sometimes wine is purchased from the farmer in the wine country. In this case, the casks are sent about 60 miles up the river, in boats, to be filled. Owing to the miserable state of the roads, the expense of carriage is very considerable; the cartage from and to the river side frequently costing from 1*l.* to 3*l.* per pipe. The freight from the upper country down the river to Oporto is about equal to that from the latter to England. There is also an internal duty of about 1*l.* 2*s.* per pipe on all wine brought down the river. Inasmuch, however, as these charges are perpetually varying, it is not possible to lay before the reader any *pro forma* account of the cost of wine bought in the Upper Douro.

The Oporto Wine Company have the monopoly of the brandy as well as of the wine trade of the Douro. — (*Private information.*)

**ORANGES** (Ger. *Pomeranzen*; Du. *Orangen*; Fr. *Oranges*; It. *Melanzani*; Sp. *Naranjas*; Rus. *Pomeranexii*; Hind. *Narunge*; Malay, *Sima-manis*), the fruit of the orange tree. The common, or sweet orange (*Citrus sinensis*, or *Citrus nobilis*), and the Seville, or bitter orange (*Citrus aurantium*), are natives of China: and the Portuguese are entitled to the honour of having transferred the plant to other countries. Particular species of *Citrus* seem to be indigenous to various Eastern countries; but the birth-place of the proper orange may be distinctly traced to China. It is now to be found in our green-houses. Oranges are imported in chests and boxes, packed separately in paper. The best come from the Azores and Spain; very good ones are also brought from Portugal, Italy, Malta, and other places.

The orange trade carried on by this country is of considerable value and importance. Oranges are not much more expensive than most of our superior domestic fruits, while they are, perhaps, the most refreshing and wholesome of those of warmer climates. The entries for home consumption amounted, as an average of the 3 years ending with 1842, to 334,070 boxes a year; and assuming each box to contain 650 oranges and lemons, the number annually entered for consumption will have been 217,145,500, exclusive of 26,863 entered by number, and 7,012*l.* worth entered at value! The duty produced, at an average of the above years, 70,833*l.* a year. The number of persons employed in the importation and sale of oranges must be very considerable. The policy of charging any duty on oranges seems questionable. They are very apt to spoil; and as no abatement is made from the duty on account of any damage, its influence on their price is much more considerable than might at first be supposed.

**ORCHILLA WEED, ORCHELLA, or ARCHIL** (Ger. *Orseille*; Fr. *Orseille*; It. *Oriella*, *Orellia*; Sp. *Orchilla*), a whitish lichen (*Lichen orchella*) found in the Isle of Portland; but that which is used is imported from the Canary and Cape de Verd Islands, Madeira, Barbary, and the Levant. From it is obtained the archil, or orchal, of commerce, which yields a rich purple tincture, fugitive, indeed, but extremely beautiful. The preparation of orchilla was long a secret, known only to the Florentines and Hollanders; but it is now extensively manufactured in this country. Orchil is generally sold in the form of cakes, but sometimes in that of moist pulp; it is extensively used by dyers; and in times of scarcity the weed or lichen has sold as high as 1,000*l.* per ton! — (*Thomson's Dispensatory.*) At present (July 1843) Madeira orchilla fetches, in

the London market, 75*l.* a ton; but orchilla from the Canary Islands fetches a higher, and that from Barbary a much lower price. The entries for consumption amounted, at an average of the 3 years ending with 1842, to 6,050 cwt. 3 qrs. 10 lbs. The duty, which had been 3*s.* a cwt., was reduced in 1842 to 1*s.* a cwt.

ORGOL. See ANCOOL.

ORPIMENT (Ger. *Operment*; Fr. *Orpiment*; It. *Orpimento*; Sp. *Oropimente*; Lat. *Auripigmentum*), the name usually given to sulphuret of arsenic. When artificially prepared, it is in the form of a fine yellow-coloured powder; but it is found native in many parts of the world, particularly in Bohemia, Turkey, China, and Ava. It is exported from the last two in considerable quantities; and is known in the East by the name of hartal. Native orpiment is composed of thin plates of a lively gold colour, intermixed with pieces of a vermilion red, of a shattery foliaceous texture, flexible, soft to the touch like talc, and sparkling when broken. Specific gravity 3·45. The inferior kinds are of a dead yellow, inclining to green, and want the bright appearance of the best specimens. Its principal use is as a colouring drug among painters, bookbinders, &c. — (*Thomson's Chemistry*; *Milburn's Orient. Com.*)

ORSEDEW, ORSIDUE, MANHEIM or DUTCH GOLD (Ger. *Flittergold*; Du. *Klatergoud*; Fr. *Oripeau*, *Oliquant*; It. *Orpello*; Sp. *Oropel*), an inferior sort of gold leaf, prepared of copper and zinc. It is sometimes called *leaf brass*. It is principally manufactured in Manheim.

OSTRICH FEATHERS. See FEATHERS.

OWNERS OF SHIPS. Property in ships is acquired, like other personal property, by fabricating them, or by inheritance, purchase, &c.

No ship is entitled to any of the privileges of a British ship until she be duly registered as such, and all the provisions in the Registry Act (3 & 4 Will. 4. c. 55.) be complied with. — (See REGISTRY.)

A British ship may belong either to one individual, or to several individuals. It is ordered by the act just cited, that the property of every vessel of which there are more owners than one, shall be divided into 64th shares; and that no person shall be entitled to be registered as an owner who does not, at least, hold one 64th share. It is further provided by the same statute, that not more than *thirty-two* persons shall be owners of any one ship at any one time. Companies or associations holding property in ships, may choose *three* of their members to act as trustees for them.

Neither the property of an entire ship, nor any share or shares in such ship, can be transferred from one individual to another, except by bill of sale or other instrument in writing; and before the sale is valid, such bill or instrument must be produced to the collector and comptroller, who are to enter the names, residences, &c. of the seller and buyer, the number of shares sold, &c. in the book of registry of such vessel, and to indorse the particulars on the certificate of registry. — (See the clause in the statute, art. REGISTRY.)

But, though compliance with the directions in the statute accomplishes a complete transference of the property, when the transaction is not in its nature illegal, it gives no sort of security to a transference that is otherwise bad. The purchaser should in all cases endeavour to get *possession* of the ship, or of his share in her, as soon as his title to her or it is acquired, by the registration of the particulars of the bill of sale; for though all the formalities of sale have been completed, yet, if the sellers continue as apparent owners in possession of the ship, their creditors may, in the event of their becoming bankrupt, acquire a right to it, to the exclusion of the purchasers. In the case of a sale or agreement for a part only, it is enough if, the sale being completed, the seller ceases to act as a part owner. — (*Lord Tenterden on the Law of Shipping*, part i. c. 1.)

Property in ships is sometimes acquired by capture. During war, his Majesty's ships, and private ships having letters of marque, are entitled to make prizes. But before the captors acquire a legal title to such prizes, it is necessary that they should be condemned in the admiralty or other court constituted for that purpose. When this is done, the captors are considered to be in the same situation, with respect to them, as if they had built or purchased them.

The act 3 & 4 Will. 4. c. 55. has ruled, that no person having the transfer of a ship, or a share of a ship, made over to him as a security for a debt, shall be deemed an owner, or part owner, of such ship. And when such transfer has been duly registered according to the provisions of the act, the right and interest of the mortgagee are not to be affected by the bankruptcy of the mortgagor, though he be the reputed owner, or part owner, of such ship. — (See REGISTRY.)

In the article MASTERS OF SHIPS is given an account of the liabilities incurred by the owners of ships for the acts of the masters. But it has been attempted to encourage navigation by limiting the responsibility of the owners, without, however, depriving the freighter of a ship of an adequate security for the faithful performance of the contract. To effect this desirable object, it has been enacted, that the owner or owners

shall not be liable to make good any loss or damage happening *without their fault or privity*, to any goods put on board any ship or vessel belonging to such owner or owners, further than the value of such ship or vessel, with all its appurtenances, and the freight due, or growing due, during the voyage that may be in prosecution, or contracted for, at the time when the loss or damage has taken place. — (53 Geo. 3. c. 159.)

This limitation was first introduced into our law by the 7 Geo. 2. c. 15. But it had previously been adopted in the law of Holland, and in the justly celebrated French Ordinance of 1681. In the Ordinance of Rotterdam, issued in 1721, it is expressly declared, that “the owners shall not be answerable for any act of the master, done without their order, any further than their part of the ship amounts to.” Independently, however, of this general agreement, the expediency of the limitation appears, for the reasons already stated, sufficiently obvious.

It was also enacted in 1786 (26 Geo. 3. c. 60.), that neither the master nor owners of any ship or vessel shall be liable to answer for or make good any gold or silver, diamonds, watches, jewels, or precious stones, lost or embezzled during the course of the voyage, unless the shipper thereof insert in his bill of lading, or declare in writing to the master or owners, the true nature, quality, and value of such articles.

The responsibility, at common law, of a *master or mariner* is not affected by the first-mentioned limitation, even though such master or mariner be owner or part owner of the vessel; neither does the limitation extend to the owner or owners of any lighter, barge, boat, &c. used solely in rivers or inland navigation, nor to any ship or vessel not duly registered according to law.

When several freighters sustain losses exceeding in the whole the value of the ship and freight, they are to receive compensation thereout in proportion to their respective losses: and any one freighter, on behalf of himself and the other freighters, or any part owner, on behalf of himself and the other part owners, may file a bill in a court of equity for the discovery of the total amount of the losses, and of the value of the ship, and for an equal distribution and payment. If the bill be filed by or on behalf of the part owners, the plaintiff must make affidavit that he does not collude with the defendants, and must offer to pay the value of the ship and freight, as the court shall direct.

It is usual in most countries, where the part owners of a ship disagree as to her employment, to give those possessed of the greater number of shares power to bind the whole. But in this country, while the majority of the owners in value have authority to employ the ship as they please, the interests of the minority are secured from being prejudiced by having their property engaged in an adventure of which they disapprove. For this purpose the Court of Admiralty has been in the practice of taking a stipulation from those who desire to send the ship on a voyage, in a sum equal to the value of the shares of those who object to it, either to bring back and restore to them the ship, or to pay them the value of their shares. When this is done, the dissentient part owners bear no portion of the expenses of the outfit, and are not entitled to a share in the profits of the voyage; the ship sails wholly at the charge and risk, and for the profit, of the others. — (Abbott, part i. c. 3.)

For the statutory enactments as to the sale and transfer of ships, see *REGISTRY*.

OYSTER, OYSTERS (Ger. *Austern*; Fr. *Huîtres*; It. *Ostriche*; Sp. *Ostras*; Lat. *Ostrea*). This well known shell-fish is very generally diffused, and is particularly plentiful on the British coasts, which were ransacked for the supply of ancient Rome with oysters. They differ in quality according to the different nature of the soil or bed. They are particularly abundant in the rivers and creeks of Essex and Kent; in Poole harbour, and elsewhere on the coast of Hants and Dorset; at Porth Einion, in Glamorgan, &c. They are also very abundant on the Mersey shores. Those found at Carlingford, in Ireland, are of a peculiarly delicate flavour. The breeding and fattening of oysters for the London market forms a considerable branch of business. It is principally carried on in Essex and Kent; the rivers Crouch, Blackwater, and Colne being the chief breeding-places in the former, and the channel of the Swale, contiguous to Milton, in the latter. The oysters found in them are not, however, brought immediately to town; but are deposited for a while in beds or layings in the adjoining creeks, where they are fed and fattened for the market. Exclusive of the oysters bred in Essex and Kent, vast numbers brought from Jersey, Poole, and other places along the coast, are fattened in the beds. The export of oysters from Jersey is very considerable, having amounted, at an average of the 4 years ending with 1832, to 208,023 bushels a year, of which a large portion comes to London. The Jersey fishery employs, during the season, about 1,500 men, 1000 women and children, and 250 boats. — (*Anglia's Channel Islands*, p. 142. 2nd ed.) The consumption of oysters in London is immense, being, notwithstanding their high price, largely consumed by the middle and lower classes.

The imports of oysters are very various, sometimes amounting to several thousand bushels a year; but in the majority of years none are imported.

The stealing of oysters, or oyster brood, from any oyster bed, laying, or fishery, is larceny, and the offender, being convicted thereof, shall be punished accordingly; and if any person shall unlawfully and wilfully use any dredge, net, &c. for the purpose of taking oysters, or oyster brood, within the limits of any oyster bed or fishery, every such person shall be deemed guilty of a misdemeanour, and, upon being convicted thereof, shall be punished by fine or imprisonment, or both, as the court may award; such fine not to exceed 30*l.*, and such imprisonment not to exceed 3 calendar months. It is provided, that nothing in the act shall be construed as preventing any one from catching *floating fish* within the limits of any oyster fishery, with any net, instrument, or engine adapted to the catching of such fish. — (7 & 8 Geo. 4. c. 29. § 36.)

## P.

PACKAGE, SCAVAGE, BAILLAGE, AND PORTAGE, were duties charged in the port of London, on the goods imported and exported by aliens, or by denizens being the sons of aliens.

During the dark ages, it was usual to lay higher duties upon the goods imported or exported by aliens, whether in British or foreign ships, than were laid on similar goods when imported or exported by natives. But according as sounder and more enlarged principles prevailed, this illiberal distinction was gradually modified, and was at length wholly abolished, in so far at least as it was of a public character, by the 24 Geo. 3. c. 16. This act, after reciting that "the several duties and restrictions imposed by various acts of parliament upon merchandise are, by the alterations of the trade now carried on between this kingdom and foreign states, in some cases become an unnecessary burden upon commerce, without producing any real advantage to the public revenue, and that it is expedient they should no longer continue," enacts, that the duty commonly called "the petty customs," imposed by the 12 Car. 2., and all other additional duties imposed by any act upon the goods of aliens above those payable by natural-born subjects, should be no longer payable. The act then goes on to provide, that nothing contained in it shall "alter the duties due and payable upon goods imported into or exported from this kingdom in any foreign ship, nor the duties of *package* and *scavage*, or any duties granted by charter to the city of London;" and then follow provisions to prevent the city being defrauded of such duties by false entries of aliens' goods in the name of a British subject. — (*Chitty's Commercial Law*, vol. i. p. 160.)

The duties thus preserved to the city were not very heavy; but the principle on which they were imposed was exceedingly objectionable, and their collection was attended with a great deal of trouble and inconvenience. Not being levied in other places, they operated to the prejudice of the trade of the metropolis. For these reasons, we observed, in the first edition of this work, that "if the funds of the corporation will not admit of their following the liberal example of the legislature, by voluntarily abandoning this vexatious impost, it would be good policy to give them a compensation for relinquishing it." And we are glad to have to state that this suggestion has since been carried into effect. The act 3 & 4 Will. 4. c. 66. authorised the Lords of the Treasury to purchase up the duties in question from the city. This was done, at an expense of about 140,000*l.*, and the duties were abolished. There is a Table of the duties in the first edition of this work.

PACKETS. See NEW YORK, PASSENGERS, and POST-OFFICE.

PALERMO (anciently PANORMUS), a large city and sea-port, the capital of the noble island of Sicily, on the north coast of which it is situated, the light-house being in lat. 38° 8' 15" N., lon. 13° 21' 56" E. Population, 170,000.

The bay of Palermo is about 5 miles in depth, the city being situated on its south-west shore. A fine mole, fully  $\frac{3}{4}$  of a mile in length, having a light-house and battery at its extremity, projects in a southerly direction from the arsenal into 9 or 10 fathoms water, forming a convenient port, capable of containing a great number of vessels. This immense work cost about 1,000,000*l.* sterling in its construction; but the light-house, though a splendid structure, is said to be very ill lighted. There is an inner port, which is reserved for the use of the arsenal. Ships that do not mean to go within the mole may anchor about  $\frac{1}{4}$  a mile from it, in from 16 to 23 fathoms, the mole light bearing N.W. & W. A heavy sea sometimes rolls into the bay, but no danger need be apprehended by ships properly found in anchors and chain cables. In going into the bay, it is necessary to keep clear of the nets of the tunny fishery, for these are so strong and well moored, as to be capable of arresting a ship under sail. — *Smyth's Sicily*, p. 70. and *Appen.* p. 4.)

*Money.* — Since 1818, the coins of Sicily have been the same as those of Naples, their names only differing. — (See NAPLES.) The ducat, = 3*s.* 5*d.* sterling, is subdivided into 100 *dajocchi* and 10 *piccioli*; but accounts are still generally kept in *oncie*, *tari*, and *grani*: 20 *grani* = 1 *taro*; 30 *tari* = 1 *oncia*. The *oncia* = 3 *ducats*; and 1 *carlino* of Naples = 1 *taro* of Sicily. The Spanish dollar is current at 12 *tari* 8 *grani*.

*Weights.* — These are the *cantaro grosso*, subdivided into 100 *rottoli grossi* of 33 *oncie*, or into 110 *rottoli sottili* of 30 *oncie*; and the *cantaro sottile*, subdivided into 100 *rottoli sottili* of 30 *oncie*, or 250 *lbs.* of 12 *oncie*. The *rottolo* of 33 *oncies* = 1*·*93 *lbs.* avoirdupois = 2*·*34 *lbs.* Troy = 8*·*73 hectogrammes = 1*·*77 *lbs.* of Amsterdam = 1*·*6 *lbs.* of Hamburg. The *rottolo* of 30 *oncies* = 1*·*75 *lbs.* avoirdupois = 2*·*13 *lbs.* Troy = 7*·*94 hectogrammes = 1*·*6 *lbs.* of Amsterdam = 1*·*64 *lbs.* of Hamburg. 100 Sicilian pounds of 12 *oncies* = 70 *lbs.* avoirdupois = 85*·*11 *lbs.* Troy = 31*·*76 *kilog.* = 64*·*23 *lbs.* of Amsterdam = 65*·*58 *lbs.* of Hamburg.

*Measures.* — The *salma grossa* = 9*·*48 Winch. bush.; the *salma generale* = 7*·*62 Winch. bush.

The principal liquid measure is the tonna, divided into 4 barili, each equivalent to  $\frac{1}{2}$  wine gallons. 1 barile = 2 quartare; 1 quartara = 20 tuattucl. The casso of oil = 48 Eng. gallons.

The yard or *canna* = 8 *palmi*; 24 *palmi* = 1 yard Eng. — (*Nelkenbrecher*; *Smyleh*, p. 62. App.)

*Taxes*.—Coffee, indigo, pepper, and dye woods, 2 per cent. and weight of package. Cinnamon, 6 rotoli per seron, with 1 wrapper, or 8 rotoli, with 2 wrappers; cocoa, 2 per cent., weight of package, and 2 per cent. for dust; cod-fish, 3 per cent.; herrings, 12 per cent.; tin, 12 rotoli per barrel; wax, weight of package, and 3 to 4 per cent. extra allowance; Harannah sugars, 15 per cent.; Brazil do., in short cases, 18 per cent., and in long cases, 30 per cent.; crushed sugar, weight of cask, and 5 per cent., or 13 per cent. in all, at the option of the buyer; East India do., in bags, 8 rot. to 10 rot. per bag. 1 rotolo taken as weight of bag, for coffee and cocoa in bags.

*Charges on Goods*.—The regular charges on the sale of goods consigned to Palermo, are—commission, 3 per cent.; brokerage,  $\frac{1}{2}$  per cent.; warehouse rent,  $\frac{1}{2}$  per cent.; and portage and boat hire; with 2 per cent. *del credere*,—imports being almost always sold on credit. The charges may occasionally vary  $\frac{1}{2}$  to 1 per cent., and imports are frequently sold duty paid; the prices, however, so obtained, fully compensate for the trifling increase of charges.

The charges on goods exported are—3 per cent. commission; brokerage, so much per *centaro*, *salme*, &c., generally amounting to about  $\frac{1}{2}$  per cent., except on fruit, on which it is equivalent to from 2 to 3 per cent.

*Imports and Exports*.—The great articles of export from Sicily are—olive oil, grain, particularly wheat and barley; silk, brimstone, wine and brandy, barilla, lemons and oranges, lemon juice, manna, shumac, linseed, fruit, salted fish and salt; with argol, liquorice, pumice stone, rags, skins, honey, cotton wool, saffron, &c. Wheat is largely exported. It is of a mixed quality, hard, and is generally sold from the public magazines, or *caricatori* (see *post*), by measure, without weight. But the best hard wheat, grown in the neighbourhood of Palermo, is sold by the *salma* of 272 rotoli = 476 lb. Eng.: the difference between weight and measure being made good by the seller to the buyer, as the case may be. Wine is principally shipped from Marsala; lemons, oranges, and lemon juice, from Messina; salt, from Trapani; and barilla, from the southern coast. But all the articles to be found on the coast may, for the most part, be had at Palermo; unless, however, the quantity required be small, it is usually best to ship them from the outports, the expense of their conveyance to Palermo being very heavy. The crops of barilla and shumac come to market in August; but brimstone, salt, oil, wine, rags, &c. may generally be had all the year round. The first shipments of lemons and oranges may be made in the beginning of November. Purchases of produce are always paid for in cash, generally  $\frac{1}{2}$  on making the purchase, and the other  $\frac{1}{2}$  on delivery, when in Palermo, and on receiving order for delivery, on the coast.

The imports consist of cotton yarn, wool, and stuffs; sugar, coffee, cocoa, dye stuffs, iron, earthenware, spices, tin, hides, Newfoundland cod, timber for building, &c. The best of the old accounts of the trade of Sicily that we have met with is contained in *Swinsborne's Travels in the Two Sicilies*, 4to. vol. ii. pp. 401–412. But the information in this article has been principally derived from the elaborate and valuable reports of Mr. Consul Goodwin, one of the most intelligent of that class of functionaries. The subjoined Tables show in detail the trade of the island and of Palermo.

Account of the Quantities and Values of the Articles exported from and Imported into Sicily in 1842, exhibiting the Quantities and Values of those exported to and imported from the United Kingdom and all other Countries.

*Remarks on the Trade, &c. of Sicily.* — This noble island contains about 10,500 square miles, being the largest in the Mediterranean, and one of the most fertile and best situated in the world. Its population is about 2,100,000. In ancient times, Sicily was celebrated for the number, magnitude, and opulence of its cities. Notwithstanding, however, that its population was then probably treble its present amount, it obtained, from its furnishing vast supplies of corn and other articles of provision for the use of Rome, the appropriate epithet of *horreum Romanorum*, and is said by Livy to have been *Populorum Romano, pace ac bello, fidissimum annonæ subsidium*. — (Lib. xxvii. cap. 5.) But (*quantum mutatus!*) there are now few countries in which agriculture and the arts are in so degraded a state! It does not, however, appear very difficult to account for this melancholy change. After the overthrow of the Roman power, Sicily was occupied successively by the Greeks, Saracens, Normans, and French, till at length it became a dependency, first of the crown of Spain, and more recently of that of Naples. It is to this dependence, and to the introduction of the feudal system by the Normans, that its backward state is principally to be ascribed. The multiplied abuses which grew up in Spain under the reign of Ferdinand and his successors of the Austrian line, flourished with equal luxuriance in Sicily, and have proved no less destructive of the industry and civilisation of its inhabitants than of those of Spain. Misgovernment, the abuses of the feudal system, insecurity, and unequal and arbitrary taxes, have here, as every where else, paralysed industry, and impoverished the people.

But the grand curse of Sicilian, as of Sardinian industry, will probably be found in the oppressive restrictions that have been laid on the exportation of corn. Down to a late period, no corn could be exported without leave being obtained from the *Real Patrimonio*, a body that pretended to take an account of the crops, and which determined whether there were to be any exportation; and in the event of its being allowed, it issued, or rather sold, licences to a few favoured individuals\*, authorising them to export certain specified quantities! Even had Sicily been ten times more productive than she really is, it is quite impossible that agriculture could have flourished under such discouragements. Luckily, however, these oppressive restraints have recently been abolished, and there are no longer any obstacles to the free exportation of corn. Oppressive taxes, the want of leases of a reasonable length, and of practicable roads, are at present, perhaps, the greatest obstacles to agriculture.

The property of the island was valued in 1811, when the English garrison and fleet occasioned a great demand, and high prices for produce of all kinds; and this valuation has been continued to this day, as the basis on which the land and house tax (*fondiaría*) is levied. A rate of 7½ per cent. on the valuation was first charged, which was subsequently raised to 12½ per cent., at which it is now fixed. Owing, however, as is stated, to the fall in the price of agricultural produce since 1811, this tax is alleged by Mr. McGregor to be more than equivalent to a duty of 25 per cent. on the produce of the soil taken at its present (1840) value, and to be a very great obstacle to improvement. We believe, however, that its influence in this respect, though considerable, has been much over-rated; and that the backward state of Sicily is principally owing to other and different causes.

Though there be in Sicily a very considerable number of small proprietors, by far the greater part of the land belongs to the crown, the church, and the nobility, some of whom have very extensive and valuable estates. Down to a recent period, these were held under a system of strict entail, and their occupiers, as well as those of the estates of the crown and the church, usually held under triennial leases, and were in a state of feudal bondage, and subject to numerous exactions on the part of their lords. Under such circumstances, even though there had been neither restrictions on exportation nor a land tax, the depressed condition of the peasantry, and the low state of agriculture, need not be wondered at.

But we are glad to have to state that the dawn of a better day seems to have arisen, and that several important changes have lately been introduced. We have already noticed the removal of the restrictions on exportation; and in 1812 and 1838 laws were passed for the abolition of the feudal system, and the complete emancipation of the peasantry. And, notwithstanding the poverty and ignorance of the latter will hinder them from speedily profiting to the extent that might be anticipated from the passing of these laws, this cannot fail, in the end, to be productive of the best effects. It was also enacted in 1819, that in future, on the death of any individual possessed of an estate in land, and having more than one son, the half only of the estate should descend to the eldest son, and that the other half should be divided in equal shares among the other children. This law, which appears to have been framed on the model of that which regulates the succession to property in France, will probably have nearly similar effects. In both countries, the abuses of entails might have been obviated without running into

\* The late Queen is said to have been a great dealer in corn on her own account!

the opposite extreme, and establishing a system that can hardly fail in the end to occasion the too great division of landed property.

Exclusive of wheat and barley, hemp, flax, and cotton are raised with but little labour. The culture of the last is said to be extending of late years, especially in the neighbourhood of Mazzara. It is mostly short-stapled, and but little is exported, and that only to Naples and Trieste. It is probable, however, that by attention to its culture, and the introduction of improved varieties, its quality might be improved, and it might become an article of some importance. The sugar-cane was formerly a staple product of the S. shore of Sicily. But owing to the introduction of cheaper sugar from the W. Indies and Brazil, the culture of the cane is now restricted to some small plantations near Avola, and will probably at no distant period be wholly abandoned.

The district round Marsala is the principal seat of the wine culture; and, thanks to the exertions of some English capitalists established in that city, the production of wine is become an important branch of industry, and it forms a principal article of export. — (See WINE.) But, except in the English establishments, little care is in general bestowed on the vintage. Along the N. coast, the mountain slopes and valleys are almost wholly covered with olive groves; though elsewhere they are rare, and do not furnish sufficient oil for the inhabitants. But for the imperfections in the mode of its preparation, the oil of Sicily would be excellent. The olives, however, are permitted to hang on the tree till they come off with shaking, or beating with light canes; and they are then kept in vats till they get quite black, so that the oil becomes pungent and rancid, and, though fit for the lamp, is totally unfit for the table. It is only near the capital and in a few other places, that a more improved process is followed. Lemons and oranges, which grow luxuriantly, are of excellent quality, well adapted for long voyages, and, when intended for exportation, are collected with more care than any other agricultural product. They are largely exported, and are altogether highly important. Almonds, pistachios, dates, madder, the barilla plant, hazel-nuts, the *Ricinus palma*, or castor oil plant, saffron, tobacco, &c., might all be raised in any quantity; but their culture is for the most part neglected, or ill-conducted. The mulberry is grown in the vicinity of Messina, and in the N. E. part of the island; but the produce of silk does not exceed 400,000 lbs. a year. The manna ash is grown near the capital, and, manna not being monopolised by the government in Sicily, as in Naples, it might be a much more extensive and profitable article of trade than it really is, if there were any public enterprise. Liquorice is found growing wild in several parts of the island, and considerable quantities of juice are exported. The culture of shumac is a good deal attended to, and it forms a principal article of export.

Formerly there were only certain ports from which corn could be exported; a limitation which gave rise to the establishment at these ports of public magazines or *caricatori*, where the corn may be deposited till an opportunity occurs of shipping it off. Provided it be of good quality (*mercantibile* or *recetibile*), and provided it be brought in immediately after harvest, or, at farthest, in August, it is warehoused free of expense; what it gains in bulk after that period (about 5 per cent.) being sufficient to defray all expenses. The receipt of the *caricator*, or keeper of the magazine, is negotiable like a bill of exchange, and is the object of speculative purchases on the exchange at Palermo, Messina, &c. according to the expected rise or fall in the price of corn. The depositor of a quantity sells it in such portions as he pleases, the whole being faithfully accounted for. The public magazines, in some parts of the island, are either excavations into calcareous rocks, or holes in the ground shaped like a bottle, walled up, and made water-proof, containing each about 200 salme of corn, or about 1,600 English bushels. The neck of the bottle is hermetically closed with a stone fastened with gypsum. Corn may be thus preserved for an indefinite length of time; at least, it has been found in perfectly good order after the lapse of a century. — (*Simond*, p. 540.; *Swinburne*, vol. ii. p. 405. For an account of the oil *caricatori* of Naples, see OLIVE OIL.)

The fisheries are chiefly conducted by corporations of fishermen, or monied individuals. That at Palermo employs, during the season, from 900 to 1,000 boats, and 3,500 fishermen; and the produce is valued at from 20,000*l.* to 25,000*l.* a year. Tunnies, the fish principally caught on the Sicilian coasts, and which were in great request in antiquity, as well as in modern times, are of large dimensions, being generally from 4 to 8 feet in length, with a nearly equal girth. Their flesh is highly nutritious. The shoals of tunny enter the Mediterranean early in the year. The *tonnare*, or fishing establishments, on the Sicilian coasts, are more extensive and valuable than those of any other part of the Mediterranean. The nets belonging to the one in the Bay of Palermo are so very strong as to be able to arrest the progress of a ship when under sail. The fishery of the sword-fish is confined chiefly to the Straits of Messina, and the anchovy and pilchard fisheries to Siculania. Lentini has some trade in *botarga*, made of the roe of the mullet. The coral fishery, near Bona, in Africa, is principally

frequented by fishermen from Trapani, at which city the coral is polished, and brought for exportation to Catania, Naples, Leghorn, &c.

The minerals of Sicily are important and valuable. Sulphur ranks first; it is found in great quantities imbedded in blue marl, or in gypsum and limestone, over most of the central and S. parts of the island. The sulphur mines have been wrought for upwards of 300 years; but it is only since 1820 that any extraordinary quantity has been prepared for exportation. Subsequently to 1833, the trade with this country increased so much that the export of sulphur to the U. Kingdom rose from 19,122 tons in the above year, to 38,654 tons in 1838. In this year, however, the Neapolitan government granted to a French company the monopoly of the trade in sulphur, the production of which was to be limited to 600,000 quintals, to be supplied to the company by the proprietors of the mines at certain fixed prices, on condition of the latter paying to the government a bonus of 400,000 Neapolitan ducats a year! It is needless to dwell on the impolicy and absurdity of such a project. Instead of attempting to limit the export of sulphur, government should have given it every possible facility; and taking the export under a free system, at only 1,000,000 quintals, it would have yielded, at the low duty of 2s. a cwt. on export, a larger sum than was to be paid by the company for their monopoly. Luckily, however, a firm remonstrance by England occasioned the suppression of the monopoly, and the sulphur trade is again restored to its former state. Some sulphur mines are wrought by English speculators, with machinery brought from England, and workmen from Wales, Cornwall, and Scotland; but in most of the other mines the processes are very rude, and, in melting, a great part of the sulphur is allowed to escape in gas, to the destruction of the surrounding vegetation. Sicily furnishes saltpetre of excellent quality in sufficient quantity for her own consumption, but from want of enterprise none is produced for exportation. Rock salt, bitumen, gypsum, and marble of different kinds are found in various places; and good salt is made at Trapani, and other coast towns. There are also ores of copper, lead, mercury, and iron, but very few of these are wrought. There are no iron foundries in the island, and iron and tin goods are principally imported from England, lead from Spain, and steel from Germany.

Were the bounty of nature towards Sicily not counteracted by vicious laws and institutions, she would undoubtedly be one of the richest and finest of European countries. All that she requires is security of property and freedom of industry. Let but these be given to her, and a few years will develop her gigantic resources, and elevate Girgenti, Termini, and Sciacca, to a very high rank among corn-shipping ports.

**PALM OIL** (Ger. *Palmöl*; Fr. *Huile de palme*, *Huile de Seneegal*; It. *Olio di palma*; Sp. *Acete de palma*) is obtained from the fruit of several species of palms, but especially from that of the *Elais Guineensis*, growing on the west coast of Africa, to the south of Fernando Po, and in Brazil. When imported, the oil is about the consistence of butter, of a yellowish colour, and scarcely any particular taste; by long keeping it becomes rancid; loses its colour, which fades to a dirty white; and in this state is to be rejected. It is sometimes imitated with hog's lard, coloured with turmeric, and scented with Florentine iris root. The inhabitants of the coast of Guinea employ palm oil for the same purposes that we do butter. Our supplies of palm oil are almost wholly derived from the west coast of Africa, of which it is the staple article of export. — (*Lewis's Mat. Med.*; *Thomson's Dispensatory*.)

Account of the Quantities of Palm Oil entered for Consumption in the U. Kingdom, with the Amount of Duty received thereon, during each of the 3 Years ending with 1842.

The duty on palm oil was reduced in 1834 from 2s. 6d. to 1s. 3d. a cwt.; and in 1842 it was further reduced to 6d. a cwt.

**PAMPHLET**, a small book, usually printed in the octavo form, and stitched.

It is enacted by 10 Ann. c. 19. § 113. that no person shall sell, or expose to sale, any pamphlet, without the name and place of abode of some known person, by or for whom it was printed or published, written or printed thereon, under a penalty of 20l. and costs.

It is enacted by the 55 Geo. 3. c. 185. that every book containing 1 whole sheet, and not exceeding 8 sheets, in 8vo. or any lesser size; or not exceeding 12 sheets in 4to, or 20 sheets in folio, shall be deemed a pamphlet. The same act imposed a duty of 3s. upon each sheet of one copy of all pamphlets published. This duty, which was at once vexatious and unproductive, hardly ever yielding more than 1,000l. or 1,100l. a year, was repealed in 1833.

**PAPER** (Ger. und Du. *Papier*; Fr. *Papier*; It. *Carta*; Sp. *Papel*; Rus. *Bumaga*; Lat. *Charta*; Arab. *Kartas*; Pers. *Kaghas*). This highly useful substance is, as every one knows, thin, flexible, of different colours, but most commonly white, being used for writing and printing upon, and for various other purposes. It is manufactured of ve-

getable matter reduced to a sort of pulp. The term paper is derived from the Greek *πᾶπιρος* (*papyrus*, see *post*), the name of the plant on the inner bark of which (*Liber*, *βιβλος*, whence our word *book*) the ancients used to write. Paper is made up into *sheets*, *quires*, and *reams*; each quire consisting of 24 sheets, and each ream of 20 quires.

*Historical Sketch of Paper. Difference between ancient and modern Paper.*—Some of those learned and ingenious persons who have investigated the arts of the ancient world, have expressed their surprise that the Greeks and Romans, though they possessed an immense number of books, and approached very near to printing in the stamping of words and letters, and similar devices, should not have discovered the art; the first rude attempts at typography being sufficiently obvious, though much time and contrivance have been required to bring the process to its present state of perfection. But they should rather, perhaps, have wondered that the more civilised nations of antiquity did not invent paper, an invention which, it may easily be shown, necessarily preceded that of printing. But this was an exceedingly difficult task; the more so, that the vast importance of paper could not be appreciated, or even imagined, till after it had been generally introduced. At first, the memory of important events appears to have been handed down by inscriptions cut on rocks, pillars of stone or marble, and the walls of edifices; and this primitive usage is still retained in the monuments in our churches and cemeteries. In a later, though still very remote age, men were accustomed to write upon portable surfaces of various kinds. Everybody knows that the Decalogue was written upon tables of stone; and Joshua wrote a copy of the law upon the like materials. — (*Josh.* c. viii. v. 32.) The Greeks and Romans engraved laws, treaties, contracts, and other important documents, on plates of brass; and it is stated, that a fire which broke out in the capitol, in the reign of Vespasian, consumed above 3,000 such bronze muniments. — (*Nouveau Traité de Diplomatique*, i. 451.) But exclusive of plates of this sort, which were necessarily inconvenient, costly, and quite unfit for ordinary use, thin and flexible plates of lead and other metals, (*Job*, c. xix. v. 23, 24.) thin pieces of wood, skins, parchment, linnen, and a variety of similar substances were used in writing. Cheaper materials, such as the leaves and bark of trees, palms, &c., were also used from a very remote period for the same purpose; but leaves (*χαρτὴς*, *charta*) being, when dry, apt to split in the direction of the fibres, it was found to be necessary, in preparing them for writing, to glue them together, so that the fibres might cross each other in opposite directions. The texture of the leaf, or sheet, if we may so call it, is thus greatly strengthened; and when it has been smoothed, polished, and fitted for use, it is less inconvenient and better looking than might be supposed. Such, in fact, is the principle on which the paper of the ancients was formed. This, however, which was called *Charta Egyptiaca*, from the place of its manufacture, did not consist of leaves, but of the inner bark of the famous reed or rush, the *Cyperus Papyrus*, found along the banks of the Nile, or rather in the pools and ditches which communicate with the river. The ancients applied this useful plant to an immense variety of purposes; but here we shall only notice that from which it has acquired an immortality of renown. The inner bark having been divided by a needle or other sharp instrument into very thin and broad layers or filaments, portions of these were placed side by side longitudinally, and glued together at the ends; another portion being glued crosswise on the backs of the latter, to give the page the requisite strength. Pliny and other writers have described the process (*Hist. Nat.* lib. xiii. c. 11, 12, 13.), which has been farther elucidated by Hardouin and other commentators. But the fullest and ablest discussion of this curious subject is contained in the very learned and elaborate work, the *Nouveau Traité de Diplomatique* (i. pp. 448—524.), where the most interesting particulars respecting the history and manufacture of papyrus, as well as of the greater number of the other writing materials used in antiquity, have been collected and set in the clearest point of view. — (See also the *Dictionnaire Diplomatique* of De Vaines, art. *Papier*, ii. pp. 165—174.) Bruce has given a summary of the authorities in the seventh volume of the octavo edition of his *Travels*; and, not satisfied with this, he attempted to make paper from the papyrus, in which not being very successful, he imputes his failure to errors in the statements of Pliny; not reflecting that, had he endeavoured, trusting to written directions, without experience and traditional art, to make modern paper, or even a pair of shoes, he would, most probably, have been equally unsuccessful. Egypt enjoyed for a lengthened period a natural monopoly of this valuable article; and even attempted, in anticipation of a later policy, by prohibiting the growth of the papyrus, except in certain localities, and limiting its supply, to sell its produce at an artificially enhanced price! — (*Ameilhon, Commerce des Egyptiens*, p. 298.) But this policy ceased on the conquest of Egypt by the Romans, who, having imported the plant into Rome, succeeded in preparing from it a very superior article. Pliny enumerates the various kinds of paper, from the coarsest, which was used, like our brown paper,

for packing, to the most expensive and finest. The latter, which was made of the innermost filaments, was of a snowy whiteness; and when properly dressed and polished, was easily written upon. The consumption was very considerable; and being, after the foundation of Alexandria, principally made in that city, it formed an important article in her commerce, and furnished employment for many workmen and much capital. Flavius Vopiscus relates, that in the 3d century, the tyrant Firmus used to say there was so much paper there, and so large a quantity of the glue or size used in its preparation, that he could maintain an army with it: — "*Tantum habuisse de chartis, ut publice saepe diceret, exercitum se alere posse papyrō et glutinō.*" We may doubt whether the value of the paper at present belonging to any single city would do the like. *Charta Egyptiaca* is very ancient, having, notwithstanding the assertion of Varro and Pliny to the contrary, (*Hist. Nat.* lib. xiii. cap. 11.,) been in common use long before the age of Alexander. This is evident from the statement of Herodotus, who, though he lived about a century before that conqueror, tells us, that in former times, when papyrus was scarce, the Ionians wrote on the skins of goats and sheep; and that that practice continued to be customary among several barbarous nations. — (Lib. v. cap. 58.)

Though white, smooth, durable, and not ill-adapted for writing, ancient paper was not suited for the printer: by reason of the closeness of the grain, it would not have received the ink from types more kindly than shavings of wood, and such like materials; and its texture was so very brittle, that it would have shivered to pieces under the press. It was, in truth, an inartificial mass ("*viscera nivea virentium herbarum*"), no great invention or ingenuity being discovered in its preparation. Modern paper, on the other hand, is wholly artificial; and the contrivances for its manufacture are marvellous alike for the sagacity evinced in their design and their practical efficiency. Like the paper of antiquity, it is formed of the filaments of various sorts of vegetable substances, derived principally from the tearing to pieces or pounding cotton and linen rags, and similar materials, mixed with water. This process is called beating them into pulp; and when examined with a microscope, the floating filaments are found to be well fitted for adhering together, being jagged and rough, and mixed in every possible way. A portion of this mixture or pulp being, when properly prepared, poured upon moulds or sieves of fine woven wire, the water is drained off, and the suspended fibres, falling to the bottom, form a layer or sheet, which, being consolidated by pressure and dried, becomes paper; its strength and goodness depending, of course, in a great measure, on the quality of the rag or other material of which it is made. Paper used to be manufactured by dipping sieves or frames into the pulp; the portion of filaments so lifted up forming the sheet of paper. But the application of rotary motion to the manufacture has effected a total change in the mode in which it was carried on: instead of dipping the sieves or frames into the cistern of pulp, a circular web, or round towel of woven wire, revolves horizontally under the vessel, (technically called the vat,) receives the deposit, conveys it away, and, by an adjustment of extraordinary delicacy, transfers it uninjured, though as fragile as a wet cobweb, to a similar revolving towel of felt: thus an endless web of paper is spun, as long, at least, as the machine continues to move, and pulp is supplied.

The pervious and spongy texture of paper make it readily imbibe and retain the ink impressed on it by types in printing, and by the pen in writing; its toughness hinders it from being easily torn; and, in a well-bound book, under favourable circumstances, its duration is indefinite, and, for all practical purposes, eternal! It is true that legal documents are sometimes written or printed on parchment, which is less liable to be torn, or injured by rubbing; the luxury of typography occasionally, also, exhibits a few impressions of a splendid work upon vellum; and, it is farther true, that these substances were used for writing upon by the ancients: but they are necessarily expensive, and the cost of either far exceeds the means of the great majority of book buyers; so that it would be altogether unprofitable to cast types, to construct presses, and to incur the various and heavy charges of an establishment for printing, unless we possessed a cheaper material on which to print.

Almost all the more ancient and valuable existing Greek and Latin manuscripts are written either on parchment or vellum, but generally on the latter. It is singular, however, that while such is the case, all or almost all the very old charters and diplomas are written on papyrus. Indeed the learned authors of the *Nouveau Traité de Diplomatique* affirm that no parchment charter has been discovered anterior to the 6th century. — (i. 479.)

It appears to be sufficiently established that paper, fabricated like that now in use, of cotton and other vegetable materials, and of silk, has been manufactured in China from a very remote epoch — (*Nouveau Traité de Diplomatique*, i. 519.): the Arab historians state that similar paper was manufactured in Mecca in the beginning of the 8th century — (*Andres, Origine e Progressi d' Ogni Letteratura*, i. 202., ed. Rom. 1808,

and Gibbon, ix. 379.); and most probably the mode of its production was then, also, known to the Greeks. It appears to have been soon after introduced into Europe; but it is doubtful whether this were done by the Arabians or Greeks. The mode of fabricating paper from cotton and other vegetable materials being once discovered, its fabrication from linen rags was a comparatively easy, and in Europe, where cotton was then extremely scarce, an all but necessary step. It is singular, however, that we have no positive information either as to the country where, or the epoch when, paper from rags began to be manufactured in Europe. *Mais on ne peut reculer son invention plus tard, qu'au Treizieme siecle, ni son usage ordinaire au-delà du Quatorzieme.* — (*Nouveau Traité*, &c., i. 524.) In fact, Egyptian paper, or paper made of papyrus, in the manner described above, continued to be partially employed down to the middle of the 11th century, though parchment was then the principal material used in writing.

It is curious to observe how very shortly the introduction of paper preceded the invention of printing, to which, indeed, as already seen, it was an indispensable preliminary. Muratori attributes the ignorance of the barbarous ages principally to the scarcity and high price of paper, and the superior intelligence of modern times to its abundance and cheapness. — (*Andres*, i. 200.) And whatever opinion may be entertained as to the first part of this statement, there can be no question that the latter is perfectly well founded.

Not only are we in the dark as to the history of modern paper, but we are unable to make any very satisfactory conjectural estimate of the mode in which it was invented. It is, however, all but certain that the invention must have been suggested by accident, or by observing the effects produced by the accidental drying of triturated vegetable matter, or in some such way; and that the hint thus afforded was gradually improved upon. It is not possible to imagine that the invention should have been wholly the result of design; for, we cannot conceive how any one without any previous knowledge should have proposed to himself to produce paper by pounding rags, or other vegetable matter, mixing the mass in water, and then pressing and drying the deposit. But, without indulging in unprofitable conjectures, it is at all events certain, that however and by whomsoever discovered, no invention has been of greater importance. *Charta usu maxime humanitas vite constat et memoria.* — (*Plin. Hist. Nat. lib. xiii. cap. 11.*) The processes by which the most worthless and vilest materials are converted into such admirable substances as paper and glass, are probably the greatest triumphs of human talent and ingenuity. They have more than realised the dreams of the alchemists; and have been incomparably more advantageous than if we had become acquainted with a means of transmuting the inferior metals into gold.

*Manufacture of Paper in England.* — The application of paper to the purposes of writing and printing, and the fact of its being indispensable to the prosecution of the latter, render its manufacture of the highest utility and importance. But, even in a commercial point of view, its value is very considerable. France, Holland, and Genoa had, for a lengthened period, a decided superiority in this department. The finest and best paper being made of linen rags, its quality may be supposed to depend, in a considerable degree, on the sort of linen usually worn in the country where it is manufactured; and this circumstance is said to account for the greater whiteness of the Dutch and Belgian papers, as compared with those of the French and Italians, and still more the Germans. The rags used in the manufacture of writing paper in Great Britain are collected at home; but those used in the manufacture of the best printing paper are imported, principally, from Italy, Hamburg, and the Austrian States, by way of Trieste. — (*See Rags.*) We believe, however, that it was owing rather to the want of skill, than, as has sometimes been supposed, to the inferior quality of the linen of this country, that the manufacture of paper was not carried on with much success in England till a comparatively recent period. During the 17th century, most part of our supply was imported from the Continent, especially from France. The manufacture is said to have been considerably improved by the French refugees who fled to this country in 1685. But it is distinctly stated in the *The British Merchant* (vol. ii. p. 266.), that hardly any sort of paper, except brown, was made here previously to the Revolution. In 1690, however, the manufacture of white paper was attempted; and within a few years, most branches were much improved. In 1721, it is supposed that there were about 300,000 reams of paper annually produced in Great Britain, which was equal to about two thirds of the whole consumption. In 1783, the value of the paper annually manufactured was estimated at 780,000*l.* At present, besides making a sufficient quantity of most sorts of paper for our own use, and for exportation, we annually export about 100,000*l.* worth of books. The importation of foreign paper for British consumption has now nearly ceased. A small quantity of French paper was used in this country for copperplate printing till within these few years; but, in this respect, we now surpass the French, and there is no artist of either country, who does not consider English paper, manufactured according to the latest improvements, best

adapted for prints. The French have, however, always excelled in the manufacture of very thin letter paper; and a small portion of this article, and some paper hangings, are now the only articles of import.

In 1813, Dr. Colquhoun estimated the value of paper annually produced in Great Britain at 2,000,000*l.*; but Mr. Stevenson, an incomparably better authority upon such subjects, estimated it at only half this sum. From information obtained from those engaged in the trade, we incline to think that the total annual value of the paper manufactured in the United Kingdom, exclusive of the duty, may at present amount to about 1,600,000*l.* or 1,700,000*l.* There are about 700 paper-mills in England, and from 70 to 80 in Scotland. The number in Ireland is but inconsiderable. Of these mills, we believe very few have lately been unemployed. About 28,000 individuals are supposed to be directly engaged in the trade: and, besides the workmen employed in the mills, the paper manufacture creates a considerable demand for the labour of millwrights, machinists, smiths, carpenters, iron and brass founders, wire-workers, woollen manufacturers, and others, in the machinery and apparatus of the mills. Some parts of these are very powerful, and subject to severe strain; and other parts are complicated and delicate, and require continual renovation. Owing to this, the manufacture is of much greater importance, as a source of employment, than might at first be supposed, or than it would seem to have been formerly considered by government, who loaded it, down to a very recent period, with an excise duty amounting to more than *three times as much as the total wages of the workpeople employed!*

It was formerly customary to collect the rags used in the manufacture into large heaps, in order that, by their heating and fermentation, they might be the more easily reduced to filaments. But this injured the rags; and it is now the practice to tear them to pieces, without any such preparation, by powerful machines, constructed for the purpose.

During the present century this manufacture has been signally promoted by the combined influence of science, ingenuity, and mechanical skill. These have been successfully exerted in the preparation of the pulp; the conversion of the pulp into paper; and the provision of materials: and in none has their influence been more remarkable than in the last. This is evident from the fact, that while the manufacture has been more than doubled since 1820, the demand for continental rags and other foreign materials has actually been reduced within that time, in consequence of the immense home supply we derive from substances previously regarded as worthless, and treated as refuse. The sweepings of cotton and flax mills, owing to the grease and dirt with which they are mixed up, were, until within these few years, of no value whatever, except as manure. But means having been discovered of rendering them clean and white, they are now made into very good paper; and the neighbourhood of Manchester has, in consequence, become a principal seat of the manufacture. The chemical and mechanical processes by which these materials are purified, whitened, and made available for the production of paper, without their strength being impaired, are not only exceedingly interesting in themselves, but are of great national importance; and, by reducing the cost of paper, have done ten times more to lower the price of books, and diffuse literature, than all the efforts of all the societies that ever existed.

The first idea of a machine for converting pulp into paper, originated in France, the inventor being an ingenious workman of the name of Louis Robert. A model of this machine was brought to England by M. Leger Didot; and though at first it was far from giving an assurance of success, it sufficed to induce English capitalists and engineers, particularly Mr. Donkin, to follow up the scheme; and in the course of a few years they brought it to a high degree of perfection. Mr. Dickinson, of Hertfordshire, one of the most intelligent mechanists and extensive paper manufacturers in England, has invented a machine of a different construction for the same purpose, and has also introduced various subsidiary improvements into the manufacture. One of these consists in the application of air pumps to the process, by the action of which, he produces a partial vacuum under a portion of the wire on which the pulp is in the act of settling, and thus very much accelerates its consolidation; in fact, prepares it almost instantaneously for the first mechanical pressure. The result is all but miraculous. By the agency of a great deal of complicated machinery, so admirably contrived as to produce the intended effect with unerring precision and in the very best manner, a process, which in the old system of paper-making occupied about *three weeks*, is performed in as many minutes! A continuous stream of fluid pulp is, within this brief space of time, and the short distance of 30 feet, not only made into paper, but actually dried, polished, and every separate sheet cut round the edges, and rendered completely ready for use! The paper manufactured by this wonderful combination of intelligence and power is, at once, moderate in price, and, for most purposes, superior in quality to what was formerly made by hand. The sample before the reader, though not the finest that is made, will warrant what is now stated.

Mr. Dickinson some time since made an important improvement in the paper manufacture, on the principle of veneering in cabinet work. He makes two webs of paper, each by a separate process; and by laying them together while in an early stage, they are rendered inseparable by the pressure to which they are subjected. This paper is used in copperplate printing; and by adopting a peculiar method of preparing the pulp, and selecting a finer rag for the web which forms the face of the paper, it is much better calculated for taking a fine impression. Its introduction has put a total stop to the importation of that species of French paper, which was formerly used in considerable quantities by copperplate printers. Probably, however, the most ingenious of the modern inventions in the manufacture is that by which Mr. Dickinson has contrived, without increasing the thickness of paper, to embody parallel coloured threads in its fabric. This novel description of paper is now used in the printing of exchequer bills and postage envelopes, for which it is admirably fitted, inasmuch as it cannot be counterfeited, except by employing similar machinery, which it would cost a great deal to construct, and be all but impossible to conceal.

*Duty on Paper.*—Previously to 1836, all writing, coloured, or wrapping papers, cardboards, and pasteboards, were denominated 1st class paper, and paid 3d. per lb. duty (28s. a cwt.); unless *manufactured wholly of tarred ropes, without the tar being previously extracted*, in which case the paper was denominated 2d class, and paid 1½d. per lb. (14s. a cwt.). Millboards and scaleboards, made of the same materials as 2d class paper, paid 2½d. per lb. (21s. a cwt.) duty.

This duty varied on the different descriptions of 1st class paper from about 25 or 30 per cent. on the finest, to about 200 per cent. on the coarsest! A duty so oppressive led to the commission of very great frauds, which all the vigilance of the officers, and the endless multiplication of checks and penalties, were unable to prevent; the real effect of such devices being to injure the honest manufacturers, and to give those of a different character greater facilities for carrying on their fraudulent schemes. But, laying out of view for a moment the oppressiveness of the duty, could any thing be more absurd, than to interdict the manufacturer of third class wrapping paper (for it is to him that the regulation applied) from using any other material than *tarred ropes*? After the peace, and the very general introduction of iron cables, tarred ropes advanced considerably in price; but as the use of *any other material whatever* would have occasioned an increase of 14s. a cwt. of duty, advantage could not be taken of this circumstance; so that the excise regulation, without putting one sixpence into the pockets of government, obliged the public to pay an increased price for an inferior article! Neither was this its only effect: a good deal of the refuse thrown out in sorting rags, which might have been used in the manufacture of coarse wrapping paper, was sold by the manufacturers for about 3s. a cwt.; while a good deal that might have been used in the same way could not be sold at all, but was absolutely lost. It is plain, therefore, that this regulation had a two-fold operation: first, in adding to the cost of wrapping paper, by compelling it to be made from a comparatively expensive article; and, secondly, in adding to the expense of fine paper, by preventing the refuse of the rags used in its manufacture from being beneficially employed.

Owing to the decline in the price of paper, the duty still amounts to about 50 per cent. on a large proportion of what is manufactured, though it may be doubted, considering the purposes to which paper is applied, whether it should be subject to any duty whatever. Printers, stationers, bookbinders, type-founders, artists, copperplate and lithographic printers, card-makers, paper-stainers and paper-hangers, &c. are all injured by a duty on it. But the greatest evil of all is its influence in increasing the price, and hindering the publication, of books. "This places a great obstacle in the way of the progress of knowledge, of useful and necessary arts, and of sober, industrious habits. Books carry the productions of the human mind over the whole world, and may be truly called the raw materials of every kind of science and art, and of all social improvement."—(*Sir H. Parnell on Financial Reform*, 3d ed. p. 30.)

But though the exigencies of the public service have not permitted the total repeal of the duties on paper, we are glad to have to state that they have been most materially lowered. In 1836, the duty on first-class papers was reduced to the same level as that on papers of the second class, or from 3d. per lb. to 1½d. per lb.; the manufacturers of the coarser descriptions of paper being at the same time relieved from the restraints under which they had previously laboured, and allowed to use any material in the manufacture which they may judge best. The oppressive duty of 1½d. per square yard laid on paper when printed or stained, over and above the ordinary duty on paper, was then also repealed, and the various acts relating to paper were combined into a single statute. At present, therefore, the same rate of duty is laid on all descriptions of paper, so that there is no longer any room for cheating the revenue by the substitution of superior for inferior paper, and, consequently, no necessity for exercising so great a degree of vexatious surveillance over the manufacture as formerly prevailed.

The influence of this wise and judicious measure in reducing the price of paper used in printing and writing, has since been decidedly manifested. The abolition of the discriminating duty on stained or printed paper has, also, been of material importance. The reduction of price it has occasioned has enabled a much larger class of persons to get their apartments papered; and it has been in this way productive, not only of a great additional demand for paper and labour, but of a great increase of comfort and cleanliness.

This measure has, also, in part obviated the injustice done to authors and publishers, by compelling them to pay a duty on the paper used in printing books previously to their publication; and, consequently, before it can be known whether the books will sell. When they do not sell, the tax has obviously to be paid out of the capital of the authors or publishers, and the loss arising from an unsuccessful publishing speculation is increased by its amount. — (See *antè*, p. 160.) It is true that every duty on paper, how limited soever, operates in this way, and is, therefore, objectionable on principle; but the hardship inflicted on an unsuccessful author by the existing paper duty being only half its former amount, is not nearly so much felt.

As respects revenue, too, the measure has been successful. In 1835, the nett produce of the duties on paper, in the U. Kingdom, amounted to 796,305*l*. Of this sum, the duty on first class paper produced about 650,000*l*.; and as the rate of charge on it has been reduced a half, it follows, had there been no increased production, that the duty should now (1843), amount to about 471,000*l*. (viz. 325,000*l*. half the duty on first class paper, plus 146,000*l*. the duty on second paper, pasteboard, &c.) But, in fact, the paper duty produced in 1841, a nett revenue of 587,380*l*., being an increase of nearly 25 per cent. This, however, gives a very imperfect view of the progress of the manufacture; for, owing to the premium (for so it may be called) which the new postage regulations give on the use of thin and light paper, the increase in its production has been incomparably greater than we might infer from the increase of weight. Indeed, the probability is, that but for the change in the postage system, the revenue would now (1843) have lost little, if anything, by the reduction of the paper duties.

An Account exhibiting the Quantities of the different Sorts of Paper charged with Duties, the Rates of Duty, and the Produce of the Duties, &c., during each of the Three Years preceding the Reduction of the Duties in 1836, and the Six subsequent Years. — (From *Parl. Papers*, No. 295. Sess. 1842, and No. 43. Sess. 1843.)

**PARCEL**, a term indifferently applied to small packages of wares, and to large lots of goods. In this latter sense, 20 hogsheds of sugar or more, if bought at one price, or in a single lot, are denominated "a parcel of sugar."

**PARCELS, BILL OF**, an account of the items composing a parcel.

**PARCHMENT and VELLUM.** The former consists of the skins of sheep and goats, and the latter of those of calves, prepared in such a manner as to render them suitable for being written upon, for covering books, and other purposes. The consumption of these articles is very considerable. In this and most other countries, it is customary to use them instead of paper in the drawing up of a great variety of deeds and other legal instruments. They are also extensively used, especially in Italy, in the binding of books. The finest copies of the magnificent classics which issued from the Dutch presses, in the 17th century and the early part of the 18th, were all bound in vellum.

Parchment is coarser than vellum, and not so well adapted for writing upon. The qualities of both articles differ very widely; so much so that the best parchment is preferable to inferior or even middling vellum. The goodness of each depends partly on the quality of the skins of which they are made, and partly, and indeed in a very high degree, on the care and skill with which they are manufactured.

*Historical Notice.* — The history of these articles is involved in some obscurity. Varro and Pliny (*Hist. Nat. lib. xiii. cap. 11.*), who have been generally followed, state that they were originally manufactured at Pergamus, in Asia Minor, the capital city of Eumenes II., one of Alexander's successors\*, during the reign of that prince; and that parchment owes to this circumstance its classical name of *charta Pergamena*. But there seems to be little if any foundation for this statement. We have seen, in the preceding article on paper, that Herodotus, who flourished rather more than a century before Alexander the Great, states distinctly, that previously to his era, when paper (*charta Egyptiaca*) was scarce, the Ionians were accustomed to write on the skins of sheep and goats, and that that practice was then followed (*viz. in his time*) by several barbarous nations. — (*Lib. v. cap. 58.*) And it is all but certain, seeing that the practice of writing on skins had been in use for at least 2½ centuries, and probably much more, previously to the era of Eumenes, that their preparation would, in the course of that lengthened period, be so much improved as to render them little different from parchment. It is probable, indeed, that their manufacture may have been improved in Pergamus; but we incline to think that parchment owes its name rather to the extensive demand for it in that city, in consequence of Eumenes having amassed a large and valuable library, than to any thing else. He was, in fact, compelled to use parchment and vellum in the copying of books, as his contemporary Ptolemy Philadelphus had prohibited the exportation of paper. — (*Plin. ubi suprâ.*)

The scarcity of parchment during the middle ages, and in antecedent times, led to the practice of obliterating the writing on old parchments, by rubbing them with pumice stone, immersing them in boiling water, and such like devices; and there can be no manner of doubt that the prevalence of this practice has been most injurious to literature, and that it has most probably occasioned the total destruction of some of the noblest *chefs-d'œuvre* of antiquity. In the middle ages these were erased that room might be made for some worthless treatise on scholastic theology or logic! Sometimes, however, it happens that the ancient writing is not so much obliterated, but that it may still be read; and to that circumstance the recent discovery of a portion of Cicero's treatise *De Republica* is to be ascribed. It had been effaced to make room for a commentary of St. Augustine on the Psalms. — (See the preface of May, the ingenious discoverer of this lost treatise.)

Parchments that have been erased in this way are called *Palimpsests* (from *παλιν*, again, and *ψαω*, to efface or clean), or repeatedly cleaned parchments; because they have been repeatedly cleaned, renewed, or prepared for writing upon. If the learned world is ever to be gratified by the recovery of the lost comedies of Menander, or the lost books of Polybius, Livy, and Tacitus, it will most probably be by finding them under some homely or such like trash. — (*Nouveau Traité de Diplomatie*, i. 482, &c.; *Dom de Vaines*, ii. 177, &c.)

**PARTIAL LOSS.** See **INSURANCE (MARINE)**.

**PARTNERSHIP**, the association of two or more individuals for carrying on some business or undertaking in common; each deriving a certain share of the profits, and bearing a corresponding share of the loss arising therefrom.

The term partnership is usually applied to those smaller associations in which the partners personally conduct their joint affairs: the term company being applied to those great associations conducted by directors and servants appointed by the body of the

\* He was a successor of, but must not be confounded with, Eumenes, the secretary and general of the Conqueror.

partners to act for them; the latter having no direct concern in the management of the affairs of the company. — (See COMPANIES.)

The advantages of partnership are obvious. Many businesses could not be successfully carried on without a larger command of capital than usually belongs to an individual; and most of them require the combination of various species of talent. An individual may have capital sufficient to undertake a particular business; but he may not be thoroughly versed in any of its details, or he may be familiar with certain parts of it and not with others; so that it might be for his advantage to assume one or more individuals as his partners, supposing them to be without capital, provided they possessed the skill and other qualifications required in prosecuting the business. Associations of this sort enable capital and talent to derive all the assistance that each is capable of lending to the other. And as the gains of each partner usually consist of a certain *proportion* of the total profits made by the company, each has the most powerful motive to exert himself for the benefit of the concern. It is not, indeed, to be denied, that associations of this sort are occasionally productive of mischievous consequences. The public interest requires that the whole partners in a firm should be bound by the acts of any one of their number; so that the folly or fraud of a single partner may entail very serious consequences upon those associated with him. Generally, however, this is not an evil of frequent occurrence; and there can be no question that, both in a private and public point of view, partnerships are highly beneficial.

To enter into any thing like a full discussion of the law of partnership would very far exceed our limits. We shall, therefore, merely state a few of those leading principles with respect to it, as to which it is of importance that mercantile men, and the public generally, should be well acquainted.

*Formation of Partnerships.* — The mere consent of the partners, fixed and certified by acts or contracts, is quite sufficient to constitute a private copartnership; so that if two or more merchants, or other persons, join together in trade, or in any sort of business, with a mutual, though it may be unequal, participation in the profit and loss of the concern, they are in every respect to be considered as partners. No particular form of words or proceeding is necessary to constitute a partnership. It may be entered into either by an express written agreement, or by a merely verbal one. The former ought in almost all cases to be preferred. The contract of copartnership should state the parties to it, the business to be carried on, the space of time the partnership is to continue, the capital each is to bring into the business, the proportion in which the profit and loss are to be divided, the manner in which the business is to be conducted, the mode agreed upon for settling accounts at the dissolution of the partnership, together with the special covenants adapted to the circumstances of each particular case.

To constitute a partnership, there must be a participation in uncertain profits and losses: and the true criterion to determine, when money is advanced to a trader, whether the individual making the advance is to be looked upon as a partner or not, is to ascertain whether the *premium or profit be certain and defined, or casual, indefinite, and depending upon the accidents of trade*. In the former case he is a lender merely; in the latter he is a partner. The mere participation in the profits of any business or adventure, without a participation in the losses, constitutes a partnership, so far as to render the individual so participating liable to third parties for the engagements of the concern, though as between the parties themselves it may be no partnership. Thus, if a clerk or other servant stipulate for a share of the profits of any business as a *reward for his labour*, he becomes responsible to third parties as a partner, and no private arrangement can cancel his liability.

If an individual, by his own act or inadvertence, allow himself to *appear to the world as a partner*, he is precluded from disputing the fact, even though he have no interest in the profits. A partner who withdraws from a firm is liable on account of the remaining partners continuing his name in the firm, though without his consent, unless he take the necessary precautions — (see *post*) — to show that he has ceased to belong to it.

If there be no express stipulation as to the management of partnership property, the majority decide as to the disposition and management of the joint affairs of the firm; or, if there be but two parties in a firm, one may manage the concern as he thinks fit, provided it be within the rules of good faith, and warranted by the circumstances of the case. The general duty of a partner is to keep in view, at all times, and in all transactions, the interest and welfare of the partnership, by acting honestly and uprightly, and as a prudent man would conduct his own affairs.

*Liability of Partners as to third Parties.* — It may be laid down as a general rule, that partners, whether actual, ostensible, or dormant, are bound by the act of their partner, made in the course of and with reference to the partnership business, and in the regular course of dealing by the firm; and though the general rule of law be, that no one is liable upon any contract, except such as are privy to it, yet this is not contravened by the liability of partners, as they are supposed virtually present at and sanctioning the pro-

ceedings they singly enter into in the course of trade, or as being severally vested with a power enabling them to act at once as principals and as the authorised agents of their copartners. It is for the advantage of partners that they are thus held liable; for the credit of their firm is in consequence greatly enhanced, and facility is given to all their dealings, even when they reside in different parts of the country, or of the world. A due regard to the interest of strangers is at the same time observed; for where an individual deals with one of several partners, he relies upon the credit of the entire firm, and therefore ought to have his remedy against all the individuals who compose it.

Unless, however, the act of one partner relate to and be connected with the partnership trade, and in the *course of dealing by the firm*, such acting partner only will be bound; for it is only by acting in the course of their particular trade or line of business that an implied authority is delegated by partners to each other; and it is only in such transactions that third parties have a right to rely upon the partnership funds. To bind a partnership, credit must be given to the firm itself, and not to one merely of its partners. One of them may even, in furtherance of the objects of the firm, enter into a contract with some third party; but if such contract be made *exclusively and solely upon the credit of the individual partner*, it will only bind him, and not the firm. The presumption of the law, however, always is, that a contract with one of the partners in reference to the business of the firm has been entered into upon the credit of the whole; and this presumption is not to be rebutted, except by very clear evidence. One partner cannot, as such, except in bankruptcy, bind another by deed.

The authority of a partner is revocable; and it is now fully established that a *disclaimer* of the authority of the partners in any particular transaction will preclude him from binding his copartners. Even during the subsistence of the partnership, one partner may to a certain degree limit his responsibility; and if there be any particular speculation or bargain proposed, which he disapproves of, he may, by giving distinct notice to those with whom his partners are about to contract that he will not be concerned in it, relieve himself from all consequences. Such notice would rebut his *primâ facie* liability. The partnership would be suspended *quoad* this transaction. Thus, if a partner draw, accept, or indorse a bill or note, he will, in all ordinary cases, thereby render the firm liable. But, to use the words of Lord Ellenborough, "it is not essential to a partnership that every partner should have such power; they may stipulate among themselves that it shall not be done; and if a third party, *having notice of this*, will take such security from one of the partners, he shall not sue the others upon it, in breach of such stipulation, nor in defiance of notice previously given to him by one of them, that he will not be liable for any bill or note signed by the others."—(*Galway v. Matthew*, 10 East, 264.); and so in other cases.

However small the share a partner may have in a concern, he is liable for the *whole* of the debts contracted by the firm; and must seek his remedy in a rateable contribution against his partners. Should one party enter into a smuggling or other illegal transaction on the partnership account, the other partners are liable to the duties and the penalty; and the Crown may proceed against the real delinquent alone, or against all the partners. A bookseller, or newspaper proprietor, is answerable for the acts of his agent or copartner, not only civilly, but also *criminally*.

*Dissolution of Partnerships.*—A partnership may be dissolved by the effluxion or expiration of the time during which it was originally agreed that it should continue. When a copartnership is formed for a single dealing or transaction, the moment that is completed, it is at an end. Partnerships may also be dissolved by death, agreement, bankruptcy, outlawry, &c. A court of equity will interfere to dissolve a partnership, in cases where a partner so misconducts himself as to be injurious to the firm, or to defeat the object for which the partnership was formed; or when a partner becomes insane, or is in such a state of mind as to render him permanently incapable of transacting the peculiar business of the firm; or where a partnership is formed for an impracticable purpose. Indeed, in all cases, where even a partnership may be dissolved without the interference of a court of equity, it may be most prudent, if the dissolution be opposed by one of the partners, to file a bill, praying a dissolution and account, and an injunction against using the partnership name.

When a partnership is dissolved by agreement, or one of the partners withdraws from it, public notice of the dissolution must be given in the *London Gazette*; and a *specific intimation of the circumstance must be sent to ALL individuals accustomed to deal with the firm*. Where such intimation has not been sent, the individual withdrawing from the firm may be made liable to third parties after he has ceased to have any thing to do with it. A dormant partner, whose name has never been announced, may withdraw from a firm without making the dissolution of partnership publicly known.

When the joint debts of the firm are paid, and the property duly distributed among the partners, the dissolution may be said, in a general sense, to be accomplished. If any one of the firm be guilty of a breach of duty in misapplying the effects before the

concern is finally wound up, the proper course is to apply to the Court of Chancery to appoint a manager.

Within a reasonable time after the death of one partner, the survivors must account to the representatives of the deceased; and if not willing to do so, a court of equity will compel them. In taking partnership accounts at the death of a partner, they must commence with the last stated account; or, if there be none such, with the commencement of the partnership; and they must end with the state of the stock at the time of the partner's death, and the proceeds thereof until it be got in.

No notice is necessary to third parties of the death of a partner; the partnership is dissolved, and all liabilities for subsequent acts cease. The surviving parties are to be sued alone for the partnership liabilities and obligations, for which they are liable to the full extent. But they are not liable for the separate debts of the deceased partner, unless, after payment of all the joint debts, they have a surplus of the partnership effects in their hands.

Upon a dissolution by death, if the joint effects be insufficient to pay the partnership debts, the separate estate of the deceased partner, if he have any, is liable for the deficiency.

The statements now made will, probably, be sufficient to give our readers a tolerably distinct notion of the formation of partnerships; and of the more important rights, duties, liabilities, &c. arising out of such institutions. Those who wish to go deeper into the subject, may consult the treatises of *Watson and Montague on the Law of Partnership*; *Chitty's Commercial Law*, vol. iii. pp. 225—269.; *Woolrych on Commercial Law*, pp. 298—317., &c.

PASSENGERS, in commercial navigation, are individuals conveyed for hire from one place to another on board ship. Passage ships are those peculiarly appropriated to the conveyance of passengers.

Passage ships are generally placed under certain regulations; and the extent to which emigration is now carried renders it of the utmost importance that these regulations should be carefully compiled.

<b>Total number of emigrants</b> - - - - -	74,683	13,108	40,555	128,344

It is seen from this statement, that in 1842 no fewer than 128,344 voluntary emigrants left the U. Kingdom; and such being the extent to which emigration is carried, the propriety, or rather necessity, of enacting some general regulations, with respect to the conveyance of emigrants to their destination, must be obvious to every one at all acquainted with the subject. The greater number of emigrants are in humble life: few among them know any thing of ships, or of the precautions necessary to insure a safe and comfortable voyage; they are also, for the most part, poor, and exceedingly anxious to economise, so that they seldom hesitate to embark in any ship, however unfit for the conveyance of passengers, or inadequately furnished with provisions, if it be cheap. Unprincipled masters and owners have not been slow to take advantage of this; and in order to prevent the frauds that would otherwise be practised on the unwary, it has been found indispensable to lay down some general regulations as to the number of passengers to be taken on board ships as compared with their tonnage, the quantity of water and provisions as compared with the passengers, &c. But this is no very easy task. If the limitations be too strict, that is, if comparatively few passengers may be carried, or if the stock of provisions to be put on board be either unnecessarily large or expensive, the cost of emigration is proportionally enhanced; and an artificial and serious impediment is thrown in the way of what should be made as easy as possible, consistent with security. But, on the other hand, if too many passengers be allowed, their health is liable to suffer; and should the supply of provisions be inadequate, or the quality bad, the most serious consequences may ensue. The act 6 G. 4. c. 116. obliged too great a quantity of expensive provisions to be put on board, and was in consequence objected to by emigrants as well as shippers. The act 9 G. 4. c. 21. avoided this error; but it was defective, inasmuch as it made no provision with respect to the sufficiency of the ship, the having a surgeon or other properly qualified medical person on board ships carrying a certain number of passengers, and in other particulars. These deficiencies were in part supplied by the act 5 & 6 W. 4. c. 53., and the acts 3 & 4 Vic. c. 21. and 1 & 2 Vic. 113. But the provisions in these acts having been still in several respects inadequate, the statute 5 & 6 Vic. c. 107. has repealed them, and substituted the following regulations in their stead.

The 1st clause repeals the acts 5 & 6 Will. 4. c. 53.; 3 & 4 Vict. c. 21.; and 1 & 2 Vic. c. 113. In part. *Limitation of Numbers of Passengers according to Tonnage and Space.*—No ship carrying passengers on any voyage from any port or place in the U. Kingdom, or in the islands of Guernsey, Jersey, Alderney, Sark, or Man, to or for any port or place out of Europe, and within the Mediterranean Sea, shall proceed on her voyage with or shall carry more persons on board than in the proportion of 3 persons to every 5 tons of the registered burden of such ship, the master and crew being included in and forming part of such prescribed number, and that no such ship shall, whatever be the tonnage thereof, proceed on her voyage with or carry more passengers on board than in the following proportion to the space occupied by them and appropriated for their use, and unoccupied by stores not being the personal luggage of passengers; (that is to say,) on the lower deck or platform 1 passenger for every 10 clear superficial feet, if such ship is not to pass within the tropics during such voyage, but if such ship is to pass within the tropics during such voyage, then 1 passenger for every 12 clear superficial feet, if such voyage is computed in manner after mentioned not to exceed 12 weeks, and 1 passenger for every 15 such clear superficial feet if such voyage is so computed to exceed 12 weeks; and under the poop and on the orlop deck, if any, 1 passenger for every 30 superficial feet in all cases; and that if any ship carrying passengers upon any such voyage as aforesaid shall carry any passengers beyond these proportions, the master of such ship shall, for or in respect of every passenger constituting such excess, be liable, on conviction, to a penalty not exceeding 3*l.*—§ 2.

*Construction and Thickness of Lower Deck.*—No ship shall carry passengers on any such voyage as aforesaid, unless she have lower or hold beams forming part of the permanent structure of the vessel, and also a lower deck or platform, of which the under surface shall be not lower than 3 inches above the bottom of the lower beams, and properly and substantially secured to the same, nor unless such lower deck or platform shall be of not less than 1½ inch in thickness.—§ 3.

*Height between Decks.*—No ship shall carry any passengers upon any such voyage as aforesaid, unless she be of the height of 6 feet at the least between the upper deck and the lower deck or platform before mentioned, nor shall passengers on the orlop deck, if any, unless the height between such orlop deck and the deck immediately above the same be 6 feet at least.—§ 4.

*Sleeping Berths.*—No ship carrying passengers on any voyage as aforesaid shall have more than 2 tiers of berths; and in no such ship shall the interval between the floor of the berths and the deck or platform beneath them be less than 6 inches; and further, that the berths shall be securely constructed, and that their dimensions shall not be less than 6 feet in length, and 18 inches in width, for each passenger.—§ 5.

*Quantities of Provisions and Water to each Passenger.*—On board every ship carrying passengers as aforesaid, there shall be issued to the passengers daily a supply of water at the rate of at least 3 quarts for each passenger per day; and there shall also be issued at convenient times, not less than twice a week, a supply of provisions after the rate of 7 lbs. of bread, flour, oatmeal, or rice per week, provided that at least of the supply shall consist of bread or biscuit, and that potatoes may be employed to the extent of the remaining half of the supply; 5 lbs. of potatoes being computed as equal to 1 lb. of the other articles above enumerated; and such issues as aforesaid shall be made throughout the whole voyage, including the time of detention, if any, at any port or place before the end of such voyage; and further, no ship proceeding on any voyage as aforesaid shall be cleared out until there be laden and on board such quantity of pure water, and of good and wholesome provisions of the requisite kind, as shall be sufficient to allow of the above issues during the period assigned to such voyage under the provisions of this act.—§ 6.

*Further Regulations as to Water.*—In such ships the water to be laden on board as before required shall be carried in tanks or sweet casks, and none of such casks shall exceed three hundred gallons in capacity; and further, when any ship shall be destined to call at a port or place in the course of her voyage for the purpose of filling up her water, a supply of water at the rate before mentioned for every week of the computed voyage to such port or place of calling shall be deemed to be a compliance with the provisions of this act, subject to the following conditions:—

1. That the government emigration agent at ports where there is one, and the collector or comptroller

of customs at ports where there is no such agent, signify his approval, in writing, and that the same be carried amongst the papers of the ship, to be delivered to the collector of customs or her Majesty's consul, on reaching her final destination.

2. That an engagement to call at such port or place be inserted in the bond which is herein-after required to be given to the crown by the owner or charterer and master.

3. That if the computed length of voyage to such port or place be not declared in this act, it shall be competent to the government emigration agent, or the collector or comptroller of customs, as the case may be, to fix the same in each case; and

4. That the ship shall have on board, at the time of clearing out, tanks or water casks sufficient for stowing the quantity of water required for the longest portion of the whole voyage. — § 7.

*Computed Length of different Voyages.* — The number of weeks deemed to be necessary for the voyage of any such ship, according to her destination, shall be determined by the following rule of computation; viz. :—

For a voyage to North America, except the west coast thereof, 10 weeks.

For a voyage to the West Indies, including under that term the Bahama Islands and British Guiana, 10 weeks.

For a voyage to any part of the continent of Central or South America, except the west coast thereof and except British Guiana, 12 weeks.

For a voyage to the west coast of Africa, 12 weeks.

For a voyage to the Cape of Good Hope or the Falkland Islands, 15 weeks.

For a voyage to the Mauritius, 18 weeks.

For a voyage to Western Australia, 20 weeks.

For a voyage to any other of the Australian colonies, 22 weeks.

For a voyage to New Zealand, 24 weeks. — § 8.

*How Children are to be computed.* — For the purposes of this act it shall in all cases be computed that 2 children, each being under the age of 14 years, shall be equal to 1 passenger, and that children under the age of 1 year shall not be included in the computation of the number of passengers. — § 9.

*Government Emigration Agents.* — Before any such ship shall be cleared out for the voyage, the government emigration agent, at ports where there is such an officer, or in the absence of such agent, and in ports where there is no such agent, the collector or comptroller of customs, shall survey or make some competent person survey the provisions and water required by this act for the consumption of the passengers, and shall ascertain that the same are in a sweet and good condition, and shall also ascertain that over and above the same there is on board an ample supply of water and stores for the victualling of the crew of the ship and other persons (if any) on board. — § 10.

Clause 11. directs that the same officers do attend generally to enforcement of the act.

*Seaworthiness of the Ship may be ascertained by Survey.* — If doubts shall arise whether any ship about to proceed with passengers as aforesaid is seaworthy, so as to be fit for her intended voyage, and such doubts shall not be removed to the satisfaction of the collector and comptroller of the customs at the port from which such vessel is to be cleared out, or in case there shall be a government emigration agent at such port, then to the satisfaction of such emigration agent, it shall be lawful for such collector and comptroller, or for such emigration agent (as the case may be), at any time to cause such ship to be surveyed by 3 competent persons, and if these persons report that such ship is not in their opinion seaworthy with reference to such voyage, such ship shall not be cleared out, unless the contents of such report be disproved to the satisfaction of the commissioners of the customs, or of the colonial land and emigration commissioners in those cases in which the report shall have been made at the instance of a government emigration agent, or until such ship shall have been rendered seaworthy. — § 12.

*Sufficient Boats to be carried.* — No ship shall carry any passengers on any such voyage as aforesaid unless she be provided with good sound boats of suitable size, and properly supplied with all requisites for their use in the following proportion to the registered tonnage of such ship: viz. :—

Two boats, if the tonnage of such ship be 150 tons and upwards, but under 250 tons :

Three boats, if the tonnage of such ship be 250 tons and upwards :

Four boats, if the tonnage of such ship be 500 tons and upwards, and the number of passengers exceed 200 :

Nor unless one of such boats be a long boat of a size duly proportioned to the tonnage of the ship. — § 13.

*Copies of the Act to be kept on board, and produced if demanded.* — Two copies of this act shall be kept on board every ship carrying passengers as aforesaid, and for this purpose 2 copies of the same, provided and issued by the authority of the commissioners of the customs, shall be delivered to the master, on demand, by the collector or comptroller of the customs at the port and time of clearance of the ship; and 1 of such copies shall, upon request made at reasonable times to the master of the ship, be produced to any passenger for his perusal. — § 14.

*Regulations as to Medical Practitioner and Medicines.* — No ship carrying passengers on any voyage as aforesaid to any port or place as aforesaid, except to some port or place in North America, shall, in case the number of such passengers amount to or exceed 100, or in case the estimated length of the voyage, computed as before mentioned, exceed 12 weeks, and the number of such passengers shall amount to or exceed 50, clear out for such voyage from any port in the U. Kingdom or in the before mentioned islands, unless there be rated upon the ship's company, and be actually serving on board such ship, some person duly authorised by law to practise in this kingdom as a physician, surgeon, or apothecary, and that no such ship shall put to sea or proceed on such voyage unless such medical practitioner be therein, and shall *bonâ fide* proceed on such voyage, taking with him a medicine chest, and a proper supply of medicines, instruments, and other things suitable to the intended voyage; and no ship carrying passengers on any voyage from any port or place in the U. Kingdom to or for any port or place out of Europe, not being within the Mediterranean Sea, shall clear out for any such voyage unless there be actually laden and on board such ship medicines, and printed or written directions for the use of the same, and other things necessary for the medical treatment of the passengers on board during such intended voyage, and available for that purpose, nor unless such medicines and other things be adequate in amount and kind to the probable exigencies of any such voyage; and, together with such medicines and other things, shall also be put on board every such ship previously to her clearing out for any such voyage as aforesaid, a certificate under the hands of any 1 or more such medical practitioner, qualified as aforesaid, who shall not have been the seller of the medicines and other things, or any part of them, to the effect that the same have been inspected by him, and are in his judgment adequate to meet any such probable exigencies as aforesaid, and further, that he has no pecuniary interest in the supply of the same. — § 15.

*Sale of Spirits to Passengers prohibited.* — In any ship carrying passengers upon any such voyage as aforesaid no spirits or strong waters shall be sold to any passenger during the voyage; and if the master of the ship shall, directly or indirectly, sell or cause to be sold any spirits or strong waters to any passenger during the voyage, he shall be liable to a penalty not exceeding 100*l.* — § 16.

*List of Passengers to be delivered before clearing.* — The master of every ship carrying passengers on any such voyage as aforesaid shall, before clearing out his ship for such voyage from any port or place in the U. Kingdom, sign and deliver, in duplicate, to the collector or to such officer of her Majesty's customs at such port or place as may clear the ship, a list, made out according to the form contained in schedule (A) hereto annexed, of all and every the passengers on board of such ship, specifying, as accurately as may be, all the particulars required in said form, and such collector or other officer shall thereupon countersign and return to the said master one of such duplicate lists; and the said master shall exhibit such duplicate list, with the additions, if any, to be made thereto, as herein directed, to the collector or other chief officer of her Majesty's customs at any port or place in her Majesty's possessions, or to her

Majesty's consul at any foreign port at which the said passengers or any of them shall be landed, and shall deposit the same with such collector or chief officer of customs, or such consul, as the case may be, at his final port of discharge. — § 17.

*Lists of additional Passengers after clearing out.* — In case any vessel shall have cleared out as aforesaid with a number of passengers less than the number she could lawfully carry under the provisions of this act, or in case any passenger or passengers named in the list afore mentioned, shall not proceed on the voyage, and there shall afterwards be taken on board any additional passenger or passengers, the master shall in every such case add to the first list so countersigned and returned to him as aforesaid, and in the same manner as is required in such first list, the names and particulars of such additional passenger or passengers; and shall moreover prepare, in the form aforesaid, a separate list of such additional passenger or passengers, and deliver the same, together with the said first list so added to as aforesaid, both being duly signed by him, to the collector or other officer of customs at the port or place where such additional passenger or passengers may have embarked, and thereupon such collector or other officer of customs shall countersign the additions so made to such first list, and shall return the same to the master, and retain the separate additional list, and so on in like manner whenever any additional passenger or passengers may be taken on board: Provided always, that in the event of there being no collector or other officer of customs stationed at any port or place where such additional passenger or passengers may be taken on board, then such separate list, and also the said first list, with the additions so to be made to it as aforesaid, shall, in case the vessel shall subsequently touch at any port or place at which there shall be stationed any officer of her Majesty's customs, be delivered by the master to such officer of customs, and the same respectively shall be dealt with in all respects by such officer of customs as it would have been dealt with by the collector or other officer of customs as aforesaid had there been one at the port or place where such additional passenger or passengers embarked. — § 18.

*Written Receipts to be given in respect of Passengers for N. America.* — If any owner, charterer, or master of a ship, or any passage broker, agent, or other person, receive any money from any person, for or in respect of the conveyance of any person as a passenger on any voyage as aforesaid, to any port or place in North America, the person so receiving such money shall give a written acknowledgment for the same to the party from whom the same shall have been received, in the form contained in the schedule (B) hereto annexed, and in default thereof shall be liable to a penalty not exceeding 10*l*. in respect of each such passenger, and if he shall be so licensed as after mentioned, his licence shall be forfeited, in case the justices before whom the penalty shall be sued for shall declare the forfeiture thereof. — § 19.

*Licences to be taken out by Dealers and Brokers in respect of Passages to North America.* — From and after the commencement of this act no person, not being the owner or master of the ship in which such passages as after mentioned shall be taken, shall carry on the business of a passage broker or passage dealer in respect of passages from the U. Kingdom to any port or place in North America, or shall sell or let, to any person, any such passage, unless he have previously taken out a licence to carry on the business of a passage broker or passage dealer as after mentioned, and unless such licence continue in force; and if any person shall carry on such business, or sell or let any such passage contrary to this enactment, every person so offending shall be liable to a penalty not exceeding 10*l*. in respect of every such offence, and shall further be subject to all the same penalties and liabilities to which licensed passage brokers and passage dealers are subject under this act; and that it shall be lawful for any person desiring to carry on the business of a passage broker or dealer, in respect of such passages to North America, to make application to the justices assembled in petty or quarter sessions held for the district or place in which such person shall reside, for a licence to carry on such business, and such justices so assembled are authorised to grant such licence to the party making application for the same, such licence to be made out according to the form contained in the schedule (C) hereunto annexed, and to continue in force for the period named in such form, unless sooner forfeited in manner after mentioned; and where any such licence shall be granted, such justices shall cause notice thereof to be forthwith transmitted by post to the colonial land and emigration commissioners at their office in London: provided that no such licence shall be granted unless the party applying for the same shall show to the satisfaction of the justices that he has given notice to the colonial land and emigration commissioners of his intention to apply for the same 21 clear days at least before such application, such notice to be transmitted by post to the office of the said colonial land and emigration commissioners, and to be in the form contained in the schedule (D) hereto annexed. — § 20.

*Penalties for acting without written Authority, &c.* — If any licensed broker or dealer shall receive money for or on account of the passage of any passenger for any voyage to any port or place in North America, without having a written authority to act as agent for the party on whose behalf the contract for such passage purports to be made, or shall by any fraud or false pretence whatsoever induce any person to purchase, hire, or engage a passage in any ship for any such voyage, every such broker or dealer shall be liable, upon conviction, in respect of every such offence, to a penalty not exceeding 10*l*.; and it shall be lawful for the justices before whom the penalty shall be sued for to declare, if they think fit, the licence of such broker or dealer forfeited, and the same shall upon such declaration be forfeited accordingly: provided, that in any case in which any justices shall declare the licence of any passage broker or passage dealer forfeited, such justices shall cause notice of such forfeiture, in the form contained in the schedule (E) hereunto annexed, to be forthwith transmitted by post to the colonial land and emigration commissioners, at their office in London. — § 21.

*Return of Passage Money and Compensation to Passengers, in certain Cases.* — If any passenger or person on his behalf shall have entered into a contract for a passage or passages for such passenger, or for him and his family, in any ship, from any port in the U. Kingdom, to or for any port or place out of Europe, and not being in the Mediterranean Sea, and if such passenger, or such passenger and his family (as the case may be), shall be at the place of embarkation at the time appointed for that purpose in such contract, and such passenger shall apply for such passage or passages, and shall, on demand, pay or tender such part of the passage money not already paid as shall be payable under such contract previously to embarkation, and if, owing to the previous departure of the ship in which such passage or passages shall have been engaged, or the neglect, refusal, or other default of the owner, charterer, or master thereof, or of the party with whom such passage or passages shall have been contracted for, such passenger shall not obtain such passage or passages, or shall not within a reasonable time obtain a passage or passages by some other equally eligible vessel to the same port or place, and in the meantime be paid subsistence money, or be provided with lodging and maintenance, as after mentioned, such passenger shall be entitled to recover, in manner herein provided, all monies which he shall have paid for such passage or passages, from the party to whom he shall have paid the same, or from the owner or charterer of the ship for whom such party shall be the agent, and also such further sum not exceeding 10*l*. in respect of each such passage as shall, in the opinion of the justices who shall adjudicate on the complaint, be a reasonable compensation for the loss or inconvenience occasioned to such passenger or his family by the loss of such passage or passages. — § 22.

*Subsistence in case of Detention.* — If any ship shall not actually put to sea, and proceed upon any such intended voyage as aforesaid, on the day for that purpose appointed in and by any contract made by the owner, master, or charterer of such ship, or their agent, with any passenger who shall on that day be on board the same, or ready to proceed on such intended voyage, then and in every such case the master of such ship shall victual each and every such passenger in like manner as if the voyage had commenced; and if the ship does not put to sea after the interval of 2 clear working days from the day appointed for sailing, shall be liable to pay to each and every such passenger, instead of victualling him, subsistence money, at the rate of 1*s*. for each day's delay, until the actual clearing out and final departure of such ship on such voyage; provided that such subsistence money shall not be payable in lieu of victualling

in respect of any unavoidable detention by wind or weather, and also shall not be payable to any passenger who shall, with his own consent, be suitably lodged and maintained on shore at the expense of the parties who are bound to provide him with a passage. — § 23.

Clause 34. enacts that passengers shall not be landed without their consent at any other place than that contracted for.

Clause 25. enacts that passengers are to be maintained for 48 hours on board ship after their arrival, unless the ship shall quit any such port or place within the said period of 48 hours.

*Facilities to be given for Inspection of Ships, &c.* — The master of every ship carrying passengers shall afford to the government agent for emigration, or to the proper officer of customs, at any port or place in her Majesty's dominions from which such ship shall sail, or at which such ship shall touch during the voyage, or at which such ship shall arrive at the end of such voyage, and to her Majesty's consul at any port or place at which such ship shall arrive, being in a foreign country, every facility for the inspection of the ship, and for communication with the passengers, and for ascertaining that the act has been duly observed. — § 26.

*Penalties.* — If in any ship carrying passengers on any voyage as aforesaid, such lower deck or platform of such thickness as before directed shall not be laid and continued throughout the whole duration of any such voyage in such manner as is before required; or if the height between such lower deck or platform and the upper deck shall be less than six feet; or if there shall be more than 2 tiers of berths; or if such berths shall not be securely constructed, or shall not be of the dimensions before required; or if there shall not be throughout the whole duration of any such voyage such an interval as is before prescribed between the deck and the floor of the berths; or if any such ship shall clear out and put to sea not having on board tanks or sweet casks of such size and number as aforesaid, and such water and provisions as aforesaid, for the use and consumption of the said passengers, of the kind and to the amount and in the proportion before required; or if such water and provisions be not issued in manner before required; or if such ship be not provided with good boats according to the rates aforesaid; or if copies of this act have not been kept on board and produced on demand as before required; or if there be not on board any such vessel such medical practitioner as aforesaid, or such medicines and other things necessary to the medical treatment of the passengers as is before required; or if any such ship be cleared out before such list of passengers as before mentioned have been delivered in manner and form aforesaid to such officer as aforesaid; or if the additions to such list and such additional separate list or lists as aforesaid be not made in the cases aforesaid, and delivered in the cases in which they are herein required to be delivered; or if any such list, or the additions to the same, be wilfully false; or if any such list, including the additions, if any, to the same, be not exhibited to or deposited with the proper officer at any port or place at which it is before required to be exhibited or deposited; or if any passenger shall, without his previous consent, be put on shore at any place other than that at which the master had contracted to land such passenger; or if any passenger be not allowed to continue on board such ship in manner before provided; or if every such facility for inspection be not afforded as is before required, the master of any such ship shall for and in respect of each and every such offence be liable, on summary conviction, to the payment of a fine not exceeding 50*l.* sterling. — § 27.

*The Right of Action of Passengers not taken away or abridged.* — Nothing herein contained shall take away or abridge any right of suit or action which may accrue to any passenger in any ship, or to any other person, in respect of the breach or nonperformance of any contract made or entered into between or on behalf of any such passenger or other person, and the master, owner or owners, of any such ship.

Clause 29. directs the steps to be taken for the recovery of penalties.

Clause 30. enacts that *visâ voce* evidence may be given of a party being a government agent or officer.

Clause 31. enacts that passengers suing are not incompetent witnesses.

Clause 32. enacts that distress shall not be unlawful for informality.

Clause 33. enacts that no plaintiff shall recover in any action against any person for any thing done in pursuance of this act if tender of sufficient amends have been made before such action was brought, or if, after the action was brought, a sufficient sum of money shall have been paid into court, with costs, by or on behalf of the defendant.

Clause 34. enacts that 31 days' notice of action shall be given.

*Owners or Charterers and Masters of Vessels to enter into Bond for the Performance of the Regulations prescribed by this Act.* — Before any ship carrying passengers, if the number of such passengers shall exceed 50, shall clear out for any voyage as aforesaid from any port or place in the U. Kingdom, the owner or charterer, or, in the event of his absence, one good and sufficient person on his behalf, to be approved by the collector or chief officer of customs at such port, and the master of the said ship, shall enter into a joint and several bond to her Majesty, her heirs and successors, in the sum of 1000*l.*, the condition of which bond shall be that the said ship is seaworthy, and that all and every the rules and regulations made and prescribed by this act for the carriage of passengers shall be well and truly performed before and during such intended voyage, and that all penalties, fines, and forfeitures which the master of such ship may be sentenced or adjudged to pay for or in respect of the breach or nonperformance, before or during such voyage, of any such rules and regulations, shall be well and truly paid; provided, that such bond shall be without stamps; and that no such bond shall be put in suit, and that no prosecution, suit, action, information, or complaint shall be brought under or by virtue of this act, or by reason of the breach of any provision thereof, in any of her Majesty's possessions abroad, after the expiration of 12 calendar months next succeeding the commencement of any such voyage as aforesaid, nor in the U. Kingdom, after the expiration of 12 calendar months next after the return of the said ship or of the said master to the U. Kingdom. — § 28.

*Exception of particular kinds of Ships.* — Nothing in this act shall extend or be construed to extend to ships carrying passengers on such voyage as aforesaid if the number of such passengers shall not amount to or exceed 50, nor shall any thing in this act extend to any of her Majesty's ships of war, or to any ship in the service of the commissioners for executing the office of lord high admiral of the U. Kingdom, or to ships of war or transports in the service of the East India Company. — § 29.

*Extension of Act to West Indies, Western Africa, Malta, and Mauritius.* — This act shall, except as herein-after stated, extend and apply to the carriage of passengers by sea from any of the British West Indies, in which term are included the British West India islands, the Bahamas, and British Guiana, and from Malta, and from the British possessions in Africa, and from the Mauritius, to any other place whatsoever. — § 30.

*Power to Governors of Colonies to adopt the Act.* — It shall be lawful for the governor or officer administering the government of any British colony not enumerated in the previous enactment, to declare by proclamation, that this act, except as herein is excepted, shall be extended and shall apply to the carriage of passengers by sea from such colony to such places as may by him be named for the purpose in such proclamation, and thereupon this act shall be thenceforth so extended, and shall so apply accordingly. — § 31.

*Governors empowered to declare computed Length of Voyage.* — It shall be lawful for the governor or officer administering the government of any of the British colonies to which this act has been extended or shall be extended by proclamation issued for that purpose, to declare the rule of computation by which the length of the voyage of any ship carrying passengers from such colony to any other place shall be estimated for the purposes of this act. Provided nevertheless that this act shall not, except as respects the West Indies, and as after mentioned, extend or apply to any such voyage, if the length thereof so computed shall not be three weeks or upwards. — § 32.

Clause 40. enables the governors of colonies to issue proclamations substituting other articles of food, &c., if equivalent to those previously specified.

**Act not to extend to Cabin Passengers.**—Wherever the term “passage” or “passenger” is used in this act, it shall be held not to include or extend to the class of passages or passengers commonly known and understood by the name of cabin passages and cabin passengers.

Ship \_\_\_\_\_ of \_\_\_\_\_ tons register burden, to sail from \_\_\_\_\_ for \_\_\_\_\_  
on the \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_\_.

Name.	Age.	Equal to Statute Adults.

I engage that the parties herein named shall be provided with a stowage passage to \_\_\_\_\_ in the ship \_\_\_\_\_ with not less than ten cubic feet for luggage for each statute adult for the sum of £ \_\_\_\_\_ including head money, if any, at the place of landing and every other charge; and I hereby acknowledge to have received the sum of £ \_\_\_\_\_ in full payment.

Water and provisions according to the annexed scale will be supplied by the ship, as required by law, and also fire and suitable hearths for cooking.

#### SCHEDULE (E) referred to in the 21st Section of this Act.

##### Form of Notice to be given to Her Majesty's Colonial Land and Emigration Commissioners of Forfeiture of Passage Broker's Licence.

Gentlemen,  
This is to give you notice that the licence granted on the \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_\_, to A. B. of \_\_\_\_\_ in \_\_\_\_\_ to act as a passenger broker or passage dealer, was on the \_\_\_\_\_ day of \_\_\_\_\_ last past duly declared by us, the undersigned justices of the peace in \_\_\_\_\_ quarter sessions assembled, to be forfeited.

The names in full, with the additions and address of the party, to be here inserted.

Here state the reason of forfeiture.

Signatures \_\_\_\_\_

To Her Majesty's Colonial Land and Emigration Commissioners, London.

Date \_\_\_\_\_

In some respects, passengers may be considered as a portion of the crew. They may be called on by the master or commander of the ship, in case of imminent danger either from tempest or enemies, to lend their assistance for the general safety; and in the event of their declining, may be punished for disobedience. This principle has been recognised in several cases; but, as the authority arises out of the necessity of the case, it must be exercised strictly within the limits of that necessity. — (*Boyce v. Badchiff*, 1 Campbell, 58.) A passenger is not, however, bound to remain on board the ship in the hour of danger, but may quit it if he have an opportunity; and he is not required to take upon himself any responsibility as to the conduct of the ship. If he incur any

responsibility, and perform extraordinary services in relieving a vessel in distress, he is entitled to a corresponding reward. The goods of passengers contribute to general average. — (*Abbott on the Law of Shipping*, part iii. c. 10.)

**PATENT**, a privilege from the Crown granted by letters patent (whence the name), conveying to the individual or individuals specified therein, the sole right to make, use, or dispose of some new invention or discovery, for a certain specified period.

The power to grant patents seems to exist at common law; but it is limited and defined by the famous statute 21 Jac. 1. c. 3., which enacts, "That any declaration before-mentioned shall not extend to any letters patent and grants of privilege for the term of 14 years or under, thereafter to be made, of the sole working or making of any manner of new manufactures within this realm, to the *true and first* inventor and inventors of such manufactures, which others at the time of making such letters patent and grants shall not use, so as also they be not contrary to the law, nor mischievous to the state, by raising prices of commodities at home, or hurt of trade, or generally inconvenient. The said 14 years to be accounted from the date of the first letters patent, or grant of such privilege thereafter to be made; but that the same shall be of such force as they should be if that act had never been made, and none other."

**Policy of Patents.** — The law with respect to patents is unavoidably encumbered with several difficulties. The expediency of granting patents has been disputed; though, as it would seem, without any sufficient reason. Were they refused, the inducement to make discoveries would, in many cases, be very much weakened; at the same time that it would plainly be for the interest of every one who made a discovery, to endeavour, if possible, to conceal it. And notwithstanding the difficulties in the way of concealment, they are not insuperable; and it is believed that several important inventions have been lost, from the secret dying with their authors. On the other hand, it is not easy to decide as to the term for which the patent, or exclusive privilege, should be granted. Some have proposed that it should be made perpetual; but this would be a very great obstacle to the progress of improvement, and would lead to the most pernicious results. Perhaps the term of 14 years, to which the duration of a patent is limited in England, is as proper a one as could be suggested. It may be too short for some inventions, and too long for others; but, on the whole, it seems a pretty fair average.

**Specification.** — Previously to the reign of Queen Anne, it was customary to grant patents without any condition, except that they should be for really new inventions. But a condition was then introduced into all patents, and is still retained, declaring that if the inventor do not, by an instrument under his hand and seal, denominated a specification, *particularly describe* and ascertain the nature of his invention, and in what manner the same is to be performed, and also cause the same to be enrolled in Chancery within a certain time (generally a month), the letters patent, and all liberties and advantages whatever thereby granted, shall utterly cease and become void. This was a very judicious regulation. It secures the invention from being lost; and the moment the patent expires, every one is in a situation to profit by it.

**Mode of granting a Patent.** — Letters patent are obtained upon petition and affidavit to the Crown, setting forth, that the petitioner has, after great labour and expense, made a certain discovery, which he describes, and which he believes will be of great public utility, and that he is the first inventor. The petition is referred to the attorney or solicitor general, who is separately attended by the applicant and all competitors, if there be any. They explain their projects to him, and he decides on granting or withholding the patent. When the inventions of two or more conflicting applicants coincide, he rejects all the applications. It would seem, that to decide upon such difficult questions in mechanics as are often agitated in applications for patents, a familiar knowledge of the principles and practical application of mechanical science would be indispensable. But by the law, as it now stands, such knowledge is not deemed necessary. The legal officers of the Crown are the sole judges as to what patents should or should not be granted; their award is *final*; and they are subject to no responsibility, other than the common remedies against public officers by impeachment, indictment, &c. — none of which would be entertained, unless a corrupt motive were established. After approval by the law officers, the grant is made out, sealed, and enrolled.

Considering the authority under which patents are granted, can any one wonder at the number that have been overturned in the courts of justice? or at the litigation to which they have given rise?

**Expense of Patents.** — Separate patents have to be taken out for England, Scotland, and Ireland, if it be intended to secure the privilege in the three kingdoms. The expense of stamps, fees, &c. is in all cases very heavy. It varies according to the intricacy of the invention, the opposition (if any) to the patent being granted, &c. But at a rough average it may, perhaps, be estimated at 120*l.* for England, 100*l.* for Scotland, and 100*l.* for Ireland. — (*See Parl. Paper No. 729. Sess. 1838.*)

**Conditions as to Patents.** — The *novelty* and *utility* of the invention are essential to the validity of a patent; if it can be shown to have been in use previously to the grant of the patent, or to be of no utility, it will be void. It must also be for something vendible — something "material and useful made by the hands of man." — (*Lord Kenyon, 8 T. R. 99.*) A philosophical principle only, neither organised, nor

capable of being so, is no ground for a patent; because it is an element and rudiment of science, and which, till applied to some new production from these elements, cannot, with justice to other inventors, be applied to the exclusive use of any one of them. In all patents there is required, in the words of Lord Tenterden, "something of a *corporeal or substantial nature*, something that *can be made by man* from the matters subjected to his art and skill, or at the least some *new mode of employing practically his art and skill*."—(*Godson on the Law of Patents*, p. 81.) Previously to Lord Tenterden, it had been ruled that a new process or method was not the subject of a patent. But his Lordship having suggested that "the word manufacture (in the statute) may, perhaps, extend to a *new process* to be carried on by known implements, or elements acting upon known substances, and ultimately producing some other known substance, &c."—(*Godson*, p. 83.)—this principle of interpretation has now been adopted.

A patent for a machine, each part of which was in use before, but in which the *combination* of the different parts is *new*, and a *new result* is obtained, is valid. But, in order to its being valid, the specification must clearly express that it is in respect of such new combination or application, and of that only; and not lay claim to original invention in the use of the materials.

A patent may be granted for an addition to an old invention. But the patent must be *confined* to the *addition* or improvement, that the public may purchase it without being encumbered with other things. If the patent include the whole, it will be void; for the property in the addition or improvement can give no right to the thing that has been improved.—(*Godson*, p. 71.)

A valid patent may be obtained for an invention, "*new in this realm*," though it may have been previously practised in a foreign country.

A patent is void, if it be for several distinct inventions, and *any one of them* fall of originality.

The specification must be prepared with *great care*. It should set forth the invention fully and correctly. The terms used must be clear and unambiguous; no necessary description must be omitted, nor what is unnecessary be introduced; and the invention must be described in the *best and most improved state* known to the inventor. If any one of these conditions be not complied with, the patent will be void. Any inaccurate or defective statement, *were it even inserted through inadvertency*, will vitiate the whole.

*Caveat*.—It is not unusual for inventors who have not brought their inventions to perfection, and who are afraid lest they be anticipated by others, to lodge a caveat at the offices of the attorney and solicitor general; that is, an instrument by which notice is requested to be given to the person who enters it, whenever any application is made for a patent for a certain invention therein described in general terms. The entry of a caveat is, therefore, nothing more than giving information that an invention is nearly completed; so that, if any other person should apply for a patent for the same thing, the preference may be given to him who entered it.

An injunction may be obtained for the infringement of a patent, in the same way as for a violation of the copyright acts.

Patents have been sometimes extended by act of parliament beyond the term of 14 years, on the ground that that term was too short properly to reward the inventor.

An act passed in 1835, 5 & 6 W. 4. c. 77., made sundry regulations in the law or regulations under which patents had been previously granted as well as in the rules for their interpretation, and pointed out the method of proceeding in cases where application is made for a prolongation of the term of the patent. We subjoin an abstract of this act.

*Any person having obtained Letters Patent for any Invention may enter a Disclaimer*.—Any person who hath obtained or shall hereafter obtain letters patent for the sole making, exercising, &c. of any invention, may, if he think fit, enter with the clerk of the patents of England, Scotland, or Ireland, respectively, as the case may be, having first obtained the leave of the attorney-general, or solicitor-general in case of an English patent, of the lord advocate or solicitor-general of Scotland in the case of a Scotch patent, or of the attorney-general or solicitor-general for Ireland in the case of an Irish patent, a disclaimer of any part of either the title of the invention or of the specification, stating the reason for such disclaimer, or may, with such leave as aforesaid, enter a memorandum of any alteration in the said title or specification, not being such disclaimer or such alteration as shall extend the exclusive right granted by the said letters patent; and such disclaimer or memorandum of alteration, being filed by the said clerk of the patents, and enrolled with the specification, shall be taken to be part of such letters patent or such specification in all courts whatever: provided, that any person may enter a caveat, as caveats are now entered, against such disclaimer or alteration; which caveat shall give the party entering a right to have notice of the application being heard by the attorney-general or solicitor-general or lord advocate respectively: provided also, that no such disclaimer or alteration shall be receivable in evidence in any action or suit (except in any proceeding by *scire facias*) pending at the time when it was enrolled, but in every such action or suit the original title and specification alone shall be given in evidence, and taken to be the title and specification of the invention for which the letters patent have been granted; provided also, that it shall be lawful for the attorney-general or solicitor-general or lord advocate, before granting such fiat, to require the party applying for the same to advertise his disclaimer or alteration, as to the said attorney-general, &c. shall seem right, and shall, if he require such advertisement, certify in his fiat that the same has been duly made.—(§ 1.)

*Mode of Proceeding where Patentee is proved not to be the real Inventor*.—If in any suit or action it shall be proved or found by the verdict of a jury that a person who has obtained letters patent for any invention, or supposed invention, was not the first inventor thereof, or of some part thereof, by reason of some other person or persons having invented or used the same, or some part thereof, before the date of such letters patent, or if such patentee or his assigns shall discover that some other person had, unknown to such patentee, invented or used the same, or some part thereof, before the date of such letters patent, it shall be lawful for such patentee or his assigns to petition H. M. in council to confirm the said letters patent or to grant new letters patent, the matter of which petition shall be heard before the judicial committee of the privy council; and such committee, upon examining the said matter, and being satisfied that such patentee believed himself to be the first and original inventor, and being satisfied that such invention or part thereof had not been publicly and generally used before the date of such first letters patent, may report to H. M. their opinion that the prayer of such petition ought to be complied with, whereupon H. M. may, if he think fit, grant such prayer; and the said letters patent shall be available to give to such petitioner the sole right of using, making, and vending such invention: provided, that any person opposing such petition shall be entitled to be heard before the said judicial committee: provided also, that any person party to any former suit or action touching such first letters patent, shall be entitled to have notice of such petition before presenting the same.—(§ 2.)

*If in any Action or Suit a Verdict pass for the Patentee, the Judge may certify, &c.*—If any action at law or suit in equity shall be brought in respect of any alleged infringement of such letters patent heretofore or hereafter granted, or any *scire facias* to repeal such letters patent, and if a verdict pass for the patentee, or if a final decree or order be made for him, upon the merits of the suit, it shall be lawful for the judge who tried such action to certify on the record, or the judge who shall make such order to give a certificate under his hand, that the validity of the patent came in question before him, which record or certificate being given in evidence in any other suit or action touching such patent, if a verdict pass, or order be made, in favour of such patentee, he shall receive treble costs in such suit or action, to be taxed at three times the taxed costs, unless the judge making such second or other order, or trying such second or other action, certify that he ought not to have treble costs.—(§ 3.)

**Mode of Proceeding in case of Application for the Prolongation of the Term.**—If any person who hath or shall hereafter obtain letters patent shall advertise in the London Gazette 3 times, and in 3 London papers, and 3 times in some country paper published in the town where or near to which he carried on any manufacture of any thing made according to his specification, or near to or in which he resides in case he carried on no such manufacture, or published in the country where he carries on such manufacture, or where he lives in case there shall not be any paper published in such town, that he intends to apply to H. M. in council for a prolongation of his term of sole using and vending his invention, and shall petition H. M. in council to that effect, it shall be lawful for any person to enter a caveat at the council office; and if H. M. refer such petition to the judicial committee of the privy council, and notice shall first be by him given to any person who has entered such caveat, the petitioner shall be heard by his counsel and witnesses to prove his case, and the persons entering caveats shall likewise be heard by their counsel and witnesses; whereupon the judicial committee may report to H. M. that a further extension of the term in the said letters patent shall be granted, not exceeding 7 years; and H. M. is hereby authorised and empowered, if he thinks fit, to grant new letters patent for the said invention for a term not exceeding 7 years after the expiration of the first term: provided that no such extension shall be granted if the application by petition be not made and prosecuted with effect before the expiration of the original term in such letters patent.—(§ 4.)

**In case of Action, &c., Notice to be given.**—In any action brought for infringing any letters patent, the defendant on pleading thereto shall give to the plaintiff, and in any scire facias to repeal such letters patent the plaintiff shall file with his declaration, a notice of any objections on which he means to rely at the trial of such action, and no objection shall be allowed to be made in behalf of such defendant or plaintiff at such trial, unless he prove the objections stated in such notice: provided always, that it shall be lawful for any judge at chambers, on summons served by such defendant or plaintiff on such plaintiff or defendant respectively to show cause why he should not be allowed to offer other objections whereof notice shall not have been given, to give leave to offer such objections, on such terms as to him shall seem fit.—(§ 5.)

**Costs in Actions for infringing Letters Patent.**—In any action brought for infringing any letters patent, in taxing the costs thereof regard shall be had to the part of such case proved at the trial, which shall be certified by the judge, and the costs of each part of the case shall be given according as either party has succeeded or failed therein, regard being had to the notice of objections, as well as the counts in the declaration, and without regard to the general result of the trial.—(§ 6.)

**Penalty for using, unauthorised, the Name of a Patentee, &c.**—If any person shall write, paint, or print, or mould, cast, or carve, or engrave or stamp upon, any thing made, used, or sold by him, for the sole making or selling of which he hath not obtained letters patent, the name or any imitation of the name of any other person who hath obtained letters patent, for the sole making and vending of such thing, without leave in writing of such patentee or his assigns, or if any person shall upon such thing, not having been purchased from the patentee or some person who purchased it from him, or not having the licence in writing of such patentee or his assigns, write, paint, or otherwise mark the word "patent," the words "letters patent," or the words "by the king's patent," or any words of the like kind, meaning, or import, with a view of imitating or counterfeiting the stamp, mark, or other device of the patentee, he shall for every such offence be liable to a penalty of 50*l.*, to be recovered by action of debt, bill, &c. in any court of record at Westminster or in Ireland, or in the court of session in Scotland, one half to H. M. and the other to any person who shall sue for the same: provided, that nothing herein contained shall be construed to extend to subject any person to any penalty in respect of stamping or in any way marking the word "patent" upon any thing made, for the sole making or vending of which a patent before obtained has expired.—(§ 7.)

The reader will find a great deal of curious and instructive information with respect to patents, in the *Report of the Committee of the House of Commons* on that subject (No. 332. Sess. 1829), particularly in the evidence and papers laid before the Committee by Mr. Farey. The treatise on the *Law of Patents and Copyrights*, by Mr. Godson, is clear and able.

**PATRAS, or PETRASSO**, a sea-port in the N. W. corner of the Morea, near the entrance of the Gulph of Lepanto, lat. 38° 14' 25" N., lon. 21° 46' 20" E. Population variously estimated, from 4,000 to 5,000.

The port lies a little to the northward of the town; but the part fronting it is unsafe, and exposed to heavy seas, particularly in winter. Vessels, therefore, go a little further up the gulph, where there is a mole or quay, and where they can lie close to the wharf. Patras has a more extensive trade than any other port of Greece. The principal exports are currants, oil, valonia, wine, raw silk, raw cotton, wool, skins, wax, &c. Of these, currants are by far the most important. The fruit is larger, and freer from sand and gravel, than that of the Ionian Islands. They are shipped in casks of various sizes; but, as the weight of the cask is included in that of the fruit, it is said to be, for the most part, heavier and stronger than necessary. Morean currants are preferred in most countries, except England; but here the currants of Zante are held in equal, or perhaps greater, estimation. The exports of currants from Patras may average from 60,000 to 70,000 cwts. a year; but the produce of the crop varies extremely in different seasons. Latterly the culture of currants in the Morea has been very greatly extended, and, we believe, we may add, completely overdone. Owing to the increase of their quantity, their price, which in 1840 amounted to 80 dollars per 1000 lbs., had, in 1842, sunk to 23 dollars per do. And as this price will not pay the expenses of cultivation, the growers are involved in the greatest difficulties, and the inferior plantations will necessarily have to be abandoned. The crops of oil, the next great article of export from Patras, are, if possible, still more fluctuating than those of currants. The imports at Patras, as at the other Greek ports, consist principally of sugar, coffee, and other colonial products; plain and printed cotton stuffs, woollen goods, salted fish, iron, tin plates, hardware, coal, cordage, hemp, deals, &c. Imported articles are brought principally from the Ionian Islands, Malta, Venice, Leghorn, Marseilles, and Trieste; but, from the want of authentic details, it is quite impossible to form any accurate estimate of their amount either as respects Patras, or any other Greek port:—

**Shipping.**—The arrivals and departures at Patras in 1841 were—

Flags.	Arrivals.				Departures.			
	Vessels.	Tonnage.	Crews.	Value of Cargoes.	Vessels.	Tonnage.	Crews.	Value of Cargoes.

\* Exclusive of Peninsular coasters four times a month. Of the 46 British arrivals, 24 were in ballast, 12 had manufactures, 4 coals, 2 sundries, 1 timber, and 3 currants. Of the 47 departures, 25 had currants, 11 were in ballast, 3 oil, &c., 3 sundries, 1 wheat and currants, and 1 manufactures.

**Money.**— Since the revolution, the Greeks have established a system of coinage in imitation of that of France. The phoenix is a silver coin, that should contain 9-10ths of pure metal, and 1-10th of alloy, or 4·029 grammes of the former, and 445 do. of the latter, being worth about 84d. sterling. The lepta is a copper coin, being 1-100th part of the phoenix. But the silver coins are already so much debased, that they have been refused even by the officers of government.

**Weights and Measures.**— The quintal is divided into 44 oges, or 132 lbs. Hence, 100 lbs. of Patras = 88 lbs. avoirdupois. Silk weight is 1-5th heavier.

A sack of currants weighs 140 lbs. of the common weight, or about 133 lbs. avoirdupois.

The stero, corn measure, = 24 Winchester bushels.

The long pic, or pik, used in measuring linens and woollens, = 27 English inches. The short pic, used in measuring silks, = 25 ditto.

We have derived these details partly from consular returns, and partly from other sources.

**Commerce of Greece.**— Considering the favourable situation of Greece, the number and excellence of her ports, the hardy enterprising character of her people, and the progress they had already made in navigation, it might have been supposed that she would have made a rapid advance in prosperity after being emancipated from the blind and brutal despotism of the Turks. But, however the fact may be accounted for, this has not certainly been the case. The ministers of King Otho appear not to have had the remotest idea of what was necessary to promote the development of industry in such a country as Greece. The new customs law, enacted in 1843, is arbitrary, and is full of prohibitions and penalties against which no caution can guard. Duties are, at the same time, laid on most articles of export; and though the rates of duty in the tariff on imports (amounting to 10 per cent. on cotton and woollen goods) cannot be fairly objected to, they are rendered most oppressive from the practice of charging them on arbitrary valuations, and of levying arbitrary fines. Agriculture is, also, subject to the greatest discouragement; from a third part to a half of the public revenue of the kingdom being derived from the worst of all possible taxes—a tithe! And we are assured by those well acquainted with the practical details, that the burden which the tithe really imposes is, in consequence of the illegal way in which it is assessed and collected, nearer 15 and 20 than 10 per cent. of the gross produce of the soil! Hence, instead of advancing, commerce and agriculture have, of late years, rather retrograded. And if to these defects in the commercial and fiscal regulations under which the country is placed, we add the deficiency of capital, the all but total want of good roads, the barbarism of a large portion of the population, the bankrupt state of the public finances, and the preference given by the government to military parade and ostentatious display, we need not be surprised at the stationary condition, the poverty, and the all but universal discontent of the people. But it is to be hoped that the excess of the evil may at length lead to a cure; and that at no distant period measures may be devised for giving freedom to industry, and for developing the extensive resources of the country, and the talents and ingenuity of its inhabitants.

It is deeply to be regretted that Candia, or Crete, was not either added to the new kingdom of Greece, or made independent. We cannot help considering it as disgraceful to the Christian nations of Europe, that this famous island, where European civilisation first struck its roots, should be consigned to the barbarians by whom it is now laid waste. It is as well entitled to the favourable consideration of England, France, and Russia, as any part of Continental Greece; and we do hope that measures may yet be devised for rescuing it from the atrocious despotism by which it has been so long weighed down.

**PATTERNS**, are specimens or samples of commodities, transmitted by manufacturers to their correspondents, or carried from town to town by travellers, in search of orders.

**PAWNBROKERS AND PAWNBROKING.** A pawnbroker is a species of banker, who advances money, at a certain rate of interest, upon security of goods deposited in his hands; having power to sell the goods, if the principal sum and the interest thereon be not paid within a specified time.

1. *Advantages and Disadvantages of Pawnbroking.*— The practice of impledging or pawning goods, in order to raise loans, is one that must necessarily always exist in

#### Lighthouse (only where there is one).

**Observations on the Tonnage Duty.**— 1. Vessels arriving from abroad loaded, and which discharge their cargoes, and depart loaded, pay the whole duty.

2. Vessels arriving from abroad loaded, and which depart in ballast, pay two thirds of the duty, which is also exacted if they arrive in ballast, and depart loaded.

3. Vessels arriving from abroad in ballast, and departing without lading, or arriving and departing with cargo, and not discharging any of it, pay one third of the duty.

4. Vessels arriving from and going to another port of the kingdom pay but one half of the duty.

5. A vessel is considered as loaded, whether she be so fully or partially.

**Exceptions.**— 1. Every vessel forced to enter a port, either by a storm or in consequence of damage, is exempted from all charges during 8 days.

2. Every vessel entering a port, from whatever cause, and destined to another port, and the master of which shall immediately make a declaration to the captain of the port, that he has no intention either of loading or discharging his goods, may remain 5 days without paying any duty except the lighthouse duty. He is permitted also to receive or to deliver letters or money, unless otherwise provided for by special ordinances.

civilised societies, and is, in many cases, productive of advantage to the parties. But it is a practice that is extremely liable to abuse. By far the largest proportion of the *bond fide* borrowers of money on pawn consist of the lowest and most indigent classes; and were the lenders not subjected to any species of regulation, advantage might be taken (as, indeed, it is frequently taken, in despite of every precaution) of their necessities, to subject them to the most grievous extortion. But, besides those whose wants compel them to resort to pawnbrokers, there is another class, who have recourse to them in order to get rid of the property they have unlawfully acquired. Not only, therefore, are pawnbrokers instrumental in relieving the pressing and urgent necessities of the poor, but they may also, even without intending it, become the most efficient allies of thieves and swindlers, by affording them ready and convenient outlets for the disposal of their ill-gotten gains. The policy of giving legislative protection to a business so liable to abuse, has been doubted by many. But though it were suppressed by law, it would always really exist. An individual possessed of property which he may neither be able nor willing to dispose of, may be reduced to a state of extreme difficulty; and in such case, what can be more convenient or advantageous for him than to get a loan upon a deposit of such property, under condition that if he repay the loan, and the interest upon it, within a certain period, the property will be returned? It is said, indeed, that the facilities of raising money in this way foster habits of imprudence; that the first resort for aid to a pawnbroker almost always leads to a second; and that it is impossible so to regulate the business, as to prevent the ignorant and the necessitous from being plundered. That this statement, though exaggerated, is to a certain extent true, no one can deny. On the other hand, however, the capacity of obtaining supplies on deposits of goods, by affording the means of meeting pressing exigencies, in so far tends to prevent crime, and to promote the security of property; and it would seem as if the desire to redeem property in pawn would be one of the most powerful motives to industry and economy. At the same time, too, it must be borne in mind, that it is not possible, do what you will, to prevent those who are poor and uninstructed from borrowing; and that they must, in all cases, obtain loans at a great sacrifice, and be liable to be imposed upon. But the fair presumption is, that there is less chance of any improper advantage being taken of them by a licensed pawnbroker, than by a private and irresponsible individual. Although, however, the business had all the inconveniences, without any portion whatever of the good which really belongs to it, it would be to no purpose to attempt its suppression. It is visionary to imagine that those who have property will submit to be reduced to the extremity of want, without endeavouring to raise money upon it. Any attempt to put down pawnbroking would merely drive respectable persons from the trade, and throw it entirely into the hands of those who have neither property nor character to lose. And hence the object of a wise legislature ought not to be to abolish what must always exist, but to endeavour, so far at least as is possible, to free it from abuse, by enacting such regulations as may appear to be best calculated to protect the ignorant and the unwary from becoming the prey of swindlers, and to facilitate the discovery of stolen property.

2. *Obligations under which Pawnbrokers should be placed.* — For this purpose it seems indispensable that the interest charged by pawnbrokers should be limited; that they should be obliged to give a receipt for the articles pledged, and to retain them for a reasonable time before selling them; that the sale, when it does take place, should be by public auction, or in such a way as may give the articles the best chance for being sold at a fair price; and that the excess of price, if there be any, after deducting the amount advanced, and the interest and expenses of sale, should be paid over to the original owner of the goods. To prevent pawnbrokers from becoming the receivers of stolen goods, they should be liable to penalties for making advances to any individual unable to give a satisfactory account of the mode in which he became possessed of the property he is desirous to pawn; the officers of police should at all times have free access to their premises; and they should be obliged carefully to describe and advertise the property they offer for sale.

3. *Law as to Pawnbrokers.* — It may appear singular that pawnbrokers should hardly have been named in any legislative enactment till after the middle of last century. It was enacted by the 30 Geo. 2. c. 24. that a duplicate or receipt should be given for goods pawned; and that such as were pawned for any sum less than 10*l.* might be recovered any time within two years, on payment of the principal and interest; but the rate of interest was not fixed. This defect was supplied by the 25 Geo. 3. c. 48.; but the act 39 & 40 Geo. 3. c. 99. contains the latest and most complete regulations on the subject.

Every person exercising the trade of a pawnbroker must take out a licence, renewable annually, 10 days at least before the end of the year, for which he shall pay, within the cities of London and Westminster, and the limits of the treasury

more than 1 house by virtue of 1 licence; but persons in partnership need only take out 1 licence for 1 house. All persons receiving goods by way of pawn or pledge for the repayment of money lent thereon, at a higher rate of interest than 5 per cent., to be deemed pawnbrokers.

Upon every pledge on which there shall have been lent not exceeding 2s. 6d., interest may be charged at the rate of  $\frac{1}{2}$  per month:

<i>£</i>	<i>s.</i>	<i>d.</i>	<i>£</i>	<i>s.</i>	<i>d.</i>
10	0	0	0	0	1

0	17	6	-	0	3
1	0	0	-	0	4
2	0	0	-	0	4
2	2	0	-	0	8

And for every sum exceeding 60s. and not exceeding 10*l.* at the rate of 5*l.* in the pound by the calendar month, including the current month, and so in proportion for any fractional sum.

Pawnbrokers are to give farthings in exchange.

Persons applying to redeem goods pawned within 7 days after the first calendar month after the same shall have been pledged, may redeem the same without paying any thing for the first 7 days; and, upon applying before the expiration of 11 days of the second calendar month, shall be at liberty to redeem such goods, upon paying the profit payable for 1 calendar month and the half of another; and in all cases where the parties so entitled, and applying as aforesaid, after the expiration of the first 11 days, and before the expiration of the second month, the pawnbroker is allowed to take the interest of the whole second month; and the same regulations and restrictions shall take place in every subsequent month.

When goods are pawned for more than 5*l.*, the pawnbroker, before advancing the money, shall immediately enter in his book a description of the pawn, the money lent thereon, the day of the month and year, the name of the person pawning the book and the name of the street, and number of the house, if numbered, where the pawn is deposited; and the pawnbroker shall, if the person be a lodger, and the letters H K, if a housekeeper; and also the name and abode of the owner of the party offering such pledge; and if the money lent shall not exceed 5*l.*, such entry shall be in all cases; and the pawnbroker shall have been pawned; and the pawnbroker shall, at the time of taking the pawn, give to the person so pawning a duplicate, corresponding with the entry in the book, which the party pawning shall take in all cases; and the pawnbroker shall not receive any pledge, unless the party so pawning shall receive such duplicate.

#### Rates payable for Duplicates.

The duplicate to be produced to the pawnbroker before he shall be compelled to redeliver the respective goods and chattels, except as herein-after excepted, for the same.

The amount of profits on duplicates shall be added on pledges redeemed, and such duplicate shall be kept by the pawnbroker for 1 year.

Persons pawning other people's goods without their consent may be apprehended by the warrant of 1 justice, and convicted in a penalty not exceeding 5*l.* nor less than 2*l.*, and the full value of the goods pawned; and if the forfeiture be not immediately paid, the justice shall commit the party to the house of correction, to be kept to hard labour for 3 calendar months; and if within 3 days before the expiration of the commitment the forfeiture shall not be paid, the justice may order the person to be publicly whipped, and the forfeitures shall be applied towards making satisfaction to the party injured, and defraying the costs; but if the party injured shall decline to accept such satisfaction and costs, or if there be any overplus, such forfeitures or overplus shall be paid to the poor of the parish.

Persons forging or counterfeiting duplicates may be seized and delivered to a constable, who shall convey them before a justice; and, upon conviction, such person shall be committed to the house of correction for any time not exceeding 3 calendar months.

Persons offering pledges, not giving a satisfactory account of themselves, or the means by which they became possessed of such goods, or wilfully giving any false information, or if there shall be reason to suspect that such goods are stolen, or illegally obtained, or if any person not entitled to redeem goods in pawn shall endeavour to redeem the same, they may be

seized and delivered to a constable, to be carried before a justice; and if there should appear ground for a second examination, they shall be committed to the common goal or house of correction, to be kept to hard labour, or where the proceedings are not authorized by the nature of the offence, the party shall be committed for any time not exceeding 3 calendar months.

Persons buying or taking in pledge unfinished goods, linen, or apparel, intended to others to wash or mend, shall forfeit double the sum lent, and restore the goods.

Peace officers are empowered to search for unfinished goods which shall be come by wilfully pawning.

When goods are unlawfully pawned, the pawnbroker is to restore them; and their houses may be searched during the hours of business, by a warrant from a magistrate for the discovery of such property.

Persons producing notes or promissory notes are to be deemed the owners of the property.

Where duplicates are lost, the pawnbroker, upon affidavit made by the owner of such loss before a magistrate, shall deliver another duplicate.

Goods pawned are deemed forfeited at the end of a year; but, on notice from persons having goods in pledge, 3 months further are to be allowed beyond the year for redemption; such notice to be given before the twelvemonth is expired.

All goods pawned may be sold at the expiration of one whole year; and all goods so forfeited, on which above 10*l.*, and not exceeding 10*l.* shall have been lent, shall be sold by public auction, unless the parties so entitled, not otherwise notified, be given, at least 3 days before the auction, in a public newspaper, upon pain of forfeiting to the owner of the goods not more than 5*l.* nor less than 2*l.*

Goods, such as pictures, books, bronzes, statues, bric-a-brac, ivory and marble, carvings, intaglios, medals, mathematical and philosophical instruments, and china, shall be sold by themselves, and without other goods, 4 times only in every year, on the 1st Monday in January, April, July, and October, in every year.

Pawnbrokers are not to purchase goods, while in their custody, nor take in pledges from persons under 12 years of age, or more than 10*l.*; nor take in any goods before 5 in the forenoon, or after 8 in the evening between Michaelmas-day and Lady-day, or before 7 in the forenoon or after 9 in the evening during the remainder of the year, excepting only till 11 on the Saturday of Saturday, and the books before a magistrate, on Friday and Christmas-day, and every fast or thanksgiving day.

An account of the sale of pledges for more than 10*l.* is to be entered by pawnbrokers in a book, and the surplus is to be paid to the owner of the goods pawned, or the proceeds within three years of the sale, under penalty of 10*l.* and treble the sum lent.

Pawnbrokers are to place in view the table of profits; and their name and business is to be placed over the door, on penalty of 10*l.*

Pawnbrokers injuring goods, or selling them before the time specified, shall, upon application to a magistrate, be compelled to make satisfaction for the same; and if the satisfaction awarded shall be equal to or exceed the principal and profits, the pawnbroker shall deliver the goods pledged to the owner without being paid any thing for principal or profit.

Pawnbrokers shall produce their books before a magistrate, or, refusing so to do, shall forfeit a sum not exceeding 10*l.* nor less than 5*l.*

Pawnbrokers offending against this act, shall forfeit for every offence not less than 4*l.*, nor more than 10*l.*

It has been held by the Court of King's Bench, that a pawnbroker has no right to sell unredeemed pledges, after the expiration of a year from the time the goods were pledged, &c. while they are in his possession, the original owner under his principal and interest due. (*Waller v. Smith*, 7th of January, 1801.) On a motion for a new trial, Lord Tenison said, "I am of opinion, that if the pledge be not redeemed at the expiration of a year and a day, (and no notice given that 3 months are to be allowed for its redemption,) the pawnbroker has a right to expose it to sale so soon as he can, consistently with the provisions of the act: but if at any time before the sale he actually takes place, the owner of the goods tender the principal and interest, and expenses incurred, he has a right to his goods, and the pawnbroker is not injured: for the power of sale is allowed him merely to secure to him the money which he has advanced, together with the high rate of interest which the law allows to him in his character of pawnbroker."

Such is the present state of the law with respect to pawnbrokers. On the whole, the regulations seem to be judiciously devised. Perhaps, however, the rate of interest on small deposits might be advantageously lowered. The law allows interest at the rate of  $\frac{1}{2}$  per month to be charged on loans of 2s. 6d., which is at the rate of 20 per cent.: but the same sum of  $\frac{1}{2}$  per month is exigible from all smaller loans; and as very many do not exceed 1s. 6d., and even 6d., the interest on them is exceedingly oppressive. No doubt there is a great deal of trouble with respect to such loans; but still, considering the vast number of advances under 2s. 6d., it would seem that the interest on them might be somewhat reduced. Perhaps, too, it might be advisable, still better to secure compliance with the statute, to enact that no one should be licensed as a pawnbroker without producing sufficient security for a certain sum, to be forfeited in the event of his knowingly or wilfully breaking or evading any of its provisions. This would prevent (what Colquhoun says is not an uncommon practice) swindlers from becoming pawnbrokers, in order to get the means of selling stolen goods. — (*Treatise on the Police of the Metropolis*, 2d ed. p. 156.)

It would be a useful regulation to oblige pawnbrokers to insure against losses by fire. Much mischief has been occasioned by the neglect of this precaution.

The duties on pawnbrokers' licences produced, in 1841, 16,365*l.*

4. *Notices of Pawnbroking in Italy, France, &c.* — The practice of advancing money to the poor, either with or without interest, seems to have been occasionally followed in antiquity. — (*Beckmann*, vol. iii. p. 14. 1st Eng. ed.) But the first public establishments of this sort were founded in Italy, under the name of *Monti di Pietà*, in the 14th and 15th centuries. As it was soon found to be impossible to procure the means of supporting such establishments from voluntary contributions, a bull for allowing interest to be charged upon the loans made to the poor was issued by Leo X. in 1521. These establishments, though differing in many respects, have universally for their object to protect the needy from the risk of being plundered by the irresponsible individuals to whom their necessities might oblige them to resort, by accommodating them with loans on comparatively reasonable terms. And though their practice has not, in all instances, corresponded with the professions they have made, there seems no reason to doubt that they have been, speaking generally, of essential service to the poor.

From Italy these establishments have gradually spread over the Continent. The *Mont de Piété*, in Paris, was established by a royal ordinance in 1777; and after being destroyed by the Revolution, was again opened in 1797. In 1804, it obtained a monopoly of the business of pawnbroking in the capital. Loans are made, by this establishment, upon deposits of such goods as can be preserved, to the amount of *two thirds* of the estimated value of all goods other than gold and silver, and to *four fifths* of the value of the latter. No loan is for less than 3 francs (2s. 6d.). The advances are made for a year, but the borrower may renew the engagement. Interest is fixed at the rate of one per cent. per month.

The *Mont de Piété* has generally in deposit from 600,000 to 650,000 articles, worth from 12,000,000 to 13,000,000 francs. The expense of management amounts to from 60 to 65 centimes for each article; so that a loan of 3 francs never defrays the expenses it occasions, and the profits are wholly derived from those that exceed 5 francs. At an average the profits amount to about 280,000 francs, of which only about 155,000 are derived from loans upon deposit, about 125,000 being the produce of other funds at the disposal of the company.

In some respects, particularly the lowness of interest upon small loans, and the greater vigilance exercised with respect to the reception of stolen goods, the *Mont de Piété* has an advantage over the pawnbroking establishments in this country. It may be doubted, however, whether it is, on the whole, so well fitted to attain its objects. The limitation of the loans to 3 francs would be felt to be a serious grievance here, and it can hardly be otherwise in France; nor is it to be supposed, that the servants of a great public establishment will be so ready to assist poor persons, having none but inferior articles to offer in security, as private individuals anxious to get business. And such, in point of fact, is found to be the case, not in Paris only, but in all those parts of the Continent where the business of pawnbroking is confined to a few establishments. And hence, though the question be not free from difficulty, it would seem that, were the modifications already suggested adopted, our system would be the best of any.

For further information with respect to this curious and interesting subject, the reader is referred to the *Traité de la Bienfaisance Publique* of Degerando, iii. 1—55.; besides giving a succinct historical notice of *Monts de Piété*, the learned author has discussed most part of the knotty questions connected with the proper organisation of these establishments, and with their influence on society, with equal sagacity and ability.

PEARL-ASH. See POTASH.

PEARLS (Du. *Paarlen*; Fr. *Perles*; Ger. *Perlen*; It. *Perle*; Lat. *Margaritæ*; Rus. *Shemtschug*, *Perliu*; Sp. *Perlas*; Arab. *Looloo*; Cyng. *Mootoo*; Hind. *Mootie*), are well known globular concretions found in several species of shell-fish, but particularly the mother-of-pearl oyster (*Concha margaritifera* Lin.). Pearls should be chosen round, of a bright translucent silvery whiteness, free from stains and roughness. Having these qualities, the largest are of course the most valuable. The larger ones have frequently the shape of a pear; and when these are otherwise perfect, they are in great demand for ear-rings. Ceylon pearls are most esteemed in England.

*Value, &c. of Pearls.* — Pearls were in the highest possible estimation in ancient Rome, and bore an enormous price. — (*Principium culmenque omnium rerum pretii, margaritæ tenent.* — *Plin. Hist. Nat.* lib. x. c. 35.) Their price in modern times has very much declined; partly, no doubt, from changes of manners and fashions; but, more probably, from the admirable imitations of pearls that may be obtained at a very low price. According to Mr. Milburn, a handsome necklace of Ceylon pearls, smaller than a large pea, costs from 170*l.* to 300*l.*; but one of pearls about the size of peppercorns may be had for 15*l.*: the pearls in the former sell at a guinea each, and those in the latter at about 1s. 6d. When the pearls dwindle to the size of small shot, they are denominated *seed pearls*, and are of little value. They are mostly sent to China. One of the most

remarkable pearls of which we have any authentic account was bought by Tavernier, at Catifa, in Arabia, a fishery famous in the days of Pliny, for the enormous sum of 110,000*l*. It is pear-shaped, regular, and without blemish. The diameter is '63 inch at the largest part, and the length from 2 to 3 inches.

Much difference of opinion has existed among naturalists with respect to the production of pearls in the oyster; but it seems now to be generally believed that it is the result of disease, and is formed in the same manner as bezoar — (see *BZOAR*) ; pearls, like it, consisting of successive coats spread with perfect regularity round a foreign nucleus. In fact, the Chinese throw into a species of shell-fish (*mytilus cygneus*, or swan muscle), when it opens, 5 or 6 very minute mother-of-pearl beads strung on a thread; and in the course of a year they are found covered with a pearly crust, which perfectly resembles the real pearl. — (*Milburn's Orient. Com.*; *Ainslie's Mat. Indica*, &c.)

*Pearl Fisheries.* — The pearl oyster is fished in various parts of the world, particularly on the west coast of Ceylon; at Tuticoreen, in the province of Tinnevelly, on the coast of Coromandel; at the Bahrein Islands, in the Gulf of Persia; at the Socool Islands; off the coast of Algiers; off St. Margarita, or Pearl Islands, in the West Indies, and other places on the coast of Colombia; and in the Bay of Panama, in the South Sea. Pearls have sometimes been found on the Scotch coast, and in various other places.

The pearl fishery of Tuticoreen is monopolised by the East India Company, and that of Ceylon by government. But these monopolies are of no value; as in neither case does the sum for which the fishery is let equal the expenses incurred in guarding, surveying, and managing the banks. It is, therefore, sufficiently obvious that this system ought to be abolished, and every one allowed to fish on paying a moderate licence duty. The fear of exhausting the banks is quite ludicrous. The fishery would be abandoned as unprofitable long before the breed of oysters had been injuriously diminished; and in a few years it would be as productive as ever. Besides giving fresh life to the fishery, the abolition of the monopoly would put an end to some very oppressive regulations, enacted by the Dutch more than a century ago.

*Persian Gulph.* — The most extensive pearl fisheries are those on the several banks not far distant from the island of Bahrein, on the west side of the Persian Gulph, in lat. 26° 50' N., long. 51° 10' E.; but pearl oysters are found along the whole of the Arabian coast, and round almost all the islands of the gulph. Such as are fished in the sea near the islands of Karraik and Corgo contain pearls said to be of a superior colour and description. They are formed of 8 layers or folds, whilst others have only 5, but the water is too deep to make fishing for them either very profitable or easy. Besides, the entire monopoly of the fishery is in the hands of the sheik of Bushire, who seems to consider these islands as his immediate property.

"The fishing season is divided into two portions — the one called the short and cold, the other the long and hot. In the cooler weather of the month of June, diving is practised along the coast in shallow water; but it is not until the intensely hot months of July, August, and September, that the Bahrein banks are much frequented. The water on them is about 7 fathoms deep, and the divers are much inconvenienced when it is cold; indeed, they can do little when it is not as warm as the air, and it frequently becomes even more so in the hottest months of the summer. When they dive, they compress the nostrils tightly with a small piece of horn, which keeps the water out, and stuff their ears with bees' wax for the same purpose. They attach a net to their waists, to contain the oysters; and aid their descent by means of a stone, which they hold by a rope attached to a boat, and shake it when they wish to be drawn up. From what I could learn, 2 minutes may be considered as rather above the average time of their remaining under water. Although severe labour, and very exhausting at the time, diving is not considered particularly injurious to the constitution; even old men practise it. A person usually dives from 12 to 15 times a day in favourable weather; but when otherwise, 3 or 4 times only. The work is performed on an empty stomach. When the diver becomes fatigued, he goes to sleep, and does not eat until he has slept some time.

"At Bahrein alone, the annual amount produced by the pearl fishery may be reckoned at from 200,000*l*. to 240,000*l*. If to this, the purchases made by the Bahrein merchants or agents at Abcootabeh Sharga, Ras-ul Khymack, &c. be added, which may amount to half as much more, there will be a total of about 300,000*l*. or 360,000*l*.; but this is calculated to include the whole pearl trade of the gulph; for it is believed that all the principal merchants of India, Arabia, and Persia, who deal in pearls, make their purchases, through agents, at Bahrein. I have not admitted in the above estimate much more than one sixth of the amount some native merchants have stated it to be, as a good deal seemed to be matter of guess or opinion, and it is difficult to get at facts. My own estimate is in some measure checked by the estimated profits of the small boats. But even the sum which I have estimated is an enormous annual value for an article found in other parts of the world as well as here, and which is never used in its best and most valuable state, except as an ornament. Large quantities of the seed pearls are used throughout Asia, in the composition of maljoons, or electuaries, to form which all kinds of precious stones are occasionally mixed, after being pounded, excepting, indeed, diamonds; these being considered, from their hardness, as utterly indigestible. The majoon, in which there is a large quantity of pearls, is much sought for and valued, on account of its supposed stimulating and restorative qualities.

"The Bahrein pearl fishery boats are reckoned to amount to about 1,500, and the trade is in the hands of merchants, some of whom possess considerable capital. They bear hard on the producers or fishers, and even those who make the greatest exertions in diving hardly have food to eat. The merchant advances some money to the fishermen at cent per cent., and a portion of dates, rice, and other necessary articles, all at the supplier's own price; he also lets a boat to them, for which he gets one share of the gross profits of all that is fished; and, finally, he purchases the pearls nearly at his own price, for the unhappy fishermen are generally in his debt, and therefore at his mercy." — (*Manuscript Notes communicated by Major D. Wilson, late Political Resident at Bushire.*)

The fishery at Algiers was farmed by an English association in 1836, but we are ignorant of their success.

The pearl fisheries on the coast of Colombia were at one time of very great value. In 1587, upwards of 697 lbs. of pearls are said to have been imported into Seville. Philip II. had one from St. Margarita, which weighed 250 carats, and was valued at 150,000 dollars. But, for many years past, the Colombian pearl fisheries have been of comparatively little importance. During the mania for joint stock companies, in 1826, two were formed: — one, on a large scale, for prosecuting the pearl fishery on the coast of Colombia; and another, on a smaller scale, for prosecuting it in the Bay of Panama and the Pacific. Both were abandoned in 1826.

The best fishery ground is said to be in from 6 to 8 fathoms water. The divers continue under water from a minute to a minute and a half, or at most 3 minutes. They have a sack or bag fastened to the neck, in which they bring up the oysters. The exertion is extremely violent; and the divers are unhealthy and short-lived.

PEARL SHELLS, commonly called *Mother-of-pearl shells*, are imported from various parts of the East, and consist principally of the shells of the pearl oyster from the Gulf of

Persia and other places, particularly the Sooloo Islands, situate between Borneo and the Philippines, the shores of which afford the largest and finest shells hitherto discovered. On the inside, the shell is beautifully polished, and of the whiteness and water of pearl itself: it has the same lustre on the outside, after the external laminae have been removed. Mother-of-pearl shells are extensively used in the arts, particularly in inlaid work, and in the manufacture of handles for knives, buttons, toys, snuff-boxes, &c. The Chinese manufacture them into beads, fish, counters, spoons, &c.; giving them a finish to which European artists have not been able to attain. Shells for the European market should be chosen of the largest size, of a beautiful pearly lustre, thick and even, and free from stains. Reject such as are small, cracked or broken, or have lumps on them. When stowed loose as dunnage, they are sometimes allowed to pass free of freight.—(*Milburn's Orient. Com.*) The imports during the 3 years ending with 1842 amounted, at an average, to about 950,000 lbs. a year.

PEAS (Ger. *Erbsen*; Fr. *Pois*; It. *Piselli, Bisi*; Sp. *Pesoles, Guisantes*; Rus. *Goroch*). The pea is one of the most esteemed of the leguminous or pulse plants. It is supposed to be indigenous to the south of Europe, and was cultivated by the Greeks and Romans, the latter of whom probably introduced it into Britain. There are many varieties; but the common garden pea (*Pisum sativum*), and the common grey or field pea (*Pisum arvense*), are the most generally cultivated; being reared in large quantities in all parts of the country, particularly in Kent. But since the introduction of the drill husbandry the culture of the pea as a field crop has been to a considerable extent superseded by the bean. Sometimes, however, it is drilled along with the latter; for, being a climbing plant, it attaches itself to the bean, so as to admit the ground being hoed; at the same time that the free admission of air about its roots promotes its growth. It is not possible to frame any estimate of the consumption of peas. The field pea is now hardly ever manufactured into meal for the purpose of being made into bread, as was formerly the case in many parts of the country; but there is reason to think that the garden pea is now more extensively used than ever.—(*London's Ency. of Agriculture; Brown on Rural Affairs*, vol. ii. p. 72. For an account of the laws regulating the importation, &c. of peas, see CORN LAWS AND CORN TRADE.) Leguminous crops are very extensively cultivated in India.

PECK, a dry measure for grain, pulse, &c. The standard, or Imperial peck, contains 2 gallons, or 554.55 cubic inches. Four pecks make a bushel, and 4 bushels a coomb.—(See WEIGHTS AND MEASURES.)

PELLITORY, the root of a perennial plant (*Anthemis pyrethrum*), a native of the Levant, Barbary, and the south of Europe. The root is long, tapering, about the thickness of the finger, with a brownish cuticle. It is imported packed in bales, sometimes mixed with other roots, from which, however, it is easily distinguished. It is inodorous. When chewed, it seems at first to be insipid, but after a few seconds it excites a glowing heat, and a pricking sensation on the tongue and lips, which remains for 10 or 12 minutes. The pieces break with a short resinous fracture; the transverse section presenting a thick brown bark, studded with black shining points, and a pale yellow radiated inside. It is used in medicine as a stimulant.—(*Thomson's Dispensatory*.) The price varies, including the duty (6d.), from 2s. to 2s. 6d. per lb.

PENCILS (Ger. *Pinssel*; Du. *Pinsselen*; Fr. *Pinceaux*; It. *Pennelli*; Sp. *Pinceles*), the instruments used by painters in laying on their colours. They are of various kinds, and made of various materials; some being formed of the bristles of the boar, and others of camel's hair, the down of swans, &c.

PENCILS, BLACK LEAD. See BLACK LEAD PENCILS.

PENKNIVES (Ger. *Federmesser*; Fr. *Canifs*; It. *Temperini*; Sp. *Corta plumas*), small knives, too well known to need any particular description, used in making and mending pens. The best and most highly ornamented penknives are manufactured in London and Sheffield.

PENNY, formerly a silver, but now a copper coin. This was the first silver coin struck in England by our Saxon ancestors, being the 240th part of their pound; so that its weight was about 22½ grains Troy.

PENS (Fr. *Plumes d'écriture*; Ger. *Schreibfedern*; It. *Penne da scrivere*; Rus. *Peru Stodol*), well known instruments for writing, usually formed of the quills of the goose, swan, or some other bird. Metallic pens have been occasionally employed for a lengthened period; but it is only within these few years that they have been extensively introduced. They are now, however, manufactured in vast quantities, and of an immense variety of forms. But though they have superseded, to a very considerable extent, the use of quills, and have some peculiar advantages, it does not appear possible to give them the elasticity of the quill, nor to fit them so well for quick and easy writing on common descriptions of paper.

PENNYWEIGHT, a Troy weight, being the 20th part of an ounce, containing 24 grains.

**PEPPER** (Fr. *Poivre*; Ger. *Pfeffer*; Du. *Peper*; It. *Pepe*; Sp. *Pimienta*; Rus. *Perez*; Lat. *Piper*), the berry or fruit of different species of plants, having an aromatic, extremely hot, pungent taste, used in seasoning, &c. The following sorts of pepper are met with in commerce:—

**I. BLACK PEPPER** (Fr. *Poivre*; Ger. *Schwarzen pfeffer*; It. *Pepe negro*; Sp. *Pimienta*; Sans. *Mercha*; Hind. *Gol-mirch*; Malay, *Lada*; Jav. *Mariha*), the fruit of a creeping plant (*Piper nigrum*), one of the pepper genus, of which there are upwards of 80 species. It is cultivated extensively in India, Siam, the Eastern islands, &c. It requires the support of other trees, to which it readily adheres. It climbs to the height of 20 feet; but is said to bear best when restrained to the height of 12 feet. It begins to produce at about the 3d year, and is in perfection at the 7th; continues in this state for 3 or 4 years; and declines for about as many more, until it ceases to be worth keeping. The fruit grows abundantly from all the branches, in long small clusters of from 20 to 50 grains; when ripe, it is of a bright red colour. After being gathered, it is spread on mats in the sun, when it loses its red colour, and becomes black and shrivelled as we see it. The grains are separated from the stalks by hand rubbing. That which has been gathered at the proper period shrivels the least; but if plucked too soon, it will become broken and dusty in its removal from place to place. The vine produces two crops in the year; but the seasons are subject to great irregularities.

Pepper should be chosen of a pungent aromatic odour, an extremely hot and acrid taste, in large grains, firm, sound, and with few wrinkles—for of these it always has some. Reject that which is shrivelled, or small grained, or which on being rubbed will break to pieces.

In point of quality, the pepper of Malabar is usually reckoned the best; but there is no material difference between it and that of Sumatra, and the other islands. In the market of Bengal, where they meet on equal terms, the produce of Malabar is generally about 2 per cent. higher than the other. In Europe, there is generally a difference of  $\frac{1}{4}$  per lb. in favour of Malabar; but in China they are held in equal estimation.

Black pepper sold ground, is said to be often adulterated with burnt crust of bread.

**II. WHITE PEPPER** is made by blanching the finest grains of the common black pepper by steeping them for a while in water, and then gently rubbing them, so as to remove the dark outer coat. It is milder than the other, and is much prized by the Chinese; but very little is imported into England.

**III. CAYENNE PEPPER** is the produce of several varieties of the *Capsicum*, an annual plant, a native of both the Indies. The best, which is brought home from the West Indies ready prepared, is made from the *Capsicum baccatum* (bird pepper). It has an aromatic, extremely pungent, acrimonious taste, setting the mouth, as it were, on fire, and the impression remaining long on the palate. It is sometimes adulterated with muriate of soda; and sometimes with a very deleterious substance, the red oxide of lead; but this fraud may be detected by its weight, and by chemical tests. — (See *Chemists*.)

**IV. LONG PEPPER**. — This species is the produce of a perennial (*Piper longum*), a native of Malabar and Bengal. The fruit is hottest in its immature state; and is therefore gathered while green, and dried in the sun. It is imported in entire spikes, which are about  $1\frac{1}{2}$  inch long. It has a weak aromatic odour, an intensely fiery pungent taste, and a dark grey colour. The root of long pepper is a favourite medicine among the Hindoos.

The quantities of the last 3 species of pepper imported are quite inconsiderable, compared with the quantity of black pepper. — (*Milburn's Orient. Com.*; *Ainslie's Mat. Indica*; *Thomson's Dispensatory*, &c.)

**Trade in Pepper.** *Consumption of, and Duties on, in England.* — Pepper is extensively used, all over Europe and the East, as a condiment. It was originally imported into this country by way of the Levant (see *anté*, p. 517.); and for many years after the establishment of the East India Company, it formed the most important article of their imports. In nothing has the beneficial effect of opening the Indian trade been so unequivocally displayed as in the instance of pepper. The private traders have resorted to new markets, and discovered new sources of supply, which had hitherto been wholly unexplored; so that there has been not only a very great increase in the quantity of pepper brought to Europe, but also a very great fall in its price, which does not now exceed a third part of what it amounted to in 1814!

Pepper for a lengthened period was one of the most grossly over-taxed articles in the British tariff. Until 1823, the duty was 2s. 6d. per lb. — a duty so exorbitant, that one would be inclined to think it had been imposed to put a total stop to the use of the article. In 1826, the duty on pepper from a British possession was reduced to 1s. per lb.; but even this duty, as compared with the price of the article (3d. to 4d. per lb.), was quite oppressive, amounting to no less than from 300 to 400 per cent.; so that it was further and most properly reduced in 1837, to 6d. per lb. And in consequence principally of these reductions, the entries of pepper for home consumption,

which, previously to 1826, had not amounted to 1,450,000 lbs. in any one year, amount at present to about 2,700,000 lbs. ! Still, however, the duty as compared with the price of pepper, is decidedly too high ; and should not in fact, exceed 2*d.* or at most 3*d.* per lb. Were the duty reduced to this amount, pepper would become accessible to the lower classes, to whom its free use would be of much importance ; and if so, the probability is, that the consumption would in no very lengthened period be doubled or more, which would either prevent the revenue from sustaining any loss by such a measure, or make it not worth mentioning.

Account of the Quantities of Pepper imported into the U. Kingdom during each of the 8 Years ending with 1842, specifying the Countries whence it was brought, and the Quantities brought from each ; and specifying also the Quantities re-exported and retained for Consumption.

*Supply of Pepper.* — The following instructive details with respect to the supply of pepper are taken from the *Singapore Chronicle* ; to which they were contributed by John Crawford, Esq. — than whom there can be no more competent authority as to such subjects.

Of all the products of the Eastern islands, and of the countries immediately in their neighbourhood, in demand among strangers, black pepper is the most important, both in value and quantity.

The pepper countries extend from about the longitude of 96° to that of 118° E., beyond which no pepper is to be found ; and they reach from 5° S. latitude to about 12° N., where it again ceases. Within these limits we have Sumatra, Borneo, the Malayan peninsula, and certain countries lying on the east coast of the Gulf of Siam.

The whole produce of the island of Sumatra is estimated not to fall short of 168,000 piculs of 132½ lbs. each ; the south-west coast being said to produce 150,000, and the north-east coast 18,000 piculs.

The pepper ports on the north-east coast of Sumatra are Lankat and Dellit, with Sardang. The first 2 produce 15,000 piculs, and the latter 3,000 annually. The cultivation is carried on by the Batta nation in the interior.

The ports on the south-west coast, and the amount of their produce, as given in a recent estimate, are as follows : viz. port and district of Trumah, 40,000 ; district of Pulo Dua, 4,000 ; ditto of Ciuat, 30,000 ; coast from Tapat Tuan to Susu, 33,000 ; port of Susu, 1,000 ; Kuala Batta, 20,000 ; Analabu, 2,000 ; districts to the north of Analabu, 20,000 ; making in all, 150,000 piculs.

Here it is of importance to remark that the culture and production are extremely fluctuating.

During the last pepper season, there obtained cargoes on the west coast of Sumatra, 27 American ships, 6 country traders, 4 large French ships, besides the ships belonging to the East India Company, which generally take away 600 tons. Nearly the whole of this trade is in the hands of Europeans or Americans ; the pepper finds its way to Europe, to America, and in a small proportion to China.

The north-east coast of Sumatra, from Pedier down to the Carlmons, is estimated, as already mentioned, to produce 18,000 piculs. Prince of Wales Island is the principal *dépôt* for this, from whence the greatest part is exported to India and China. The produce of Prince of Wales Island itself is about 15,000 piculs.

Of the islands at the mouth of the Straits of Malacca and Singapore, Bintang, on which Rhio is situated, and adjacent islands, produce 10,000 piculs ; and Lingga about 2,000. A large proportion of this is brought to Singapore, which exported last year about 21,000 piculs : some part to Bengal and China, but principally to Europe direct, in free traders.

The west coast of the Malayan peninsula produces no pepper, with the exception of about 4,000 piculs afforded by the territory of Malacca.

On the east coast of the peninsula, the production of pepper is very considerable. The ports of Patani and Calantan — chiefly the latter — yield about 16,000 piculs annually, and Tringnan about 8,000. A portion of this is brought to Singapore and Penang ; but we believe the greater proportion goes direct to China in junks, of which 3 large ones frequent Tringnan annually, and 1 Calantan. The Americans, too, occasionally visit these ports. In the year 1821, 3 vessels of considerable burden obtained cargoes.

The east coast of the Gulf of Siam, from the latitude of 10° to that of 12½° N., affords an extensive produce of pepper. This coast is scarcely known, even by name, to the traders of Europe. The principal ports here are Chantibun, Tungyal, Pongsom, and Kampop ; the first 2 being under the dominion of Siam, and the latter under that of Kamboja. The whole produce is estimated at not less than 60,000 piculs ; 40,000 of which are brought at once to the capital of Siam as tribute to the king, and the whole finds its way to China in junks. It remains only to estimate the produce of the island of Borneo. The whole produce of Borneo is estimated at about 20,000 piculs ; of which a large share is carried to China direct in junks, some by Portuguese vessels ; and about 7,000 piculs are now annually brought by the native craft of the country itself to Singapore in the course of that free trade, which is happily flourishing at this settlement. The data which have been stated, will enable us to estimate the whole production of the Malayan Archipelago, including that of the peninsula of Malacca, and that of the east coast of the Gulf of Siam, at 308,000 piculs ; and as there is no other part of the world that affords pepper, excepting the western coast of the peninsula of India, and this affords but 30,000 piculs, or less than 1-10th part of what the places we have enumerated produce, we have, accordingly, at one view, the whole production of the earth, being 338,000 piculs, or 45,066,666 lbs. avoirdupois. The average price of pepper has been lately about 9 Spanish dollars a picul ; so that the whole value drawn into India from Europe, China, and the New World, on account of this single commodity, is 3,042,000 dollars. The quantity given in this statement may appear enormous ; but if meted out to the whole population of the globe, or to 1,000,000,000 of people, it would be found that the average annual consumption of an individual would amount to no more than 223 grains.

Mr. Crawford has more recently supplied us with a revised estimate of the production of pepper as follows : —

	<i>Lbs.</i>		<i>Lbs.</i>
Sumatra (west coast) - - -	30,000,000	Slam - - - -	8,000,000
Do. (east do.) - - -	8,000,000	Malabar - - - -	4,068,000
Islands in the Straits of Malacca - - -	3,600,000		
Malay peninsula - - -	3,733,333		
Borneo - - - -	2,666,667	Total - - - -	50,000,000

The localities in the previous estimate are quite correct ; and we, therefore, did not think it would be right to suppress it.

PERCH, a long measure, 16½ feet in length. — (See *WRIGHTS AND MEASURES*.)

**PERIODICAL PUBLICATIONS.** These, as the name implies, are publications which appear at fixed periods or stated intervals, and consequently include newspapers, monthly and other magazines, quarterly reviews, and journals, and all such books as appear at monthly or other intervals. But the term "periodical publications" is usually understood in a more confined sense, or as comprising only magazines and such political, literary, and scientific journals as appear at regular intervals, without including newspapers or works published in parts.

Even when thus restricted, this is a very extensive and important department of literature. No doubt a vast deal of trash gets into print by the agency of magazines that might not otherwise see the light ; but most part of these publications contain at the same time some superior articles ; and a few are ably conducted and embrace a wide range of topics. Since the establishment of the *Edinburgh Review* in 1802, the quarterly journals, especially those that embrace politics and literature, have risen to great eminence, and have had a powerful influence over the public mind. At present, however, and for some time past, the influence of this class of journals has been declining. An ably conducted daily paper is, at this moment, by far the most powerful engine the press can bring into the field.

In a mercantile point of view periodical literature is of more importance than most persons would probably be at first disposed to admit. We have inquired with some care into the subject, and we are inclined to think that the following estimate of its extent and value in 1843 may be relied on with pretty considerable confidence.

*Monthly Magazines.* — These in the U. Kingdom amount, including all descriptions, to about 200 ; and taking their average price at 1s. 2d., and their average sale at 1,500 copies, their produce will be 17,500*l.* a month, and 210,000*l.* a year.

*Quarterly Journals.* — There are 27 of these ; and taking the average price of each at 5s., and their average sale at 2,000 copies, they will produce 13,500*l.* a quarter, and 54,000*l.* a year. Hence, supposing these estimates to be nearly accurate, the annual produce of the sale of periodical publications (exclusive of what they yield by advertisements) will amount to about 264,000*l.*

**PERMIT**, a licence or instrument, granted by the officers of excise, certifying that the excise duties on certain goods have been paid, and permitting their removal from some specified place to another.

The acts relative to permits were consolidated by the stat. 2 Will. 4. c. 16. The commissioners of excise provide moulds or frames for making the paper used in the printing of permits, which have the water mark "Excise Office" visible in its substance ; and the counterfeiting of such frames or paper, or the having the latter in one's possession without being able satisfactorily to account for it, are felonies punishable by transportation. Permits are not delivered except on the receipt of "request notes," specifying the places from and to which the goods are to be conveyed. A penalty of 800*l.* is to be imposed on all persons counterfeiting "request notes," or fraudulently procuring or misapplying permits, and all goods, for the removal of which permits are necessary, if they be removed without them, are to be forfeited, and the various parties engaged in their removal are to be each amerced in a penalty of 500*l.* It is needless to dwell on the extreme inconvenience that would result from such regulations were permits in extensive use. But such is not the case, and they are now wholly dispensed with, except in the case of a very few articles.

**PERRY**, a fermented liquor made from pears, in the same manner as cider from apples. The pears best fitted for producing this liquor are exceedingly harsh and tart ; but it is itself pleasant and wholesome. — (See *CIDR*.)

**PETERSBURG**, the modern metropolis of the Russian empire, situated at the confluence of the river Neva with the eastern extremity of the Gulph of Finland, in lat. 59° 56' 23" N., lon. 30° 18½' E. Population, 480,000.

This flourishing emporium was founded by Peter the Great, whose name it bears, in 1703. In the same year, the first merchant ship that ever appeared on the Neva arrived from Holland : and the Czar, to mark his sense of the value of such visitors, treated the captain and crew with the greatest hospitality, and loaded them with presents. In 1714, 16 ships arrived at Petersburg ; in 1730, the number had increased to 180 ; and so rapid has been the progress of commerce and civilisation in Russia since that period, that, at present, from 1,200 to 1,500 ships annually enter and clear out from Petersburg !

It is much to be regretted, that, although favourable to commerce, the situation of Petersburg is, in other respects, far from good. The ground on which it stands is low and swampy ; it has, on different occasions, sustained great injury from inundations ; and the country round is, generally speaking, a morass and forest, so that almost

every thing required for the subsistence of the inhabitants must be brought from a distance. No one less bold and daring than Peter the Great would have thought of selecting such a situation for the metropolis of his empire; and none possessed of less

*References to Plan.*—A, Cronslot; B, Men-of-war haven; C, Tolboken light-house, 88 feet high, furnished with a fixed light. Soundings in fathoms. It appears, from the above plan, that the depth of water between Cronstadt and Petersburg does not, in some places, exceed 6 or 7 feet; but it is increased about a foot by continued westerly, and is diminished about as much by continued easterly, winds. Cronstadt is, therefore, as already observed, in reality, the port of Petersburg; and has, indeed, no separate Custom-house or jurisdiction. The transfer of goods between the two places by means of lighters has of late years been materially facilitated by the employment of steam tugs.

power and resolution could have succeeded in overcoming the all but insuperable obstacles which the nature of the country opposed to the completion of his gigantic schemes.

Cronstadt, situated on a small island about 20 miles W. of Petersburg, may, in some measure, be considered as the port of the latter. Almost all vessels bound for Petersburg touch here; and those drawing above 8 feet water load and unload at Cronstadt; the goods being conveyed from and to the city in lighters, the charges of which vary according to the demand at the time. The merchants' harbour at Cronstadt is fitted to contain about 600 ships; but it is exposed to the westerly winds. Cronstadt is strongly fortified, and is the principal station of the Russian fleet. Vessels bound for Petersburg must pass by the narrow channel to the south of the island, commanded by the fortifications of Cronstadt on the one side, and of Cronslot on the other. The woodcut on the opposite page, taken from the official survey published by the Russian government, gives a better idea of the situation of Petersburg, Cronstadt, &c. than could be derived from any description.

*Trade, &c.*—Petersburg has the most extensive foreign trade of any city in the north of Europe. This arises from its being the only great maritime outlet on the Gulph of Finland, and from its vast and various communications with the interior of the country. Few countries have such an extent of internal navigation as Russia. By means partly of rivers, and partly of canals, Petersburg is connected with the Caspian Sea. Goods are conveyed from the latter to the capital, through a distance of 1,494 miles, without once landing them! The iron and furs of Siberia, and the teas of China, are received at Petersburg in the same way; but owing to the great distance of those countries, and the short period of the year during which the rivers and canals are navigable, they take 3 years in their transit. Immense quantities of goods are also conveyed during winter upon the ice, in sledges, to the different ports, and to the nearest *pristans*, or places in the interior where barks are built for river or canal navigation. They are put on board in anticipation of the period of sailing, that the barks may be ready to take advantage of the high water, by floating down with the current as soon as the snow and ice begin to melt. The cargoes carried up the river into the interior during summer are principally conveyed to their ultimate destinations by the sledge roads during winter. The conveyance by the latter is generally the most expeditious; and it, as well as the internal conveyance by water, is performed at a very moderate expense.

The barks that come from the interior are mostly of a very rude construction, flat-bottomed, and seldom drawing more than 20 or 30 inches water. When they arrive at their destination, they are sold or broken up for fire-wood. Those that leave the ports for the interior are of a superior description, and are comparatively few in number; the commodities imported, being at an average, of much greater value relatively to their bulk and weight than those that are exported.

*Principal Articles of Export and Import.*—The principal articles of export are tallow, hemp and flax; grain, particularly wheat; linseed, timber; iron and copper; hides, potashes, bristles, hempseed oil, furs, leather; fox, hare, and squirrel skins; canvass and coarse linen, cordage, caviare, wax, isinglass, quills, tar, &c. Tallow, both for candles and soap, is more largely exported from this than from any other port in the Baltic or elsewhere, and is an article of great commercial importance. — (See TALLOW.) The hemp is of good quality, though inferior to that of Riga: it is assorted, according to its quality, into *clean*, or *firsts*; *outshot*, or *seconds*; and *half-clean*, or *thirds*. The first sort should be quite clean, and free from spills; the second is less so; and the third, or *half-clean*, contains a still greater portion of spills, and is, besides, of mixed qualities and colours. Russian flax is much esteemed for the length of its fibre; it is naturally brownish, but becomes very white after the first bleaching. Three qualities are distinguished; viz. 12 head, 9 head, and 6 head. — (See HEMP, and FLAX.) Iron is of very good quality, and is preferable to that from the other Russian ports: there are two kinds, old and new sable; the former is the best. The grain trade between this country and Petersburg has latterly become of very considerable importance; and Russia will, probably, continue to be one of the principal sources of our foreign supplies. It will be seen from the subjoined accounts that we drew from her in 1839 no fewer than 371,693 quarters wheat, and 316,823 ditto oats, and that the imports in 1840 and 1841 were also very large. A very considerable proportion of this supply was, however, derived from Odessa, Taganrog, Archangel, and other ports, exclusive of Petersburg. The *Russian wheat*, so called to distinguish it from the *azemaia*, or soft wheat, and the *kubanka*, or hard wheat, is the lowest description of wheat shipped from Petersburg. It is very small-grained, and dingy coloured; being, though sound, unfit for the manufacture of fine bread. The *azemaia* is of a larger, though still not a large grain, and better colour, and has of late been extensively imported into England. The *kubanka*, or hard wheat, is a large semi-transparent grain. Its hardness has nothing of the flinty character of the Spanish

hard wheat, which it most resembles. When first brought to London, the millers objected to it, on account of the difficulty experienced in grinding it; but it is now much esteemed. All the Russian wheats are well calculated for keeping, either in granary, or when made into bread: but the kubanka has this quality in a peculiar degree; and is in great demand for mixing with other wheats that are old, stale, or out of condition. A shipment of 100 chetverts of wheat in Petersburg is found, when delivered here, to yield about 72 Imperial quarters. The principal imports are sugar, especially from the Havannah (the importation of refined sugar was prohibited in 1822); coffee, but not in large quantities; madder, indigo, cochineal, and dye woods; cotton stuffs and yarns, — the latter being by far the principal article sent from this country to Russia; woollens, oils, spices, salt, wine, lead, tin, coal, fine linen, from Holland and Silesia, &c.

Rapid as has been the increase of Russian commerce, its progress has been materially retarded by restrictions on importation. Considering the immense variety of valuable natural productions with which Russia abounds, the thinness of the population, and the slavery and ignorance of the great bulk of the people, nothing can be more childish than the attempt to render them, by dint of Custom-house regulations, rivals of the English and Germans in manufacturing industry! However, it must be confessed, that in enacting prohibitions and restrictions, they are only following a line of policy which more advanced countries have shown but little disposition to abandon. It should also be observed that, except in a few great towns, a middle class is all but unknown in Russia. And the population being consumers of coarse and heavy rather than of fine and finished goods, restrictions on importation are less injurious than might at first be supposed. Whether, in fact, importation be free or restricted, the great bulk of the Russian people will, for a lengthened period, be consumers of home made articles. Indeed the frontiers of the empire are far too extensive, and the functionaries too corrupt, to enable high duties on foreign produce to be levied to any great extent, or prohibitions of its importation to be made effectual, provided there were any considerable internal demand for it.

But, on the whole, the policy of Russia, in so far at least as respects commercial matters, has become more liberal of late years. Many articles are at present admitted for consumption that were formerly wholly excluded; and though the duties on various articles have been increased, there are others, and those too of considerable importance, on which they have been reduced. The Russian government wisely admits machinery of all sorts, including ships with their tackle, steamers, &c., duty free; and most articles necessary to the successful prosecution of art and science are treated in the same way. We, therefore, are not without hopes that her government may also at no very distant period see the advantage of materially reducing the duties on the superior descriptions of manufactured goods. It is true that, having by far the largest share of the foreign trade of Russia, this country will gain most by any modifications that may be made in her tariff. The Russian government is well aware of this, and may naturally enough suspect that we are more attentive to our own than to Russian interests when we recommend the repeal of restrictions; and certainly this suspicion will not be weakened by the very objectionable manner in which matters relating to Russia are too often discussed in this country. No one acquainted with our history during the last dozen years, can fail to know that a party amongst us have exerted themselves to the utmost to embroil the two countries; and have even gone so far, in furtherance of their object, as to establish journals apparently for the sole purpose of abusing and misrepresenting the government and people of Russia. This conduct is at once foolish and flagitious. We are not going to undertake the defence of Russia, but we have yet to learn what she has done to injure us; and her conquests, how objectionable soever in some respects, have, in most instances, materially promoted the interests of commerce and civilisation. The Russian government has, however, acted wisely as well as magnanimously in despising the abuse alluded to. Instead of being enemies or estranged from each other, there are no two nations between whom so intimate a friendship should prevail as Russia and England. They have no really conflicting interests; she cannot injure us, nor we her. The products of the one country are admirably suited for the markets of the other; and a farther modification of protecting duties in Russia, accompanied, as it should be, by the adjustment of our regulations as to corn and timber on sound principles, would add largely to the intercourse between the two countries, and establish it on solid foundations.

*Inspection of Goods.* — At Petersburg, Riga, and other Baltic ports, when goods are brought from the interior to be shipped, they are inspected and classified according to their qualities, by officers (*brackers*) appointed by government for that purpose, and sworn to the faithful performance of their duty. All sorts of timber, linen and canvass, flax and hemp, linseed and hempseed, ashes, wax, &c. are subject to such inspection. They are generally divided into three qualities: *Krohn* (crown), or superior; *Brack*, or

middling : and *Bracks-Brack*, or inferior. This classification is said to be, in most cases, made with considerable fairness. A factor or commission agent in Russia, instructed to buy, on account of his correspondent in England or Holland, a specified quantity of any description of produce subject to the official visit, is not liable to any action in the event of the article being found upon delivery to be of inferior quality, provided he produce a certificate to show that it had been officially inspected, or *bracked*. But a factor is at liberty, should any article delivered to him be manifestly defective, to name 1 or 2 other *brackers* to decide whether the article be merchantable or not.

*Native and Foreign Merchants, &c.* — Every Russian carrying on trade must be a burgher, and have his name registered in the burghers' book ; he thus acquires an unlimited freedom of trade. All whose names are in the burghers' books, are either townsmen who have property within the city, or members of a guild. There are three guilds. Those belonging to the first must possess from 10,000 to 50,000 roubles: these may follow foreign trade, are not liable to corporal punishment, and may drive about the city in a carriage drawn by 2 horses. Those belonging to the second guild declare themselves possessed of from 5,000 to 10,000 roubles ; they are confined to inland trade. A capital of from 1,000 to 5,000 roubles entitles its owner to admission into the third guild, which comprises shopkeepers and petty dealers. The rates paid by the members of these guilds amount to 1 per cent. upon their declared capital, the "statement of which is left to the conscience of every individual." Burghers are not obliged to serve in the army, but may provide a substitute, or pay a fine. The *guests*, or foreign merchants, who enrol themselves in the city register on account of their commercial affairs, enjoy privileges nearly similar to those enjoyed by the members of the first guild.

None but native Russians are allowed to engage in the internal trade of the country ; and hence a foreigner, who imports goods into Russia, must sell them to Russians only, and at the port where they arrive. A few foreigners, indeed, settled in Russia, and having connections with the natives, do carry on a trade with the interior ; but it is contrary to law, and the goods are liable to be seized.

The merchants engaged in foreign trade are mostly foreigners, of whom the English are the principal. The peculiar privileges formerly enjoyed by the latter are now nearly obsolete ; and their rights, in common with those of other foreigners, are merely those of *guests*. The English factory is, at present, little more than a society formed of some of the principal English merchants, several of whom, however, do not belong to it : its power extends to little else than the management of certain funds under its control.

*Purchase and Sale of Commodities, &c.* — Owing to the scarcity of capital in Russia, goods the produce of the country are frequently paid for in advance ; and foreign goods are most commonly sold upon credit. From the month of November till the shipping season in May, the Russians who trade in flax, hemp, tallow, bristles, iron, &c. either come themselves to Petersburg, or employ agents to sell their goods to foreigners, to be delivered, according to agreement, in May, June, July, or August. The payments are made according to the circumstances of the sellers and buyers ; sometimes the buyer pays the whole amount, in the winter months, for the goods which are to be delivered in the summer or autumn ; and sometimes he pays a part on concluding the contract, and the remainder on delivery of the goods. The manufacturers and dealers in linen usually come to Petersburg in March, and sell their goods for ready money.

Foreign goods were formerly almost entirely sold at a twelvemonth's credit, and some at a still longer term ; but of late years several articles, as coffee and sugar, are sold for ready money ; still, however, the great bulk of foreign goods for the supply of the interior is sold on credit. Most part of the Russians who buy goods on credit of foreigners, for the use of the interior, have no other connection or trade with Petersburg, than merely coming there once or twice a year to make purchases : which having accomplished, they set off with the goods, and the foreigner neither sees nor hears of them again till the bill becomes due.

It is obvious, from this statement, that experience and sagacity are nowhere more requisite in a merchant than here. He has nothing, in fact, but his own knowledge of the native dealers to depend upon : and it is highly creditable to the Russians, that foreigners do not hesitate to trust them with immense sums on such a guaranty. A foreign merchant, carrying on business in Russia, must also be acquainted with the customary forms and obligations of contracts ; the mode of making payments ; the many formalities that encumber, and sometimes turn aside, the course of justice ; the spirit, still more than the letter, of the tariff and the Custom-house regulations ; the privileges claimed by the Crown, and the different orders ; with a variety of other particulars, which attentive able men may learn on the spot, and nowhere else.

Another circumstance connected the British trade is too curious to be passed in silence. Every mercantile house in Petersburg employs certain men, called in the language of the country *artelchicks*, who are the counting-house men, and employed by every merchant to collect payment on bills, and to receive money, as well as, in many instances, to pay it in very considerable sums. This is an important part of their trust. There being no bankers in Russia, every mercantile house keeps its own cash ; and as the payments between merchants, and for bills of exchange, are made entirely of bank notes of no higher value than 5, 10, 25, 50, and 100 roubles — most of them in so tattered a state as to require several hours to count over a sum of 2,000*l.* or 3,000*l.* — this business is performed by *artelchicks* ; and very few instances have occurred of loss by their inattention, either in miscounting the notes, in taking false notes, or, where they are much torn, in receiving parts of different bank notes.

These *artelchicks* are also employed to superintend the loading and unloading the different cargoes ; they receive the most valuable into the warehouse, where they are left solely under their care ; and in these warehouses not merely merchandise, but often large quantities of dollars, are deposited. These Russians are mostly natives of Archangel and the adjacent governments, of the lowest class ; are often slaves, generally of the Crown : and the only security of the merchant arises in some degree from the natural reluc-

tance of the Russian to betray confidence reposed in him; but in a much greater from their association, which is called an arte.

"An arte consists of a certain number of labourers, who voluntarily become responsible, as a body, for the honesty of each individual. The separate earnings of each man are put into the common stock; a monthly allowance is made for his support; and at the end of the year the surplus is equally divided. The number varies in different associations from 50 to 100; and so advantageous is it considered to belong to one of these societies, that 500 and even 1,000 roubles are paid for admission. These societies are not bound by any law of the empire, or even written agreement; nor does the merchant restrain them under any legal obligation; yet there has been no instance of their objecting to any just claim, or of protecting an individual whose conduct had brought a demand on the society."—(*Cox's Travels in Russia*, vol. iii. p. 315.)

Few Russian merchants engage in foreign trade. It is carried on principally in foreign bottoms, of which by far the larger proportion are English. Marine insurances are generally effected in London or Amsterdam; there being no establishment for that department of business in Russia. An insurance company against fire has been established in Petersburg, and enjoys several privileges. It is a joint stock company, divided into actions or shares. It has been very successful; and its shares are at a high premium. No insurance on houses or goods in Russia, made in a foreign country, can be legally recovered; no official documents of loss being allowed to be furnished for such a purpose. A life insurance company has, also, been established.

**Money.**—Accounts are kept at Petersburg, and throughout Russia, in roubles of 100 copecks.

The only gold coin at present struck is the  $\frac{1}{2}$  Imperial, or 5 rouble piece, = 15*s.* sterling very nearly. The silver rouble, worth 3*s.*  $\frac{1}{2}$ d. sterling very nearly, was declared, by a ukase issued in 1839, to be worth 31 paper roubles.

But another ukase, issued on the 14th June, 1845, directs that the old bank notes, and the sum of 995,776,310, being equal, at the exchange of 3*s.* to 170,221,903 silver roubles, should be called in, and replaced by an issue of 170,221,000 *billets du credit*, to be exchangeable at the pleasure of the holder for silver roubles. This is a most important regulation, and if it be fully carried out, the distinction between silver and paper roubles will disappear; at the same time that additional security will be given to all sorts of industrious undertakings, and to the government.

**Weights and Measures.**—The Russian weights are the same for gold, silver, and merchandise, viz.—

3 Solotniks = 1 Loth.      40 Poods = 1 Pood.  
32 Loths = 1 Poud.      10 Poods = 1 Berkovits.

The Russian pound contains, according to Kelly, 6318.5 English grains. Hence, 100 lbs. Russian = 90.9 lbs. avoirdupois = 40.93 kilog. The pood = 36 lbs. 1 oz. 11 drs., but among merchants it is reckoned = 36 lbs. According to

Nelkenbrecher, 100 lbs. Russian = 90.19 lbs. avoirdupois = 40.9 kilog. = 82.8 lbs. of Amsterdam = 84.44 of Hamburg.

The principal measure for corn is the chetwert, divided into 2 *osmin*, 4 *pejacks*, 8 *chetvericks*, or 64 *garnits*. The chetwert = 5.55 Winchester bushels. Hence, 100 chetwerts = 74.4 English quarters.

In liquid measure,      5 Wedros = 1 Anker.  
11 Tarky = 1 Krashka.      6 Ankers = 1 Oshoft.  
8 Krashka = 1 Wedro.      4 Oshoft = 1 Pipe.  
40 Wedros = 1 Sorokery.      In long measure,  
The wedro =  $\frac{1}{2}$  English.      16 Werzhok = 1 Arshen.  
wine gallons.      3 Arshen = 1 Sashen.  
15 1/3 Bottles = 1 Wedro.      500 Sashen = 1 Verst.

1 saashen = 7 English feet. 1 arshen = 28 English inches. 100 Russian feet = 114 English feet. The verst, or Russian mile, = 5 furlongs 12 paces. The English inch and foot are used throughout Russia, chiefly, however, in the measuring of timber.—(*Kelly's Compend*, art. *Russia*; *Nelkenbrecher*, *Manual Universel*.)

In fixing freight to England, a ton is 63 poods of hemp, flax, tallow, iron, copper, and shales; 44 poods of bristles, isinglass, leather, and wax; 5 dozen of dials; 3,500 hare skins; 3 chetwerts of wheat or linseed; and 60 pieces of sail-cloth.

The following regulations for the importation of foreign goods are strictly enforced:—

All goods imported must be accompanied by the following documents:—

1. The declaration of the captain, according to the form ordered by the Custom-house.

2. An attestation from the Russian consul, and, where there is no consul, from the Custom-house of the place, of the quantity and quality of the goods, and a declaration that they are not the produce, manufacture, or property of an enemy's country.

3. Bills of lading of all goods, in which the weight, measure, or quantity of each package must be specified. In case the bills of lading are not exactly after this regulation, the goods pay double duty as a fine. In case more is found than specified in the bill of lading, the surplus is confiscated; if less is found, the duty must be paid on the quantity specified. (Of wine, it is not sufficient to specify the number of pipes or hogsheads

only, but also their contents in gallons, &c. Of lemons, the number in each box must be specified. Of manufactured goods, the measure of each piece must be specified, and the number of pieces in each bale. It is indifferent whether the gross or the net weight be specified. If the packages be all of the same weight, measure, or contents, a general specification will do; as, for example, 100 casks alum, of 17 pound each. Of woods, the weight of the whole need only be mentioned. Of goods of small bulk, as pepper, &c., it is sufficient to state the weight of every 5 or 10 bales, but with specification of the bill numbers. There must not be any erasures or blots in the bills of lading. All goods not accompanied by these documents, or where the documents are not according to the above regulations will be sent back.

Bills of lading may be made out either to some house, or to order.

The following charges have been fixed by the merchants of Petersburg:—

	Per cent.		Per cent.		Per cent.
Commission on sales and purchases	2	Charges on duty, paid inwards	4	Dues to be paid to the church, 10 roubles each vessel.	—
Extra charges on all goods	1	Ditto, paid outwards	4	Clearing of ships, of or under	—
Commission and extra charges for goods delivered up	2	Commission for collecting freight, or average inwards	3	25 last achip, 40 roubles each vessel.	—
Brokerage on sales and purchases	2	Commission for procuring freight	2	25 to 50 do. 60 —	—
Ditto on bills	2	outwards	5	75 — 100 — 100 —	—
Ditto on freight, per ton, 60 copecks.	—	For clearances, 40 roubles.	—	100 — 150 — 150 —	—
Stamps	—			150 or above, 200 —	—

**Tare on Goods exported, as fixed by the Custom-house.**

Dry Goods.	Per cent.	Moist Goods.	Per cent.	Moist Goods.	Per cent.
In barrels or chests	10	Pressed caviare	13	Honey	17
In sacks	12	Soap	3	Travels	10
In mists, or sacks made of mats	3	Meat and salt fish	20	All other moist goods	17
Except if woollen leather, which is deducted	5	Tallow	10		

**Tare on Goods imported.**

Dry Goods.	Per cent.	Dry Goods.	Per cent.	Dry Goods.	Per cent.
In barrels or chests	10	In double sacks	4	In sacks and mats together	5
In vessels of glass or earthenware	30	In mats	3	In baskets	5
In sacks	2				

**Moist Goods imported.**—The following are some of the tares specified in the tariff:—

Olive oil in casks	17 per cent.	Cochineal must be weighed in the sacks after being taken from the casks; for every sack of from 4 to 7 poods.	2 lbs.
of Italy, in flasks and straw	20 —	sacks of from 8 to 3 1/2 poods	1 —
of France, in flasks and earthenware	40 —	Indigo in serons; every seron of from 3 1/2 to 7 poods	34 —
Salt fish in barrels	17 —	In 4 serons, 2 1/2 to 4 poods	20 —
And generally on all moist goods in barrels	17 —	of Guatemala in boxes	20 per cent.
in glass and earthenware	20 —		
<b>Miscellaneous Goods.</b>			
cotton twist in tules	6 —		
in chests and barrels	15 —		

Bills drawn in Russia, and payable after date, are allowed 10 days' grace: but if payable at sight, 5 days only: Sundays and holidays are included in both cases. The Julian calendar, or old style, is still retained throughout Russia. This is 12 days later than the new style; and in leap-years, 13 days, after the month of February.

**Port Charges.**—The regular charges which British ships have to pay at the ports of Petersburg and Cronstadt, comprise the following fixed dues and expenses, viz. lastage, passee, clearing at Cronstadt, address money, Petersburg and Cronstadt church money, Cronstadt expedition and allowance to the

Russia Company's agent, for all which a charge is made in the ship's account in one sum, proportionally to the ship's register tonnage, according to the following scale, viz. :—

For	61 tons register	-	-	Silver rouble.	For 312 to 341 tons register	-	-	Silver rouble.
61 to 81	-	-	-	48 0	342 to 361	-	-	125 0
82 to 101	-	-	-	56 0	362 to 381	-	-	141 14
102 to 121	-	-	-	61 14	382 to 401	-	-	159 14
122 to 141	-	-	-	66 28	402 to 421	-	-	174 0
142 to 161	-	-	-	74 0	422 to 441	-	-	182 0
162 to 181	-	-	-	79 14	442 to 461	-	-	197 14
182 to 201	-	-	-	84 28	462 to 481	-	-	212 0
202 to 221	-	-	-	92 0	482 to 501	-	-	228 0
222 to 241	-	-	-	97 14	502 to 521	-	-	244 0
242 to 261	-	-	-	102 28	522 to 541	-	-	260 0
262 to 281	-	-	-	110 28	542 to 561	-	-	276 0
282 to 301	-	-	-	115 14	562 to 581	-	-	292 0
302 to 321	-	-	-	123 14	582 to 600	-	-	308 0

In compiling this article, we have consulted *Schnitzler, Essai d'une Statistique Générale de la Russie*, pp. 133—157.; and his *Russie, Pologne, et Finlande*, pp. 187—289.; *Richard, Traité Général du Commerce*, ed. 1781. II. pp. 268—317.; *Tooke's View of Russia*, book 13.; *Coxe's Travels in the North of Europe*, 8vo ed. III. pp. 283—358. &c.; *Clark's Russian Trader's Assistant*, a valuable and useful work; *Supplément au Journal de St. Pétersbourg*, for 1842; *Consular Returns* from Petersburg and Odessa; but we have derived our principal information from the official returns published by government, and private communications of eminent Russian merchants.

PEWTER (Ger. *Zinn*, *Zinngeisserzinn*; Fr. *Etain*; It. *Stagno*; Sp. *Estano*, *Pelvro*; Rus. *Olovo*), a factitious metal used in making plates, dishes, and other domestic utensils. It is a compound, the basis of which is tin. The best sort consists of tin alloyed with about 1-20th or less of copper, or other metallic bodies, as the experience of the workmen has shown to be most conducive to the improvement of its hardness and colour, such as lead, zinc, bismuth, and antimony. There are 3 sorts of pewter, distinguished by the names of plate, trifle, and ley-pewter. The 1st was formerly much used for plates and dishes; of the 2d are made the pints, quarts, and other measures for beer; and of the ley-pewter, wine measures and large measures. — (*Ure*.)

**PHILADELPHIA**, a large city and sea-port of the United States, in Pennsylvania near the confluence of the rivers Delaware and Schuylkill, lat.  $39^{\circ} 57' N.$ , lon.  $75^{\circ} 10' 59'' W.$  Population, in 1840, 258,832.

**Harbour, Light-houses, Pilotage, &c.**—Vessels of the largest burden ascend the river as far as New-castle, but those drawing above 18 or 20 feet water cannot reach Philadelphia, on account of a bar a little below the city. The entrance to the magnificent bay formed by the embouchure of the Delaware, has Cape May on its north, and Cape Henlopen on its south side. The former, in lat.  $38^{\circ} 57' N.$ , lon.  $75^{\circ} 47' 45'' W.$ , is a sandy headland, rising about 12 feet above the level of the sea. It has recently been surmounted by a light-house 60 feet in height. The light revolves once a minute; an eclipse of 50 seconds being succeeded by a brilliant flash of 10 seconds. It is seen in clear weather from 20 to 25 miles off. Cape Henlopen, marking the southern boundary of the bay, is in lat.  $38^{\circ} 47' N.$ , lon.  $75^{\circ} 4' 45'' W.$  A little south from it is a hill, elevated about 60 feet above the level of the sea; and on it is erected a light-house, 72 feet in height, furnished with a powerful fixed light visible in clear weather 10 leagues off. To the N. of this principal light, and close to the extremity of the cape, a second light-house has been constructed, 36 feet above the level of the sea, which is also furnished with a fixed light, which may be seen at about 6 leagues off. The channel for large ships is between Cape Henlopen and the banks called the Overfalls. The navigation is, however, a little difficult, and it is compulsory on ships to take pilots. The latter frequently board them at sea; but if not, as soon as a ship comes between the capes, she must hoist the signal for a pilot, and heave to as soon as one offers to come on board.—(*Coulier sur les Phares* 2d ed. See post, for regulations as to pilotage.)

**Trade.**—The trade of Philadelphia is very extensive. She communicates by various canals (one of which, 39½ miles in length, unites her with Pittsburg, on the Ohio) and railways with the interior, and is the grand dépôt for the coal of the Union. The increase of the coal trade has, indeed, been quite unprecedented. Previously to 1825 no coal had been sent down the Schuylkill, and in that year only 5,206 tons were brought by that channel to Philadelphia, whereas in 1846 the quantity amounted to 1,145,583 tons, exclusive of about as much more supplied by other channels. Very large quantities of this coal are sent coastwise to other ports of the Union. Exclusive of coal and iron, the exports principally consist of wheat and wheat flour, Indian corn, of which immense quantities were sent to England in 1847, and other agricultural products, timber, and various species of manufactured goods. The principal imports are cotton, woolen, and silk goods; sugar, coffee, and tea; wines, brandies, spices, dye-stuffs, &c. In point of shipping, Philadelphia is the fourth port in the Union, being, in this respect, inferior only to New York, Boston, and New Orleans. The registered, enrolled, and licensed tonnage belonging to the port on the 30th June, 1847, amounted to 152,617 tons, of which upwards of a half was engaged in the coasting trade, which is very large. The total value of the articles imported into Pennsylvania from foreign countries in the year ending the 30th of June, 1847, amounted to \$9,587,516, and of the exports to \$8,844,391, of which \$8,263,311 were domestic produce.—(*Papers published by order of Congress*, 14th December, 1847.) The coasting trade of the port is, however, more extensive and of greater importance than its foreign trade.

There are numerous banks in Philadelphia, but they stand no higher in point of character than those in most other parts of the Union, and have over and over again suspended payments. The Bank of the United States had its head office here. Besides banks, there are numerous insurance companies, and joint-stock associations.

The following statement of the prices of shares in sundry banks and other public companies in Philadelphia, in September, 1836, and September, 1846, shows, better than any thing else could do, the vicious nature of the foundations on which they had been established.

In Pennsylvania, the dollar is worth 7s. 6d. currency; so that 1l. sterling = 1l. 13s. 4d. currency. — (See New York.)

Weights and Measures same as those of England.

*Regulations of the Port.*—If any master or captain of any ship or vessel, or other person, shall refuse or neglect to comply with the directions of the harbour master, in matters within the jurisdiction of his office, such person shall, for each and every such offence, severally forfeit and pay any sum not exceeding 100 dollars. And the said harbour master, shall in full compensation for his services be entitled to have, recover, and receive from the master, captain, owner, or consignee of each and every ship or vessel arriving at the port of Philadelphia (coasting vessels not exceeding the burden of 75 tons) the sum of 1 dollar for each and every voyage by such ship or vessel performed, and no more.

Every ship or vessel that may arrive in this harbour, and that shall come to anchor in the stream anywhere between Almond and Vine Streets, having previously caused her gunpowder, if any she had on board, to be landed as the law directs, may remain in that situation 24 hours, and no longer, taking care to lie as near to the island or sand bar as may be consistent with their safety. But if, from the circumstance of a vessel having servants on board, or from any other cause, it may be thought necessary or convenient to lie a longer time in the stream, then, and in every such case, the owner, master, pilot, or other person having the charge or direction of such vessel, shall remove her from opposite the city, and shall moor her, or cause her to be moored, to the northward of Vine Street, with 1 anchor and cable up and 1 anchor and cable down the stream; and in both the above-mentioned situations, the regulation contained in the next succeeding article to be duly attended to.

If any vessel properly moored in the stream shall have her anchor or cable overlaid by any other vessel in anchoring or mooring, the master or person having the care or direction of such last-mentioned vessel shall immediately, or as soon as may be after application made to him by the party aggrieved, cause the said anchor or cable so or lying to be taken up and cleared. When any ship or vessel shall be hauled in to any wharf or dock, or alongside of another vessel that may be lying at such wharf or dock, the owner, master, pilot, or whoever may have the command, care, or direction of her, shall have her securely made fast; and if outside of another vessel, shall get one good fast from each end of the vessel to the shore, with sufficient fender, between them and the inside vessel; and shall cause the flukes of their anchors to be taken on board; and, within 24 hours thereafter, cause her jib boom, spritsail-yard, main boom, sparker and ringtail booms, if any they have, to be rigged in, and their lower yards topped up, in such a manner as least to interfere with vessels passing.

If the fasts of vessels when moored at a wharf shall extend across a dock, so as to obstruct the passing or repassing of shallops, lighters, or other small boats, the master or other person having the command of such ship or vessel shall, upon the first application, immediately cause such fasts to be cast off or slackened down.

No outward-bound vessel, putting off from a wharf, shall lie longer in the stream between Vine Street and Almond, in the district of Southwark, above mentioned, than 24 hours. And if vessels lying at the end of wharfs so much interlock with each other as to prevent the vessels hauling in and out of docks, the master, owner, pilot, or other person having the charge of the same, shall, immediately on application from any person so wanting to haul his vessel in or out of docks abroad, have the vessel or vessels so interlocking moved in such a manner as to accommodate the one applied for: in which case the vessel making room for another to haul in or out shall have liberty to make her warps fast to the most convenient place adjacent, for a reasonable time; and all such vessels, when ordered or wanting to haul into a wharf or dock, or to make sail in order to proceed to sea, shall have the same privilege.

When any ship or vessel may be lying alongside any wharf, and not taking in or discharging, moved in such a manner as to permit any vessel that wants to unload or load, to come inside, next the wharf, until she discharges or loads her cargo; and the said vessel, when so discharged or loaded, shall haul outside and give way to the vessel that first occupied the wharf; provided that, from the 10th of December to the 1st of March, no vessel shall be compelled to move from her berth (only those at Gloucester Point pier), excepting to let vessels in and out of docks.

No ship or vessel loading or discharging hemp at any wharf, or within any dock, shall be allowed to have any fire on board;

neither shall any vessel lying outside or near her be permitted to have fire on board, while it may be considered dangerous. And no tar, turpentine, gum, or pitch shall be heaped on the wharf, or on board any vessel lying at any wharf within the limits of the city.

*Rate of Pilotage.*—Inwards, up to 15 feet, at 2-67 dollars per foot; above 15 feet, at 3-33 dollars.

Outwards, up to 15 feet, at 2 dollars; above 15 feet, at 2-67 dollars.

Every vessel arriving from, or bound to, a foreign port, as required by law to receive a pilot, or to pay half pilotage, in the wardens' office, where the master of every such vessel is required, under a penalty of 10 dollars, to make report within 36 hours after his arrival, and again before his departure, signing his name to said report in the wardens' book.

Every vessel of 75 tons and upwards arriving from, or bound to, any port within the United States, and the master of all such vessels, are bound as above.

The pilot of every vessel is required to inform the master of his having to report at the wardens' office.

All vessels obliged to receive a pilot are required to pay 10 dollars in addition, as winter pilotage, from the 5th of November to the 10th of March, both days inclusive.

Foreign vessels, (i.e. French, Spanish, Portuguese, Neapolitan, Danish, Russian, South American, and Mexican, &c.) pay 2 dollars 67 cents in addition to other pilotage.

Every pilot detained more than 24 hours by any manner, owner, or consignee is entitled to 2 dollars per day for every day he is so detained.

Every pilot detained more than 48 hours by the ice, after he has conducted his vessel to a place of safety, is entitled to 2 dollars per day for every day he is so detained, and cannot be discharged in less than 6 days, without his consent.

Every pilot obliged by the ice or stress of weather to proceed to another port, is, when there, entitled to his pilotage; and if there discharged, to 5 cents a mile for every mile he has to travel home.

Every pilot is required, under a penalty of 10 dollars, to make report, within 48 hours, at the wardens' office, of every vessel he conducts to the city.

Rates of Commission recommended for general Adoption, and allowed by the Philadelphia Chamber of Commerce, when no Agreement subelists to the contrary, established at a stated Meeting on the 10th of March, 1823.

On bills remitted for collection under protest for non-acceptance or non-payment: † commission to be charged.

On consignment of merchandise withdrawn or re-shipped, full commission to be charged to the extent of advances or responsibilities incurred, and ‡ commission on the current value of the residue.

On sale of merchandise originally consigned to another house, but withdrawn, and where no responsibilities are incurred, only ‡ commission to be charged on the current value.

The current value in all cases to be settled by certificates of 2 respectable merchants, auctioneers, or brokers.

The above commissions to be exclusive of guarantee, brokerage, storage, and every other charge actually incurred.

The risk of loss by fire, unless insurance be ordered, and of robbery, theft, and other unavoidable occurrences, if the usual care be taken to secure the property, is, in all cases, to be borne by the proprietor of the goods.

**PHOSPHORUS**, a substance of a light amber colour, and semi-transparent; but, when carefully prepared, nearly colourless and transparent. When kept some time, it becomes opaque externally, and has then a great resemblance to white wax. It may be cut with a knife, or twisted to pieces with the fingers. It is insoluble in water; its specific gravity is 1.77. When exposed to the atmosphere, it emits a white smoke, and is luminous in the dark. When heated to 148° it takes fire, and burns with a very bright flame. When phosphorus is inflamed in oxygen, the light and heat are incomparably more intense; the former dazzling the eye, and the latter cracking the glass vessel. — (*Thomson's Chemistry*.)

**PIASTRES, or DOLLARS**, Spanish and American silver coins in very extensive circulation. Value, at an average, about 4s. 2d. sterling. — (See **COINS**.)

**PILCHARDS**, fishes closely resembling the common herring, but smaller, and at the same time thicker and rounder. They are rarely found on the British shores, except on the coasts of Cornwall and Devon, particularly the former, where they are taken in great numbers from the middle of July to the end of November, or even the middle of December. It is a saying of the Cornish fishermen, that the pilchard is the least fish in size, most in number, and greatest for gain, taken from the sea.

**Pilchard fishery**.—This is carried on along the coasts of Cornwall and Devon, from the Bolt Head in the latter, round by the Land's End to Padstow and Bosinney in the former. Its principal seats are St. Ives, Mount's Bay, and Mewagisey. The fish usually make their appearance in vast shoals in the early part of July, and disappear about the middle of October; but they sometimes reappear in large quantities in November and December. They are taken either by *seams* or by drift nets, but principally, perhaps, by the former. A *seam* is a net, varying from 200 to 800 fathoms in length, and from 10 to 14½ do. in depth, having cork buoys on one edge and lead weights on the other. Three boats are attached to each *seam*, viz. a boat (*seam boat*), of about 15 tons burden, for carrying the *seam*; another (*follower*), of about the same size, to assist in mooring it; and a smaller boat (*arker*), for general purposes. The number of hands employed in these 3 boats varies from about 13 to 18, but may be taken, at an average, at about 16. When the shoals of fish come so near the shore that the water is about the depth of the *seam*, it is employed to encircle them; the fishermen being directed to the proper places for casting or shooting the nets by persons (*auers*) stationed for that purpose on the cliffs and in the boats.\* The practice is to row the boat with the *seam* on board gently round the shoal; and the *seam* being, at the same time, thrown gradually into the water, assumes, by means of its buoys and weights, a vertical position, its loaded edge being at the bottom, and the other floating on the surface. Its 2 ends are then fastened together; and, being brought into a convenient situation, it is moored by small anchors or grapnels; sometimes, however, one or two smaller *seams* are employed to assist in securing the fish. At low water, the enclosed fish are taken out by a *ruck net*, and carried to the shore. A single *seam* has been known to enclose at once as many as 4,200 hogs-

\* The tunny fish in the Archipelago was caught in a similar way:—"Ascendebat quidam (Anglicè *Auer*, Græcè *thumascopus*) in altum promontorium, unde thunnorum gregem specularetur, quo viso, signum plicatoribus dabat, qui retribus totum gregem includebant." — (*Bishop of London's Notes on the Persa of Æschylus*, quoted by Dr. Paris, in his *Guide to Mount's Bay*, p. 150.)

heads (1,300 tons) of fish! But this was the greatest quantity ever taken, and it is but seldom that as many as 1,300 hogsheads are caught at a time. The "take," in fact, depends on so many accidental circumstances, that while one sean may catch and cure in a season from 1,000 to 2,000 hogsheads, others in the neighbourhood may not get a single fish. In some places, the tides are so strong as to break the seams and set the fish at liberty. When the quantity enclosed is large, it requires several days to take them out, as they must not be removed in greater numbers than those who salt them can conveniently manage.

Drift nets are usually about  $\frac{1}{2}$  mile in length by about  $\frac{1}{4}$  fathoms in depth; they are shot in the open sea, and entangle the fish in their meshes in the same way as the herring nets. The fish thus taken are said to be superior to those taken by the seams, though it be doubtful, from their being strangled in the nets, whether they are so good for curing.

As soon as the fish are brought on shore, they are carried to cellars or warehouses, where they are piled in large heaps, having a sufficient quantity of salt interspersed between the layers. Having remained in this state for about 86 days, they are, after being carefully washed and cleaned, packed in hogsheads, each containing, at an average, about 2,600 fish  $\uparrow$ ; they are then subjected to a pressure sufficient to extract the oil, of which each hogshead yields, provided the fish be caught in summer, about 3 gallons; but those that are taken late in the season do not yield above half this quantity. This oil usually sells for from 12 to 15 per cent. under the price of brown seal oil. The broken and refuse fish and salt are sold to the farmers, and are used as manure with excellent effect. The skimmings which float on the water in which the pilchards are washed are called *drags*, and are chiefly sold as grease for machinery.

The fresh fish in a hogshead of pilchards weigh about 6 cwt., and the salt about 24 cwt.; but the weight of the hogshead when cured and pressed is reduced to about  $\frac{1}{4}$  cwt.; including the weight of the cask, from 20 to 24 lbs. We subjoin

An Account of the Exports of Pilchards during each of the Ten Years ending with 1842; specifying the Places for which they were exported, the Quantity shipped for each, the Places at which they were taken and cured, and their Price at the Port of Shipment.

N.B.—Of the quantity sent to the Adriatic full 2-4ths have been sold in Venice, and the remainder chiefly in Ancona.

The export of pilchards has been rather declining of late years. This has been ascribed to various causes, such as the withdrawal of the bounty of 8s. 6d. a hogshead formerly paid on their export, the relaxed observance of Lent in the countries to which they are principally exported, and the imposition of a heavy duty on their importation into Naples. The falling off in the demand of the latter has, however, been in a great measure compensated by the increased demand at Venice.

Pilchards are not used in England, except in Cornwall and Devon, where about 3,000 hds. a year may at present be made use of. We believe, however, that their consumption in these counties has begun to increase with considerable rapidity.

The sean fishery employs about 1,500 hands regularly throughout the season, and a vast number more when any considerable shoals are inclosed. There are at present (1843) about 260 seams afloat, of which no fewer than 186 belong to St. Ives. The first cost of a sean on the South coast is about 450*l*.; but a St. Ives sean does not cost above 300*l*. The drift fishery employs, during the season, from 900 to 1,000 men, and about 280 boats; the cost of each boat and nets amounting to about 200*l*. The labour in the cure of the fish may be taken at about 6s. a hogshead. The total capital embarked in the fishery, in 1842, was estimated by those engaged in it at from 300,000*l*. to 350,000*l*., and it has not varied materially in the interval.

The drift fishermen employ themselves, when not engaged in the pilchard fishery, in the mackerel, herring, and hook-line fisheries. The sean fishermen consist principally of agricultural labourers, miners, &c., attracted to the business in the expectation (in which, however, they are not unfrequently disappointed) of making a comparatively large sum by a few weeks' exertion. But there are always 3 or 4 individuals of the crew of each sean who are regularly bred, expert fishermen.

Four fifths of the persons employed on shore in the salting, curing, packing, &c. of the fish, are women.

The wages of those employed in the fishery are made sometimes to depend on the number of fish taken; but in other instances they are independent of any such contingency.

The fishery at St. Ives is carried on under a particular act of parliament, passed in 1841. The extraction of a tith of the fish is a very serious burden on the fishery; sometimes it is taken in kind, but is more generally compounded for.—(*Dr. Peris's Guide to Mount's Bay and the Land's End*, 2d ed. pp. 166-168; *Beauties of England and Wales*, vol. ii. p. 471.; but we are principally indebted to private information obtained from the most authentic sources, and obligingly communicated, by Mr. Coulson, of Penzance.)

**PILOTS AND PILOTAGE.** The name of pilot or steersman is applied either to a particular officer, serving on board a ship during the course of a voyage, and having the charge of the helm and the ship's route; or to a person taken on board at any particular place, for the purpose of conducting a ship through a river, road, or channel, or from or into a port.

It is to the latter description of persons that the term pilot is now usually applied; and pilots of this sort are established in various parts of the country by ancient charters of incorporation, or by particular statutes. The most important of these corporations are those of the Trinity House, Deptford Strand; the fellowship of the pilots of Dover,

<sup>†</sup> Mr. Pennant inadvertently states the number of fish in a hogshead at 25,900.—(*British Zoology*, iii. 344. ed. 1776.) Trusting to his authority, we fell into the same error in the 1st edition of this work.

Deal, and the Isle of Thanet, commonly called the *Cinque Port Pilots*; and the Trinity houses of Hull and Newcastle. The 5 Geo. 4. c. 73. established a corporation for the regulation and licensing of pilots in Liverpool.

The principle of the law with respect to pilots seems to be, that where the master is bound by act of parliament to place his ship in charge of a pilot, and does so accordingly, the ship is not to be considered as under the management of the owners or their servants, and they are not to be liable for any damage occasioned by the mismanagement of the ship, unless it be proved that it arose from the negligence or misconduct of the master or men; but when it is in the election or discretion of the master to take a pilot or not, and he thinks fit to take one, the pilot so taken is to be considered as the servant of the owners, who are to be responsible for his conduct. — (*Abbott on the Law of Shipping*, part ii. c. 5.)

The statute of 6 Geo. 4. c. 125. has consolidated the laws with respect to the licensing, employment, &c. of pilots. It is of great length; but all its provisions of any material importance may be embraced under the following heads: —

1. *Appointment of Pilots.* — The corporation of the Trinity House of Deptford Strond are required to appoint and license fit and competent persons, duly skilled, to act as pilots for the purpose of conducting all ships or vessels navigating the Thames, the Medway, and the several channels, creeks, and docks thereof, between Orfordness and London Bridge, as also from London Bridge to the Downs, and from the Downs westward as far as the Isle of Wight, and in the English Channel from the Isle of Wight up to London Bridge; and all ships and vessels sailing as aforesaid (except as herein-after mentioned) shall be conducted and piloted within the aforesaid limits by such pilots, and by no other person whomsoever.

No person shall be licensed by the said corporation as a pilot, who has not served as mate for 3 years on board of, or been for 1 year in the actual command of, a square-rigged vessel of not less than 80 tons register tonnage, as to licences for the *North Channel* upwards; and not less than 150 tons register tonnage, as to licences for the *North Channel*, *Queen's Channel*, *South Channel*, or other channels downwards; or who shall not have been employed in the pilotage or buoyage service of the said corporation for 7 years, or who shall not have served an apprenticeship of 5 years to some pilot vessel licensed under the act passed in the 53d year of the reign of George III., or under this act; and no person so licensed shall take charge as a pilot of any ship or vessel drawing more than 14 feet water, in the river Thames or Medway, or any of the channels leading thereto or thereupon, until such person shall have acted as a licensed pilot for 3 years, and shall have been after such 3 years, on re-examination, approved of in that behalf by the said corporation, on pain of forfeiting 10*l.* for every such offence; and the person employing or permitting such pilot to take charge of such ship or vessel is also to forfeit 10*l.* — § 3.

Every pilot licensed by the corporation of the Trinity House of Deptford Strond is to pay an annual licence of 2*l.* 6*s.*, and 6*d.* in the pound upon his earnings; which sums are to be applied to the uses of the pilots' fund of the said corporation. — § 4.

The said corporation are further authorised to appoint competent persons, not more than five, nor less than three, at such ports and places as they may think fit (except within the liberty of the Cinque Ports, and such other ports and places as may have been specially provided for by act of parliament, or by charter, for the appointment of pilots), to be called sub-commissioners of pilotage, who are to take the following oath: —

"I, A. B., do swear, that I will diligently and impartially examine into the capacity and skill of in the art of piloting ships and vessels into the roadstead, port, or harbour, and upon the coasts following; *videlicet* (here describe the limits within which the person examined is intended to act as pilot), and will make true and speedy return thereof to the corporation of Trinity House of Deptford Strond, without favour, affection, fee, or reward, other than such fee or reward as is allowed by the by-laws or regulations duly established in that behalf. So help me God."

And upon the recommendation of such sub-commissioners, the Trinity House Corporation may grant licences to pilots. — § 5.

Notices of the appointment of pilots are to be put up in writing at the Trinity House and Custom-house, London, and at the Custom-houses of the ports for which they are licensed, and are to be published in the *London Gazette*. — § 7.

No person shall take charge of any ship or vessel as a pilot belonging to the *Cinque Ports*, before he be examined by the master and two fellows, or by four wardens of the society or fellowship of pilots or Dover, Deal, and the Isle of Thanet, touching his abilities, and shall be approved and admitted into the said society by the Lord Warden of the Cinque Ports, or his lieutenant; and any person presuming to act as a pilot belonging to the said society or fellowship, without having been so examined, approved, and admitted, shall for the first offence forfeit 10*l.*, for the second 20*l.*, and for every other offence 40*l.* — § 15.

No person licensed by the aforesaid society or fellowship is to take charge of any ship or vessel drawing more than 11 feet 6 inches water, until he has acted as a pilot for 3 years; nor of a vessel drawing more than 14 feet water, till he has acted as a pilot for 5 years; nor of a vessel drawing more than 17 feet water, till he has acted as a pilot for 7 years; when he is to be again examined; and if he shall be approved of and licensed upon such second examination, he may take charge of ships of any draught of water. — § 16.

The number of *Cinque Port* pilots used to be fixed at 140; but during peace, no more than each alternate vacancy is to be filled up, unless the number be reduced below 120. — § 24.

All bodies politic and corporate, and all persons authorised to appoint or license pilots for any port or place in England, shall, upon any such appointment being made, forthwith transmit to the Trinity House, London, and to the commissioners of customs, London, the Christian name and surname, age, and place of residence, of every pilot so appointed, distinguishing the limits in which he is to act, and by whom appointed. And the said bodies politic, &c. are to transmit lists, corrected up to the 31st day of December in each year, either on that day, or within a month after, to the said Trinity House and commissioners of the customs, of the names and residences of all the pilots within their respective jurisdictions; stating all the alterations that may have been made within the year in the rates of pilotage charged, and in the rules and regulations for governing pilots within their respective districts. — § 25.

The commissioners of the customs are to transmit to their principal officers, at the different ports, the names and places of residence of all the pilots residing within the limits of each port, as far as they are acquainted with the same; and every pilot is to be furnished with copies of all proclamations and orders in council respecting the performance of quarantine. — § 36.

A particular description of the person of every pilot is to be written upon the back of his licence; and no person shall take charge of any ship or vessel, or in any manner act as a pilot, or receive any compensation for acting as a pilot, until his licence shall have been registered by the principal officers of the Custom-house of the place at or nearest to which such pilot shall reside (which officers are hereby required to register the same without fee or reward), nor without having his licence at the time of his so acting in his personal custody, and producing the same to the master of any ship or vessel, or other person.

who shall be desirous of employing him as a pilot, or to whom he shall offer his services, on pain of forfeiting a sum not exceeding 50*l.* nor less than 10*l.* for the first offence; and for the second or any subsequent offence, a sum not exceeding 50*l.* nor less than 50*l.*; and upon further pain, as to any person licensed as aforesaid, of forfeiting his licence, or being suspended from acting as a pilot, by and at the discretion of the corporation or other authority from which such pilot's licence was derived, either for the first, second, or any subsequent offence. — §§ 55, 56.

3. *Government of Pilots.* — All persons licensed to act as pilots by the Trinity House are subject to the government of the said corporation, which is empowered to make by-laws, rules, &c. specifying what sums shall be paid by such pilots to the sub-commissioners of pilotage for their examination, and for granting or renewing or confirming their licences from time to time, and annexing such reasonable penalties and forfeitures for the breach of such by-laws as to them shall seem expedient. But no such by-laws, regulations, &c. shall have any force till they have been examined, sanctioned, and approved by the chief justice of the Court of King's Bench, or the chief justice of the Court of Common Pleas. — § 11. (The by-laws of the Trinity House, Deptford Strond, sanctioned by Lord Tenterden, are annexed to this article.)

Copies of any proposed by-laws are to be transmitted to the privy council and the commissioners of customs, 3 months before they are submitted to any chief justice for approval; and the commissioners of the customs are to cause such proposed by-laws to be hung up in the several Custom-houses of the principal ports of Great Britain, for the inspection of all parties having an interest therein. And when such by-laws shall have been sanctioned, they shall be hung up in the several Custom-houses within the limits of which the pilots respectively shall be licensed, and also at the Trinity House in London. — § 12, 13.

The *Cinque Port* pilots are to be subject to the rules and regulations framed by the Lord Warden of the said ports, or his deputy, with the assent of the majority of the commissioners of *Loadmanage* (master and wardens of the fellowship of pilots of Dover, Deal, and the Isle of Thanet). The privy council may, however, amend, correct, or enlarge such rules or regulations, if they shall appear to them, upon the representation of any person having an interest therein, to be in any material point erroneous, insufficient, or defective. — § 21, 22.

The Trinity House Corporation are authorised and required to establish, vary, and alter, from time to time, as circumstances may require, the rates of pilotage performed by pilots licensed by the said corporation, according to the size and draught of water of the vessels, the distance piloted, the detention and responsibility of the pilot, and such other circumstances as they may think fit to take into account. Tables of these rates are to be hung up at the several Custom-houses of the ports to which they apply; and no greater or less rates, or other reward or emolument for such pilotage, shall, under any pretence whatever, be demanded, solicited, paid, received, or offered, on pain of forfeiting 10*l.* for every such offence, as well by the party offering as by the party accepting or soliciting the same. Ships returning by stress of weather, contrary winds, or on account of accident, into ports in the district of the Isle of Wight, Plymouth, and Falmouth, shall be subject to pay half the common pilotage in such ports. — § 8.

If the majority of the pilots licensed by the Trinity House Corporation in any port or place, or any ship owner in the same, be dissatisfied with the rates, they may appeal to the privy council, who may decide upon the matter as they think fit. — § 9.

Every person applying for a licence to act as a pilot, shall, before any such licence be granted to him, execute a bond in a penal sum, at the discretion of the Trinity House Corporation, or of the Lord Warden of the Cinque Ports, to an amount not exceeding 100*l.*, for the better securing his due obedience to the by-laws, rules, regulations, &c. to be made by competent authority. — § 27.

Licences may be annulled, suspended, or adjudged forfeited, at the pleasure of the foresaid corporation and Lord Warden; but, persons whose licences are so annulled, suspended, &c. may appeal to the privy council, who are authorised to make such adjudication in the premises as they may think fit. — § 28, 29.

3. *Licences of Pilot Boats.* — The Trinity Corporation and the fellowship of the Cinque Port pilots are authorised to license pilot vessels of such size and description as may appear to them to be proper for having pilots constantly in attendance in such vessels at sea; and the licensed pilots are authorised to form themselves into companies, with consent of the corporations aforesaid, for providing and maintaining such pilot vessels, such companies and vessels being at all times subject to such rules and regulations as shall from time to time be sanctioned by the said corporate bodies. — § 31.

Pilot boats or vessels are to be distinguished by being at all times and on every station fitted with black sides, and having the upper streak next the gunwale painted white; they are, while afloat, to carry a flag of large dimensions, proportioned to the size of the vessel, at the mast head, or on a spar or staff in some conspicuous situation, which flag shall be half red and half white, in horizontal stripes, the white uppermost. The name of the pilot on board is to be painted in large white letters (3 inches long) on a black ground on the stern, and on each bow the number of the licence of such pilot; and the concealment of such name or number, or the evasion of any of the before-mentioned provisions, incurs a penalty of 20*l.*, to be paid by the senior pilot on board, who is answerable for their observance. Any pilot carried off in a boat other than a pilot boat, is to hoist a flag as previously ordered, on pain of forfeiting 20*l.* unless he show reasonable cause for having omitted it. — § 32.

The owners or master of any boat or vessel carrying a pilot's flag, without having a licensed pilot on board, shall for every such offence forfeit 100*l.* — § 33.

The Trinity House Corporation, the Court of *Loadmanage* of the Cinque Ports, and all other corporations and persons authorised to manage or direct pilots in any part of England shall, on the 1st of January in each year, or within the month next following, transmit to the officer of the sixpenny duty in the port of London, a list of all the vessels of every description employed by them or by those under them, for the purposes of pilotage, with the number of men and boys belonging to or serving in such vessels. — § 37.

4. *Duties of Pilots.* — In order to secure the due performance of his important duties by the pilot, it is enacted that every pilot, duly licensed, who shall, without sufficient cause, refuse or decline going off to any vessel wanting a pilot, upon signal being made by the same, or upon being required to do so by the master of such ship, or by any person interested therein as principal or agent, or by any officer of the corporation to which such pilot shall belong, or by any principal officer of the customs; or who shall, on any frivolous pretext, quit any ship or vessel, or decline piloting thereof, after he has been engaged to pilot the same, or after going alongside thereof, without leave of the master, shall, for every such offence, forfeit not more than 100*l.* nor less than 10*l.* — § 72.

Any licensed pilot employing or making use of, or compelling or requiring any person having the charge of any ship or vessel to employ or make use of, any boat, anchor, or cable, &c. beyond what is actually necessary, shall forfeit and pay for every such offence not more than 50*l.* and not less than 10*l.*, and shall also be deprived of his licence, or suspended, at the discretion of those by whom he was licensed. — § 73.

If any licensed pilot shall lend his licence to an unlicensed person, to assist him in acting or claiming to act as pilot, and if such unlicensed person shall by drunkenness render himself incapable of conducting any ship or vessel, or negligently or wilfully load, decoy, or betray any ship into danger, or shall unnecessarily or improperly cut any cable or cables belonging to any vessel; or if any such person shall, by wilful misrepresentation of any circumstances upon which the safety of the vessel shall appear naturally to depend, obtain or endeavour to obtain the conduct of such vessel, then, and in every such case, the person so offending, or who shall aid in, procure, abet, or connive at the committing any such offence or offences, shall, besides being liable to damages at the suit of the party grieved, forfeit and pay a sum of not more than 100*l.* and not less than 30*l.*; and if the person offending be a pilot, he shall be liable to be deprived of his licence, at the discretion of those by whom he was appointed. — § 74.

Pilots keeping public-houses, or selling wine, spirituous liquors, tobacco, or tea (unless authorised by the competent authorities), or being concerned in any fraud or offence against the revenue laws, or in

relation to any branch of their duty, shall, over and above all mulcts, penalties, &c. for such offences, be adjudged to forfeit their licence, or to be suspended. at the discretion of those by whom they are licensed. — § 68.

A pilot, when taken on board, shall enter his name in the log-book of every ship entering the port of London requiring to be piloted under this act, and if any pilot or other person insert a false name, he is to forfeit 20*l*.; and the name or names of the pilot or pilots so entered in the log-book and employed in piloting the vessel, are to be inserted in the *entry* or *report* of such vessel inwards; and this insertion is to be made (without fee or reward) by the proper officer of the customs, who shall report the same daily to the Trinity House, and monthly to the Lord Warden of the Cinque Ports. The principal searcher or officer of the customs at Gravesend is to demand and take the name or names of the pilot or pilots of all vessels clearing outwards, and shall transmit monthly lists thereof to the Trinity House, on pain of forfeiting a sum not more than 10*l*. nor less than 5*l*., to be paid by each and every of the persons foresaid who shall neglect to comply with any of the foresaid regulations. — § 43.

Pilots quitting any vessel in the Thames or Medway before she has arrived at the place to which she was bound, without the consent of the captain or other person in command, and unless some other duly qualified person shall with such consent come on board and take charge of the ship, shall forfeit for such offence all pay or reward they might be entitled to, and shall also be subject to such other penalty or punishment as may legally affect them in consequence of any by-law, &c. — § 40.

Pilots neglecting or refusing to obey the orders of the different dock masters within their respective jurisdictions incur a penalty of not more than 50*l*. and not less than 20*l*. for each offence, and may be dismissed or suspended. — § 75.

Licensed pilots may supersede unlicensed ones. And if any unlicensed person shall act after a duly licensed pilot has offered to come on board and take charge of the ship, she being at the time within the limits for which he is qualified, such unlicensed person shall forfeit not more than 50*l*. and not less than 20*l*. — § 70.

But unlicensed persons may act so long as no licensed pilot offers to take charge of the ship, or makes a signal for that purpose, or where and so long as the ship shall be in distress. — § 71.

Licensed pilots who have executed the bond before mentioned shall not be liable to any action for damages on account of neglect or want of skill, at the suit of the party grieved, in any greater sum than the amount which shall have been specified by way of penalty in such bond, and the pilotage payable to him in respect of the voyage during which the neglect or want of skill are alleged to have been exhibited. — § 57.

5. *Fees of Pilotage.* — The charge on account of pilotage is regulated in various places by usage or statute, and generally increases in proportion to the depth of water which the vessel draws. The Trinity House Corporation and the Lord Warden of the Cinque Ports have authority, as before mentioned, to fix the rates on account of pilotage to be charged by all pilots licensed by them. (Subjoined to this article are Tables of the present rates.)

Any pilot carried to sea beyond the limits of his district without his free consent, except in cases of absolute necessity, shall, over and above his pilotage, receive 10*l*. 6*l*. a day, to be computed from and inclusive of the day next after the day on which the vessel shall pass the limit to which the pilot was engaged to conduct her, until he shall be returned to the port or place where he was taken on board, or be discharged for a sufficient time to enable him to return there. — § 38.

Pilots are to qualify themselves for conducting vessels in and out of Ramsgate harbour, and the harbours of Dover, Sandwich, and Margate, and shall be entitled to and receive for such pilotage at the rate of 5*l*. for every foot of the draught of water of every vessel so piloted. — § 39, 40.

Ships bound to the Thames, repairing to Standgate Creek, or other place appointed for the performance of *quarantine*, are to pay the full charges of pilotage to such place, and a further sum of 8*l*. a day for the days the pilot shall be obliged to remain on quarantine.

Any boat or vessel running before a ship or vessel, not having a licensed pilot on board, when such ship or vessel cannot be boarded, for the purpose of directing her course, the pilot on board such boat or vessel, or, if no pilot be on board, the person having the command thereof, and who shall run before such ship at the request or by the direction of the master, shall be entitled to full pilotage for the distance run. — § 34.

All the sums which shall become due to any licensed pilot for the pilotage of foreign ships or vessels trading to or from the port of London may be recovered from the owners or masters of such ships or vessels, or from the consignees or agents thereof, who shall have paid, or made themselves liable to pay; any other charge for the ship or vessel in the port of her arrival or delivery as to pilotage inwards, and in the port whence she shall clear out or sail as to pilotage outwards; and may be levied in like manner, according to the amount, as any penalty may be recovered and levied by virtue of the act, demand thereof being made in writing at least *fourteen* days before such levy. And the master or other person having the charge of ships or vessels, *not having British registers*, which shall enter into or sail from the port of London, and which are by law required to be piloted by persons licensed by the corporation of the Trinity House, or the consignees or agents thereof, are to pay at the Trinity House, in London, to persons appointed by the corporation of the Trinity House, the full pilotage inwards and outwards; viz. as to pilotage outwards, the amount for the distance which the ship is by law required to be piloted; as to pilotage inwards, where a pilot shall have been on board, the amount for the distance piloted by him, if greater than that which she shall be required to be piloted; if less, or if no pilot shall have been on board, the amount for the distance which she was by law required to be piloted: the pilotage inwards may be levied, &c. upon the master or other person in charge, consignee, or agent, in the same manner as in the case of ships *having British registers*, if such pilotage inwards be not paid within *fourteen* days from the day of the ship's reporting inwards. — § 44, 46.

The pilotage outward upon foreign vessels is to be calculated according to the scale or amount of tonnage upon which such ships or vessels are rated in the port of London for payment of light and other dues, or according to the draught of water thereof, as the Trinity House may think most proper. — § 49.

In order to prevent controversies with respect to the draught of water of ships not having British registers, the Trinity House is empowered to appoint an officer to measure the draught of water of ships with respect to which there is any controversy; such officer receiving 1*l*. 1*s*. for his trouble if the ship be below the entrance to the London Docks, and 10*l*. 6*l*. if above such entrance, from the party against whom he may decide. If arriving inwards, application for such officer must be made within 12 hours after the ship has come to her moorings, and before she begin to unlade; and before quitting her moorings, if clearing outwards. — § 50.

The Trinity House are empowered to take measures for the relief of foreign vessels coming to the port of London with fish, corn, and other provisions on board, either from the whole or a part of the charges on account of pilotage that would fall upon them under this act. — § 51.

No foreign vessel shall be cleared outwards until a certificate, signed by the person appointed for that purpose by the Trinity House, that the pilotage has been paid, has been produced; the corporation pay the pilot employed, on proof that he has duly performed his service, the pilotage, after deducting the 6*l*. duty. — § 47.

The consignees or agents of any ship or vessel are authorised and empowered to retain in their hands respectively, out of any monies which they may have received or shall thereafter receive for or on account of such ship or vessel, or the owner or owners thereof, so much as shall be sufficient to pay and discharge such pilotage, and any expenses attending the same. — § 45.

6. *Responsibility, &c. of Masters.* — Ships coming from the westward, bound to any place in the Thames

or Medway, not having a duly qualified Cinque Port pilot on board, shall, on arriving at *Dungeness*, and until they have passed the south buoy of the *Brake*, display and keep flying the usual signal for a pilot to come on board; and the master shall heave to and shorten sail, so as to facilitate the entry of the pilot. Persons not displaying such signal, &c. shall forfeit and pay double the amount of the sum that the charge for pilotage would have amounted to. And it is further provided, that all masters of vessels acting themselves as pilots, or employing any unlicensed person as such, or any licensed person out of the limit of his qualification, after any licensed and qualified pilot shall have offered to come on board, or made a signal for that purpose, shall forfeit double the sum that would have been legally demandable as pilotage, and an additional penalty of *£l.* for every 80 tons burden of the ship, if the Trinity House or Lord Warden of the Cinque Ports, as the case may be, shall think it proper to certify the same.

But the master of any of the following vessels may pilot the same, so long as he is not assisted by any unlicensed pilot or other person than the ordinary crew; viz. the master of any collier, or of any ship or vessel trading to *Norway*, or to the *Catagat* or *Baltic*, or round the *North Cape*, or into the *White Sea*, or their inward or outward voyages, or of any constant trader inward, from the ports between *Boulogne* inclusive, and the *Baltic* (all such ships or vessels having *British* registers, and coming up by the *North Channel*, but not otherwise), or of any *Irish* trader using the navigation of the rivers *Thames* and *Medway*, or of any ship or vessel employed in the regular coasting trade of the kingdom, or of any ship or vessel wholly laden with stone from *Guernsey*, *Jersey*, *Alderney*, *Sark*, or *Moss*, and being the production thereof, or of any ship or vessel, not exceeding the burden of 60 tons, and having a *British* register (or not exceeding the burden of 60 tons, and not having a *British* register, if authorised so to do by an order of the privy council), or of any other ship or vessel whatsoever, whilst the same is within the limits of the port or place to which she belongs, the same not being a port or place in relation to which particular provision had heretofore been made by any act or acts of parliament, or by any charter or charters for the appointment of pilots. — § 53, 60.

The master or mate of any vessel, being the owner or part owner thereof, and residing at *Dover*, *Deal*, or the Isle of *Thanet*, shall not be liable to any penalty for conducting or piloting his own ship or vessel up or down the rivers *Thames* or *Medway*, or into or out of any place within the jurisdiction of the Cinque Ports. — § 62.

This act shall not extend, or be construed to extend, to subject the master or owner of any ship or vessel, to any of the penalties of this act, for employing any person or persons whomsoever, as a pilot or pilots, in and for the assistance of such ship or vessel, whilst the same shall be in distress, or in consequence thereof, or under any circumstances which shall have rendered it necessary for such owner or master to avail himself of the best assistance which at the time could be procured. — § 61.

No owner or master of any ship or vessel shall be answerable for any loss or damage which shall happen to any person or persons whatsoever, from or by reason or means of no licensed pilot or of no duly qualified pilot being on board thereof, unless it shall be proved that the want of such licensed or of such duly qualified pilot respectively shall have arisen from any refusal to take such licensed or qualified pilot on board, or from the wilful neglect of the master of such ship or vessel in not heaving to, or using all practicable means, consistently with her safety, for the purpose of taking on board thereof any pilot who shall be ready, and offer to take charge of the same. — § 53.

Nothing in this act shall extend, or be construed to extend, to make the owner of any ship or vessel liable in any such case, for any loss or damage beyond the value of such ship or vessel and her appurtenances, and the freight due, or to grow due, for and during the voyage wherein such loss or damage may happen or arise. — § 54.

No owner or master of any ship or vessel shall be answerable for any loss or damage which shall happen to any person or persons whomsoever, from or by reason or means of any neglect, default, incompetency, or incapacity of any licensed pilot, acting in the charge of any such ship or vessel, under or in pursuance of any of the provisions of this act, where and so long as such pilot shall be duly qualified to have the charge of such ship or vessel, or where and so long as no duly qualified pilot shall have offered to take charge thereof. — § 55.

Nothing in this act shall be construed to extend to deprive any person or persons of any remedy or remedies upon any contract of insurance, or of any other remedy, whatsoever, which he or they might have had if this act had not been passed, by reason or on account of the neglect, default, incompetency, or incapacity of any pilot duly acting in the charge of any ship or vessel, under or in pursuance of any of the provisions of this act, or by reason or on account of no pilot or of no duly qualified pilot being on board of any such ship or vessel, unless it shall be proved that the want of a pilot arises from a refusal on the part of the master to take such pilot on board, or to heave to for him. — § 56.

All masters or other persons having the command of any ship, who shall report, or be privy to any one reporting, a false account of the draught of water of such ship, shall, besides the full pilotage, forfeit double the amount thereof; and any master or other person having any interest, share, or property in any vessel, who shall fraudulently alter any marks on the stem or stern post thereof, diminishing the draught of water, or shall be privy or consent thereto, shall for every such offence forfeit and pay the sum of 500*l.*

7. *Recovery of Penalties.* — Penalties incurred under this act, not exceeding 20*l.*, are to be recovered before a justice by prosecution within six months; and penalties above 20*l.* by action of debt in any of the courts of record at *Westminster*, to be commenced within twelve months; but if it shall be made to appear, as soon after as the circumstances of the case will admit, that the commencement of the prosecution or action has been delayed by reason of the absence of any party or parties, whether offending or complaining, or of any necessary witness, then, upon such circumstances being stated by affidavit, made before any judge of any of his Majesty's courts of record at *Westminster*, any such judge may order or authorise the commencement of the prosecution or action within such further time as he shall think fit to limit.

It is, however, provided that nothing therein contained shall affect or impair the jurisdiction of the Court of *Loadmanage*, or High Court of *Admiralty*, nor the right of the city of *London*, nor (in general) any separate jurisdiction established under any act of parliament or charter. — § 76, 77, 87, 88, 89.

BY LAWS, REGULATIONS, AND ORDINANCES AS TO PILOTS, framed by the Trinity Corporation, and sanctioned by Lord Tenterden, 19th of April, 1826.

#### I. Annuls the previous regulations.

II. It is ordained, that every pilot who shall be ordered to proceed on his Majesty's service, by any order signed by the deputy master or secretary of the said corporation, or by the officer for the time being for the said corporation at *Yarmouth*, or elsewhere, duly authorised to act in matters of pilotage, or who shall be so ordered, in writing or otherwise, by any officer in his Majesty's service, shall immediately proceed thereon; and every pilot who shall fail so to do, or shall evade the receipt of any such order, or who shall quit or decline such service, shall for the first offence forfeit *£l.*, and for the second and every subsequent offence 10*l.* each.

III. It is ordained, that every pilot engaged in the charge of any ship employed by government in the transport service, shall observe particularly if any unnecessary delay take place on the part of the master in proceeding towards his destination; and if any delay does take place, such pilot shall, on his return, report the same to the secretary of the said corporation, and upon going on board, such pilot shall give notice to the master that he has orders so to do.

IV. It is ordained, that no pilot having the charge of a merchant ship shall stop the same alongside the

moorings of his Majesty's ships at Deptford, or elsewhere, or between the Round Tree and Bathing-house, Gravesend (except in either of such cases there be an extreme necessity for so doing, or leave be obtained for that purpose from the proper officer or officers in that behalf), and all pilots licensed by the said corporation are at all times to be particularly careful to steer clear of the king's ships in passing them.

V. It is ordained, that every pilot, when called upon or required to pilot any ship or vessel, shall, if under engagement to any other ship, forthwith make known such engagement, and specify the particulars thereof truly and faithfully to the person calling for or requiring such pilot's service; and in case of any concealment, misrepresentation, or falsehood, in respect of such alleged previous engagement, the pilot offending shall forfeit 10*l*.

VI. It is ordained, that every pilot who shall have taken charge of any ship from the river Thames to the Downs, or elsewhere, shall, without any additional compensation in that behalf, wait on board for the space of 3 complete days while such ship may be detained at Gravesend, or elsewhere, for want of seamen, or by any other casualty; nor shall he at the end of 3 complete days be at liberty to quit such ship, or receive any additional compensation, if she shall be further detained by winds, weather, or tides; and should the ship be detained beyond 3 complete days on any other account except winds, weather, or tides, the pilot having the charge thereof shall nevertheless still (if required so to do) remain in the charge of her, provided a compensation of 6*s*. per day be offered to him in that behalf by the master or owner.

VII. It is ordained, that every pilot shall in all cases demean himself civilly and respectfully towards all persons who may require his service, and towards all officers in his Majesty's navy, and shall maintain a strict temperance and sobriety in the exercise of his office, and shall use his utmost care and diligence for the safe conduct of every ship which he shall be intrusted with the charge of, and to prevent her doing damage to others.

VIII. It is ordained, that every pilot who shall undertake the charge of any ship downwards, shall, before his departure, leave, or cause to be left, notice thereof, in writing, at the proper office at the Trinity House in London, with one of the clerks there attending, and shall be considered as discharged until he shall have done so; and upon such pilot's return, he shall, immediately, in his own person, attend at the said office, and make and sign such entry, in a book there kept for that purpose, as the said corporation shall from time to time direct or require.

IX. It is ordained, that every pilot licensed by the said corporation shall, from time to time, and at all times, in obedience to the order or summons of the said corporation, under the hand of the secretary thereof for the time being, duly delivered or offered to such pilot, or left a reasonable time at the usual or last known place of residence of such pilot, attend the said corporation, at their courts, by-boards, or committees, or their secretary for the time being, at the Trinity House in London; and that every pilot licensed by the said corporation, upon a certificate of qualification from sub-commissioners of pilotage, shall, in like manner, attend the sub-commissioners of the port or place for which such pilot shall be so licensed, in obedience to the order or summons of the said sub-commissioners, under their hands, or the hands of the major part of them, duly delivered, offered, or left as aforesaid, to answer to any charges brought against such pilots respectively, or for the performance of any public service, or for any other purpose whatsoever; and in default of such attendance, every pilot so offending shall forfeit for the first offence 40*s*., and for the second and every subsequent offence 5*l*. each.

X. It is ordered, and hereby directed, that every pilot licensed or to be licensed by the said corporation, upon their receiving a certificate of examination by any sub-commissioners of pilotage, shall, for such examination, and for granting the licence thereon, pay the sum of 2 guineas to the said sub-commissioners of pilotage by whom he shall be examined, or to one of them; and shall also, for the renewing or confirming such licence from time to time, pay to the sub-commissioners of pilotage for the time being, at or for the port or place specified in such licence, or to 1 of them, the annual sums following; (that is to say,) every pilot so licensed or to be licensed as aforesaid, for the ports of Plymouth, Portsmouth, or Cowes respectively, the annual sum of 2 guineas; and every pilot licensed or to be licensed as aforesaid, for any other port or place, the annual sum of 1 guinea, unless the pilots at or for such port or place shall be divided into 2 classes; and in that case the pilots of the 1st class are to pay the annual sum of 2 guineas each, and pilots not of the 1st class the annual sum of 1 guinea each.

XI. It is ordained, that no pilot shall add to or in any way alter his licence, or make or alter any endorsement thereon, nor shall he be privy to any such licence or endorsement being altered.

XII. It is ordained, that every pilot who shall observe any alteration in any of the sands or channels, or that any of the buoys or beacons of the said corporation are driven away, broken down, or out of place, shall forthwith deliver or send a correct statement thereof, in writing, to the secretary of the said corporation for the time being.

XIII. It is ordained, that every pilot shall, whenever he comes to an anchor, carefully observe the settings of the tide, and the force of the stream; and if it shall happen that he comes near to a sand or other object or cause of danger, and there be any other ships or ship in company likely to fall in therewith, such pilot shall immediately give notice thereof to the captain or principal officer of the ship under his care, that he may make a signal to such other ship or ships for avoiding the same.

XIV. It is ordained, that no pilot shall, on any pretence, aid or assist, either in his own person or with his boat or servants, or by any other means whatever, the landing, removing, or secreting any seaman, from any merchant ship or vessel, to avoid serving in his Majesty's navy, or escape the impress for the same.

XV. It is ordained, that every pilot shall from time to time conform himself strictly to all directions which shall be given to him by any of the harbour masters authorised by act of parliament under the corporation of the city of London, touching the mooring, unmooring, placing or removing of any ship or vessel under his charge as long as such ship or vessel shall be lying and situate within the limits of the authority of such harbour master.

XVI. It is ordained, that each and every pilot belonging to a licensed pilot vessel shall be at liberty to entertain one apprentice and no more.

XVII. It is ordained, that for any work done on the rivers Thames or Medway by men in boats, being less than the work for the whole tide, the pay shall be, for half a tide's work 4*s*. to each man, and so in proportion for any time less than a whole tide, the pay for which is settled by the said act of the 6th year of the reign of his present Majesty at 8*s*.

XVIII. It is ordained, that in all cases where pecuniary penalties and forfeitures are annexed to the breach of the foregoing by-laws, rules, orders, regulations, and ordinances, the said corporation of Trinity House may mitigate and reduce the same to 1-4th part at their discretion.

XIX. It is ordained, that every pilot who shall offend against any or either of the foregoing by-laws, orders, regulations, and ordinances, shall, for every such offence (whether the same shall subject him to any pecuniary penalty or not, and in addition to such penalty if any), be liable to have his licence annulled and forfeited, or suspended, at the discretion of the said corporation.

N.B.—Besides conforming themselves diligently to the above by-laws, rules, orders, regulations, and ordinances, the pilots licensed by the corporation of Trinity House are, of course, in all things to observe and obey the same enactments and provisions relating to such pilots contained in the said act of parliament made and passed in the 6th year of the reign of his Majesty King George the Fourth, a copy of which act has been delivered to each of the said pilots.

\*. The following Tables of the charges on account of pilotage, &c. are the most complete that have hitherto been published. They have all been derived from official sources, so that their accuracy may be depended upon.

For putting a Pilot on board, and for Pilotage of Ships and Vessels to the Anchorage in the Downs.	60 Tons, and under 150.	150 Tons, and under 250.	250 Tons, and under 400.	400 Tons, and under 600.	600 Tons, and upwards.
From off Dungeness to off Folkestone: the church bearing N. N. W. by compass	£ 0 0	£ 0 0	£ 10 0	£ 4 0 0	£ 5 5 0
From off Folkestone to the South Foreland, the lights in one	1 10 0	2 0 0	2 10 0	3 0 0	4 4 0
From off the South Foreland to the Downs	1 5 0	1 5 0	1 10 0	2 0 0	3 3 0

In the River Thames above Gravesend -	For a boat of a class carrying an anchor of above 4 cwt. with a corresponding tow-line	£ s. d. 2 0	Per trip for the whole distance from Urswick to London and in proportion for any part of that distance.
Do. do.	2 cwt.	1 10 0	
Do. do.	under 2 cwt.	0 15 0	

And for each man's service in those boats, 8s. per tide.

# ACCOUNT OF THE RATES CHARGED FOR THE PILOTAGE OF VESSELS, AND OF THE OTHER CHARGES AFFECTING THEM IN THE UNDERMENTIONED PORTS.

ANALYSIS.	Tonnage Duty.	s. d.
Class 1. — For all vessels to or from any place between Plymouth Head, on the southward, and Cape Wrath, on the north, excepting vessels passing through the Caledonian and Forth and Clyde Canals, but including the Orkney and Shetland Isles, per register ton		0 2
Class 2. — To or from all other ports or places in Great Britain and Ireland		0 4
Class 3. — To or from all parts of Europe to the northward of Gibraltar, including the Canaries, Western Islands, Madeira, Azores, Guernsey, Jersey, Alderney, Sark, the Faroe Isles and Iceland, also the whole of the Baltic and White Seas		0 9
Class 4. — All parts on the eastern coast of North America, including Greenland and Davis's Straits fisheries, all parts within the Straits of Gibraltar and W. coast of Africa, as far S. as the Tropic of Cancer		1 0
Class 5. — The West India Isles, and all parts within the Tropics of Capricorn and Cancer		1 6
Class 6. — All vessels navigating to the southward of the Tropic of Capricorn, and all other parts of the world		2 0

## Leading Lights, Tidal Pier Light, and Flag Dues

All vessels under 40 tons	1 6
40 tons and under 80	2 0
80 — 100	2 6
100 — 120	3 0
120 — 200	3 6
200 tons and upwards	4 0

The above rates are payable for all vessels entering the harbour.

Pilotage.	First Boat.	Second Boat.	Third Boat.
Vessels under 50 tons	£ s. d. 0 7 0	£ s. d. 0 6 0	£ s. d. 0 5 0
50 tons and under 60	0 8 0	0 7 0	0 6 0
60 — 85	0 9 0	0 7 6	0 6 6
85 — 110	0 10 0	0 8 0	0 7 0
110 — 130	0 11 0	0 8 6	0 7 6
130 — 150	0 12 0	0 9 0	0 8 0

200 tons and above it	0 15 0	0 11 0	0 10 0

**Ballast.** — All ships or vessels furnished with ballast by the Aberdeen harbour commissioners pay —  
Vessels belonging to Aberdeen, 3s. per ton.  
All other vessels, 1s. per ton.

Vessels launched at the port of Aberdeen to pay half dues on first voyage, if sailing in ballast, but if landing goods, to pay full dues.

Vessels entering the harbour for safety, or wind-bound, and not breaking bulk, to pay half dues, but if they break bulk, or take in goods (stores for their own use excepted), to pay full dues.

Foreign vessels to pay one-half more dues than British vessels.

One arrival and one sailing to constitute a voyage.

Vessels remaining in the harbour after 3 calendar months (and 14 days allowed for loading and discharging) to pay 1s. per register ton per calendar month, and for each part of a month, in advance.

It shall be in the option of the trustees to charge either the dues on the voyage, inwards or outwards, at the rates specified in the foregoing Table, according to the distance; and if the charge be made on the voyage outwards, there shall be deducted from it the amount of dues that may have been previously paid on the voyage inwards; but if such vessels sail in ballast, they shall be charged with dues on the inward voyage only.

Exemptions for shipping, not including loading, lights, &c. or pilotage —

All open boats under the burthen of 10 tons to be exempted from dues.

All ships, steamers, or vessels having made 50 voyages in any 1 year, from January to December inclusive, shall pay no more harbour dues for any additional voyages made by them within the same year.

Vessels sailing from the harbour and put back by stress of weather, or other cause, without having accomplished the voyage, shall not be liable in additional dues for such returns.

All ships or vessels belonging to, or exclusively employed in the service of H. M., the Customs, Excise, or Post-Office, or of the Commissioners of the Northern Lighthouses, or of the Corporation of the Trinity House of Deptford Strand, to be exempted from dues.

British vessels, *being* *fish* employed in the white fishery, to be exempted from the payment of harbour dues, provided they have no cargo on board but the fish caught, and their stores and fishery implements.

Whether from eastward or westward of Holms. The docks and quays in Bristol are not enclosed. The warehouses, whether bonded or otherwise, are all private property; they are for the most part close to the quays, and are all of access.

## REGULATION AND RATES OF PILOTS.

All vessels navigating up, down, or upon the British Channel, to the E. of Lundy Island, except coasting vessels and Irish traders, shall be piloted, and navigated by pilots, duly authorised and licensed by the mayor, the burgesses, and commonalty of the city of Bristol; and the master, owner, or owners of every vessel which shall be navigated in the limits aforesaid, without a licensed pilot, shall forfeit double the sum that would have been demandable, for the pilotage of such vessel, together with 5s. for every 50 tons burthen of such vessel.

It shall be lawful for any licensed pilot to supercede any person not licensed as a pilot, in the charge of any vessel within the limits aforesaid; and every master who shall continue any person not licensed, after any licensed pilot has offered to take charge of such vessel; and every person who shall continue in the charge of any such vessel, without being duly licensed, after any other licensed pilot has offered to take charge thereof, shall, respectively, forfeit for every such offence, a sum not exceeding 10l.

For rates of pilotage from Lundy Island to Kingroad, &c., see art. Bristol, p. 527.

For each man employed on board, or for hauling or towing any vessel, and mooring or unmooring, from Bathurst or Cumberland Basin, to Hungrood Pill, and Broad Pill, and from either of those places to Cumberland or Bathurst Basin, the pilot shall receive and be entitled to 3s. 9d. per man; or from Bathurst or Cumberland Basin to Kingroad and Portland, or either of them, or from either of those places to Cumberland or Bathurst Basin, he shall receive 3s. 9d. per man, and no more. When the pilot remains on board a vessel, he shall be entitled to 6s. per day; and the man to 3s. per day.

And the pilot shall be entitled to and shall receive for each tow-boat and yawl employed in towing or assisting, mooring and unmooring any vessel from Portland, Kingroad, Hungrood, or Broad Pill, in Cumberland or Bathurst Basin, and out of Cumberland or Bathurst Basin to Portland, Kingroad, Hungrood, or Broad Pill, the sums following, viz.—for a tow-boat, 6s.; for a yawl, 2s.

And he shall receive for every boat used in towing, unmooring and mooring any ship or vessel from either of the following places, to any part of such places, viz.—Portland, Kingroad, Pill, or Hungrood; or for unmooring, new berthing, and again mooring any ship or vessel in either of the said last mentioned places, the sums following, viz.—for every yawl, 2s. 6d.

And every man who shall be engaged, or be discharged at Hungrood or Pill, without being employed to assist in towing or unmooring, shall be entitled to, for his fee or wages, 2s. 6d.; and the pilot shall be entitled, for the boats not employed in so mooring and unmooring, for a tow-boat, 4s.; and for a yawl, 2s. 6d., and no more.

The pilot of all vessels above 300 tons shall be allowed for an assistant pilot in the river pilotage, the sum of 10s.—such an assistant being a licensed pilot; in default whereof, only 5s. 6d. shall be paid for such assistant.

There shall be allowed for each horse used in towing any ship or vessel, a sum not exceeding 6s., and to the driver, 1s.

	s.	d.
If under 100 tons reg. burthen -	0	1 0
If 100 tons and under 200 -	0	2 0
If 200 and upwards -	0	3 0

And that such sums shall be added to the pilotage note and paid therewith by the master and commander, merchant or owner of such ship or vessel.

In case any ship or vessel shall be in distress, either in the outward or homeward bound voyage, and any pilot or men shall run an imminent risk or hazard in going to the relief of such ship or vessel, the pilots or men assisting shall have reasonable satisfaction for the assistance so given, according to such assistance, and the risk and hazard run, and in case of a difference of opinion as to the amount of such satisfaction, the same to be ascertained by two of her Majesty's Justices of the Peace, sitting for the city and county of Bristol.

If any licensed pilot shall proceed with any ship or vessel as far as Minehead, Combe, or Lundy Island, and shall be forced by stress of weather to return to Kingroad or Portland, he shall be allowed one third part of the channel pilotage, according to the distance such vessel may have reached before she shall have put back.

Each pilot shall, within two days after his return from a voyage to the westward, return to the Haven-Meter the number of the ship so returned from the westward, the time of her sailing, the time of her return, the distance she has been, and the names of the persons employed in navigating her, and all the material particulars of the voyage; and each pilot who shall neglect to make such return, or shall make a false return, shall for each offence, forfeit and pay any sum not exceeding 40s.

Addenda to Pilotage.—From Lundy Island to Steamer. An uniform charge of 4l. 4s.

From Lundy Island to Bridgewater.

	s.	d.
If such vessel be under 100 tons reg. -	4	0
If 100 tons and under 200 -	5	10
If 200 — 300 -	4	7 6
If 300 and upwards -	5	3 0

From Lundy Island to Cardiff.

The same rates as to Bridgewater.

From Lundy Island to Newport.

The same rates as to Kingroad.

## COVES.

Description of Dues and Charges collected.

Anchorage and groundage for all boats, vessels, and barges liable to registry or licence, not registered at this port and which shall anchor within this harbour, for each vessel under 20 tons, 1s. 4d.; above 20 tons and not exceeding 100 tons, 2s. 6d.; above 100 tons, 5s.; payable to harbour-master of the port of Cove.

On all vessels anchoring in Cowes Roads; viz. the sum of 4s. 6d. per vessel, on all foreign vessels; and the sum of 1s. on all British vessels; payable to the gunner of Cowes castle.

**Ballast.**—There are no regular charges for ballast within this port, each captain of a vessel employing whom he may choose, and paying such price as they may agree for.

## CORK.

**Tonnage.**—  
On every vessel reporting at custom-house, except  
coasters and colliers - - - per ton 0 0 5  
Colliers - - - - - per ton 0 0 2  
Vessels from any port in Ireland - - - 0 0 1

**Ballast.**—  
Other than limestone - - - - - 0 1 0  
Limestone - - - - - 0 1 6  
For every ton of ballast taken from any vessel, if by  
lighter - - - - - 0 0 1  
Otherwise - - - - - 0 0 4

**Anchorage.**—On vessels calling for orders or refuge 0 0 1  
Pilotage.—During summer months, British vessels outside the limits of Cork Harbour, by special agreement.

## C. LEICESTER.

Channel Dues on all Vessels, whether in the Coasting or Foreign Trade.	Pilotage Charges.	Ballast Charges.	Observations.
Vessels belonging to the port, under 50 tons, charged 1d. per ton; above 50 tons, 2d. per ton. Vessels not belonging to the port, under 50 tons, 3d. per ton; above 50 tons, 5d. per ton. Vessels with coal, culm, and clinders, 6d. per ton on the quantity delivered, by the act 51 Geo. 3., Sept. 1811.	1s. 6d. per foot from East Ness to Pyefoot, and 1s. per foot from Pyefoot into the harbour, collected under the authority of the Trinity Board.	From 1s. to 1s. 3d. per ton, according to the description of ballast required; collected by consent, being private property.	The charge on vessels taking refuge in the harbour is 1s. per vessel for anchorage, and collected by prescriptive right.

## DARTMOUTH.

**Dues and Charges levied by Corporation of Dartmouth under License from Duchy of Cornwall.** £ s. d.  
On vessels going upon the ground - - - 0 1 0  
On vessels anchoring - - - - - 0 0 6  
By prescription:  
On vessels graving their bottoms - - - 0 2 6  
On vessels going alongside the quays - - - 0 1 0  
By consent:  
On vessels passing the Castle - - - - - 0 0 6

**Dues and Charges levied by Corporation of Dartmouth under License from Duchy of Cornwall.** £ s. d.  
On all vessels taking in ballast, per ton - - - 0 0 2½

**Dues and Charges levied under Act 6 Geo. 4. c. 125.**

**Pilotage.**—All ships, if boarded without the run of the Newstone East or the Blackstone West, are to pay as follows, viz. —

Drawing 10 feet water and under, per foot - - - 0 4 6  
— 10 to 12 feet - - - - - 0 3 0  
— 12 to 14 feet - - - - - 0 3 6  
— 14 to 16 feet - - - - - 0 4 0  
— 16 feet and upwards - - - - - 0 5 0

All ships, if boarded within that line, are to pay 4 part less. All ships boarded within the Castle are to pay only 1 pilotage. In carrying ships out of the harbour, the pilotage is to be in all cases ½ less than the inward pilotage.

## DOVER.

**Charges on Vessels when delivering Cargoes in whole or in part.** Foreign Vessels.

Dover harbour duty, per act 9 Geo. 4. c. 31., 3d. per ton.  
Ramsgate harbour duty, per acts 32 Geo. 3. c. 74., and 55 Geo. 3. (1815), payable in respect of vessels which have passed that port on their voyages, viz. vessels privileged as British, if 30 tons, and not exceeding 300 tons, 2d. per ton.  
Ditto, exceeding 300 tons, 1d. per ton.  
On vessels not privileged as British, if 30 tons and not exceeding 300 tons, 4d. per ton.  
Ditto, exceeding 300 tons, 1d. per ton.

**Light Dues, payable for such Lights as have been passed on the Voyage.**

Barque money, to fund for cast-away seamen, by prescription, 1s. per vessel.  
Water-bailiff's fee, by prescription, 1s. per vessel.

## DUNDEE.—Tonnage Rates and Duties. Per Register Ton.

For all vessels navigating to the southward of the tropic of Capricorn	£ s. d.
Between the equator and the tropic of Capricorn	0 1 6
Between the tropic of Cancer and the equator	0 1 3
To and from any port in North America, Greenland, Davis Straits fisheries, and all within the Straits of Gibraltar	0 1 0
To and from any port in Europe to the north of Drontheim, in Norway, and to or from the Azores, Madeira, or Teneriffe Islands, and the west coast of Africa, between the tropic of Cancer and the Straits of Gibraltar	0 0 8
To and from any port on the coast of Europe, between Gibraltar and Drontheim, in Norway, including Iceland	0 0 7
These ports, and all ports in the Baltic	0 0 5
To or from any port in Great Britain or Ireland, including the Islands of Guernsey, Jersey, Alderney, Sark, Man, the Shetland Islands, and Orkneys	0 0 3
All vessels loaded with coals, lime, or manure only, from any port in Great Britain, etc., excepting Scotland	0 0 2
All vessels loaded with coals, lime, or manure only, from any port in Scotland	0 0 1½
All vessels employed in the River Tay, carrying goods and entering the precincts of the port or harbour of Dundee	0 0 1½
All steam vessels from any port in Great Britain or Ireland, including the Islands of Guernsey, Jer-	

sey, Alderney, Sark, Man, the Shetland Islands, &c. s. d.  
and Orkneys, carrying passengers and their luggage exclusively. - 0 0 2

All steam vessels (from any port in Great Britain) employed on the river Tay, carrying passengers and their luggage exclusively, and vessels trading from the harbour, or carrying passengers to any port within the precincts. - 0 0 1  
All steam vessels carrying goods and passengers to pay the same rates as sailing vessels.

All vessels from any part of the river Tay, not exceeding 50 tons register, with stores, and having no other goods on board, and delivering their cargoes in the precincts of the said harbour, to pay 2s. each voyage in name of tonnage dues, and 1s. for every 40 tons, or part of 40 tons, additional.

All vessels from any part of the river Tay with sand, and having no other goods on board, to pay 1s. for each trip in name of tonnage dues.

It shall be in the option of the trustees to charge either the tonnage dues on the voyage inwards, or on the voyage outwards, at the rates specified in the above schedule; and if the charge be made on the voyage outwards, there shall be deducted from it the amount of the dues that may have been previously paid on the voyage inwards; but if such vessels sail in ballast, they shall be charged with dues on the inward voyage only.

All vessels launched within the harbour of Dundee, or precincts thereof, to pay half dues on the voyage outwards, if sailing in ballast; but if loaded in whole or in part, or taking passengers, to pay full dues.

All vessels to be permitted to enter the harbour of Dundee for safety, by payment of one-half of the tonnage dues; but if such vessels shall remain in the harbour, or any of the docks, beyond the space of 21 days, or shall take goods on board (stores for their own use excepted), or break bulk, they shall be liable in the full tonnage dues.

All vessels remaining in harbour to pay, after 3 months, 1d. per register ton per month in advance, when they are lying in any of the tide-harbours, and 1½d. per ton when lying in any of the docks.

Each vessel, with the exception after-mentioned, entering the harbour and loading or unloading goods or ballast within the same, or performing both operations, before leaving the harbour, to pay, in name of dues, of plank-money (whether a plank be used or not) as follows:—

Vessels not exceeding 30 tons	£ s. d.
Vessels exceeding 30 tons and not exceeding 50	50 0 0
— 50 —	100 0 0
— 100 —	150 0 0
— 150 —	200 0 0
— 200 —	250 0 0
— 250 —	300 0 0
— 300 —	350 0 0
— 350 —	400 0 0
— 400 and upwards	0 6

All vessels loaded with lime, coals, or manure only, and discharging their cargoes within the precincts of the harbour, to the eastward of the Hood Yards, or to the westward of the Magdalen Yard, to pay one-half of the dues in the above schedule.

Vessels with fish of any kind for curing, per ton register, or admeasurement, 2d.

## Exemptions.

All vessels leaving the harbour for the purpose of taking on board ballast in any part of the River Tay, and returning to the said harbour, or precincts thereof, with ballast, shall not be liable in above dues for such return.

Any vessel sailing from the port of Dundee, and put back by stress of weather, or any other cause, without having accomplished her voyage, shall not be liable in additional dues for such return.

Vessels partly loaded with coals, lime, or manure, or in ballast, but having damage done, or stow-wood on board, which have been used as such, and are intended to be unloaded; or having goods on board, which are neither to be landed nor re-shipped into any other vessel within the harbour or precincts, shall be charged the same dues as vessels wholly loaded with coals, lime, or manure.

All vessels arriving in ballast for the purpose of being re-pressed in the graving-dock, or on the patent slip, and departing in ballast, shall be exempted from tonnage dues, provided such vessels enter for the dock or slip immediately on arrival, and sail within 1 month after leaving such graving-dock or patent slip; or otherwise to be charged the 1s. per register ton per month in advance, when they are lying in any of the tide-harbours, and 1½d. per ton when lying in any of the docks.

Vessels with cargoes, arriving for the express purpose of

being repaired in the graving-dock, or on the patent slip, shall not be liable in shore dues, provided they neither take goods on board (store for their own use excepted) nor break bulk, except to lighten for getting into the dock, or upon the slip, and that they shall again re-load all the goods so landed.

All vessels loading or unloading goods within the precincts of the harbour of Dundee, to the eastward of the Rood Yards, and the westward of the Magdalen Yard, shall be exempted from payment of plank-money.

All vessels not carrying passengers arriving in the harbour in ballast, and departing again in ballast, shall be subject only in half dues; but if such vessels, after arriving in ballast, shall take in cargoes, or parts of cargoes, before their departure, they shall be liable in full dues.

Table of Rates for Pilots licensed by the Trustees of the Harbour of Dundee.

For vessels to or from foreign, boarded at the distance of not more than 3 miles outward of the Fairway Buoy of Tay, or at any point between that distance and the said buoy, and from thence to and including the harbour of Dundee, 5s. 6d. per foot, according to the draught of water.

For vessels to or from foreign, boarded between the Fairway Buoy of Tay and the buoy on the Elbow-end, marked No. 3, and from thence to and including the harbour of Dundee, 2s. 6d. per foot.

For vessels to or from foreign, boarded between the Elbow-end Buoy, No. 3, and Broughty Castle, and from thence to and including the harbour of Dundee, 1s. per foot.

All coasting vessels boarded at the respective distances above mentioned, to pay as follows: viz. vessels boarded not more than 3 miles outward of the Fairway Buoy of Tay, to pay 5s. per foot; between the Fairway Buoy of Tay and the Elbow-end Buoy, No. 3, 2s. per foot; and between the Elbow-end Buoy and Broughty Castle, to and including the harbour, 1s. per foot.

All vessels, whether foreign or coasting, boarded above Broughty Castle, to and including the harbour, 1s. per foot.

In the event of vessels having to stop in Carolina Roads for want of water in the harbour, or otherwise, the master of the vessel shall have it in his option either to dispense with the services of the pilot, or detain him on board till the vessel can enter the harbour. In the former case the pilot shall be entitled to full pilotage dues; in the latter, the pilot shall be EXETER.—RIVER EXR.

mitted, besides these dues, to 5s. for each day, or part of a day, in name of river fees.

When pilots enter the river on board vessels bound for places above Dundee, the river or sea pilotage, including the harbour, shall be payable in full by such vessels when moored off Carolina Roads.

All vessels boarded between 3 miles and 6 miles beyond the Buoy of Tay, to pay 10s. 6d. additional for distance-money; and vessels boarded 6 miles beyond said Buoy of Tay, to pay 15s. of distance-money.

In case of dispute, the distance to be ascertained by the bearings of the different headlands when the vessel was boarded.

#### Tay Light Duties (local).

The "Fraternity of Masters and Seamen of Dundee, incorporated by Royal Charter," possess the right, by charter, to levy, *inter alia*, the following dues on vessels arriving within the Firth of Tay, being the whole charges presently made in respect of said right; and those for and in name of the expense of erection and maintenance of 4 light-houses owned exclusively by said fraternity, 2 of which are situated on the north side and 2 on the south side of said Firth; and of certain booms placed in the Fairway thereof.

On every British ship coming within the entrance of the Firth of Tay, whether with cargo on board or in ballast, or driven therewithin by stress of weather or otherwise, at the rate of 1s. for every 10 tons register; under 10 tons, charged at the same ratio.

On every foreign ship, privileged, the same rate of dues when in either of the above situations; but the Trinity House makes good an equal amount to the said incorporation, in consequence of the half charge being only made on foreign vessels so privileged.

On every foreign ship, unprivileged, situated as above, the rate of charge is 2s. for every 10 tons register; under 10 tons charged at this ratio.

No dues are levied on British ships, nor on foreign vessels privileged or otherwise, leaving the Tay on their outward voyage, whether laden or in ballast, in the case of war ships, built within the ports of Dundee and Perth respectively, which pay the above dues on British shipping when leaving on their first voyage, whether foreign or coasting.

Harbour Dues.	Canal Dues.	Ballast.	Pilotage.	
One halfpenny per vessel, provided the proceeds above Powderham, payable to municipal corporation by prescription.	All vessels entering and passing through the canal, not otherwise, if less than 10 tons burthen, 5s. each; if 100, and less than 110 tons, 6d. per ton; if above 110 tons, 9d. per ton each, up and down.	4d. per ton, payable to the lord of the manor.	As per annexed rate, established under act 6 Geo. 4. c. 125, but amended under sanction of the Trinity Board of 6th May, 1835.	Vessels coasting, or in the foreign trade, are liable to the same charges, except pilotage. Vessels taking shelter only, are not liable to any charges beyond pilotage.
One penny per ton for every British vessel, and 2d. per ton for foreign, and not privileged as British. Sixpence upon every vessel not belonging to the port.	-	-	As per annexed rate, established under act 6 Geo. 4. c. 125, but amended under sanction of the Trinity Board of 6th May, 1835.	Vessels coasting, or in the foreign trade, are liable to the same charges, except pilotage. Vessels taking shelter only are not liable to any charge beyond pilotage.

	d.	d.
Forth, extending from Stirling to Fifeness on the north side, and Dunbar on the south; likewise by the Crinan canal to or from all ports and places in the Highlands, situated betwixt West Loch Tarbert on the south, and the north end of the Isle of Skye, including Skye, Mull, Coll, Tiree, Islay, Jura, and other islands betwixt these and the mainland	1½	1½
CLASS 4. To or from any place situated betwixt the Mulls of Galloway and St. David's head on the British side of St. George's channel, including the Isle of Man, and, on the Irish side, from Tuskar along the east and north coasts of the island to Torry; and from the Mull of Kintyre to Cape Wrath, including all the Hebrides; also by the Forth and Clyde Canal to or from places betwixt Fifeness and Kinnaird's Head, and betwixt Dunbar and Flamborough Head	2	2
CLASS 5. To or from all places in Ireland extending from Torry along the west and south coasts of the island to Tuskar; and in England and Wales, betwixt the Land's End and St. David's Head; also in Scotland, betwixt Cape Wrath and Kinnaird's Head, including the Orkney and Shetland Islands; likewise to or from places north of Flamborough Head navigating otherwise than by the canals.	3	3
CLASS 6. To or from all places on the east and south coasts of England extending from Flamborough Head to the Land's End, including Scilly Islands	4	4
CLASS 7. To or from any port or place in Europe, or island in the European seas	4	4
CLASS 8. To or from any port or place in the British province of Canada, New Brunswick, Nova Scotia, Newfoundland, Iceland, the Greenland and Davis' Strait fisheries, and all ports or places on the south coast of the Mediterranean Sea	5	5
CLASS 9. To or from all ports or places in the United States of America, West Indies, and east coast of America, north of the river Amazon; also the west coast of Africa, from the Straits of Gibraltar to the equator, including the islands of these coasts.	5	5
CLASS 10. To or from any port, place, or island lying betwixt the River Amazon and Cape Horn in South America, and between the equator and Cape of Good Hope on the west coast of Africa	6	6
CLASS 11. To or from all ports, places, or islands south and east of the Cape of Good Hope and west of Cape Horn		

CLASS 12. All vessels navigating under foreign flags to pay double the foregoing rates, corresponding to their respective voyages.

CLASS 13. All vessels, British or foreign, arriving at or departing from the port of Greenock in ballast, and all steam-packets employed solely in carrying passengers, to be charged only a moiety of the rates, corresponding to their voyages.

CLASS 14. Whenever any vessel propelled by steam, whether employed in carrying goods, partly goods and passengers, or passengers solely, shall have entered inwards and cleared outwards so frequently as to have paid 13s. 4d. per ton of port charges, viz. of harbour rates, police dues, anchorage, and water money, inclusive, as chargeable to shipping; or when any sailing vessel shall have entered inwards and cleared outwards so often as to have paid 6s. 8d. per ton, including the above enumerated dues, such vessels shall be exempt from further payment of port charges, during whatever part of 12 current months may be unexpired from the date of making payment of first portion of said 13s. 4d. or 6s. 8d., as the case may be. Owners or masters of either description of shipping, wishing to save trouble, may have a clearance of 12 months, by paying at the Harbour Dues Office 15s. 4d. per ton for steamers, and 6s. 8d. per ton for sailing vessels. The sums arising from vessels compounding as before-mentioned will fall to be allocated among the different tris is interested.

CLASS 15. All vessels not bound to or from the port of Greenock, but taking shelter in either of the harbours thereof, to pay, in addition to the anchorage dues, 1d. per ton.

CLASS 16. All vessels at clearing outwards shall pay the rate applicable to the most distant port of their intended voyage.

CLASS 17. All vessels outward bound for foreign ports from any other port in the river or channel, coming to anchor in the roadstead of this harbour for stores only, shall be exempt from harbour dues.

CLASS 18. All vessels outward bound for foreign ports from any other port in the river or channel, touching at the quays of this harbour for stores merely, and not taking in any cargo here, shall be admitted on payment of 1½d. per ton of harbour dues.

CLASS 19. All vessels outward bound for foreign ports, partly laden at any other port or ports in the river or channel, and taking on board goods from this port, not exceeding one-third of a full cargo, shall pay 3d. per ton of harbour dues.

CLASS 20. All vessels coming into the port of Greenock to lay up for any space not exceeding 8 days, shall on arrival pay 4d. per ton, and on departure pay the like sum of 4d. per ton.

CLASS 21. All vessels discharging a cargo or part cargo of lime, or limestone, or blintstone, to be charged inwards as if arriving in ballast.

CLASS 22. All lighters from and for Glasgow and intermediate places are chargeable with harbour dues, when with

cargo, at  $\frac{1}{4}$  d. per ton per voyage, inwards and outwards making a voyage.

Class 23. All lighters with coals for the use of the inhabitants of the town, but not for the manufactories, are not chargeable with harbour dues inwards, but when loading a cargo are chargeable outwards at  $\frac{1}{4}$  d. per ton, and if departing light, without cargo, at  $\frac{1}{4}$  d. per ton.

Class 24. Vessels under 15 tons, excepting when entering at or clearing from the custom-house with cargo, are exempted from the payment of harbour dues, and pay only anchorage dues, as per anchorage table.

Class 25. All vessels arriving at this port in distress, or for repair (excepting such vessels as have sailed from the port and paid the outward dues) shall, upon arrival, pay the one-half harbour dues applicable to the most distant port or place for which such vessel was bound, and on sailing shall pay the full dues applicable to the port or place to which such vessel is destined.

Class 26. All vessels clearing for foreign ports in ballast, with stores only, and having to proceed to Troon, Ardrossan, or any other place in the United Kingdom, to load, are to be charged the ballast rates applicable to coasting vessels.

Class 27. All steamers plying to and from ports or places, as per Class 1 of harbour rates, and when entering at or clearing from the custom-house, or with cargo, at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per

voyage, and when entering or clearing at the custom-house, or with cargo, at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per voyage.

Class 28. All steamers plying to or from ports or places, as per Class 2 of harbour rates, when with passengers only, are chargeable at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per voyage; and when entering or clearing at the custom-house, or with cargo, at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per voyage.

Class 29. All steamers plying to or from ports or places, as per Class 3 of harbour rates table, and passing to or from Glasgow with passengers only, are chargeable at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per voyage; and when entering or clearing at the custom-house, or with cargo, at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per voyage.

Class 30. All steamers plying to or from ports or places, as per Class 4 of harbour rates table, when with passengers only, are chargeable at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per voyage; and when entering or clearing at the custom-house, or with cargo, at the rate of  $\frac{1}{4}$  d. per ton per trip, or  $\frac{1}{4}$  d. per ton per voyage; and on so far steamers plying to or from ports or places, as per Classes 5 and 6 of harbour rates according to the table.

The rates in the foregoing table are exclusive of the harbour police rates on shipping, and of the town dues for anchorage.

The charges levied for local lights on vessels arriving at or departing from the Port of Greenock (exclusive of those of the Trinity House, the Irish Ballast Board, and the Commissioners of Northern Lights) are the Cloch, Cumber, and Toward Lights, under the authority of 27 Geo. 3, 31st May, 1754, as follows:—

One penny per ton on British ships on foreign voyages inwards, and the same charge outwards.

One halfpenny per ton on British ships on coasting voyages inwards or outwards.

Two pence per ton on Foreign ships on foreign voyages, inwards or outwards.

One penny per ton on foreign ships proceeding to, or coming from any port in Great Britain.

The above charges are levied on all vessels, whether with or in ballast.

#### Rates of Pilotage on the Clyde.

1. From any place betwixt the Cumberly Light and the Cloch Light, or from the anchorage at Fairlie roads, Redbeary Bay, or Quarantine Station, Holy Loch, or Greenock Roads,

and mooring, or to the quay and berthing,  $\frac{1}{4}$  d. per ton registered ton.

2. When a vessel, inward bound, is boarded outside of the south entrance of Lamlash harbour, the pilot to receive  $\frac{1}{4}$  d. per ton additional.

3. From any place inside of the Cloch Light, or from the anchorage at Greenock road, or the tail of the bank, in Greenock,  $\frac{1}{4}$  d.

4. Vessels inward bound, not boarded until near Greenock than the Bay of Quick,  $\frac{1}{4}$  d. per ton.

5. From Greenock to Port Glasgow,  $\frac{1}{4}$  d. per ton.

6. From Greenock roads, unmooring, and bringing into any of the harbours or docks, a ship, &c.; a brigantine, &c.

The same rates chargeable for like distances outwards, with the exception of the charge under article 2, which is payable on outward-bound vessels only in the event of the pilot being required to proceed with the vessel so far as the south entrance of Lamlash harbour.

All vessels sailing under foreign flags to pay one-half more than the above rates.

Any vessel anchoring at the tail of the bank, outward bound, the pilot, if required, is afterwards to go and meet her on to the anchorage the master may require, betwixt the Cloch and the Cumberly, without any additional charge to the  $\frac{1}{4}$  d. per ton; failing the pilot's attending, another may be hired to be stead, who is to have  $\frac{1}{4}$  d. per ton for taking the vessel from the tail of the bank out, leaving  $\frac{1}{4}$  d. per ton at the allowance for piloting from the quay to the tail of the bank.

Any pilot going on board ship (liable to question) at the request of the owner or master, is to be paid, in addition to be pilotage, 4s. 6d. per day of 24 hours for every day he may be detained on board.

## IPSWICH.

*Dock Dues on Vessels entering or departing from the Port, laden.*

Vessels under 50 tons -	per ton	£ s. d.
- from 50 to 60 tons -	-	0 0 1
- 60 to 70 -	-	0 0 2
- 70 to 80 -	-	0 0 4
- 80 to 90 -	-	0 0 5
- 90 to 100 -	-	0 0 6

North Cape of Norway, all places within the Straits of Gibraltar, and all islands and places in the ocean to the southward of Cape St. Vincent, not hereinbefore named, for every ton, the sum of -

For every foreign ship or vessel coming to or going (with merchandise) from any of the above named ports or places, double the rates, tonnage, or duties above mentioned, unless the said ships belong to British owners.

For every ship or vessel sailing coastwise or otherwise, or coming into the said haven in ballast to be laid up, for every ton (coasting duty included), the sum of -

N.B. - River craft using the docks and harbour at Hull are not charged any tonnage dues, except in cases where they come from and go to other ports.

Now. - It is important to note here, that the dues here given include any period of time during which a vessel may lie in the docks. It may also be stated that there is no trans-shipping duty on goods at Hull. There is no general dock-rate on goods; but for merchandise landed on the quays, wharfe is charged. The importer, however, may remove goods by lighters, &c., without placing them on the quays; and the quays are perfectly open to the merchant's labourers, if he choose to land them there, so that the charge of the company may, if the merchant and shipowner so desire, be strictly limited to the tonnage rates on the vessel, as stated in the above table.

*An Account of Charges levied on Shipping by the Corporation of Hull.*

Buoyage and beaconage on British vessels.	£ s. d.
Vessels under 80 tons -	0 2 0
And for every additional 10 tons -	0 0 6
Buoyage and beaconage on Alien vessels	
Vessels under 65 tons -	0 11 0
65 tons, and under 135 tons -	0 14 0
135 - 170 -	0 17 0
170 - 180 tons -	0 1 0
And for every additional 10 tons.	0 1 0

The above duty of buoyage and beaconage is payable once during the voyage, coasting or foreign, either inward or outward for the maintenance of the buoys, beacons, lighthouses, and vessels erected and placed in and about the river Humber, by the corporation of the Trinity House, Hull.

Fine on alien vessels importing a cargo, or part of a cargo -

Fine on alien vessels exporting a cargo, or part of a cargo -

Vessels taking refuge in the port are chargeable only with the buoyage and beaconage.

Authority: - Charter.

*A Scale of ancient and usual Dues payable to the Corporation of Hull, upon Ships and Vessels Entering Inwards and Clearing Outwards, Foreign and Coastwise.*

250 to 300 - 0 12 0

300 tons and upwards - 0 1 6

Foreign vessels, unprivileged, double the above rates.

All vessels bringing coals only, and departing in ballast only, half dues. All colliers bringing goods are charged full tonnage duty for the quantity of goods on board, in proportion the goods bear to the register tonnage of such vessel.

**Pilotage.** The charges for pilotage, which are levied under the dock commissioners, are as follows:

From the dock entrance to Downham Reach, for British vessels with one mast - 0 1 0

For every British vessel with 2 or more masts - 0 1 2

From Downham Reach to Levington Creek, and vice versa - 0 0 6

From Levington Creek to Harwich Harbour - 0 0 6

Inwards from Harwich Harbour to Downham Reach - 0 1 0

Outwards from Downham Reach to Harwich Harbour - 0 1 0

For every foreign ship, double the above rates.

**Ballast.** The charge for ballast is, for Ipswich vessels, 11*d.* per ton, and 1*s.* 5*d.* per ton to all other vessels, which must be taken from the dock commissioners' ballast wharf, under the authority of 1 Vict. c. 74.

**Water Balliff's Dues.** This is a charge of 1*s.* 8*d.* for every vessel not belonging to the port, under charter of corporation.

# CHARGES ON SHIPPING.

1013

above 3 calendar months, for each after month, or any part thereof, excepting ships or vessels from Greenland or Davis's Straits - £ s. d. 0 0 2½

For all foreign vessels from any of the before-mentioned ports or places, the aforesaid respective rates, and one-half more; but those privileged under the reciprocity act pay no more than British vessels.

For all loaded vessels not breaking bulk, and for all vessels in ballast which do not take in goods, coming into the present harbour, provided they do not make use of any of the docks, nor remain

in the harbour above four weeks, one-half of the aforesaid respective rates or duties; applicable also to vessels taking refuge.

For every ship or vessel going from the port of Leith to any other port in the Frith of Forth to take in a part of a cargo, and return to Leith, upon her return - £ s. d. 0 0 2

No ship or vessel is subjected in payment of the aforesaid rates and duties for more than 5 voyages in any one year.

Vessels loaded with coals, sold in retail to the inhabitants of Edinburgh and Leith, who are hereby debarred from entering the said dock, are exempted.

## LONDON.

**Port or Dock Duty.**—The following rates are received by the officers of this port on all vessels, whether British or foreign, entering inwards or clearing outwards, except in ballast, under the authority of act 4 & 5 Will. 4. c. 52.; and the amount so received is paid into the chamber of the city of London, in conformity with the 6th section of the said act; viz.

From or to Denmark, Norway or Lapland, Holstein, Hamburg, Bremen, or any other part of Germany bordering on or near the German Ocean, Holland, or any other of the United Provinces, Brabant, Antwerp, Flanders, the Netherlands, France (within Utrecht), Finland, Russia (without or within the Baltic Sea), Livonia, Courland, Pomerania, Prussia, Sweden, or any other country or place within the Baltic Sea, &c. per ton.

From or to all other places,  $\frac{1}{2}$  per ton.

**Remount Harbour Duty** (per act 32 Geo. 3 c. 74.), chargeable on all Vessels trading to or from Foreign Ports or Places passing the Harbour, London or in Ballast.

For every British vessel, or vessel belonging to foreign states under treaties of reciprocity —

Under 500 tons — — — — — 2d. per ton.

Above 500 — — — — — 4d. —

For every vessel belonging to foreign states not under treaties of reciprocity —

Under 500 tons — — — — — 4d. per ton.

Above 500 — — — — — 1d. —

For every British vessel trading coastwise passing the harbour, the British rate not otherwise once a year.

Also 1d. per chaldron on coals, and 1d. per ton on stone payable for each voyage.

**Dover Harbour Duty** (per act 9 Geo. 4.), chargeable on all Vessels, British or Foreign.

From 50 to 500 tons burthen trading over-sea, for each time passing the harbour, if laden, 1d. per ton; also the like sum for entering the harbour.

Coasters: The passing and entering, duty once a year; also 1d. per chaldron on coals, and 1d. per ton on stone, each time passing.

**Cinque Ports Surplus Pilotage Rate** (per act 52 Geo. 3. c. 59.), chargeable on all foreign vessels not under treaties of reciprocity.

Not having corn or provisions for the greater part of the cargo, having come through the Cinque Port water, a fourth part of the Cinque Port pilotage rates.

**Scarborough Pier Duty**, chargeable on coasting vessels. If laden, passing the pier, one-fifth of a penny per ton.

## LONDONDOCK.

**Tonnage.**—Collected under 2 & 3 Will. 4.

Foreign ships, 6d. per ton; British ships from Foreign, 3d. per ton; coasters, 2d. per ton; vessels in distress, or taking refuge from stormy weather, free; vessels in ballast, free; vessels under 30 tons, free; no deduction on vessels delivering their cargo in part.

**Pilotage.**—Collected under 2 & 3 Will. 4., and reduced by bye-laws to the following rates, viz.:

**British Ships of every Description, or Steam-Boats.**

Inward.		per foot, and inches in proportion.

15 feet and upwards at the rate of	—	4 0 0

Vessels of 30 tons burthen, per register, and under, shall pay 10s. inward pilotage, and 6s. outward pilotage; above 30 tons and not exceeding 40 tons, if bound coastways, and sailing in ballast, only 8s. outward. Ships which have discharged potatoes, under 30 tons, 3s. 6d. outward pilotage, if British. Wind-bound vessels half pilotage in and half pilotage out, to or from Mollie or Quilpie's Point. Vessels towed by steamers 1-5th off, if demanded by the master or owner, or by any person for them, on producing a proper order.

All vessels laden with bark, under 180 tons, to pay 6d. per foot extra; 180 tons and not exceeding 150 tons, 4d.; exceeding 150 tons, 1s. per foot extra. All British ships from foreign ports, or, if bound to foreign ports, having on board half their

registered tonnage of cargo, or with passengers, to pay 2d. per foot extra, in addition to the above charges.

Vessels which have cleared the Lough, and by storm of weather obliged to return:—It is hereby directed that as these vessels have paid the full amount of pilotage, they shall pay but 1-3rd in, and 1-3rd out, of the amount of their outward pilotage to be ascertained by the master's account from the collector of pilotage.

Pilots detained on board vessels, the sum of 2s. 6d. per day; when the measurement exceeds 150 tons, 3s. 6d. per day; detaining them unnecessarily in Derry, the like amount.

**Ballast.**—Collected under the 2 & 3 Will. 4. Masters of vessels may procure their own ballast in the best and cheapest manner; but those who may wish to be supplied by the Ballast office pay, for gravel, 1s. 3d. per ton; sand or sufficient ballast, 1s. per ton.

**Anchorage.**—Collected from time immemorial. Vessels with one mast, 1s. 6d.; Vessels with 2 masts or more, 2s. 6d. Vessels, unless they come to the ship quays, are not charged.

**Merchants' Quay.**—Vessels arriving or sailing with a cargo are free; the owners of the goods pay the wharfage.

Vessels arriving in ballast for the purpose of repairing, pay 2d. per ton on the register tonnage, for the berth and use of the quays.

Vessels coming to the quays for the purpose of discharging or taking in ballast, pay 2d. per ton on the quantity discharged or taken in.

Vessels arriving in ballast for the purpose of taking passengers, pay 2d. per ton on the register tonnage, for the berth and use of the quays, and the passengers' luggage is free.

Vessels that have discharged cargo, and taken in ballast for the purpose of taking passengers, pay 2d. per ton on their register tonnage; the ballast and the luggage are free.

## LYONS.

**Town Dues. Foreign and Coasting Vessels.**

Beaconage, per ton delivered — — — — — 0 1

Stackage, ditto — — — — — 0 3

Anchorage, per vessel — — — — — 0 6

Bulkbreaks, per vessel, to foreign parts and not belonging to Lyons — — — — — 3 4

Ballast, ditto, every 3 tons delivered. *Fide Ballast.* — — — — — 0 4

Unprivileged vessels:

Beaconage, per ton in addition — — — — — 0 0 6

Stackage, ditto — — — — — 2 6

Ballast, ditto — — — — — 2 6

In addition to these charges, there is also a due of 6d. per chaldron (of 25 cwts.) of coals, payable by vessels not belonging to Lyons.

(This due is collected with the town dues. It is understood to have been assigned to the courts of guardians of the poor; and the produce of it is paid to the said guardians, and applied in relief of the poor rates.)

These dues are not payable from vessels taking refuge or discharging their cargoes for the purpose of repairs, and are under the superintendence of the corporation.

**Moorings Dues.**

2d. per ton delivered; unprivileged vessels double. Not chargeable upon vessels taking refuge, &c.

Under the control of the commissioners under the pilot act.

**Pilotage.**

To 10 feet draught of water — — — — — 1 6 per foot.

Exceeding 10 feet to 12 feet — — — — — 1 9

12 — 14 ft. 6 in. — — — — — 2 6

14 ft. 6 in. — — — — — 2 6

The rate is the same whether loaded or in ballast, and is chargeable each time up and away, as well as on vessels taking refuge or in distress. The company of pilots is under the control of the commissioners under the pilot act.

Ballast is supplied to vessels by private individuals at 1s. 2d. per ton. This charge is independent of that of ballast, under the head of Town Dues, which is payable from all vessels not belonging to freemen of the borough of King's Lynn.

**Moorings.**

**Dues and Charges levied under the 1st Victoria, cap. 58.**

Vessels from Foreign Ports. — — — — — 4 4

For all vessels navigating to the southward of the Tropic of Cancer, per register ton — — — — — 0 1 6

Between the Equator and the Tropic of Cancer — — — — — 0 1 2

Between the Tropic of Cancer and the Equator — — — — — 0 1 8

To and from any port in North America, Greenland, Davis's Straits, Flanders, and all within the Straits of Gibraltar — — — — — 0 0 0

To or from any port to the north of Drenthaim, in Norway, or from Azores, Madeira, or Teneriffe Islands — — — — — 6 0 0

To or from any port between Gibraltar and Dunkirk, including Dunkirk, and from any port in the Baltic, per register ton — — — — — 0 0 3

**On Coasting Vessels.**

To or from any port in Great Britain or Ireland, including the Islands of Guernsey, Jersey, Alderney, Sark, Man, the Shetland Islands, and Orkney — — — — — 0 0 3

All vessels loaded with coals or lime, or from any port in Great Britain, &c., excepting Ballast — — — — — 0 0 1

All vessels loaded with coals or lime only, from any port in Scotland, and all vessels engaged in the herring trade — — — — — 0 0 3

All steam vessels from any port in Great Britain, or places enumerated in No. 7, carrying passengers and their luggage exclusively — — — — — 0 0 3

All steam vessels carrying goods and passengers, to pay the same rates as sailing vessels.

It is in the option of the harbour trustees to charge either the tonnage dues on the voyage inwards, or on the voyage outwards, at the rates specified in the above schedule, according to the clearance; and if the charter be change on the voyage outwards, there shall be deducted from it the amount of the dues that may have been previously paid on the voyage inwards; but if such vessels sail in ballast, they shall be charged 1-3d. off on the inward voyage and 1-3d. on the outward.

All vessels lashed at this port pay half tonnage dues on the voyage outwards, according to the clearance of the port to which such vessels sail, provided they take cargo on board, but if they sail in ballast the dues shall be charge on land.

All vessels with cargoes are permitted to make this return

for safety or convenience by payment of one-half of the tonnage dues; but if they shall take goods on board (stores for their own use excepted), or break bulk, they shall pay full tonnage dues.

All vessels remaining in harbour pay, after 2 months, 1d. per register ton per month in advance.

#### Plankeage.

Each vessel entering the harbour, and loading or unloading goods or ballast within the same, or performing both operations before leaving the harbour, pay, in place of plank money (whether a plank be used or not), as follows, viz. —

On vessels amounting to and not exceeding	20 tons	£	s.	d.
— exceeding 20 and not exceeding 50	50	0	1	6
— 50 — 100	100	0	2	0
— 100 — 150	150	0	2	6
— 150 — 200	200	0	3	0
— 200 — 250	250	0	3	6
— 250 — 300	300	0	4	0
— 300 — 350	350	0	4	6
— 350 — 400	400	0	5	6
— 400 and upwards		0	6	6

#### Local Lights and Beacons.

The harbour trustees are empowered by the before-mentioned act to charge at the rate of 1d. per ton on vessels, for the support of the harbour lights and beacons, but finding that a less rate would cover the expenditure, they reduced it to ½d. per ton.

#### Pilotage.

By virtue of the powers conferred on the harbour trustees, the following rates of pilotage were fixed by them, viz.:

Tons Register.	First Boat.		Second Boat.	
	In-wards.	Out-wards.	In-wards.	Out-wards.
£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
All under 10 tons	0 6 0	0 4 6	0 5 0	0 4 0
40 and under 50	0 7 0	0 5 3	0 6 0	0 4 6
50 — 60	0 8 0	0 6 0	0 6 0	0 5 0
60 — 70	0 9 0	0 6 9	0 7 0	0 5 6
70 — 85	0 10 0	0 7 6	0 7 6	0 6 0
85 — 100	0 12 0	0 9 0	0 8 0	0 6 6
100 — 120	0 13 0	0 11 3	0 9 0	0 6 9
120 — 150	1 0 0	0 15 0	1 0 0	0 7 6
150 — 175	1 5 0	0 18 9	1 11 0	0 8 3
175 — 200	1 7 6	1 0 7	1 12 0	0 9 0
200 — 250	1 10 0	1 2 6	1 13 0	0 9 9
250 — 300	1 15 0	1 6 3	1 14 0	0 10 6
300 and upwards.	2 0 0	1 10 0	1 15 0	0 11 3

The third boat is paid the same as the second, and the pilot-master's charge is 6d. per mast on each vessel entering the harbour.

#### Ballast.

The charge for ballast at this port is 1s. per ton, ½d. of which is paid to the magistrates and town council for the privilege of removing the sand, and 10d. for the cartage thereof.

#### NEWCASTLE.

Description of Dues, &c.	Rates.

Deck Dues. First Class:—Vessels Entering with Cargo or Departing with Cargo.

	Inwards.			Outwards.		
	Per Ton.	£	s. d.	Per Ton.	£	s. d.
Vessels from or to any part of Great Britain, Ireland, the Isle of Man, or any of the Islands of (Jersey, Jersey, Alderney, and Sark, not exceeding 100 tons measurement	0 0 2			0 0 2		
For vessels exceeding 100 tons measurement	0 0 3			0 0 3		
Rent after two weeks from date of entrance, 1d. per ton, per week.						
Vessels from or to any other part of Europe, except places within the Straits of Gibraltar, and round the North Cape	0 0 5			0 0 5		
Rent after 4 weeks, as before, 1d. per ton, per week.						
From or to any port or place in Europe, round the North Cape, any port or place within the Straits of Gibraltar, whether in Europe, Asia, or Africa	0 0 6			0 0 6		
Rent after 4 weeks, as before, 1d. per ton, per week.						
From or to any port or place in British America, except the West Indies, and any port or place in United States	0 0 9			0 0 9		
Rent after 4 weeks, as before, 1d. per ton, per week.						
From or to any port or place in any other part of the world	0 0 9			0 0 9		
Rent after 4 weeks, as before, 1d. per ton, per week.						

For every vessel, with a cargo, which shall enter the said dock and depart therefrom, without breaking bulk, or which shall discharge, and afterwards take on board and depart with the same cargo, per ton measurement, 6d.  
 Entering and departing in ballast, per ton, 5d.  
 Rent after 1 week from date of entrance, 1d. per ton per week.  
 Every vessel of less burthen than 20 tons measurement to be rated at 20 tons measurement.

There is a charge made for what is called a brokerage, of 1d. per ton, upon the number of tons of goods shipped or landed, paid by consent, and under the authority of the merchants. This is paid by the masters of vessels on clearing, and we believe is very generally charged to the ship.

Ballast Charges, levied by Harbour Commissioners, under act 6 Will. 4. c. 66.

Vessels coming in in ballast pay only on the outward cargo. The dues levied on vessels for discharging their ballast on the east side of the river are 1d. per ton register on vessels coming from any place westward of the Helms Islands; and 1d. per ton on those from places eastward of the Helms.

For removing and taking away the ballast, a charge of 2d. per ton is made on the register tonnage.

Ballast discharged at various private wharves on the west side of the river, costs from 1d. to 2d. per ton register, from any place whatever, varying according to the nature of the ballast, whether gravel or limestone; payable by custom or consent.

#### PLYMOUTH.

##### Ballast Dues.

1s. per vessel of every description (except Spanish), whether taking refuge in the harbour only, or to deliver the cargo, or whole or in part.  
 6s. per vessel, Spanish, ditto.

##### Sutton Pool.

Dues payable to the Sutton Pool Company.—Tolls on Ships.  
 For all ships or vessels belonging to foreign subjects, coming within the said harbour of Sutton Pool, 4d. per ton.  
 For all ships or vessels belonging to H. M.'s subjects, coming from foreign parts, 5d. per ton.  
 For all ships and vessels belonging to H. M.'s subjects employed in the coasting trade, or coming from Ireland, above 50 tons, 1d. per ton.  
 For all such ships or vessels of 50 tons, or under, 1d. per ton.  
 All vessels employed in fishing, and belonging to the port, 1s. 1s. per annum.  
 All barges, lighters, and other craft above 20 tons, 1s. per annum.  
 All barges, lighters, and other craft under 20 tons, 16s. per annum.  
 All ships or vessels lying within the said harbour more than 3 calendar months, (under repair at a shipwright's yard) shall pay, at the expiration thereof, the same dues as if she had again entered the harbour; and so on at the expiration of every 3 months she shall continue therein.

##### For the Use of the Graving Dock.

For every ship or vessel of 60 tons, and under 80 tons, 2s. per week.  
 of 80 tons and under 100 tons, 2s. 6d. per week.  
 of 100 tons and under 200 tons, 5s. per week.  
 of 200 tons or upwards, 5s. per week.  
 For the Use of the Mooring Chains.  
 For every ship under 200 tons, 5s. per week.  
 Above 200 and under 250 tons, 4s. per week.

Above 250 tons, 5s. per week.

For the anchorage and groundage of every ship or vessel entering or coming into Sutton Pool, 1s. 6d.

For moorage, 5d.

(The above charges are levied per acts 51 Geo. 3. and 2 Will. 4.)

##### Dawsonport.

Dues charged on Vessels entering Sutton Pool, New Passage and Mewstone Quay.

Foreign ships, per ton register, 4d.

British ships of 80 tons register, each, 6s.

British ships under 80 tons, 4s. 6d.

British boats, 3s. 6d.

British barges or hoy 20 tons, and not exceeding 40 tons register, 1s.

British boats or vessels under 20 tons, laden, 6d.

For vessels lying up, per week, 2s. 6d.

For the use of the graving bench, 5s.

(Levied, by prescription, by the lord of the manor.)

##### Rates for Pilotage.

1. All British ships of 14 feet water and upwards, except East Indians, if boarded without the land off Penlee Point or the Mewstone, which must be known by the western land being open off the Ram Head, shall pay 5s. per foot pilotage, if carried into the harbour of Hamoaze, Catwater, or Sutton Pool.

2. British ships under 14 feet water down to 8 feet, boarded as above stated, are to pay 4s. per foot for the like service.

3. Ships above 14 feet, within that line, are to pay only 4s. per foot; and ships under 14 feet, boarded as above, only 3s. per foot for the like service.

4. All ships under 8 feet water are to pay as above stated, as if the vessel was of that draught.

5. All the above rates are to be paid in proportion for every half foot water, but no allowance is to be made for any draught of water less than half a foot.

6. In carrying ships to sea from the said harbour, the pilotage is to be in all cases the same as the inward pilotage.

7. All ships which may anchor on their arrival either in Caw- and Bay or Plymouth Sound, are to pay only  $\frac{1}{2}$  of the before-mentioned rates of pilotage.

8. All pilots employed to carry ships from any one of the harbours to and from her, is to be paid the same pilotage as if the said ship had been boarded within the headlands coming from sea.

9. Should any ship above 17 feet water be boarded a mile the western land is open off the Itam Head by one of the second class pilots, and he runs the ship as far as either of the buoys on the Panther or Shoreol, and is there superseded by one of the first class, he shall be entitled to  $\frac{1}{2}$  of the pilotage.

10. Masters of ships taking a pilot at sea

3 leagues without a line drawn from the Itam Head	s.	d.
to the Newstone, are to pay	3	0
6 leagues ditto	4	0
10 leagues ditto	6	0

and proportionably for intermediate distances.

11. Ships not having British registers are to pay  $\frac{1}{2}$  more than ships having British registers, except when such first-mentioned ships shall, by any order of H. M.'s most honourable privy council, be privileged to enter the ports of this kingdom, upon paying the same duties of tonnage as are paid by British ships, in which case such ships and vessels not having British registers shall pay the like rates of pilotage only as are payable by ships having British registers.

12. If a master choose to retain or employ a pilot whilst at anchor, the rate for the lay-days is to be 1s. 6d. a day, not including the day coming in or going out.

The foregoing rates are levied by authority of the Trinity Board, under an act of parliament; 6 Geo. 4. cap. 125.

There are no charges levied for local lights or beacons at this port.

There is no regulated charge for ballast, nor any Board appointed for its supply: the parties obtain it on the best terms they can from different quarters, the quarries here abounding with matter fit for the purpose.

## SOUTHAMPTON.

Vessels, whether coasting or foreign, entering the port of the town of Southampton, and not belonging to the port, are chargeable with a boomage duty:—

Under 50 tons	-	-	1s. 6d. per vessel.
Above 50 and under 100 tons	-	-	2s. 6d. —
100 tons and upwards	-	-	4s. —

And all vessels, upon loading or unloading in the roads, at the legal quays, or in the docks, 1d. per ton, register tonnage, each voyage.

The above are collected under the authority of the acts of 43 Geo. 3. c. 21., and 50 Geo. 3. c. 168.

*Rates on Shipping in the Southampton Dock, per Act 5 Will. 4. c. 25.*

All vessels landing or shipping cargo in the dock, not being coasters, per register ton, 1d., with privilege to remain 3 weeks from date of entry.

Rent after 3 weeks, per register ton, per week	0 0 0½
Coasters landing cargo or passengers, or loading out, with 1 week's privilege	free.
Rent after 1 week, per register ton, per week	0 0 0½
Coilers, transhipping their cargoes into vessels in dock, per coiler	1 1 0

The docks are part of the port of Southampton, and, consequently, vessels using them are subject to no extra dues of pilotage.

*Rates of Pilotage for the Port of Southampton.*

From any place within the Isle of Wight to Southampton, Hamble, or Burdwood:	Per Foot.
For vessels drawing 17 feet water and under	0 2 0
For vessels drawing more than 17 feet	0 3 0

From any place within the Isle of Wight to Eling, Redbridge, Northam, or Chapel, 1s. per foot more than the above rates.

From Southampton to sea:	
For vessels drawing 17 feet water and under	0 6 0
17 feet and not exceeding 20 feet	0 7 0
more than 20 feet	0 9 0

Vessels belonging to the port of Southampton are to pay one-half only of the above rates.

For removing vessels from one place to another within the Southampton Water, or within the Isle of Wight, the following rates: viz.

From Southampton to Redbridge, Eling, Northam, or Chapel, and vice versa	0 1 0
From Southampton to Hamble, Burdwood, Lype, or Buckler's Hard, or Beaulieu, and vice versa	0 1 6

and for any intermediate distance a proportionate part of the above rates.

If a master chooses to retain or employ a pilot whilst at anchor, the rate for the lay-days is to be 7s. 6d. per day, exclusive of the day on which the vessel comes in or goes out.

## STOCKTON.

## Foreign Trade.

Vessels inwards, with cargoes	per Ton Register.
Vessels outwards, with general cargoes	0 0 6
Vessels outwards, with coals	0 0 3
And these vessels 6s. 9d. per mast per voyage.	

## Coasting Trade.

Vessels inwards, with general cargo	0 0 4
Vessels inwards, with hazelwood, corse rods, pit props, old lead, and old iron	0 0 0½
Old lead and old iron from the port of London considered general cargo.	
Vessels outwards, with general cargo	0 0 4
Vessels with coals	0 0 3
And these vessels pay 5s. 3d. per mast per voyage.	

## Exempt from Dues.

Ships in ballast, or with manure, lime, blunstone, or ships taking refuge within the Town by stress of weather. The above dues are levied and collected under acts 45 Geo. 3. c. 48 and 9 Geo. 4. c. 37.

And all vessels entering the Town bay, 2s. 6d. per vessel for anchorage and plankage dues to the Stockton Corporation, leased by them from the Bishop of Durham, who holds the same as owner of the port; whether by ancient charter, prescription, or by what right unable to ascertain.

Life-boats, by consent, on vessels above 160 register tons, 6d.

Life-boats, by consent, on vessels under 160 register tons, 3d. per voyage.

Ballast discharged at the Middleboro' Crane at 5d. per ton.

*Rates of Pilotage for every Foot of Water the Vessel draws.*

		British Ships.	Foreign Ships.
From the sea and any intermediate place, and vice versa.	To the 5th buoy, being the first safe place of anchorage, as allowed by act of parliament.	1 3	1 9
	To Cargo Fleet	1 9	2 9
From Cargo Fleet, and any intermediate place, and vice versa.	To Middleboro'	0 6	1 0
	To Stockton	1 6	2 6

Between the 1st day of October and 1st day of April, 1d. per foot extra, and for every foreign vessel having two booms, 5s. over and above the said rates to be paid for two booms free sea, and in the river likewise.

N.B. Owners and masters of ships using the Town and port of Stockton are not to pay more, or any other rates of passage, than the above-mentioned rates; and all pilots acting under the licence and authority of the master, wardens, &c. of the Trinity House, are hereby ordered and directed not to act, demand, or receive for pilotage any more than the rates above stated.

## SUNDERLAND.

Dues and Charges.	Rate.

## Charges for Ballast.

5*d.* per ton for every ton of ballast which is brought alongside of the vessel in lighters, and if it is put on board by the lightermen, an additional 6*d.* per ton for heaving.

Local lights and beacons - - - - - nil.

**PIMENTO, ALLSPICE, or JAMAICA PEPPER** (Fr. *Poivre de Jamaïque*; Ger. *Nelkenpfeffer*; It. *Piment*), the fruit of the *Myrtus pimenta*, a beautiful tree which grows in great plenty on the hills on the north side of Jamaica. The berries are spherical, and, when ripe, of a black or dark purple colour. But, as the pulp is in this state moist and glutinous, the berries are plucked when green; and being exposed in the sun to dry, they lose their green colour, and become of a reddish brown. They are packed in bags and hogsheads for the European market. The more fragrant and smaller

they are, the better are they accounted. They have an aromatic, agreeable odour, resembling that of a mixture of cinnamon, cloves, and nutmegs, with the warm, pungent taste of the cloves. Pimento is used in medicine; but its principal use is in the seasoning of soups and other dishes.

"The returns," says Mr. Bryan Edwards, "from a pimento walk in a favourable season are prodigious. A single tree has been known to yield 150 lbs. of the raw fruit, or 100 lbs. of the dried spice; there being commonly a loss in weight of  $\frac{1}{3}$  in curing; but this, like many other of the minor productions, is exceedingly uncertain, and perhaps a very plentiful crop occurs but once in 5 years. The price in the British market, as may be supposed, fluctuates accordingly; but I believe its average for some years past may be set down at 7d. per lb., exclusive of the duty (8d.)." — (Vol. ii. p. 372. ed. 1819.) The price of pimento in bond, in the London market, has varied of late years from 4d. to 5½d. per lb.

At the period when Edwards's work was published, the annual imports of pimento from Jamaica, which supplies more than 9-10ths of the pimento brought to England, amounted to about 679,000 lbs., and were decreasing every year — (*loc. cit.*). But at an average of the 3 years ending with 1833, the annual imports were 3,349,893 lbs.; and in 1833 they amounted to 4,844,573 lbs.; since then, however, there has been a considerable falling off in the imports, which in 1841 were only 1,013,400 lbs. We subjoin

An Account of the Quantities of Pimento entered for Consumption in the U. Kingdom, during each of the 3 Years ending with 1842, and of the Amount of the Duties thereon.

Quantities.			Duties.					
1840.	1841.	1842.	1840.		1841.		1842.	
<i>Cwts.</i> 3,031	<i>Cwts.</i> 2,654	<i>Cwts.</i> 4,074	£ 4,577	s. d. 2 7	£ 3,900	s. d. 19 1	£ 1,846	s. d. 1 4

The duty on pimento, which amounted, when the former edition of this work was published, to 5d. per lb., was reduced in 1836 to 3d. per lb., and in 1842 to 6s. a cwt. Its price averages in the London market from 2½d. to 3d. per lb., ex. duty.

**PINCHBECK** (Ger. *Tomback*; Du. *Tombak*; Fr. *Tambac*, *Similor*; It. *Tombacco*; Sp. *Tumbac*, *Tumbaga*), a name given to one of the many imitations of gold. By melting zinc in various proportions with copper or brass, some alloys result, the colours of which approach more or less to that of gold. This composition is frequently employed as a substitute for gold, in the formation of watch-cases, and various other articles of a like description. Pinchbeck is sometimes called *Tambac*, and sometimes *Similor*, and *Petit-or*.

**PINE**, or **FIR**, a species of forest tree, next, if not superior, to the oak, in point of utility and value. There are above 20 species of pine. They do not bear flat leaves, but a species of spines, which, however, are real leaves. They are mostly, though not all, evergreens; but the appearance of the tree, as well as the quality of the timber, varies with the species, and also with the situation in which it grows. Generally speaking, the timber is hardest and best in exposed cold situations, and where its growth is slow. We shall only notice those species, the timber of which is most in use in this country.

1. **SCOTCH PINE** (*Pinus sylvestris*) is a native of the Scotch mountains, and of most northern parts of Europe; being common in Russia, Denmark, Sweden, Norway, and Lapland. It is straight, abruptly branched, rising in favourable situations to the height of 80 or 90 feet, and being from 3 to 4 feet in diameter. It is at perfection when 70 or 80 years old. The colour of the wood differs considerably; it is generally of a reddish yellow, or of a honey yellow, of various degrees of brightness. It has no larger transverse septa, and it has a strong resinous odour and taste. In the best timber, the annual rings are thin, not exceeding  $\frac{1}{10}$ th of an inch in thickness; the dark parts of the rings of a bright reddish colour; the wood hard and dry to the feel, neither leaving a woolly surface after the saw, nor filling its teeth with resin. The best Norway is the finest of this kind, and the best Riga and Memel are not much inferior. The inferior sorts have thick annual rings; in some, the dark parts of the ring are of a honey yellow, the wood heavy, and filled with a soft resinous matter, feels clammy, and chokes the saw. Timber of this kind is not durable, nor fit for bearing strains. In some inferior species, the wood is spongy, contains less resinous matter, and presents a woolly surface after the saw. Swedish timber is often of this kind.

Scotch fir is the most durable of the pine species. It was the opinion of the celebrated Mr. Brindley, "that red Riga deal, or pine wood, would endure as long as oak in all situations." Its lightness and stiffness render it superior to any other material for beams, girders, joists, rafters, &c. It is much used in joiners' work, as it is more easily wrought, stands better, is much cheaper, and is nearly, if not quite, as durable as oak.

Scotch fir is exported from Norway and Sweden, under the name of *redwood*. Norway exports no trees above 18 inches diameter, consequently there is much sapwood; but the heart wood is both stronger and more durable than that of larger trees from other situations. Riga exports a considerable quantity under the name of masts and spars: pieces from 18 to 25 inches diameter are called *masts*, and are usually 70 or 80 feet in length; those of less than 18 inches diameter are called *spars*. — (See **RIGA**.) Yellow

deals and planks are imported from various parts of Norway, Sweden, Prussia, Russia, &c. Tar, pitch, and turpentine are obtained from the Scotch fir. — (See these titles.) When the tree has attained to a proper age, it is not injured by the extraction of these products.

2. **SPRUCE PINE.** — Of this there are 3 species: the Norway spruce, or *Pinus abies*; white spruce, or *Pinus alba*; and black spruce, or *Pinus nigra*. These are noble trees, rising in straight stems from 150 to 200 feet in height. They yield the timber known by the name of *white fir*, or *deal*, from its always being imported in deals or planks.

Deals imported from Christiania are in the highest estimation. — (See CHRISTIANIA.) The trees are usually cut into 3 lengths, generally of about 12 feet each: and are afterwards cut into deals by saw-mills, each length yielding 3 deals. The Norway spruce thrives very well in Britain, and produces timber little inferior to the foreign: it is somewhat softer, and the knots are extremely hard.

The white spruce, or *Pinus alba*, is brought from British North America. The wood is not so resinous as the Norway spruce: it is tougher, lighter, and more liable to twist in drying.

The black spruce, or *Pinus nigra*, is also an American tree; but it is not much imported into this country. The black and white spruce derive their names from the colour of the bark; the wood of both being of the same colour.

The colour of spruce fir, or white deal, is yellowish or brownish white; the hard part of the annual ring a darker shade of the same colour; it often has a silky lustre, especially in the American and British grown kinds. Each annual ring consists of two parts; the one hard, the other softer. The knots are generally very hard. The clear and straight-grained kinds are often tough, but not very difficult to work, and stand extremely well when properly seasoned. White deal, as imported, shrinks about  $\frac{1}{4}$ th part in becoming quite dry.

3. **WYEMOUTH PINE, OR WHITE PINE** (*Pinus strobus*), is a native of North America, and is imported in large logs, often more than 2 feet square and 90 feet in length. It is one of the largest and most useful of the American trees, and makes excellent masts; but it is not durable, nor fit for large timbers, being very subject to dry rot. It has a peculiar odour.

4. **SILVER FIR** (*Pinus picea*) is a native of the mountains of Siberia, Germany, and Switzerland, and is common in British plantations. It is a large tree, and yields the Strasburg turpentine. The wood is of good quality, and much used on the Continent both for carpentry and ship building. The harder fibres are of a yellow colour, compact, and resinous; the softer nearly white. Like the other kinds of fir, it is light and stiff, and does not bend much under a considerable load; consequently, floors constructed of it remain permanently level. It is subject to the worm. It has been said to last longer in the air than in the water; and, therefore, to be fitter for the upper parts of bridges, than for piles and piers.

5. **LARCH** (*Pinus larix*). There are 3 species of this valuable tree; 1 European, and 2 American. The variety from the Italian Alps is the most esteemed, and has lately been extensively introduced into plantations in Great Britain. It is a straight and lofty tree, of rapid growth. A tree 79 years of age was cut down at Blair Athol, in 1817, which contained 252 cubic feet of timber; and one of 80 years of age, at Dunkeld, measured 300 cubic feet. The mean size of the trunk of the larch may be taken at 45 feet in length, and 33 inches diameter. The wood of the European larch is generally of a honey yellow colour, the hard part of the annual rings of a redder cast; sometimes it is brownish white. In common with the other species of pine, each annual ring consists of a hard and a soft part. It generally has a silky lustre; its colour is browner than that of the Scotch pine, and it is much tougher. It is more difficult to work than Riga or Memel timber; but the surface is better when once it is obtained. It bears driving bolts and nails better than any other species of resinous wood. When perfectly dry, it stands well; but it warps much in seasoning.

It is in all situations extremely durable. It is useful for every purpose of building, whether external or internal; it makes excellent ship timber, masts, boats, posts, rails, and furniture. It is peculiarly adapted for flooring boards, in situations where there is much wear, and for staircases: in the latter, its fine colour, when rubbed with oil, is much preferable to that of the black oaken staircases to be seen in some old mansions. It is well adapted for doors, shutters, and the like; and, from the beautiful colour of its wood when varnished, painting is not necessary. — (We have abstracted these particulars from Mr. Tredgold's excellent work, *The Principles of Carpentry*, pp. 209—217.)

**PINE-APPLE**, or **ANANAS**, though a tropical fruit, is now extensively cultivated in hothouses in this country, and is well known to every one. When of a good sort and healthy, it is the most luscious, and, perhaps, the best fruit that this country produces; and when carefully cultivated, is superior in point of quality to that produced in the West Indies. A pine-apple raised at Stackpool Court, Pembrokeshire, and

served up at the coronation dinner of George IV., weighed 10 lbs. 8 oz. — (*Vegetable Substances*, p. 379., *Lib. Entert. Knowledge*.)

PINT, a measure used chiefly in the measuring of liquids. The word is High Dutch, and signifies a little measure of wine. The English pint used to be of 2 sorts; the one for wine, the other for beer and ale. Two pints make a quart; 2 quarts a pottle; 2 pottles a gallon, &c. The pint, Imperial liquid measure, contains 34.659 cubic inches.

PIPE, a wine measure, usually containing 105 (very nearly) Imperial, or 126 wine gallons. Two pipes, or 210 Imperial gallons, make a tun. But, in practice, the size of the pipe varies according to the description of wine it contains. Thus, a pipe of port contains 138 wine gallons, of sherry 130, of Lisbon and Bucellas 140, of Madeira 110, and of Vidonia 120. The pipe of port, it is to be observed, is seldom accurately 138 gallons, and it is usual to charge what the vessel actually contains.

PIPE-CLAY, a species of clay abounding in Devonshire, and other parts of England, employed in the manufacture of various sorts of earthenware, and in bleaching.

PIRACY, consists in committing those acts of robbery and violence upon the seas, that, if committed upon land, would amount to felony.

Pirates hold no commission or delegated authority from any sovereign or state, empowering them to attack others. They can, therefore, be only regarded in the light of robbers or assassins. They are, as Cicero has truly stated, the common enemies of all (*communes hostes omnium*); and the law of nations gives to every one the right to pursue and exterminate them without any previous declaration of war; but it is not allowed to kill them without trial, except in battle. Those who surrender, or are taken prisoners, must be brought before the proper magistrates, and dealt with according to law.

By the ancient common law of England, piracy, if committed by a subject, was held to be a species of treason, being contrary to his natural allegiance; and, by an alien, to be felony only: but since the statute of treasons (25 Edw. 3. c. 2.), it is held to be only felony in a subject. Formerly this offence was only cognisable by the admiralty courts, which proceed by the rules of the civil law; but it being inconsistent with the liberties of the nation that any man's life should be taken away, unless by the judgment of his peers, the statute 28 Hen. 8. c. 15. established a new jurisdiction for this purpose, which proceeds according to the course of common law.

It was formerly a question whether the Algerines, and other African states, should be considered pirates: but, however exceptionable their conduct might have been on many occasions, and however hostile their policy might be to the interests of humanity, still, as they had been subjected to what may be called regular governments, and had been admitted to enter into treaties with other powers, they could not be treated as pirates.

Pirates having no right to make conquests, or to seize upon what belongs to others, capture by them does not divest the owner of his property. At a very early period of our history, a law was made for the restitution of property taken by pirates, if found within the realm, whether belonging to strangers or Englishmen: but any foreigner suing upon this statute must prove that, at the time of the capture, his own sovereign and the sovereign of the captor were in mutual amity; for it is held that piracy cannot be committed by the subjects of states at war with each other.

Piracy was almost universally practised in the heroic ages. Instead of being esteemed infamous, it was supposed to be honourable. — (*Lutrocinium maris glorie habebatur*. — *Justin*. lib. xliii. c. 3.) Menelaus, in the *Odyssey*, does not hesitate to inform his guests, who admired his riches, that they were the fruit of his piratical expeditions — (lib. iv. ver. 90.); and such, indeed, was the way in which most of the Greek princes amassed great wealth. — (*Goguet, Origin of Laws*, vol. i. p. 383. Eng. trans.)

The prevalence of this piratical spirit in these early ages may, perhaps, be explained by the infinite number of small independent states into which the country was divided, and the violent animosity constantly subsisting amongst them. In this way ferocious and predatory habits were universally diffused and kept alive; and it is not to be supposed that those who were at all times liable to be attacked by hosts of enemies, should very accurately examine the grounds upon which they attacked others. According, however, as a more improved system of government grew up, Greece, and a few states, as Athens, Corinth, &c., had attained to distinction by their naval power, piracy was made a capital offence: but though repressed, it was never entirely put down. Cilicia was at all times the great stronghold of the pirates of antiquity: and in consequence of the decline of the maritime forces of Athens, Rhodes, &c., which had kept them in check, they increased so much in numbers and audacity as to insult the majesty of Rome herself; so that it became necessary to send Pompey against them, with a large fleet and army, and more extensive powers than had been ever previously conferred on any Roman general.

During the anarchy of the middle ages, when every baron considered himself a sort of independent prince, entitled to make war on others, piracy was universally practised. The famous Hanseatic League was formed chiefly for the purpose of protecting the ships of the confederated cities from the attacks of the pirates by which the Baltic was then infested. The nuisance was not finally abated in Europe till the feudal system had been subverted, and the ascendancy of the law everywhere secured. In more modern times, some of the smaller West India islands have been the great resort of pirates: latterly, however, they have been driven from most of their haunts in that quarter. They are still not unfrequently met with in the Indian seas east of Sumatra.

Besides those acts of robbery and depredation upon the high seas, which, at common law, constitute piracy, some other offences have been included under that term. Thus, by the stat. 11 & 12 Will. 3. c. 7., if any natural-born subject commits any act of hostility upon the high seas against others of his Majesty's subjects, under colour of a commission from any foreign power, this, though it would only be an act of war in an alien, shall be construed piracy in a subject. And further, any commander or other seafaring person betraying his trust, and running away with any ship, boat, ordnance, ammunition, or goods, or *giving them up voluntarily to a pirate*, or conspiring to do these acts; or any person assaulting the commander of a vessel, to hinder him from fighting in defence of his ship, or confining him, or causing or endeavouring to cause a revolt on board, shall for each of these offences be adjudged a pirate, felon, and robber, and shall suffer death, whether he be principal, or merely accessory by setting forth such pirates, or abetting them before the fact, or receiving them, or concealing them or their goods after it; and the stat. 4 Geo. 1. c. 2. expressly excludes the principals from the benefit of clergy. By the stat. 8 Geo. 1. c. 24., the trading with known pirates, or furnishing them with stores or ammunition, or fitting out any vessel for that purpose, or in any wise consulting, combining, confederating, or corresponding with them; or the forcibly boarding any merchant vessel, though without seizing or carrying her off, and destroying or throwing any of the goods overboard, shall be deemed piracy; and such accessories to piracy as are described by the statute of King William are declared to be principal pirates, and all pirates convicted by virtue of this act are made felons without benefit of clergy. To encourage the defence of merchant vessels against pirates, the commanders and seamen wounded, and the widows of such seamen as are slain in any engagement with pirates, are entitled to a bounty, to be divided among them, not exceeding the *one fiftieth* part of the value of the cargo saved; and the wounded seamen are entitled to the pension of Greenwich Hospital. — (11 & 12 Will. 3. c. 7. : 8 Geo. 1. c. 24.) The first of these statutes also enacts, that if any mariner or inferior officer of any English ship decline or refuse to fight when commanded by the master, or shall utter any words to discourage the other mariners from defending the same, he shall lose all the wages due to him, together with such goods as he hath in the ship, and be imprisoned and kept to hard labour for 6 months.

The 6 Geo. 4. c. 49. enacts that a bounty shall be paid to the officers and crews of such of his Majesty's ships of war as may be engaged in the actual taking, sinking, burning, or otherwise destroying any vessel or boat manned by pirates, of 20*l.* for each pirate taken or killed during the attack, and of 5*l.* for every other man of the crew not taken or killed, who shall have been alive on board the said piratical vessel at the attack thereof.

The same statute (§ 3.) enacts that vessels and other property taken from pirates, proved to have belonged to any of his Majesty's subjects, are to be delivered up to them, on their paying a sum of money as salvage, equal to 1-8th part of the true value of the same.

**PISTACHIA** or **PISTACHIO NUTS** (Ger. *Pistaschen*; Du. *Pistasjes*; Fr. *Pistaches*; It. *Pistacchi*, *Fastucchi*; Sp. *Alfocigos*; Lat. *Pistacia*), the fruit of the *Pistachia vera*, a kind of turpentine tree. It grows naturally in Arabia, Persia, and Syria; also in Sicily, whence the nuts are annually brought to us. They are oblong and pointed, about the size and shape of a filbert, including a kernel of a pale greenish colour, covered with a yellowish or reddish skin. They have a pleasant, sweetish, unctuous taste, resembling that of sweet almonds; their principal difference from which consists in their having a greater degree of sweetness, accompanied with a light grateful flavour, and in being more oily. Pistachias imported from the East are superior to those raised in Europe. — (*Lewis's Mat. Med.*)

**PITCH** (Ger. *Pech*; Fr. *Poix*, *Bras*; It. *Pece*; Sp. *Pez*; Rus. *Smola gustuja*), the residuum which remains on inspissating tar, or boiling it down to dryness. It is extensively used in ship building, and for other purposes. Large quantities are manufactured in Great Britain; but exclusive of these, 13,284 cwts. imported from foreign countries were entered for consumption in 1841; and as the duty, which was then 10*d.* a cwt., was reduced in 1842 to 6*d.*, a farther increase of consumption may be anticipated.

An allowance is to be made for tare on pitch, of 93 lbs. each on Archangel casks, 36 lbs. each on Swedish do., and 56 lbs. each on American do.

**PLANE**, a forest tree, of which there are 2 species; the Oriental plane (*Platanus Orientalis*), and the Occidental plane (*Platanus Occidentalis*.)

The Oriental plane is a native of the Levant, and other Eastern countries, and is considered one of the finest of trees. It grows to about 60 feet in height, and has been known to exceed 8 feet in diameter. Its wood is much like beech, but more figured, and is used for furniture and such like articles. The Occidental plane is a native of North America, and is one of the largest of the American trees, being sometimes more than 12 feet in diameter. The wood of the Occidental plane is harder than that of the Oriental. It is very durable in water.

The tree known by the name of plane in England, is the sycamore, or great maple (*Acer pseudo-platanus*). It is a large tree, grows quickly, and stands the sea spray better than most trees. The timber is very close and compact, easily wrought, and not liable either to splinter or warp. It is generally of a brownish white or yellowish white colour, and sometimes it is very beautifully curled and mottled. In this state it

takes a fine polish, and bears varnishing well. It is chiefly used in the manufacture of saddle trees, wooden dishes, and a variety of articles of furniture and machinery. When kept dry, and protected from worms, it is pretty durable; but it is quite as liable as beech to be attacked by them. — (*Tredgold*, p. 196.)

**PLANKS** (Ger. and Du. *Planken*; Da. *Planker*; Sw. *Plankor*; Fr. *Planches*, *Bordages*; Rus. *Толстые доски*), thick strong boards, cut from various kinds of wood, especially oak and pine. Planks are usually of the thickness of from 1 inch to 4. They are imported in large quantities from the northern parts of Europe, particularly from the ports of Christiania, Dantzic, Archangel, Petersburg, Narva, Revel, Riga, and Memel, as well as from several parts of North America.

**PLANTAIN**, or **BANANA**, the pulpy fruit of the *Musa paradisiaca*, an herbaceous plant, extensively cultivated in most intertropical countries, but especially in Mexico. It is not, like most other fruits, used merely as an occasional luxury, but is rather an established article of subsistence. Being long and extensively cultivated, it has diverged into numerous varieties, the fruit of which differs materially in size, flavour, and colour. That of some is not above 2 or 3 inches long, while that of others is not much short of a foot; some sorts are sweet, and of a flavour not unlike nor inferior to that of a good mellow pear; but the larger kind are, for the most part, coarse and farinaceous. The latter are either used fresh or dried in the sun, in which latter state they are occasionally ground into meal and made into bread. In Mexico, the sweeter sorts are frequently pressed and dried, as figs are in Europe; and, while they are not very inferior to the last mentioned fruit, they are infinitely cheaper.

"I doubt," says M. Humboldt, "whether there be any other plant that produces so great a quantity of nutritive substance in so small a space. Eight or 9 months after the sucker is planted, it begins to develop its cluster. The fruit may be gathered in the 10th or 11th month. When the stalk is cut, there is always found, among the numerous shoots that have taken root, a sprout (*primipolo*), which, being 2-3ds the height of its parent plant, bears fruit 3 months later. Thus a plantation of bananas perpetuates itself, without requiring any care on the part of man, further than to cut the stalks when the fruit has ripened, and to stir the earth gently once or twice a year about the roots. A piece of ground of 100 square metres of surface will contain from 30 to 40 plants. During the course of a year this same piece of ground, reckoning the weight of the cluster at from 15 to 30 kilog. only, will yield 2,000 kilog., or more than 4,000 lbs., of nutritive substance. What a difference between this product and that of the cereal grasses in most parts of Europe! The same extent of land planted with wheat would not produce above 30 lbs.; and not more than 90 lbs. of potatoes. Hence the product of the banana is to that of wheat as 133 to 1, and to that of potatoes as 44 to 1." — (*Essai sur la Nouvelle Espagne*, tom. II. p. 388. 2d. ed.)

The banana forms a principal part of the food of the people of Mexico; and the apathy and indolence of the natives in the *tierras calientes*, or hot regions, has been ascribed, and probably with good reason, to the facility with which it supplies them with subsistence. It is by no means in such extensive use in tropical Asia; and comes nowhere in it into competition with corn as an article of food.

**PLATE**, the denomination usually given to gold and silver wrought into articles of household furniture.

In order partly to prevent fraud, and partly for the purpose of collecting a revenue, the manufacture of plate is placed under certain regulations. Those who carry it on are obliged to take out a licence, renewable annually on the 31st of July. Assay offices are established in different places; and any one selling any article previously to its having been assayed and marked, forfeits 50*l*. — (24 Geo. 3. c. 53.) No plate is passed at the assay offices, unless it be of the fineness of the old standard or 11 oz. and 2 dwts., or of the new standard of 11 oz. and 10 dwts. Gold plate, with the exception of gold watch-cases, is to pay a duty of 17*s*. an oz., and silver plate a duty of 1*s*. 6*d*.; but watch-cases, chains, tipplings, mountings, collars, bottle tickets, teaspoons, &c. are exempted. The 52 Geo. 3. c. 143. made the counterfeiting, or the transference from one piece of plate to another, of the marks, stamps, &c. impressed on plate by the assayers, felony without the benefit of clergy. But the offence is now punishable by transportation or imprisonment only. — (1 Will. 4. c. 66.)

The subjoined account (from *Porter's Progress of the Nation*, iii. 25.) gives a very complete view of the plate manufacture from 1800 downwards. It appears from it that the annual consumption of silver plate has increased from about 800,000 oz. at the commencement of the century, to about 1,050,000 oz. at present. Most persons may, perhaps, be inclined to think that this is not so great an increase as might have been anticipated from the increased wealth and population of the country. But it should be borne in mind that this account refers only to articles of standard silver and gold, and that the great consumption of the precious metals consists in plated and gilt articles, which are now made of a very superior quality. Owing also to the fact of old plate being held in the greatest estimation, but little of it is melted down to be remanufactured, so that the principal consumption is by new families. The returns for the year 1826, in the subjoined Table, afford a striking proof of this. During a considerable portion of that year a crowd of speculators, most of whom were previously worth little or nothing, believed they had made large fortunes, and launched out, with the proverbial ostentation of *parvenus*, into all sorts of lavish expenditure. Hence the wonderful increase in the demand for plate in the course of that year. No doubt, also, the consumption of plate appears less than it really is, from the facility with which the duties are evaded. We subjoin

Account of the Number of Ounces of Gold and Silver Plate upon which Duty was paid, and for which Drawback was allowed, showing the Quantity retained for Home Use in each Year, from 5th January, 1800, to 5th January, 1841.

**PLATINA**, a metal which, in respect of scarcity, beauty, ductility, and indestructibility, is hardly inferior to gold, was unknown in Europe till about the middle of last century, when it began to be imported in small quantities from South America. It has since been discovered in Estremadura in Spain, and, more recently, in the Ural Mountains in Asiatic Russia, where it is now raised in very considerable quantities.

Platina is of a white colour, like silver, but not so bright, and has no taste or smell. Its hardness is intermediate between copper and iron. Its specific gravity is about 21·5, that of gold being 19·3; so that it is the heaviest body with which we are acquainted. It is exceedingly ductile and malleable; it may be hammered out into very thin plates, and drawn into wires not exceeding 1-1940th of an inch in diameter. In these properties it is probably inferior to gold, but it seems to surpass all the other metals. Its tenacity is such, that a wire of platina 0·078 inch in diameter is capable of supporting a weight of 274·31 lbs. avoirdupois without breaking. It is one of the most infusible of all metals; but pieces of it may be welded together without difficulty when heated to whiteness. It is not in the smallest degree altered by the action of air or water. — (*Thomson's Chemistry*.)

The late Dr. Wollaston discovered a method of fusing platina, and consequently, of rendering it easily available in the arts. The Russians have, within these few years, issued platina coins of the value of 3, 6, and 20 silver roubles. Platina first began to be an object of attention in Russia in 1824, when 1 pood 33 lbs. were collected. In 1836, the produce amounted to 138 poods 42 lbs. In 1831, a piece of native platina was discovered at Demidoff's gold mines, weighing 20 lbs. 2½ zolts. — (*Official Statements* published by the Russian Government.)

**PLATTING**, slips of bast, cane, straw, &c. woven or plaited for making into hats, &c. — (See **HATS**, **STRAW**.)

**PLUMS**, the fruit of the *Prunus domestica*, are too well known to require any description. They were introduced into England in the 15th century, and are cultivated in all parts of the country. There are said to be nearly 300 varieties of plums.

**PLUMBAGO**. See **BLACK LEAD**.

**POMEGRANATE**, **POMEGRANATES** (Ger. *Granatapfel*; Fr. *Grenades*; It. *Granati*, *Melagrani*; Sp. *Granadas*), the fruit of the pomegranate tree (*Punica granatum*). This tree, which grows to the height of 15 or 20 feet, appears to be a native of Persia, whence it has been conveyed, on the one side, to Southern Europe, and on the other to the tropical parts of Asia, and eventually to the New World. The fruit is a pulpy, many-seeded berry, the size of an orange, covered with a thick, brown, coriaceous rind. The pulp has a reddish colour, and a pleasant subacid taste. The value of the fruit depends on the smallness of the seed and the largeness of the pulp. The finest, called by the Persians, *badana*, or seedless, is imported into India from Caubul and Candahar, where the pomegranate grows in perfection. The tree thrives all the way to the equator; but, within the tropics, the fruit is hardly fit for use. The pomegranates brought to England from the south of Europe and the West Indies are very inferior to those of Persia. — (*Private information*.)

**POPLAR** (Ger. *Pappel*, *Pappelbaum*; Du. *Popelier*; Fr. *Peuplier*; It. *Pioppa*;  
3 U 2

*Sp. Alamo; Lat. Populus*). Of the poplar (*Populus* of botanists) there are about 15 species described; of these 5 are common in England; viz. the common or *White*, the *Black*, the *Aspen* or trembling poplar, the *Abele* or great white poplar, and the Lombardy poplar. In most favourable situations, the white poplar grows with great rapidity, sometimes sending forth shoots 16 feet long in a single season. The wood is soft, and not very durable unless kept dry; but it is light, not apt either to swell or shrink, and easily wrought. The Lombardy poplar grows rapidly, and shoots in a complete spire to a great height; its timber does not differ materially from that of the white poplar. It is very light; and is, therefore, well adapted for the manufacture of packing-cases. None of the species is fit for large timbers.—(*Tredgold's Principles of Carpentry; Veget. Sub., Lib. of Entert. Knowledge.*)

**POPULATION.** It would be quite inconsistent with the objects and limits of this work, to attempt giving in this place any explanation of the laws which regulate the progress of population. It may, indeed, be thought that the word has no business here. However, as it is frequently of importance in commercial questions, and in others affecting commercial interests, to be able to compare the consumption of an article with the population, we believe we shall gratify our readers by laying before them the following Tables, showing the results of the different censuses that have been taken of the population of Great Britain and Ireland, and showing also the increase in the population of the principal British cities.

1. Population of Ireland, as determined by the Censuses taken in 1813, 1821, 1831, and 1841, showing its Amount at each Period in each County, with the Rates of Increase.

Counties, &c.	1813.	In-crease per Cent.	1821.	In-crease per Cent.	1831.	In-crease per Cent.	1841.

It is somewhat singular that no such table as the above should be found amid the myriads published in the Report on the Irish census of 1841.

11. Population of Great Britain in 1801, 1811, 1821, 1831, and 1841, showing its Amount at each Period in each County of England and Scotland, and in the entire Principality of Wales; with the Ratio of Increase.

Counties.	Area in English Statute Acres.	1801.	Increase per Cent.	1811.	Increase per Cent.	1821.	Increase per Cent.	1831.	Increase per Cent.	1841.

**PORCELAIN, or CHINA WARE**, a very fine species of earthenware. The first specimens of this fabric were brought to Europe from China and Japan. The best Chinese porcelain is of a very fine texture, white, semi-transparent, and sometimes

beautifully coloured and gilt; is infusible, and not subject to break by the sudden application of heat or cold. The Chinese term for the article is *tsé-ki*. But the Portuguese, by whom it was first brought in considerable quantities into Europe, bestowed on it the name of porcelain, from *porcella*, a cup.

Common earthenware, sometimes of a very good quality, is manufactured in Canton, Fokien, and several other provinces of China. But it is a curious fact, that the beautiful porcelain imported into Europe is made only in the town of Kingteing, in the province of Kiangsi. Its manufacture is fully described by Duhalde, in his account of China, under the head "Porcelain and China ware." The porcelain of Japan is decidedly inferior to that of China; very little is imported, and it is valued only as a curiosity.

After porcelain began to be imported, its beauty soon brought it into great request, notwithstanding its high price, as an ornament for the houses and tables of the rich and the great. The emulation of European artists was in consequence excited. Very little information was, however, obtained as to the mode of manufacturing porcelain till the early part of last century, when the process was developed in a letter from a French Jesuit in China, who had found means to make himself pretty well acquainted with the subject. The knowledge that thus transpired, and the investigations of Reaumur and other chemists, prepared the way for the establishment of the manufacture in Europe. It was first commenced at Dresden, which has been famous ever since for the beauty of its productions; but the finest and most magnificent specimens of European china have been produced at Sèvres, in France, in the factory carried on at the expense of the French government.

*British Porcelain Manufacture.*—This, though unable to boast of such fine specimens of costly workmanship as have been produced at Sèvres and Dresden, is of much greater national importance. Instead of exclusively applying themselves to the manufacture of articles fitted only for the consumption of the rich, the artists of England have exerted themselves in preference to produce China ware suitable for the middle classes; and have succeeded in producing articles at once excellent in quality, elegant in form, and cheap. We are principally indebted for the improvements made in this important manufacture to the genius and enterprise of the late Mr. Josiah Wedgwood. This extraordinary man owed none of his success to fortuitous circumstances. Devoting his mind to patient investigation, and sparing neither pains nor expense in accomplishing his aims, he gathered round him artists of talent from different countries, and drew upon the stores of science for aid in pursuing the objects of his praiseworthy ambition. The early and signal prosperity that attended his efforts served only as an incentive to urge him forward to new exertions, and as means for calling forth and encouraging talent in others, in a manner calculated to promote the welfare of his country. Previously to his time, the potteries of Staffordshire produced only inferior fabrics, flimsy as to their materials, and void of taste in their forms and ornaments; the best among them being only wretched imitations of the grotesque and unmeaning scenes and figures portrayed on the porcelain of China. But such have been the effects resulting from the exertions and example of this one individual, that the wares of that district are now not only brought into general use in this country, to the exclusion of all foreign goods, which had been largely imported, but English pottery has since been sought for and celebrated throughout the civilised world, and adopted even in places where the art was previously practised. An intelligent foreigner, M. Faujas de St. Fond, writing on this subject, says,—"Its excellent workmanship, its solidity, the advantage which it possesses of sustaining the action of fire, its fine glaze impenetrable to acids, the beauty and convenience of its form, and the cheapness of its price, have given rise to a commerce so active and so universal, that, in travelling from Paris to Petersburg, from Amsterdam to the farthest part of Sweden, and from Dunkirk to the extremity of the south of France, one is served at every inn upon English ware. Spain, Portugal, and Italy are supplied with it; and vessels are loaded with it for both the Indies and the continent of America."—See the quotation in the *Account of the Porcelain Manufacture*, p. 16, in *Lardner's Cyclopædia*; for the statistical details with respect to the manufacture, see the article *EARTHENWARE*, in this work.) The British porcelain manufacture is principally carried on at the potteries in Staffordshire, and at Worcester, Derby, Colebrook Dale, and other places.

*Murrhine Cups.*—It was long a prevalent opinion among modern critics, that the *vasa murrhina*, so famous in Roman history, were formed of porcelain. Pompey was the first who brought them to Rome from the East, about 64 years before the Christian æra. They were used as drinking cups, and fetched enormous prices; Nero having given, according to the common method of interpreting, 58,000*l.* for a single cup! The extravagance of the purchaser may, in this instance, be supposed to have increased the price; so that the degree of estimation in which these cups were held may be more accurately inferred from the fact, that, of all the rich spoils of Alexandria, Augustus was content to select one for his share.—(*Sueton.* lib. ii. c. 71.) Pliny (*lib. xxxvii. c. 2.*) says they were made in Persia, particularly in Karamania. But those who contend they were China ware, chiefly found on the following line of Propertius:—

*Murrheaque in Parthis pocula cocta rocis.*—(*Lib. iv. Eleg. 5. lin. 26.*)

In despite, however, of this apparently decisive authority, Le Bland and Larcher have, in two very learned dissertations (*Mémoires de Littérat.* tom. xliii.), which Dr. Robertson has declared are quite satisfactory, endeavoured to prove that the *vasa murrhina* were formed of transparent stone, dug out of the earth in some Eastern provinces, and that they were imitated in vessels of coloured glass.—(*Robertson's Disquisition on India*, note 39.) Dr. Vincent (*Commerce and Navigation of the Ancients*, vol. ii. p. 723.) inclines to the opposite opinion; but the weight of authority is evidently on the other side. At all events, it is plain that if the murrhine cups were really porcelain, it had been exceedingly scarce at Rome, as their price would otherwise have been comparatively moderate. But it is most probable that the ancients were wholly unacquainted with this article; which, indeed, was but little known in Europe till after the discovery of the route to India by the Cape of Good Hope.—(For some further details on this question, see *Kipping's Antiq. Rom.* lib. iv. c. 3.)

**PORK, the flesh of the hog.** Salted and pickled pork forms a considerable article of export from Ireland to the West Indies and other places.

Pork and Bacon exported from Ireland in the under-mentioned Years.

Years.	Pork.		Bacon.		Years.	Pork.		Bacon.

Most part of the bacon is exported to England.—(see *BACON*).—and also a good deal of the pork. The account cannot be brought further down than 1825, the trade between Great Britain and Ireland having since then been placed on the footing of a coasting trade.

PORT. See WINE.

PORT-AU-PRINCE, the capital of Hayti, or St. Domingo, in lat.  $18^{\circ} 33' 42''$  N., lon.  $72^{\circ} 27' 11''$  W. Population variously estimated, probably from 18,000 to 20,000. It is situated on the west coast of the island, at the bottom of a large and deep gulph. It was founded in 1749; since which, with few intervals, it has been the capital of French St. Domingo, as it is now of the entire island. It is partially fortified; the harbour being protected by a battery on a small island at a little distance from the shore. The country round is low and marshy; and the heat in the summer months being excessive, the climate is then exceedingly unhealthy. The buildings are principally of wood, and seldom exceed 2 stories in height.

*Harbour.*—The entrance to the harbour is between White Island and the southern shore. The depth of water varies from about 18 feet at ebb to about 21 do. at full tide. It is customary, but not compulsory, to employ a pilot in entering the harbour. They are always on the look-out. Ships moor head and stern, at from 100 to 500 yards from shore; loading and unloading by means of boats, as there are neither docks nor quays to assist these operations. The harbour is perfectly safe, except during hurricanes, which may be expected from August to November.

Hayti is, next to Cuba, the largest of the West India islands. It was discovered by Columbus, on the 5th of December, 1492. Its greatest length may be about 400 miles, and its greatest breadth 155. Its superficies is estimated at about 29,500 square miles. Three principal chains of mountains (from which emanate smaller mountain arms) run from the central group of Cibao. The whole of these are described as fertile and susceptible of cultivation, even to their summits; affording great variety of climate, which, contrary to what is the fact in the plains, is remarkably healthy. The soil of the plains is, in general, a very rich vegetable mould, exceedingly fertile, and well watered. There are several large rivers, and an immense number of smaller streams, some tributary and others independent. The ports are numerous and good. The harbour of Cape St. Nicholas, the fortifications of which are now in ruins, is one of the finest in the West Indies; being inferior only to the Havannah. Timber of the finest description is most abundant; and mines of gold, silver, copper, tin, iron, and rock salt, besides other natural productions, are said not to be wanting. The French were therefore fully justified in designating this magnificent island, *La Reine des Antilles*. The principal towns, besides Port-au-Prince, are Cap Haitien, formerly Cap François, on the north coast, St. Domingo on the south, Les Cayes, and Jacmel.

Previously to the revolt of the blacks, Hayti was divided in unequal portions between the French and Spaniards; the former possessing the west, and the latter the eastern and larger portion of the island. The revolution began in 1789; and terminated, after the most dreadful massacres, and the destruction of a vast deal of property, in the total abolition of slavery, and the establishment of an independent black republic. The Spanish part of the island and the French were finally consolidated in 1822.

*Population.*—In 1789, the French part of Hayti was by far the most valuable and flourishing colony in the West Indies. The population was estimated at 524,000; of which 31,000 were white, 27,500 people of colour, and 465,500 slaves. The Spanish part of the island was much less densely peopled; the number in 1785 being estimated at 152,640; of which 122,640 were free people of all colours, mostly mulattoes, and the rest slaves. The population of the entire island, in 1827, was estimated by Humboldt at 820,000, of whom 30,000 were whites: but there are good grounds for thinking that that estimate was exaggerated, and that the present population does not exceed 600,000 or 700,000.

*Exports.*—There has been an extraordinary decline in the quantity and value of the articles exported from Hayti since 1789. Sugar, for example, has fallen off from 141,000,000 lbs. to almost nothing; coffee from about 77,000,000 lbs. to little more than 25,000,000 lbs.; cotton from 7,000,000 lbs. to perhaps 650,000 lbs.; indigo from 758,000 lbs. to nothing, &c. ! Mahogany is almost the only article the exports of which have increased of late years. The following table illustrates what has now been stated.—

A General Table of Exports from Hayti, during the Years 1789, 1801, and from 1818 to 1826, both inclusive.

Yrs.	Clayed Sugar.	Muscovado Sugar.	Coffee.	Cotton.	Cacao.	Indigo.	Molasses.	Dye Woods.	Tobacco.	Caster Oil.	Maho- gany.	Cigars.
	Lbs.	Lbs.	Lbs.	Lbs.	Lbs.	Lbs.	Lbs.	Lbs.	Lbs.	Gal.	Feet.	
1789	47,516,531	93,573,300	76,855,219	7,004,274	-	758,628	25,749	-	-	-	-	-
1801	16,540,185	18,518,572	43,420,970	2,480,340	648,518	804	99,419	6,768,634	-	-	-	5,217

1826	-	32,864	32,159,748	620,972	457,592	-	-	5,307,745	340,588	-	2,136,984	179,300

Gum Gualacum, in 1822, 7,338 lbs.—1823, 13,056 lbs.—1824, 68,692 lbs.

**Imports.** — The principal articles of import are provisions; such as flour, rice, mess and cargo beef, fish, &c., and timber, from the U. States; cotton goods of all sorts, Irish and Scotch linens, earthenware, cutlery, ammunition, &c. from England; wines, satins, liqueurs, jewellery, toys, haberdashery, &c. from France; and linens, canvas, gin, &c. from Holland and Germany.

The destruction caused by the excesses which accompanied the revolution explains a part of this extraordinary falling off: but the greater part is to be accounted for by the change in the condition of the inhabitants. The blacks, being no longer compelled to labour, and regarding with abhorrence the culture of sugar and the other occupations in which they had been principally engaged, sunk into a state of idleness and apathy. The condition of all the great branches of industry that were formerly carried on became, in consequence, most deplorable, and the commerce of the island was reduced within the narrowest limits. Its successive rulers have endeavoured, though with little success, to bring about a revival of industry. The *Code Rural*, enacted for this purpose by Boyer in 1826, is exceedingly stringent, its principal provisions being in fact copied from the regulations as to slaves embodied in the *Code Noir*. But even this code has had little influence; and as a proof of the low state of industry in the island, we need only state that sugar has wholly disappeared from the list of exports, and that the exports of coffee and most other articles seem to be diminishing. And this result is, after all, only what should have been anticipated. To expect that half-civilised Africans, under a burning sun, and without the wants or desires of Europeans, should be equally industrious, is to expect what is contradictory, and all but absurd. We subjoin

A Statement of the Quantities of the principal Articles exported from Hayti during each of the 3 Years ending with 1837.

Articles.	Quantities exported.		
	1835.	1836.	1837.
Coffee - - - - - lbs.	48,358,371	57,669,674	30,845,400
Logwood - - - - -	13,293,757	5,767,502	6,435,238
Cotton - - - - -	1,649,717	1,079,555	1,013,171
Mahogany - - - - - feet	5,413,316	4,951,914	4,798,263
Cocoa - - - - - lbs.	397,581	550,484	
Tobacco, &c. - - - -	2,066,666	1,328,716	
Cigars - - - - - No.	8,500	35,000	
Sugar - - - - - lbs.	1,097	16,199	
Hides - - - - - No.	8,951	14,981	
Old rags - - - - - lbs.	31,192	77,275	
Wax - - - - -	10,993	15,630	
Ginger - - - - -	8,769	15,509	

The trade of this country with Hayti is comparatively inconsiderable, the value of the exports from the U. Kingdom thither, in 1841, having amounted to only 251,979*l.*, of which more than 3-4ths consisted of cottons and linens; the imports consist of coffee, tobacco, and cotton wool; but the quantities of the last two articles are very trifling.

**Port Charges.** — The charges on a native and foreign ship of 300 tons are the same, and as follows: —

	Dollars.
Tonnage duty - - - - -	300
Administrateur - - - - -	12
Commandante de place - - - -	12
Commissaire de guerre - - - -	12
Commandante de port - - - - -	12
Director of customs - - - - -	12
Interpreter - - - - -	12
Treasurer - - - - -	12
Doctor - - - - -	12
Stampa for entry and clearing -	16 50
Fountain tax - - - - -	50
Pilotage - - - - -	2
Total, currency - - - - -	454 50

**Custom-house Regulations.** — On arrival, the master of the vessel proceeds to the Custom-house with the interpreter, where he makes his declaration whether he discharges his cargo in the port. If he procures his invoice at the Custom-house, the goods verified in the presence of the consignee, who is allowed to land and store them. On clearing outwards, the merchant pays the duties in the cargoes both ways, and exhibits a receipt at the office of the commissaire de guerre, commandante de place, and commandante de port, who sign a certificate that the vessel may depart.

**Warehousing.** — The warehousing and bonding system is established by law, but there are at present no buildings appropriated to the reception of bonded goods. Until very recently, goods were permitted to be bonded under this law in the merchants' stores; a late order has, however, suspended that indulgence. The rate is 1 per cent. per year, and no allowance made for waste or loss. Goods exported in the same vessel they arrive in, pay, if landed, 1 per cent. and wharfage fee.

**Money.** — The weight of the dollar is 216 grains; the 1/2 and 1/4 dollar being in proportion. But nearly 1/2 the weight of the coin consists of tin or other alloy; so that the value of the dollar does not exceed 1*l.* 6*s.* sterling.

**Weights in Hayti** are divided as in avoirdupois and apothecaries' weight; but they are about 8 per cent. heavier than British weights.

**Measures.** — Same as those used in France.

**Regulations as to Trade.** — It is enacted, that all persons exercising any trade or profession, excepting that of cultivating the soil, must be provided with a patent or licence to carry on such trade or profession; that all strangers admitted as mer-

chants into the republic must, in the first place, procure the permission of the president to take out a patent, which, when obtained, only authorises them, under heavy penalties, to carry on a wholesale business, not with each other, but with the Haytiens, in the open ports, which are Port-au-Prince, Gonaïves, Cap-Haïtien, Port-au-Plate, Santo Domingo, Jacmel, Les Cayes, and Jérémie. The minimum quantities of goods that may be sold are fixed by the same law. The Haytian consueque may be also a retailer, on taking out a corresponding patent.

A charge of 2,000 dollars is made for each patent to a foreigner trading to Port-au-Prince; 1,500 for Les Cayes, Cap-Haïtien, and Jacmel; and 1,600 for each of the remaining ports.

**Duties.** — The duties on all imported commodities consigned to foreign merchants are 17 1/2 per cent. on an established tariff, whether they be brought in native or foreign ships, with the exception of those from the United States, which pay an additional 10 per cent. on the amount of the duties. Goods consigned to native merchants pay only 16 1/2 per cent.

The following articles are duty free in all bottoms: — Shot of all sizes, grenades, howitzers, bomb-shells, and other projectiles of artillery; iron and bronze cannon, mortars, muskets and bayonets, carbines, pistols, and cavalry sabres, brigquets, or short swords for infantry; machines and instruments for simplifying and facilitating the cultivation of the soil, and the preparation of its products; horses and cattle, mules, asses, gold and silver coin; classical and elementary works, sewed in boards, or bound in parchment, for the instruction of youth.

The following is a list of articles absolutely prohibited, without reference to their place of growth: — Mahogany, logwood, gum resin, vanilla, coffee, cotton wool, cacao, raw and clayed sugar, rum, tafia, arrup, molasses, canes, whips, and ames, brellas, containing swords, stilettos, or other arms; books and other works, opposed to good morals.

Besides the export, there is also a territorial duty levied equally on the produce of the soil, whether exported in national or foreign ships.

The export of the following articles is strictly prohibited: — Gold and silver coin, side and fire arms, munitions, and other articles of war; oil or new iron and copper; horses, brood mares, mules, asses, and wood for ship building.

The coasting trade is entirely confined to Haytian citizens.

The commerce of Port-au-Prince is carried on by various classes of persons. The imports from Europe and America are principally consigned to European and North American commission houses, besides a few Haytian establishments. The capital is one of the ports to which foreign merchants are confined by the law of patents; but they are, or at least were, during the time of my residence, restricted by heavy penalties

to wholesale business. Of course they cannot deal with the consumers, but with the native retailers, who are chiefly women, styled "marchandes;" these employ bucketers, also women, who traverse the country, attend the markets, and give an account of their transactions to their employers, either every evening, once a week, or once a month, according to their character for integrity.

As the payments of the importer are generally in money, and there is only one important article of export — coffee — the purchases for returns can only be made after the crops have been gathered; and these are effected by brokers, who often bargain with a class of natives called coffee speculators, for their dealing for the chance of the market with the cultivators, and either sell to the best advantage, or fulfil contracts previously entered into.

Among the respectable *marchandises* there is said to be much good faith; but with the great body of the customers, I believe the merchants are obliged to use the utmost circumspection.

All the ordinary tradesmen, such as tailors and shoemakers, and even a water-proof hat manufacturer, are to be found at Port-au-Prince. And I confess I was struck with the respectable appearance of several booksellers' shops, having looked in vain for such things both in Barbadoes and Antigua. The

books are generally elementary, French publications, and romances. The works of Voltaire, Rousseau, and others of the same class, abound.

There are also two printing presses; one at which the government Gazette *Le Télégraphe* is printed, and the other from which the *Feuille de Commerce* issues. The former rarely contains more than the documents issued by the government; the latter occasionally some spirited papers, and is conducted by M. Curtois, who was for a short time director of the post-office.

The apothecaries' shops are numerous, as they ought to be in such a horrible climate, and are well supplied with all the contents of the French Pharmacopœia. There are also some tanneries, in which the bark of the mangrove is used as the tanning material. At several of the houses, the great number of the border people were either of that class of Europeans, called in the French term "*peuple blanc*," or people of colour. The labourers in town and country are generally black.

With the exception already referred to, we have derived these details with respect to Hayti partly from the communications to government, and the published *Memo* of Charles Mackenzie, Esq., late consul in that island; and partly from consular returns.

**PORTERS AND PORTERAGE.** Porters are persons employed to carry messages or parcels, &c.

In London, they are divided into different classes. It is enacted by 39 Geo. 3. c. 58., that the following rates shall be the maximum of charges upon all parcels not exceeding 56 lbs weight, in London, Westminster, Southwark, and the suburbs; viz.:—

For any distance not exceeding $\frac{1}{4}$ of a mile	-	-	-	0	3
Not exceeding $\frac{1}{2}$ mile	-	-	-	0	4
Not exceeding 1 mile	-	-	-	0	6
Not exceeding $\frac{3}{4}$ mile	-	-	-	0	6
Not exceeding 2 miles	-	-	-	10	0

And so in like manner the additional sum of 5d. for every further distance not exceeding  $\frac{1}{4}$  mile.

Tickets to be made out at the inns, and given to the porters, who are to deliver them with the parcels; and any innkeeper not making out such tickets to forfeit not exceeding 40s. nor less than 5s.; porters not delivering, or defacing the same, to forfeit 40s.; and if they make any overcharge they are to forfeit 20s. Parcels brought by coaches to be delivered *within six hours*, under a penalty not exceeding 20s. nor less than 10s. Parcels brought by wagons to be delivered *within twenty-four hours*, under a like penalty. Parcels directed to be left till called for, to be delivered to those to whom the same may be directed, on payment of the carriage, and 2d. for warehouse room, under like penalty. If parcels be not sent for till the expiration of a week, i.e. more for warehouse rent may be charged. Parcels not directed to be left till called for, to be delivered on demand, under the above penalty. *Misbehaviour* of porters may be punished by a fine not exceeding 20s. nor less than 5s. The porters of London have the exclusive privilege of taking up and carrying goods within the city, and the employment of any one else may be punished by fine.

PORTERS (TACKLE-HOORS), are regulated by the city of London. They have the privilege of performing the labour of unshipping, landing, carrying, and re-shipping goods of the South Sea Company, the East India Company, and all other goods, except from the East country, the produce of the British plantations and Ireland, and goods coastwise. They give bond for 500*l.* to make restitution in case of loss or damage, and are limited to rates fixed by the corporation.

PORTERS (TICKET), are persons appointed by the city of London, and have granted to them the exclusive privilege of unshipping, loading, and hoisting, pitch, tar, soap, tallow, vascoat, fir, poles, masts, deals, oars, chests, tables, flax and hemp, brought to London from the East country; also iron, cordage, and timber, and all goods of the produce of Ireland and the British plantations, and all goods coastwise, except bond. They are freemen of the city, give security in 100*l.* for fidelity, and have their names and numbers engraved on a metal badge. They are under the tackle porters; who may, in performing the business of the port, employ other labourers, if ticket porters be not at hand. — (*Montfaucon's Dictionary*.)

Any person may bring goods into the city of London; but he is liable to a fine if he either take up, or carry, any where the city. It is establishing that such board regulations should be still kept up: why should not the merchants of London, as well as those of Manchester, be allowed to employ any one they please in the conveyance of goods? Does any one doubt that competition would, in this, as in every thing else, be productive of the greatest advantage? The regulations in question were; tend to keep up oppressive privileges, injurious to the public interests, and disadvantageous even to those in whose favour they are enacted.

**PORT LOUIS, OR NORTHWEST PORT**, the capital of the Mauritius, at the bottom of a triangular bay, the entrance to which is rather difficult, in lat. 20° 9' 56" S., lon. 57° 28' 41" E. Every vessel approaching the harbour must hoist her flag and fire 2 guns; if in the night, a light must be shown; when a pilot comes on board, and steers the ship to the entrance of the port. It is a very convenient port for careening and repairing; but provisions of all sorts are dear. In the hurricane months, the anchorage in Port Louis is not good; and it can then only accommodate a very few vessels. The houses are low, and are principally built of wood. The town and harbour are pretty strongly fortified. Almost all the foreign trade of the island is carried on here.

The Mauritius was so called by the Dutch in honour of Prince Maurice; but it was first settled by the French in 1720; and is indebted for most part of its prosperity to the skilful management of its governor, the famous M. de la Bourdonnais. It was taken by the English in 1810; and was definitively ceded to us in 1814.

**Exports and Imports, &c.**—Mauritius is pretty fertile, a considerable part of the surface being, however, occupied by mountains. Its shape is circular, being about 150 miles in circumference. The climate is healthy, but subject to hurricanes. The principal product of the island is sugar, which is now cultivated to the almost total neglect of every thing else; but it also produces excellent coffee, indigo, and cotton. The blackwood or ebony of the Mauritius is very abundant, and of a superior quality. Very little corn or grain of any kind is raised in the island; most articles of provision being imported. Previously to 1825, the sugar and other articles brought to Great Britain from the Mauritius were charged with the same duties as the like articles from India: but in the above-mentioned year this distinction was done away, and it was enacted (6 Geo. 4. c. 111. § 44.), that all goods of the growth, produce, or manufacture of the Mauritius, should, upon importation into any port of the U. Kingdom, be subject to the same duties and regulations as the like goods being of the growth, produce, or manufacture of the British colonies in the West Indies; and that the trade with the Mauritius should be placed as nearly as possible on the same footing as that of the West India islands.

This was a great boon to the Mauritius, and the exports of sugar from it have since rapidly increased. According to Milburn (*Oriental Commerce*, ii. 568.), they amounted, in 1812, to about 5,000,000 lbs. In 1818, they amounted to about 8,000,000 lbs.; and in 1824, to 23,334,553 lbs. Since 1825, some tenshs of

the sugar raised in the Mauritius has been shipped for the U. Kingdom. Its wonderful increase is seen in the following table:—

I. Account of the Quantities of Sugar imported into the U. Kingdom from the Mauritius during each of the 18 Years ending with 1842.

Years.	Quantities.	Years.	Quantities.	Years.	Quantities.	Years.	Quantities.

												£791,132 4 11

The cultivation of sugar being found more profitable than that of coffee, the latter has been all but wholly abandoned. The exports of cotton are also inconsiderable. The exports of ebony in 1826 amounted to 2,002,783 lbs., of the estimated value of 9,017*l*.; but, as seen above, they had sunk in 1836 to 664,369 lbs. The principal imports consist of provisions, particularly grain and flour; the supply required for the use of the island being almost entirely derived from the Cape of Good Hope, Madagascar, India, Bourbon, &c. Earthenware, machinery, furniture, hardware, piece goods, wine, &c. are also largely imported. The total declared value of the exports from the U. Kingdom to the Mauritius in 1842 amounted to 244,922*l*.

In 1836, the population of the Mauritius amounted to 92,147 souls; of whom between 9,000 and 10,000 were whites (exclusive of the king's troops). The population of the Seychelles—small islands dependent on the Mauritius—amounted at the same time to near 8,000.

*Monies, Weights, and Measures.*—According to the regulations of government, the franc is deemed equal to 10*l*., and the Spanish dollar to 4*l*. 4*d*. The government accounts are kept in sterling money; but merchants, shopkeepers, &c. keep their accounts in dollars and cents, and dollars, livres, and sous.

The measures and weights are those of France previously to the Revolution. 100 lbs. French = 108 lbs. English; the French foot is to the English foot as 100 to 93·89, but in practice they are supposed to be as 16 to 15. The *velte* = 1 gallon 7·8 pints English; but in commercial transactions it is always taken at 2 gallons.

*Duties, &c.*—A duty of 6 per cent. *ad valorem* is laid on all goods imported for consumption in British vessels from all quarters of the world. The duties on the goods imported in foreign ships are, for the most part, also 6 per cent. A duty of 25 cents, or 1*l*. 1*d*., per cwt., is laid on all sugar exported in British bottoms, to all places except Bourbon; and an additional duty of 8 per cent. *ad valorem* is laid on all goods exported in foreign bottoms. The charges for pilotage, wharfage, &c. are fixed by government, and may be learned at the Custom-house. For the most part they are very moderate.

It will be seen that the Mauritius has not suffered nearly so much from the emancipation of the blacks as the West India islands, though there has been a very great falling off in the imports of sugar in 1843. The continued cultivation of the Mauritius, despite the emancipation of the slaves, has been principally owing to the importation of hill-coolies and other labourers from India; who, in fact, are enticed away by the same arts that were employed to entice the blacks from Africa, and are substantially slaves.

**PORTO-RICO**, the capital of the valuable Spanish island of the same name, on the north side of the island, on a peninsula joined to the main land by a narrow isthmus, lat. 18° 29' 10" N., lon. 66° 13' 15" W. The fortifications are very strong: the town, which stands on a pretty steep declivity, is well built, clean, and contains about 30,000 inhabitants.

*Harbour.*—The harbour of Porto-Rico has a striking resemblance to that of the Havannah, to which it is but little inferior. The entrance to it, about 300 fathoms in width, has the Morro Castle on its east side, and is defended on the west side by forts erected on 2 small islands. Within the harbour expands into a capacious basin, the depth of water varying from 5 to 6 and 7 fathoms. On the side opposite to the town there are extensive sand banks; but the entrance to the port, as well as the port itself, is unobstructed by any bar or shallow.

The island of Porto-Rico lies in the same latitude as Jamaica. Though the smallest of the greater Antilles, it is of very considerable size. Its form is that of a parallelogram; being about 100 miles in length from east to west, with a mean breadth of about 38, containing an area of 3,750 square miles. Surface pleasantly diversified with hills and valleys; soil generally fertile. It has, however, suffered much from hurricanes; those of 1742 and 1825 having been particularly destructive. Since the breaking up of the old Spanish colonial system, the progress of Porto-Rico has hardly been less rapid than that of Cuba. Her population, which in 1778 was estimated at 80,650, amounted, according to a census taken in 1836, to 357,086, of whom 188,869 were whites, and only 41,818 slaves. It is obvious from this statement that a large proportion of the free inhabitants are coloured: but the law knows no distinction between the white and the coloured *roturier*; and this circumstance, as well as the

whites being in the habit of freely intermixing with people of colour, has prevented the growth of those prejudices and deep-rooted antipathies that prevail between the white and the black and coloured population in the U. States, and in the English and French islands.

*Trade.*— Sugar and coffee are by far the greatest articles of export. Next to them are molasses, tobacco, cotton, rum, &c. The imports consist principally of flour, fish, and other articles of provision, lumber, &c. from the U. States; cottons, hardware, machinery, &c. from England; wines, silks, jewelry, perfumery, &c. from Spain and France; linen from the Hanse Towns; iron from Sweden, &c. Large quantities of rice, maize, &c. are raised in the island. The pasture lands in the north and east are superior to any in the West Indies for breeding and fattening cattle.

Previously to 1815, Porto-Rico, being excluded from all direct intercourse with other countries, excepting Old Spain, was either stationary or but slowly progressive, the entire value of the exports in that year having amounted to only 65,374 dollars! But at that epoch a royal decree appeared, which exempted the trade between Spain and the Spanish colonies and Porto-Rico from all duties for 15 years; and she was then, also, permitted to carry on a free trade, under reasonable duties, with other countries. In consequence principally of these wise and liberal measures, but partly, also, of a considerable immigration of rich Spanish colonists from S. America, Porto-Rico has latterly made a most extraordinary progress. Great improvements have been effected in the police and internal administration, and roads have been constructed in all parts of the island.

The following statements as to the trade of Porto-Rico in 1839, taken from the *Balanza Mercantil*, published in the capital, afford the most conclusive proofs of the advancing prosperity of the island.

PORTS. See HARBOURS.

POSTAGE AND POST-OFFICE. Postage is the duty or charge imposed on letters or parcels conveyed by post; the Post-office being the establishment by which such letters or parcels are conveyed.

1. *Establishment of Post-offices.*— Regular posts or couriers were instituted at a very early period, for the safe, regular, and speedy transmission of public intelligence. Herodotus informs us (lib. viii. c. 98.), that in Persia, men and horses, in the service of the monarch, were kept at certain stations along the public roads; and that the despatches, being given to the first courier, were by him carried to the second, and so on, with an expedition that neither snow, nor rain, nor heat, nor darkness, could check. A similar institution, under the name of *cursus publicus*, was established at Rome by Augustus, and was extended and improved by his successors. Horses and carriages were kept in readiness at the different stations along the public roads, not only for the transmission of despatches, but also for the conveyance of official personages, or others who had obtained an order from authority allowing them to travel post. By this means government was speedily apprised of whatever took place in the remotest corners of the empire; and instructions or functionaries could be sent to, or recalled from, the most distant provinces, with a celerity that would even now appear considerable.—(*Bergier, Histoire des Grand Chemins*, liv. iv. c. 4.; *Bouchaud sur la Police des Romains*, pp. 136—151.)

Posts appear to have been established, for the first time, in modern Europe, in 1477, by Louis XI. They were originally intended to serve merely, as the ancient posts, for the conveyance of public despatches, and of persons travelling by authority of government. Subsequently, however, private individuals were allowed to avail themselves of this institution; and governments, by imposing higher duties or rates of postage on the letters and parcels sent through the Post-office than are sufficient to defray the expense of the establishment, have rendered it productive of a considerable revenue. Nor, while the rates of postage are confined within due limits, or not carried so high as to form any serious obstacle to correspondence, is there, perhaps, a more unobjectionable tax.

*English Post-office.* — The Post-office was not established in England till the 17th century. Postmasters, indeed, existed in more ancient times; but their business was confined to the furnishing of post-horses to persons who were desirous of travelling expeditiously, and to the despatching of extraordinary packets upon special occasions. In 1635, Charles I. erected a letter office for England and Scotland; but this extended only to a few of the principal roads, the times of carriage were uncertain, and the postmasters on each road were required to furnish horses for the conveyance of the letters at the rate of 2½*l.* a mile. This establishment did not succeed; and at the breaking out of the civil war, great difficulty was experienced in the forwarding of letters. At length a post-office, or establishment for the *weekly* conveyance of letters to all parts of the kingdom, was instituted in 1649, by Mr. Edward Prideaux, attorney-general for the Commonwealth; the immediate consequence of which was a saving to the public of 7,000*l.* a year on account of postmasters. In 1657, the Post-office was established nearly on its present footing, and the rates of postage that were then fixed were continued till the reign of Queen Anne. — (*Black. Com.* book i. c. 8.)

From the establishment of the Post-office by Cromwell, down to 1784, mails were conveyed either on horseback, or in carts made for the purpose; and instead of being the most expeditious and safest conveyance, the post had become, at the latter period, one of the slowest and most easily robbed of any in the country. In 1784, it was usual for the diligences between London and Bath to accomplish the journey in *seventeen* hours, while the post took *forty* hours; and on other roads their rate of travelling was in about the same proportion. In consequence of this difference in point of despatch, a very great number of letters were sent by those conveyances; the law being very easily evaded, by giving them the form of small parcels.

Under these circumstances, it occurred to Mr. John Palmer, of Bath, afterwards comptroller general of the Post-office, that a very great improvement might be made in the conveyance of letters, in respect of economy, as well as of speed and safety, by contracting with the proprietors of the coaches for the carriage of the mail; the latter being bound to perform the journey in a specified time, and to take a guard with the mail for its protection. Mr. Palmer's plan encountered much opposition, but was at length carried into effect. The consequences have proved most beneficial: the use of mail-coaches has extended to every part of the empire; and while the mail is conveyed in less than half the time that was required under the old system, the coaches by which it is conveyed afford, by their regularity and speed, a most desirable mode of travelling. Mr. Palmer was the author of several other improvements in the economy of the Post-office; nor is there any other individual to whose exertions this department owes so much. — (*Macpherson's Hist. of Commerce*, anno 1784.)

*The Scotch Post-office* was established on its present footing in 1710: but, owing to the backward state of Scotland, the limited amount of its trade and population, and the extreme badness of the roads — (see *Roads*), — it was very defective in most parts of the country till after the American war. In proof of this, we may mention that the first mail-coach, from London to Glasgow direct, arrived at the latter on the 7th of July, 1788. Previously to that period, the course of post from London to Glasgow was five days; this, however, is not to be entirely ascribed to the slowness of the conveyance by horseback; for the mail came round by Edinburgh, and was detained there *twelve hours*, or till the usual Edinburgh despatch was made up for Glasgow in the evening!

The construction of railways between most of the great towns of the empire has, within these few years, gone far to supersede the use of mail-coaches on the principal lines of road, and has added prodigiously to the facilities of correspondence and travelling. The journey from London to Liverpool, which had been accomplished by the mail, when in its most improved state, in about 20 or 22 hours, is now accomplished by railway in 9 or 10 hours! and on other roads in the same proportion. The principal expense of the Post-office consists, however, not so much in the conveyance of letters from place to place, though that amounts to a very large sum, as in their previous collection and their subsequent distribution. This necessitates the establishment of a vast number of subordinate offices in the remoter parts of the kingdom, many of which do not repay their expenses. This is particularly the case in Ireland, and in the Highlands and islands of Scotland.

It does not really seem, though the contrary has been sometimes contended, that the Post office could be so well conducted by any one else as by government. It is indispensable to its satisfactory working that it should be conducted with the greatest regularity and precision; and that all the departments should be made subservient to each other, and conducted on the same plan. It is plain that such results could not be obtained in any extensive country otherwise than by the agency of government; and the interference of the latter is also required to make arrangements for the safe and speedy conveyance of letters to, from, and through foreign countries.

The organisation of the Post-office supplies one of the most striking examples of the advantages resulting from the division and combination of employments. "Nearly the same exertions that are necessary to send a single letter from Falmouth to New York will send 50,000. If every man were to effect the transmission of his own correspondence, the whole life of an eminent merchant might be passed in travelling, without his being able to deliver all the letters which the Post-office forwards to him in a single evening. The labour of a few individuals devoted exclusively to the forwarding of letters, produces results which all the exertions of all the inhabitants of Europe could not effect, each person acting singly."—(*Senior on Political Economy.*)

*Rates of Postage.*—Previously to the introduction of the new system of a uniform penny rate of postage in 1839, under the provisions of the act 2 & 3 Vict. cap. 52., the following rates of postage, increasing progressively according to the distance, were charged on all letters (not privileged) conveyed by post from place to place in Great Britain and in Ireland, and from places in Great Britain to places in Ireland, and conversely.

GREAT BRITAIN.		Postage of a Single Letter in Pence.
From any post-office in Great Britain to any place not exceeding 8 miles from such office.

Exclusive of an additional charge for the packets plying between the two countries.

On comparing the number of non-privileged letters conveyed by the general post with the gross amount of postage, it appears that of late years they had paid an average rate of about 7d. or 7½d. each.

Exclusive, however, of these rates of postage, letters posted in London and other large towns for delivery in such towns, were charged 2d. each in London, and 1d. each in the other towns in which such local posts were established.

In addition, too, to the letters on which postage was charged, all the principal officers of government, and the members of both houses of parliament, enjoyed (either to a greater or less extent) the privilege of "franking," or of sending and receiving letters by the post free of postage, and this privilege was very extensively exercised.

*Post-Office Revenue.*—The gross produce, deducting overcharges, of the post-office revenue of Great Britain, exclusive of Ireland, in the undermentioned years, has been—

Years.	Duty.	Years.	Duty.	Years.	Duty.	Years.	Duty.
	£		£		£		£
1722	301,804	1810	1,675,076	1830	2,063,720	1839	2,162,915

1800	1,083,950						

The progress of the Scotch branch of the post-office revenue has been quite extraordinary. In 1698, Sir Robert Sinclair of Stevenson had a grant from William III. of its entire produce, with an extra allowance of 300*l.* a year, on condition of his keeping up the post; but, after trial, he abandoned the undertaking as disadvantageous. In 1709, the Scotch post-office revenue was under 2,000*l.*; whereas its amount in 1838 was 223,491*l.* gross, and 211,543*l.* nett; having increased more than a hundred fold in little more than a century! In 1781, the Glasgow post-office produced only 4,341*l.* 4*s.* 9*d.*, while in 1839 it produced 47,527*l.* — (*Stark's Picture of Edinburgh*, p. 144.; *Cleland's Statistics of Glasgow*; *Finance Book for 1838 and 1839*, &c.)

The expenses of collecting the post-office revenue amounted, under the old system, to from 24 to 30 per cent. on the gross receipt. In 1842, however, they amounted, for the U. Kingdom, to 966,759*l.*, being no less than 60 per cent. on the gross revenue.

*Introduction of the New System.* — The increase of the post-office revenue, as evinced by the above statements, has been very remarkable. It is mostly, no doubt, to be ascribed to the increase of population, the diffusion of education, and the growing intercourse among all classes of the community; though a good deal must also be ascribed to the efforts made in the early part of the reign of George III. to suppress some of the grosser abuses that had grown out of the privilege of franking, and still more to the additions that were repeatedly made to the rates of postage. Unfortunately, however, the latter were, in the end, carried far beyond their proper limits, imposing a heavy burden on the public, without any corresponding advantage to the revenue. This is obvious from the fact of the post-office revenue having continued stationary for the 20 years ending with 1839; though, from the great increase of population and commerce during that period, it is obvious, had the rates of postage not been so high as to force recourse to other channels, the revenue must have rapidly increased from the termination of the war downwards. When the rates of postage are moderate, the greater despatch and security of their conveyance by post, prevent any considerable number of letters being sent through other channels. But when the rates become oppressive, when, for example, a postage (as under the late system) of 11*d.* is charged on the conveyance of a single letter between London and York, of 13*d.* between London and Edinburgh, and so on, a serious interruption is given to that facility of intercourse which is so important, at the same time that a very large proportion of the correspondence which is carried on is unavoidably forced into private channels. It was, no doubt, attempted to prevent the transfer of letters from the post, by forbidding, under heavy penalties, their conveyance by private parties. But, as might have been anticipated, this prohibition could not be enforced, and had little or no effect. Considering, indeed, the facilities which have long existed for the transmission of letters in parcels between different parts of the country, and the oppressive rates of postage, the wonder is, not that the post-office revenue was nearly stationary previously to 1839, but that it did not fall off. Although, however, the rates of postage then existing, amounting, as already stated, to an average charge of about 7*d.* or 7½*d.* on all single letters conveyed by the general post, were very decidedly too high, it did not therefore follow that an invariable charge of 1*d.*, whether a letter were conveyed 1 mile or 1,000 miles, or singly or with 10,000 others, was the precise charge that should have been imposed! But, notwithstanding this was rushing blindfold from one extreme, or rather absurdity, to another, and endangering a large amount of revenue without any equivalent advantage, the project, brought forward by Mr. Rowland Hill, for a uniform penny postage, to be paid in advance, was eagerly adopted. It must be admitted, too, that it had various recommendations in its favour. Being calculated to obviate trouble and save expense to the public, it could not fail to be generally acceptable, (what reduction of taxation is not?) especially to mercantile men and others having an extensive correspondence. No doubt, however, the scheme was far more indebted for its popularity to the oppressiveness of the old rates of postage, than to any intrinsic merits of its own. Had these rates been properly reduced in 1837 or 1838, that is, had the postage of letters of ½ oz. weight passing between Scotland and Ireland and London been reduced to 4*d.* or 6*d.*, and other letters in proportion, and mercantile circulars, advertisements, and notices of sales, &c. been allowed to pass under covers open at the ends at 1*d.* or 2*d.* each, we venture to say that the clamour for a uniform penny postage would never have made any way. But government, though hostile to the project, took no step calculated to stop the agitation in its favour.

They neither reduced the old rates of postage, nor attempted to give any increased facilities for the conveyance of letters by post. And it happened in this, as it all but invariably happens on similar occasions, that those who decline making reasonable and necessary concessions at the outset, are, in the end, compelled to concede a great deal more than would at first have been satisfactory. Such, at all events, was the case in this instance. The clamour for a uniform penny rate became too powerful to be resisted; and parliament, whether it were so inclined or not, was obliged to lend its sanction to the measure. The act 2 and 3 Victoria, cap. 52., for regulating the duty on postage, did not indeed enact that the charge for conveying letters of a given weight should, in all cases, be reduced to 1d.; but it was introduced for the avowed purpose of enabling the Treasury to take the necessary steps to bring the change about with the least inconvenience to all parties. In this view it gave the Treasury power to alter and reduce the rates of postage, without reference to the distance which letters may be conveyed, according to the weight of the letters, and not to the number or description of their enclosures: it also gave them power to adopt such regulations as they might think expedient as to stamped covers or envelopes; to suspend parliamentary franking, &c.

In virtue of the powers so conveyed, regulations have been issued (rendered permanent by the act 3 & 4 Vict. c. 96.) by which all inland letters, without regard to the number of enclosures or the distance conveyed, provided they be paid when posted or despatched, are —

If not exceeding 4 os. weight, charged 1d.; 1 os. 2d.; 2 os. 4d.; 3 os. 6d.; and so on, 2d. being added for every additional ounce up to 16 os., beyond which, with the following exceptions, no packet, whether subject to postage or not, is received:—

1. Parliamentary petitions and addresses to her Majesty.
2. Parliamentary proceedings.
3. Letters and packets addressed to or received from places beyond sea.
4. Letters and packets to and from public departments.
5. Deeds, if sent open, or in covers open at the sides. They may be tied with string and sealed, in order to prevent inspection of the contents, but they must be open at the sides, that it may be seen that they are entitled to the privilege.
6. Bankers' parcels, despatched from London, and specially delivered at the General Post Office, under certain regulations.

With these exceptions, all packets above the weight of 16 os. will be immediately forwarded to the Dead Letter Office.

All letters not paid when they are posted or despatched are charged *double the above rates*.

All parliamentary and official franking has been put an end to; but members of either house of parliament are entitled to receive petitions and addresses to her Majesty, and petitions to parliament, free of charge, provided such petitions and addresses be sent in covers open at the ends, and do not exceed 32 os. weight.

The punctual delivery of letters may be insured by getting them *registered* when posted. A fee of 1s. is charged for the registration of each letter over and above the rate of postage to which it may be liable.

To facilitate the working of the plan, government furnish adhesive stamps of 1d. &c. each, which being pasted on letters, they are of course delivered to those to whom they are addressed free of any farther charge for postage; and it also furnishes stamped envelopes at the low rate of 24 for 2s. 3d., the 3d. being for the paper and manufacture. Hence, as any quantity of stamps or of stamped envelopes may, in most parts of the country, be procured beforehand, the necessity that must otherwise have existed of paying the postage at the moment when letters are posted, has been pretty generally obviated.

Such are the more prominent features of the new system; and no doubt it has the recommendations of simplicity (if we may apply such a phrase to a uniform charge for services costing widely different sums) and cheapness in its favour, and has greatly facilitated correspondence. But it may, notwithstanding, be easily shown that its adoption was most unwise. It is, no doubt, very convenient for merchants, bankers, middlemen, retail dealers, and indeed for most persons, to get letters for 1d. that previously cost them 7d. or 7½d.; but their satisfaction is not the only thing to be attended to in forming a fair estimate of the measure. The public exigencies require that a sum of about fifty millions a year should be raised, one way or other; and so long as we are pressed by an unreasoning necessity of this sort, it is not much to say in favour of the repeal or diminution of any tax, that those on whom it fell with the greatest severity are delighted with the reduction. Sugar has, in England, become a necessary of life; and its consumption, to say the least, is quite as indispensable to the bulk of the people, and especially to the labouring classes, as the writing of letters. But would it, therefore, be a wise measure to repeal the duty on sugar, or to reduce it to 1s. a cwt.? It has been alleged, indeed, that taxes on the transmission of letters are objectionable on principle, and should therefore be repealed, independently altogether of financial considerations! But it is easier to make an allegation of this sort than to prove it. All taxes, however imposed, if they be carried (as was the case with the old rates of postage) beyond their proper limits, are objectionable; but provided these be not exceeded, we have yet to learn why a tax on a letter should be more objectionable than

a tax on the paper on which it is written, on the food of the writer, or on fifty other things.

It was contended, when the plan was under discussion, that there would be no loss of revenue, and that the increase of correspondence growing out of the reduction of the postage would be so vast as fully to balance the reduced rate of charge! But though there has been a great increase in the number of letters, it has fallen far short of this. Notwithstanding all that has been said about the *furor scribendi*, letter-writing is generally looked upon as a duty rather than a pleasure; and it does not follow, when the expense of postage is reduced, that the occasions for writing letters are proportionally increased.

The total gross receipt of the Post-office revenue of the U. Kingdom, deducting overcharges and returned letters, amounted in 1838 (before the late changes began) to 2,346,278*l.*, while the expenses of the establishment for the same year amounted to 686,768*l.*, leaving a nett revenue of 1,659,510*l.* In 1842, however, two years after the new system had been in full operation, the gross receipt of the Post-office revenue amounted to only 1,578,146*l.*, while the expenses of the establishment for the same year amounted to 977,505*l.*, leaving a nett revenue of only 600,641*l.*, being no less than 1,058,869*l.* under its amount in 1838. This, however, is not all. Of the Post-office revenue in 1838, 45,156*l.* consisted of postage paid by public offices, which, being a mere charge by one government department against others, must be deducted in order to learn the nett available revenue produced by the Post-office. Owing, however, to the abolition of franking, the postage charged against government departments is now greatly increased, and in 1842 amounted to no less than 122,161*l.* Hence it will be found, on deducting these sums, that in 1838 the Post-office produced to government, over and above all charges, a clear available income of 1,614,354*l.*, which in 1842 was sunk to 478,480*l.*, being a nett diminution of 1,135,874*l.*! The subjoined account sets these important particulars in the clearest point of view.

An Account showing the Gross and Nett Post Office Revenue, and the Cost of Management, for the United Kingdom, for each of the Years ending 5th January 1839, 1840, 1841, 1842, and 1843, excluding from the Account, whether of Gross Revenue or Cost of Management, any Advances that may have been made by the English to the Irish Post Office, and Advances to the Money Order Office.

\* Namely, the gross receipts, after deducting the returns for "refused letters," &c.

† Includes over and above what are properly the expenses of collection, all payments out of the revenue, in its progress to the Exchequer, amounting to about 10,000*l.* a year in pensions to the Dukes of Marlborough and others, except advances to the money order office.

‡ This year includes one month of the fourpenny rate.

It is plain, therefore, that the adoption of the new Post-office system has occasioned the sacrifice of above 1,100,000*l.* a year of revenue. And though it be true that a sacrifice of this amount might not, under other circumstances, have been of much consequence, it is to be borne in mind that it was incurred when the revenue was already inadequate to meet the expenditure, and when, consequently, the deficiency had to be otherwise provided for, though probably in some more onerous way. We should not, however, have thought the loss of revenue, nor even the miserable quackery of a uniform penny rate, a valid objection to the new plan, had there been no means other than its adoption of getting rid of the inconveniences attached to the old system. But such was not the case. All its defects might have been effectually obviated without any, or with but a very inconsiderable, loss of revenue. Had franking been abolished, and the old rates of postage so reduced that the average charge might have been about 2½*d.* or 3*d.* a letter, the revenue would not probably have lost any thing, while every really advantageous object effected by the present system would have been secured. Indeed, we see no good reason why the present rates of postage should not, and very many why they should, be doubled, or increased to 2*d.* for a letter weighing ½ oz., 4*d.* for one weighing 1 oz., and so on. We are well convinced that, were this done, and the troublesome practice of forcing the prepayment of letters abandoned, the revenue would be nearly doubled, with little or no inconvenience to the public.

It will redound nothing to the credit of the new system should the Post-office revenue increase while it is maintained; for this will necessarily follow from the increasing population, wealth, commerce, and education of the country. The revenue would increase quite as fast under any reasonably well contrived system; all taxes on ar-

ticles in general use are sure, provided they be not excessive, to increase with every increase of population and wealth.

The abolition of franking, which, however, is in nowise connected with a penny rate of postage, is by far the least exceptionable of the late alterations. Franked letters were in most instances addressed to those who could best afford to pay the expense of postage; and who in this way escaped a burden that fell with its full weight on their less opulent and less known neighbours.

**Money Orders.**—The granting of money orders at the different post-offices for the payment of sums of 5*l.* and under, is a very great accommodation to the public, and is very extensively resorted to. Such orders cost 3*d.* if for 2*l.* or under, and 6*d.* for all sums between 2*l.* and up to 5*l.* As orders are not paid unless the parties in whose favour they are drawn, or other parties well known to the postmaster by whom they are payable, appear to receive payment, there is no risk of the money getting into improper hands. The following account shows the great increase in this department.

Return of the Number and Amount of Money Orders issued and paid in England and Wales during the different Quarters, from that ending on the 5th of April, 1839, to that ending on the 5th of July, 1843.

**Despatching of Letters.**—Full details as to the posting of letters in London may be found in *Kelly's Post-office Directory*—a useful and valuable publication, to which we beg to refer. It is sufficient here to state that, speaking generally, letters may be put into the receiving boxes of the different post-offices throughout the country at all hours of the day, and mostly, also, of the night. The mails for particular places are made up at certain specified hours, of which public intimation is given; and letters put in after those hours are not of course despatched till next mail.

Letters to be despatched from the General Post-office, London, on the day they are posted, are received at the general post receiving houses till 4 past 5 P.M.; and by the letter-carriers ringing bells (on payment of 1*d.* with each letter or newspaper), from 4 past 4 till 4 past 5 P.M.; at the branch post-offices, at Charing Cross, Old Cavendish Street, and Borough, till 45 min. past 6 P.M. with an additional 1*d.* stamp; at the branch post-office, Lombard Street, till 7 P.M., with an additional 1*d.* stamp; and at the general post-office, in St. Martin's le Grand, till 7 P.M., upon payment of a fee of 6*d.*

Letters to pass by foreign mails, except those for India, *via* Marseilles, which must be posted at the same hours and under the same regulations as inland letters, are, on Tuesdays and Fridays, received at the branch offices, Charing Cross, Old Cavendish Street, and 108, Blackman Street, Borough, until 8 P.M.; at the general post-office, St. Martin's le Grand, and at the branch office in Lombard Street, until 10 P.M.; and at St. Martin's le Grand only from 10 until 11 P.M. on payment of a fee of 1*d.*, and after 11 and until half-past 11 P.M. on payment of a fee of 6*d.* The letter boxes are invariably closed immediately after the striking of the clock.

Foreign and ship letters addressed London only, for persons whose residences are not known, are copied into lists which are hung up daily in the hall of the general post-office. Parties writing their addresses opposite to their names will receive their letters on the following morning.

Non-commissioned officers, captains' stewards, seamen, and soldiers, can send and receive letters to and from the East Indies by the overland mails, *via* Southampton, under the weight of half an ounce, on the condition of having the command must sign his name, and specify the name of the ship or regiment, corps or detachment, he commands.

Letters coming from a Seaman, or from a Sergeant, Corporal, Drummer, Trumpeter, Fifer, or private Soldier.—The 1*d.* must be paid when the letter is put into the post-office. The name of the soldier or sailor, his class or description, and the name of the ship or regiment, corps or detachment, to which he belongs, must be specified. And the officer having the command must sign his name, and specify the name of the ship or regiment, corps or detachment, he commands.

**Letters going to Seamen or Soldiers.**—The 1*d.* must be paid at posting, and the direction must specify the class of person, and the ship, regiment, or corps to which he belongs.

For soldiers upon shore and seamen's letters received from parts beyond sea, without the penny having been pre-paid, is 5*d.* in addition to the ship letter gratuity, if received by private ship.

3*d.* postage is charged on letters addressed to soldiers and seamen at the following places:—River Gambia, Sierra Leone, Goree, Senegal, Cape Coast Castle, Fernando Po, Coast of Africa, Ascension (Isle), and China. To St. Helena, the East Indies, and New South Wales, 1*d.* Seamen's and soldiers' letters from abroad by private ships are chargeable with 5*d.* each.

Warrent officers either in the army or navy, or masters' rates of the navy, are not entitled to receive or transmit letters at less than the usual rates of postage.

Printed votes and proceedings of the Imperial parliament, of the colonial legislatures, are charged—

Under 4 ounces - - - - - 1*d.*  
 Above 4 and under 8 ounces - - - - - 2*d.*  
 Above 8 and under 12 ounces - - - - - 3*d.*, and so on.

Such votes and proceedings, whether paid or unpaid, pass at these rates between places in the U. Kingdom as well as to the colonies by packet. To those places to which there are no packets, they may be forwarded by private ships, at double the above rate. They are not, however, forwarded to the East Indies, *via* Southampton and Alexandria, nor to places through France, under the full rates of letter postage. The postmaster general is authorised (if he shall see fit) to delay the transmis-

tion of printed votes and proceedings in parliament for any space not exceeding 34 hours from the time at which the same would otherwise have been forwarded.

**Stamp.**—The date shown when the letters were received at the post office.

The circular stamp of black ink, at the back of the letter, is used when the postage is paid on delivery.

**Mark of red ink**, on the face of the letter, with the word "Paid," when the postage has been paid at the time of posting the letter.

**Ship Letters.**—The single uniform rate on letters between the U. Kingdom and places beyond sea, when conveyed by private ships, is 6d., with the following exceptions, viz.: to or from Hamburg, Lubek, Bremen, and the Duchy of Oldenburg, the rate is 6d.; to or from France, 10d.; and to or from Holland, 1s. On letters by private ships the postage must be paid in advance, except to France and Holland, to which countries the payment is optional. The respective rates of 10d. to France and of 1s. to Holland includes the French and Dutch postage to destination.

The rates of postage on ship as on other letters are taken by weight:—

Not exceeding ½ oz.	Single.
Not exceeding 1 oz.	Double.
Not exceeding 2 oz.	Quadruple.
Not exceeding 3 oz.	Sextuple, and so on.

**Persons exempted from Ship Letter Postage.**—The owners, charterers, or consignees (resident in the U. Kingdom), and

the owners, consignees, and shippers of goods on board vessels inward bound, are entitled to receive their letters free from sea postage, to the extent collectively of 6 ounces in weight, by any vessel to any 1 such person. In the case of vessels coming from Ceylon, the Mauritius, the East Indies, or the Cape of Good Hope, for an owner, charterer, or consignee, of such vessel, the letters may be collectively twenty ounces in weight. The owner, charterer, or consignee must be described as such on the address and superscription; and in the case of owners, shippers, or consignees of goods, it must also appear by the ship's manifest that they have goods on board the vessel. Such persons are entitled to have their letters which come within the above conditions before the master of the vessel delivers the other letters in his charge to the post-office.

Every person who shall, with intent to evade any duty of postage, falsify superscribe a letter as being the owner, or the charterer, or the consignee of a vessel conveying the same, or as the owner, or the shipper, or the consignee of goods shipped in such vessel, shall for every such offence forfeit 10s.

**Mails made up in London.**—Letters (except those for India *via* Marseilles, which must be posted at the same hours as inland letters) for the foreign mails are received at the branch office, Charing Cross, Old Cavendish Street, and 108, Blackman Street, Borough, until 8 o'clock at night, on Tuesday and Friday, and till 10 at St. Martin's le Grand and Lombard Street: at St. Martin's le Grand only they will be received after 10, and up to 11 p. m., on payment of a fee of 1d.; and after 11 until half past 11 p. m., on payment of a fee of 6d.

When made up in London.

When due.

France	Daily	Daily
Holland	Monday, Tuesday, Thursday, & Friday	Sunday, Monday, Tuesday, & Friday.
Hamburg, Sweden, and Norway	Tuesday and Friday	Monday and Thursday.
	Tuesday and Friday	Tuesday and Saturday, but usually arrive on previous day.
Dublin	Twice a day	Twice a day.
Waterford	Daily	Daily.
Bombay	Daily	Daily.
Guernsey and Jersey	Tuesday and Friday	Monday and Thursday.

Lisbon, Madeira, <i>via</i> Lisbon, Vigo, Cadiz, Oporto, and Gibraltar	Every Thursday morning.
Malta, Greece, and Ionian Islands, <i>via</i> Southampton	Twice in each month, viz.:—On the first morning of every month, and on the Thursday morning nearest to the 15th of every month.
Syria, Egypt, India, and China, <i>via</i> Southampton	1st morning in each month.
Brazil, Buenos Ayres, Madeira, and Canary Islands	1st Tuesday in each month.
British North America, Bermuda, and U. States	3rd and 15th of every month, except in the winter months, December, January, February, and March, and then on the 3rd only.
New South Wales	Last day of each month.
Jamaica, Leeward Islands, Hayti, Porto Rico, and Cuba	2nd and 17th morning of every month.
Mexico, Panama, New Granada, and Venezuela	2nd morning of every month.

The mails despatched every Thursday for Vigo, Oporto, Lisbon, Cadiz, and Gibraltar are forwarded by steam vessels from Southampton to Gibraltar.

The mails for Malta, Greece, and the Ionian Islands, despatched from London on the Thursday nearest to the 15th of the month, are conveyed from Gibraltar to Malta by Her Majesty's steam packets employed in the Mediterranean.

The mail of the 1st day in each month is forwarded by the same packet from Southampton to Alexandria; leaving mails at Malta.

The mails for Greece and the Ionian Islands are conveyed from Malta every fortnight, by steam packets, which start after the arrival of the mails from England.

The mails for Egypt, India, and China are forwarded direct from Southampton on the 1st of each month by steam packets. From August to January inclusive the packet touches at Pernambuco and Bahia, on her outward passage to Rio Janeiro, and the other 6 months on her homeward.

**North America and British and Foreign West Indies, from Liverpool.**—The mails for North America are forwarded by steam packets, which leave Liverpool twice a month immediately after the arrival of the London mails of the 3d and 18th, unless either of these should fall on a Sunday, and then on the succeeding day. During the winter months, viz. December, January, February, and March, but one mail, that of the 3d, is despatched.

American and West Indian Letters.

	Rates, paying the Postage optional, excepting Places marked thus *, which must be paid with.		
	Not exceeding ½ Oz.	Not exceeding 1 Oz.	Not exceeding 2 Oz.
North America, viz.:—Quebec, Montreal, and all parts of Canada, Nova Scotia (Halifax excepted), Prince Edward's Island, and New Brunswick, conveyed direct by the contract packets (1s. packet postage, and 2d. uniform internal colonial rate)	s. d.	s. d.	s. d.
if forwarded <i>via</i> Boston, the above places are charged	1 2	2 4	4 8
Halifax, Newfoundland, * New York, the Bermudas, and the United States	1 0	2 0	4 0
British West Indies, &c., including Barbados, New Providence, Turk's Island, Bahamas, Antigua, Barbice, Carriacou, Demerara, Dominica, Grenada, St. Lucia, Montserrat, Nevis, St. Vincent's, St. Kitt's, Tobago, Tortola, Trinidad, and the port of Kingston in Jamaica	1 0	2 0	4 0
Jamaica (port of Kingston excepted)	1 2	2 4	4 8
Foreign West Indies, including * Guadeloupe, * Martinique, * Surinam, * St. Martin's, * St. Croix, Porto Rico, and Hayti	1 5	2 10	5 8

Postage on letters to the British West Indies (Jamaica excepted), 1s. for each single letter, and so on in proportion from all parts of the U. Kingdom, without any charge for inland postage.

On letters to Jamaica (with the exception of Kingston, the packet port, to which the postage is 1s. only) the uniform rate is 1s. 3d. the single letter.

All letters addressed to North America are forwarded by the contract steam packets, and charged accordingly, unless the words "By Private Ship" be plainly written on them.

**N.B.**—Letters for North America, conveyed by the North American packets from Liverpool, if specially addressed *via* Boston, will be forwarded by that route, in the United States mail, provided the packet postage be paid in advance.

**Rates of Postage *via* India, British North America.**—Letters forwarded to or from British North America by the Liverpool packets, or by private ships, passing direct between the U. Kingdom and British America, are charged with a uniform colonial rate of 3d. the ½ ounce when posted or delivered at any other towns than the ports of Halifax, Nova Scotia, or St. John's Newfoundland.

When not conveyed direct between the U. Kingdom and British America, but forwarded through the United States, they are liable to the full internal rates, according to distance.

**Letters *via* France.**—A large portion of the letters to and from India, as well as to various parts in Europe, are now sent through France; and a convention has been entered into with that country, by which the transit rate on letters weighing under ½ oz. passing through France, has been fixed at 3d., which is also the British rate on such letters not exceeding ½ oz. When conveyed beyond the French frontier the additional foreign postage has of course to be paid.

**India Letters.**—Mails for India are made up on the 4th of every month, and despatched *via* Marseilles, whence they are forwarded by British steamers to Alexandria, and again by steamers from Suez to Bombay. All letters sent by this route unless otherwise addressed. Postage paid in advance 1s. 10d. to Bombay for a letter under ½ oz., and 2s. 3d. for one under 1 oz. Mails for India are also forwarded *via* Southampton on the 1st of every month. Postage by this route is for a letter not exceeding ½ oz. Letters intended to go by Southampton must be addressed "via Southampton."

**Russia.**—Mails for Russia and the north of Europe are despatched every Tuesday and Friday *via* Hamburg. Postage 1s. 6d. not exceeding ½ oz. Letters for Russia may also be sent through France and Holland.

**Holland.**—Letters forwarded every Tuesday and Friday, paid or unpaid, at the rate of 1s. on letters not exceeding 1 oz. The British rate of 6d. on letters passing to Germany must be paid in advance.

Letters for the following states are forwarded through the office of the Prince of Tour and Taxis, when sent *via* France.

A List of the Northern States of Europe, and the German States, which are served by or forwarded through the office of the Prince of Tour and Taxis.

**Newspapers and Supplements to Newspapers.**—It is not compulsory to send newspapers or the supplements by the post, but those that are intended to be so transmitted, and are entitled to pass free, must be put into the receiving houses before 5 p.m.; at the branch post-offices, before half-past 5 p.m.; or at the general post-office, St. Martin's le Grand, before 6 p.m. Newspapers for the colonies and foreign countries cannot be received after 6. All newspapers must be sent in covers, open at the ends, and no words or communication may be printed on such papers after their publication, nor must there be any writing or marks upon any newspaper, or cover, other than the name and address of the person to whom it is sent; nor any paper or thing enclosed or concealed in it, nor any printed words or communication on the cover, except that new-renders only may print their names and addresses thereon. Newspapers may be examined by the officers of the Post-office; and if there be any breach of the above regulations, the packet is chargeable with treble the amount of postage which a letter of the same weight would have been liable to. And any person who shall write or enclose any thing in any newspaper or its cover, or shall print any words or communication on a newspaper, after it has been published, to be sent by the post, or any person who shall knowingly send, or cause to be sent, by the post, a newspaper in respect of which any one of those offences has been committed, may be prosecuted for a misdemeanour.

**N.B.**—As the mere affixing a newspaper stamp on any new periodical publication will not entitle it, as a matter of course, to pass free by the post, those who may be about to publish, for the first time, any such paper, should submit a copy to the

postmaster general, in order that it may be determined whether the publication is of a nature that will entitle it to pass free of postage, it being provided by the act 1 Victoria, c. 34, § 37.

That in all cases in which a question shall arise, whether a printed paper is entitled to the privileges of a newspaper or other publication hereby provided, so far as respects its transmission thereof by the post under the Post-office Act, the question shall be referred to the determination of the postmaster general, whose decision, with the concurrence of the lords of the treasury, shall be final.

Newspapers from the British colonies are delivered *free of postage* at any place within the British dominions.

Newspapers may be forwarded to the British colonies and possessions by her Majesty's packet boats, *free of the duty of postage*, provided they be duly stamped and made up *pre* to the ends, and put into the post-office within 7 days after the day of publication.

Newspapers may also be forwarded to the colonies by private ships for a postage of 1d. each, to some foreign ports *free*, and to others for a postage of 2d. each, to be paid at the time of putting in, under the same regulations as to date, &c. Newspapers printed in the colonies and brought to Great Britain or Ireland by packet boats, if made up without covers, or in covers open at the ends, are delivered in the U. Kingdom *free of postage*.

Newspapers to the East Indies and China are forwarded in the packet *via* Mauritius, on payment of 5d. each. The mail is made up on the 4th of every month, except it happens to fall on a Sunday, when it is made up on the following day.

List of Colonies and Foreign Parts to which Newspapers may be sent by Packet free of Postage.

British Colonies.			Foreign Parts.		
Aden	Grenada	Neris	Brazil	Algiers	
Antigua	Halifax	New Brunswick	Bremen	St. Domingo	
Bahama	Belgium	Newfoundland	Buenos Ayres	Lubeck	
Barbadoes	Honduras	Nova Scotia	Cathagen	New Granada	
Berbee	Hong Kong, <i>via</i> South-	Quebec	Denmark	(Venezuela)	
Bermuda	ampton	St. Kitt's	France	Pera	
Canada	India, ditto	St. Lucia	Greece	Spain	
Caracao	Ionian Islands, ditto	St. Vincent's	Hamburg	Venezuela	
Damerra	Jamaica, ditto	Tobago			
Deminea	Malta, ditto	Trinidad			
Gibraltar	Monterrat				

Foreign Parts to which a Postage of 2d. on each Newspaper must be paid when it is posted.

United States of America	Continent of Europe	With the exception of Holland, and the places mentioned in the preceding list of "foreign parts" as not <i>free of postage</i> .
Guadeloupe		
Martinique		
Surinam		
St. Croix		
St. Thomas		
St. Martin's		
Cuba		
Keye		
Syria		
	South America	With the exception of Brazil, Buenos Ayres, New Granada, Venezuela, Peru, Spain.

The rate on newspapers to or from Holland, or to or from countries through Holland, is 1d.; Greece *via* France, 1d.; Spain *via* France, 1d.; the Mediterranean, Egypt, the East Indies, and China, by the closed mail, *via* Mauritius, 5d.

Newspapers to France are forwarded free of charge to the sender. A rate of 4 centimes (nearly equivalent to  $\frac{1}{2}$ d.) is charged upon delivery in France.

*Newspapers from Abroad.* — Newspapers arriving from those foreign parts to which newspapers are despatched free, are delivered free of postage, except those from France, which are charged  $\frac{1}{2}$ d. each. From places abroad, to which they are not despatched free, newspapers are charged here  $\frac{1}{2}$ d. each, except as stated in the above paragraph. All newspapers must be printed in the language of the country from which they are sent, unless specially exempted by the lords of the treasury.

*Newspapers by private Ships.* — If put into the office within 7 days after publication, are forwarded to the Cape of Good

Hope, Mauritius, or Isle of France, Hong Kong, Sydney, New South Wales, Van Diemen's Land, Swan River, South Australia, Chili, Peru, Guatemala, and the Western Coast of America, and the East Indies, on payment of  $\frac{1}{2}$ d. with each paper; to St. Helena and the Western Coast of Africa, viz. St. Mary's, River Gambia, Sierra Leone, Cape Coast Castle, Fernando Po, and Ascension (Isle), at the same rate; to China (Hong Kong excepted) and places not British, on payment of  $\frac{1}{2}$ d. each, under the above regulations as to date, &c.

*N.B.* — All newspapers forwarded through the Ship Letter Office, except those between ports in Great Britain, and Ireland, must be paid for when put in.

*Offences against the Post-Office.* — The laws relative to offences against the Post-office were consolidated by the act 1 Vict. c. 36., of the more important parts of which we subjoin an abstract.

*Contravening the Privilege of Post-Office.* — Every person who shall convey otherwise than by the post a letter not exempted from the exclusive privilege of the postmaster general shall for every letter forfeit 5*l.*; and every person who shall be in the practice of so conveying letters not so exempted, shall for every week during which the practice shall be continued forfeit 100*l.*; and every person who shall perform otherwise than by the post any services incidental to conveying letters from place to place, whether by receiving, taking up, collecting, ordering, despatching, carrying, re-carrying, or delivering a letter not exempted from the exclusive privilege of the postmaster general, shall forfeit for every letter 5*l.*; and every person who shall be in the practice of so performing any such incidental services shall for every week during which the practice shall be continued, forfeit 100*l.*; and every person who shall send a letter not exempted from the exclusive privilege of the postmaster general otherwise than by the post, or shall cause a letter not so exempted to be sent or conveyed other than by post, or shall tender or deliver a letter not so exempt in order to be sent otherwise than by post, shall forfeit for every letter 5*l.*; and every person who shall be in the practice of committing any of the acts last mentioned shall for every week during which the practice shall be continued, forfeit 100*l.*; and every person who shall make a collection of exempted letters for the purpose of conveying or sending them otherwise than by the post, or by the post, shall forfeit for every letter 5*l.*; and every person who shall be in the practice of making a collection of exempted letters for either of those purposes, shall forfeit for every week during which the practice shall be continued 100*l.* And be it declared, that the term post shall herein include all post communications by land or by water (except by outward-bound vessels not employed by the post-office or the admiralty to carry post letters); and the above penalties shall be incurred whether the letter be sent singly or with any thing else, or such incidental service be performed in respect to a letter either sent or to be sent singly or together with some other letter or thing; and in any prosecution for the recovery of any such penalty the onus shall lie upon the party prosecuted to prove that the act in respect of which the penalty is alleged to have been incurred was done in conformity to the post-office laws. — § 2.

*Ship Letters retained after delivering of Letters to Post-Office.* — Every person, being either the master of a vessel inward-bound, or one of the officers, or one of the crew, or a passenger thereof, who shall knowingly have any letter in his possession not exempted from the privilege of the postmaster general, after the master shall have sent any part of his ship's letters to the post-office, shall forfeit for every letter 5*l.*; and every such person who shall detain any such letter after demand made, either by the officer of the customs or by a person authorised by the postmaster general to demand ship's letters, shall forfeit for every letter 10*l.* — § 3.

Clause 4. relates to the abuse of the privilege of franking, and is no longer of importance.

*Penalties on Masters of Ships not taking Letter Bags.* — Every master of a vessel bound to Ceylon, the Mauritius, the East Indies, or the Cape of Good Hope, who shall refuse to take a post letter bag delivered or tendered to him by an officer of the post-office for conveyance, shall forfeit 200*l.*; and every master of a vessel who shall open a sealed letter bag, with which he shall be intrusted for conveyance, shall forfeit 200*l.*; and every master of a vessel who shall take out of a letter bag with which he shall have been intrusted for conveyance a letter or any other thing shall forfeit 200*l.*; and every master of a vessel who shall not duly deliver a letter bag with the contents at the post-office on his arrival in port, without wilful or unavoidable delay after his arrival, shall forfeit 200*l.*; and every person to whom letters may have been intrusted by the master of a vessel to bring on shore who shall break the seal, or in any manner wilfully open the same, shall forfeit 20*l.*; and every master of a vessel who shall refuse or wilfully neglect to make declaration of having delivered his ship's letters to the post-office, shall forfeit 50*l.*; and every collector, comptroller, or officer of the customs who is required by the act 1 Vict. c. 34. to prohibit any vessel reporting until the requisites of such act have been complied with, who shall permit such vessel to report before the requisites of such act shall have been complied with, shall forfeit 50*l.*; and every master of a vessel (not having been able to send his letters ashore previous to his arrival at the port where the vessel is to report) who shall break bulk or make entry before all letters on board shall be sent to the post-office shall forfeit 20*l.*; and every master of a vessel, or any other person on board any ship liable to the performance of quarantine, who shall neglect or refuse to deliver to the person or persons appointed to superintend the quarantine all letters in his possession, shall forfeit 20*l.* — § 6.

*Penalties on the Carelessness of Persons engaged or employed in carrying, conveying, &c. Letters.* — Every person employed to convey or deliver a post letter bag or a post letter who shall, whilst so employed, or whilst the same shall be in his custody, care, or possession, leave a post letter bag or a post letter, or suffer any person, not being the guard or person employed for that purpose, to ride in the place appointed for the guard in or upon any carriage used for the conveyance of a post letter bag or post letter, or to ride in or upon a carriage so used or other licensed conveyance, or upon a horse used for the conveyance on horseback of a post letter bag or a post letter, or if any such person shall be guilty of any act of drunkenness, or of carelessness, negligence, or other misconduct, whereby the safety of a post letter bag or a post letter shall be endangered, or who shall collect or receive, or convey or deliver, a letter otherwise than in the ordinary course of the post, or who shall give any false information of an assault or attempt at robbery upon him, or who shall loiter on the road or passage, or wilfully mispend his time so as to retard or delay the progress or arrival of a post letter bag or a post letter, or who shall not use due and proper care and diligence safely to convey a post letter bag or a post letter at the rate of speed appointed by and according to the regulations of the post-office for the time being, being thereof convicted, shall forfeit 20*l.* — § 7.

Clauses 8. to 24. inclusive impose penalties on hackney carriages plying for hire opposite the general post-office in London or Dublin; exempt mail coaches from toll; and direct how penalties shall be sued for.

*Opening or delaying Post Letters a Misdemeanour.* — Every person employed by or under the post-office who shall, contrary to his duty, open or procure or suffer to be opened a post letter, or shall wilfully detain or delay, or procure or suffer to be detained or delayed, a post letter, shall in England and Ireland

\* The 3 & 4 Vict. c. 96. extends this penalty to the master of every vessel outward bound who shall refuse to take a post letter bag delivered or tendered to him for conveyance.

be guilty of a misdemeanor, and in Scotland of a crime and offence, and being convicted thereof shall suffer such punishment by fine or imprisonment, or by both, as to the court shall seem meet: provided always, that nothing herein contained shall extend to the opening or detaining or delaying of a letter returned for want of a true direction, or of a letter returned by reason that the person to whom the same is directed is dead or cannot be found, or shall have refused the same, or shall have refused or neglected to pay the postage thereof: nor to the opening or detaining or delaying of a post letter in obedience to an express warrant in writing under the hand (in Great Britain) of one of the principal secretaries of state, and in Ireland under the hand and seal of the lord lieutenant of Ireland.

**Embezzlement, &c. of any Letter or Packet, Felony.**—Every person employed under the post-office who shall steal, or shall for any purpose whatever embezzle, secrete, or destroy a post letter, shall in England and Ireland be guilty of felony, and in Scotland of a high crime and offence, and shall, at the discretion of the court, either be transported beyond the seas for the term of 7 years, or be imprisoned for any term not exceeding 3 years; and if any such post letter so stolen or embezzled, secreted or destroyed, shall contain therein any chattel or money whatsoever, or any valuable security, every such offender shall be transported beyond the seas for life. — § 95.

**Stealing Money, &c. from or out of Letters, Felony.**—Every person who shall steal from or out of a post letter any chattel or money, or valuable security, shall in England and Ireland be guilty of felony, and in Scotland of a high crime and offence, and shall be transported beyond the seas for life.

**Persons stealing Post Letter Bags, &c. to be transported for Life.**—Every person who shall steal a post letter bag, or a post letter from a post letter bag, or shall steal a post letter from a post-office, or from an officer of the post-office or from a mail, or shall stop a mail with intent to rob or search the same, shall in England and Ireland be guilty of felony, and in Scotland of a high crime and offence, and shall be transported beyond the seas for life.

**Persons stealing Post Letter Bags or Post Letters to be transported for 14 Years.**—Every person who shall steal or unlawfully take away a post letter bag sent by a post-office packet, or who shall steal or unlawfully take a letter out of any such bag, or shall unlawfully open any such bag, shall in England and Ireland be guilty of felony, and in Scotland of a high crime and offence, and shall be transported beyond the seas for any term not exceeding 14 years.

**Receivers of Property sent by the Post and stolen or embezzled, guilty of Felony.**—Every person who shall receive any post letter or post letter bag, or any chattel or money or valuable security, the stealing or taking or embezzling or secreting whereof shall amount to a felony under the Post Office Acts, knowing the same to have been feloniously stolen, taken, embezzled, or secreted, and to have been sent or intended to be sent by the post, shall in England and Ireland be guilty of felony, and in Scotland of a high crime and offence, and may be indicted and convicted either as an accessory after the fact or for a substantive felony, and in the latter case, whether the principal felon shall or shall not have been previously convicted, or shall or shall not be amenable to justice; and every such receiver, howsoever convicted, shall be liable to be transported beyond the seas for life.

**Fraudulently retaining, after Delivery thereof, &c.**—Every person who shall fraudulently retain, or shall wilfully secrete or keep or detain, or being required to deliver up by an officer of the post-office, shall neglect or refuse to deliver up a post letter which ought to have been delivered to any other person, or a post letter bag or post letter which shall have been sent, whether the same shall have been found by the person secreting, keeping, or detaining, or neglecting or refusing to deliver up the same, or by any other person, shall in England and Ireland be guilty of a misdemeanor, and in Scotland of a crime and offence, and on conviction shall be liable to be punished by fine and imprisonment.

**Stealing, &c. printed Votes or Proceedings in Parliament, &c.**—Every person employed in the post-office who shall steal, or shall for any purpose embezzle, secrete, or destroy, or shall wilfully detain or delay in course of conveyance or delivery thereof by the post, any printed votes or proceedings in parliament, or any printed newspaper, or any other printed paper whatever sent by the post without cover, or in covers open at the sides, shall in England and Ireland be guilty of a misdemeanor, and in Scotland of a crime and offence, and on conviction shall suffer such punishment by fine or imprisonment, or both, as the court shall direct.

**Forging or Counterfeiting of the Receiver General in England or Ireland, Felony.**—Every person who shall knowingly and wilfully forge or counterfeit, or cause or procure to be forged or counterfeited, the name or handwriting of the receiver general for the time being of the general post office in England or Ireland, or of any person employed by or under him, to any draft, instrument, or writing whatsoever, for or in order to the receiving or obtaining of any money in the hands or custody of the governor and company of the bank of England or Ireland on account of the receiver general of the post-office, or shall forge or alter, or shall offer, utter, dispose of, or put off, knowing the same to be forged or altered, any draft, warrant, or order of such receiver general, or of any person employed by or under him, for money or for payment of money, with intent to defraud any person whomsoever, shall be guilty of felony, and on conviction shall be transported beyond the seas for life.

Clause 24. relates to the forging or altering franks.

The remaining clauses relate to the punishment of accessories, determine the mode in which the postage duties shall be sued for, define terms, &c.

**Irish Post-office.**—The most gross and scandalous abuses were long prevalent in every department of the Irish post-office. The commissioners of Revenue Inquiry exerted themselves to abate the nuisance; but, as it would appear from the evidence of the Duke of Richmond before the committee of the House of Commons on public salaries, without much effect. His Grace, however, laboured with laudable activity and zeal to introduce something like honesty, order, and responsibility into this department. The gross revenue of the Irish post-office amounted, in 1842, to 128,984*l.*, the expenses of collection for the same year being 127,856*l.*; so that it may be fairly said that under the new system Ireland pays no postage.

**UNITED STATES.**—We subjoin an account of the number of post-offices, the extent of post roads, the rates of postage, &c. in the United States.

#### POST-OFFICES AND POSTAGE.

Post-offices in 1790	75;	extent of post roads in miles,	575
— 1800	903	—	20,817
— 1810	2,300	—	56,405
— 1820	4,500	—	73,492
— 1829	8,004	—	115,000
— 1842	13,733	—	149,734

#### RATES OF POSTAGE.

For Single Letters, composed of One Piece of Paper.—			
Any distance not exceeding 80 miles, 6 cents.			
Over 80, and not exceeding	90	—	12
— 90	—	100	14
— 100	—	400	18
— 400	—	—	25

Double letters, or those composed of 2 pieces of paper, are charged with double the above rates.

Triple letters, or those composed of 3 pieces of paper, are charged with triple the above rates.

Quadruple letters, or those composed of 4 pieces of paper, are charged with quadruple the above rates.

All letters weighing 1 ounce avoirdupois, or more, are charged at the rate of single postage for each  $\frac{1}{2}$  of an ounce, or quadruple postage for each ounce, according to their weight; and no letter can be charged with more than quadruple postage, unless its weight exceeds 1 ounce avoirdupois.

The postage on ship letters, if delivered at the office when the vessel arrives, is 6 cents; if conveyed by post, 2 cents in addition to the ordinary postage.

**Newspaper Postage.**—For each newspaper, not carried out of

the state in which it is published, or if carried out of the state but not carried over 100 miles, 1 cent.  
Over 100 miles, and out of the state in which it is published, 1½ cent.

*Magazines and Pamphlets.*—If published periodically, distance not exceeding 100 miles, 1½ cent per sheet.  
Over 100 — 2½

If not pub. — period. dist. not exceed. 100 miles, 4 cts. per sheet  
over 100 — 6

Small pamphlets, containing not more than a 4 sheet royal, are charged with ½ the above rates. Eight pages quarto are rated as one sheet, and all other sizes in the same proportion.

The number of sheets in a pamphlet sent by mail must be printed or written on one of the outer pages. When the number of sheets is not truly stated, double postage is charged.

Every thing not coming under the denomination of newspapers or pamphlets is charged with letter postage.

The total post-office revenue of the United States, in the year ended the 30th June 1842, amounted to 4,546,246 dollars, the expenditure during the same year being 4,235,052 dollars.—(*American Almanac* for 1844.)

**POST ENTRY.** When goods are weighed or measured, and the merchant has got an account thereof at the Custom-house, and finds his entry, already made, too small, he must make a *post* or additional *entry* for the surplusage, in the same manner as the first was done. As a merchant is always in time, prior to the clearing of the vessel, to make his post, he should take care not to over-enter, to avoid as well the advance, as the trouble of getting back the overplus. However, if this be the case, and an over-entry has been made, and more paid or bonded for customs than the goods really landed amount to, the land-waiter and surveyor must signify the same, upon oath made, and subscribed by the person so over-entered, that neither he, nor any other person, to his knowledge, had any of the said goods over-entered on board the said ship, or anywhere landed the same without payment of custom; which oath must be attested by the collector or comptroller, or their deputies, who then compute the duties, and set down on the back of the certificate, first in words at length, and then in figures, the several sums to be paid.

**POTASH** (Da. *Potaske*; Fr. *Potasse*; Ger. *Pottasche*; It. *Potassa*; Pol. *Potasz*; Rus. *Potash*). If vegetables be burned, the ashes lixiviated, and the solution boiled to dryness in iron vessels, the mass left behind is the *potash* of commerce—the impure carbonate of potash of chemists. It is intensely alkaline, solid, and coloured brown by the admixture of a small portion of vegetable inflammable matter, which generally becomes moist. When potash is calcined in a reverberatory furnace, the colouring matter is destroyed, it assumes a spongy texture, and a whitish pearly lustre; whence it is denominated *pearl-ash*. The latter generally contains from 60 to 83 or 84 per cent, of pure carbonate of potash.

The ashes of those vegetables only which grow at a distance from the sea are employed in the manufacture of potash. Herbaceous plants yield the largest portion, and shrubs more than trees. It is principally manufactured in America, Russia, and Poland, the vast forests of which furnish an inexhaustible supply of ashes.

Potash is of great importance in the arts, being largely employed in the manufacture of flint glass and soft soap, the rectification of spirits, bleaching alum, scouring wool, &c. At an average of 1840 and 1841, the entries of pot and pearl ashes for home consumption, amounted to 82,381 cwt. a year. Of 99,295 cwt. imported in 1840, 98,260 cwt. were brought from the British possessions in North America. The ashes of the U. States are the purest, and bring the highest price.

Ashes from Canada are duty free; those from Russia and the United States used pay a duty of 6s. a cwt., which was reduced, in 1842, to 6d.

**POTATOES** (Ger. *Kartoffeln*; Du. *Aardappelen*; Fr. *Pommes de terre*; It. *Patate*, *Pomi di terra*; Sp. *Patatas manchegas*; Rus. *Jabloki semleniye*), the roots of the *Solanum tuberosum*, of innumerable varieties, and too well known to require any description.

1. *Historical Notice.*—The potato, which is at present to be met with everywhere in Europe, and forms a principal part of the food of a considerable proportion of its inhabitants, was entirely unknown in this quarter of the world till the latter part of the 16th century. It is a native of America, but whether of both divisions of that continent is doubtful.—(*Humboldt, Nouvelle Espagne*, liv. iv. c. 9.) Some authors affirm that it was first introduced into Europe by Sir John Hawkins, in 1545; others, that it was introduced by Sir Francis Drake, in 1573; and others, again, that it was for the first time brought to England from Virginia, by Sir Walter Raleigh, in 1586. But this discrepancy seems to have arisen from confounding the common, or Virginian potato (the *Solanum tuberosum* of Linnaeus), with the sweet potato (*Convolvulus batatas*). The latter was introduced into Europe long before the former, and it seems most probable that it was the species brought from New Granada by Hawkins. Sweet potatoes require a warm climate, and do not succeed in this country; they were, however, imported in considerable quantities, during the 16th century, from Spain and the Canaries, and were supposed to have some rather peculiar properties. The kissing comfits of Falstaff, and such like confections, were principally made of batatas and eringo roots.—(See Collins' elaborate note to *Troilus and Cressida*, act. v. scene 2.) On the whole, we are inclined to think that we are really indebted for the potato (as well as for tobacco) to Sir Walter Raleigh, or the colonists planted by him in Virginia. Gerard, an old English botanist, mentions, in his *Herbal*, published in 1597, that he had

planted the potato in his garden at London about 1590; and that it succeeded there as well as in its native soil, Virginia, whence he had received it. Potatoes were at first cultivated by a very few, and were looked upon as a great delicacy. In a manuscript account of the household expenses of Queen Anne, wife of James I., who died in 1618, and which is supposed to have been written in 1613, the purchase of a very small quantity of potatoes is mentioned at the price of 2s. a pound. The Royal Society, in 1663, recommended the extension of their cultivation, as a means of preventing famine. Previously, however, to 1684, they were raised only in the gardens of the nobility and gentry; but in that year they were planted, for the first time, in the open fields in Lancashire, — a county in which they have long been very extensively cultivated.

Potatoes, it is commonly thought, were not introduced into Ireland till 1610, when a small quantity was sent by Sir Walter Raleigh to be planted in a garden on his estate in the vicinity of Youghal. Their cultivation extended far more rapidly than in England; and have long furnished from  $\frac{1}{3}$  to  $\frac{1}{2}$  of the entire food of the people of Ireland!

Potatoes were not raised in Scotland, except in gardens, till 1728, when they were planted in the open fields by a person of the name of Prentice, a day labourer at Kilsyth, who died at Edinburgh in 1792.

The extension of the potato cultivation has been particularly rapid during the last 40 years. The quantity that is now raised in Scotland is supposed to be from 10 to 12 times as great as the quantity raised in it at the end of the American war; and though the increase in England has not been nearly so great as in Scotland, it has been greater than during any previous period of equal duration. The increase on the Continent has been similar. Potatoes are now very largely cultivated in France, Italy, and Germany: and, with the exception of the Irish, the Swiss have become their greatest consumers. They were introduced into India some 70 or 80 years ago; and are now successfully cultivated in Bengal, and have been introduced into the Madras provinces, Java, the Philippines, and China. But the common potato does not thrive within the tropics unless it be raised at an elevation of 3,000 or 4,000 feet above the level of the sea, so that it can never come into very general use in these regions. This, however, is not the case with the sweet potato, which has also been introduced into tropical Asia; and with such success, that it already forms a considerable portion of the food of the people of Java, and some other countries. So rapid an extension of the taste for, and the cultivation of, an exotic, has no parallel in the history of industry; it has had, and will continue to have, the most powerful influence over the condition of mankind. — (For further details with respect to the history of the potato, see *Sir F. M. Eden on the State of the Poor*, vol. i. p. 508.; *Humboldt, Essai sur la Nouvelle Espagne*, iii. 460—465. 2d ed.; *Sir Joseph Banks on the Introduction of the Potato*; *Phillips's History of Cultivated Vegetables*, vol. ii. art. *Potato*.)

2. *Influence of the Cultivation of the Potato on the Number and Condition of the People.* — There is a considerable discrepancy in the statements of the best authors as to the number of individuals that might be supported on an acre of land planted with potatoes, as compared with those that might be supported on an acre sown with wheat; some stating the proportion as high as *six to one*, and others at only *two to one*. According to Mr. Arthur Young, 1 lb. of wheat is about equal in nutritive power to 5 lbs. of potatoes. But Mr. Newenham, who has carefully investigated this subject, states that "3 lbs. of good mealy potatoes are, undoubtedly, more than equivalent to 1 lb. of bread," — (*Newenham on the Population of Ireland*, p. 340.); and his estimate is rather above Mr. Wakefield's. Supposing, however, that 1 lb. of wheat is fully equal to *four* lbs. of potatoes, still the difference in favour of the superior quantity of food derived from a given quantity of land planted with the latter is very great. According to Mr. Young, the average produce of potatoes in Ireland may be taken at 82 barrels the Irish acre; which, at 20 stone the barrel, is equal to 22,960 lbs.; and this being divided by *four*, to bring it to the same standard, in point of nutritive power, as wheat, gives 5,740 lbs. Mr. Young further estimates the average produce of wheat, by the Irish acre, at 4 quarters; which, supposing the quarter to weigh 480 lbs., gives in all 1,920 lbs., or about  $\frac{1}{3}$  part of the solid nourishment afforded by an acre of potatoes. — (*Tour in Ireland*, Appen. pp. 12. 24. &c. 4to ed.) This estimate must, however, be somewhat modified, when applied to Great Britain; the soil of which, while it is better adapted to the growth of wheat, is generally supposed not to be quite so suitable for the potato as that of Ireland. But it notwithstanding admits of demonstration, that even here, "an acre of potatoes will feed double the number of individuals that can be fed from an acre of wheat." — (*General Report of Scotland*, vol. i. p. 571.)

It is clear, therefore, on the most moderate estimate, that the population of a potato-feeding country may become, *other things being about equal*, from 2 to 3 times as dense as it would be, were the inhabitants fed wholly on corn. But it is exceedingly

doubtful whether an increase of population, brought about by the substitution of the potato for wheat, be desirable. Its use as a subordinate or subsidiary species of food is attended with the best effects — producing both an increase of comfort and security; but there are certain circumstances inseparable from it, which would seem to oppose the most formidable obstacles to its advantageous use as a *prime* article of subsistence. The discussion of this subject can hardly be said properly to belong to a work of this sort; but its importance may, perhaps, excuse us for making a few observations with respect to it.

It is admitted on all hands, that the rate of wages is principally determined by the species of food made use of in a country. Now, as potatoes form that species which is produced at the very least expense, it may be fairly presumed, on general grounds, that wages will be reduced to a minimum wherever the labouring classes are mainly dependent on potatoes; and the example of Ireland shows that this conclusion is as consistent with fact as with principle. It is clear, however, that when the crop of potatoes happens to be deficient in a country thus situated, the condition of its inhabitants must be in the last degree unfortunate. During a period of scarcity, men cannot go from a low to a high level: if they would elude its pressure, they must leave the dearer and resort to cheaper species of food. But to those who subsist on potatoes this is not possible; they have already reached the lowest point in the descending scale. Their wages being determined by the price of the least expensive sort of food, they cannot, when it fails, buy that which is dearer; so that it is hardly possible for them to avoid falling a sacrifice to absolute want. The history of Ireland abounds, unfortunately, in examples of this sort. Nothing is more common than to see the price of potatoes in Dublin, Limerick, &c. rise, because of a scarcity, to 5 or 6 times their ordinary price, and the people to be involved in the extreme of suffering; and yet it rarely happens, upon such occasions, that the price of corn is materially affected, or that any less quantity than usual is exported to England.

It may be said, perhaps, that, had potatoes not been introduced, wheat, or barley, or oats would have been the lowest species of food; and that, whenever they happened to fail, the population would have been as destitute as if they had been subsisting on potatoes. It must, however, be observed, that the proportion which the price of wheat, or any species of grain, bears to the price of butcher's meat, tea, beer, &c., is always decidedly greater than the proportion which the price of potatoes bears to these articles: and it therefore follows, that a people who have adopted wheat, or any species of corn, for the principal part of their food, are much better able to make occasional purchases of butcher's meat, &c.; and will, consequently, be more likely to have their habits elevated, so as to consider the consumption of a certain quantity of animal food, &c. as indispensable to existence. And hence it appears reasonable to conclude, that a people who chiefly subsist on corn would, in most cases, subsist partially on butcher's meat, and would enjoy a greater or less quantity of other articles; so that it would be possible for them, in a period of scarcity, to make such retrenchments as would enable them to elude the severity of its pressure.

But, though the population in corn-feeding countries were dependent on the cheapest species of grain, not for a part only, but for the whole, of their food, their situation would, notwithstanding, be less hazardous than that of a population subsisting wholly on potatoes.

In the *first* place, owing to the impossibility, as to all practical purposes at least, of preserving potatoes, the surplus produce of a luxuriant crop cannot be stored up or reserved as a stock to meet any subsequent scarcity. The whole crop must necessarily be exhausted in a single year; so that, when the inhabitants have the misfortune to be overtaken by a scarcity, its pressure cannot be alleviated, as is almost uniformly the case in corn-feeding countries, by bringing the reserves of former harvests to market. Every year is thus left to provide subsistence for itself. When, on the one hand, the crop is luxuriant, the surplus is of comparatively little use, and is wasted unprofitably; and when, on the other hand, it is deficient, famine and disease necessarily prevail.

In the *second* place, the general opinion seems to be, that the variations in the quantities of produce obtained from land planted with potatoes are greater than the variations in the quantities of produce obtained from land on which wheat, or any other species of grain, is raised.

And *lastly*, owing to the great bulk and weight of potatoes, and the difficulty of preserving them on shipboard, the expense of conveying them from one country to another is so very great, that a scarcity can never be materially relieved by importing them from abroad. In consequence, those who chiefly depend on potatoes are practically excluded from participating in the benevolent provision made by nature for equalising the variations in the harvest of particular countries by means of commerce, and are thrown almost wholly on their own resources.

We should, therefore, be warranted in concluding, even though we were not possessed

of any direct evidence on the subject, from the circumstance of the potato being a crop that cannot be kept on hand, from its natural sickleness, and from the incapacity of importing it when deficient, or of exporting it when in excess, that the oscillations in its price must be greater than in the price of wheat; and such, in point of fact, is the case. The oscillation in wheat is thought great when its price is doubled; but in a scarce year the potato is not unfrequently six times as dear as in a plentiful one!—(*Minutes of Evidence taken before the Agricultural Committee of 1831*, p. 212.) And the comparatively frequent recurrence of scarcities in Ireland, and the destitution and misery in which they involve the population, afford but too convincing proofs of the accuracy of what has now been stated.

It is, therefore, of the utmost consequence to the well-being of every people, and to their protection in years of scarcity, that they should not subsist principally on the potato. In this country, the pressure of a scarcity is evaded by resorting to inferior species of food, such as potatoes, and a lower standard of comfort; but if our people were habitually fed on the potato, this would be impracticable. The chances of famine would thus be vastly increased; while, owing to the low value of the potato as compared with most other things, the labourers would have less chance of preserving or acquiring a taste for animal food, or other necessities and luxuries; and, consequently, of changing at any future period their actual condition for a better.

It is not easy to form any very accurate estimate of the profit and loss attending the cultivation of potatoes to the farmer, as compared with other crops. This is a point as to which the statements of those best qualified to give an opinion differ very considerably. Mr. Loudon says, "they require a great deal of manure from the farmer; while, generally speaking, little is returned by them; they are a bulky, unhandy article, troublesome in the lifting and carrying processes, and interfering with the seed season of wheat,—the most important one to the farmer. After all, from particular circumstances, they cannot be vended unless when raised in the vicinity of large towns; hence they are in most respects an unprofitable article to the agriculturist. To him, the real criterion is the profit which potatoes will return in feeding beasts; and here we apprehend the result will be altogether in favour of turnips and rutabaga, as the most profitable articles for that purpose."

It seems difficult to reconcile this statement with the rapid progress of the potato cultivation: but those who assent to what has been previously advanced with respect to the mischievous consequences that arise from the mass of the population becoming dependent on the potato as a principal article of food, will not regret though it should turn out to be accurate.

Dr. Colquhoun estimated the entire value of the potatoes annually consumed in Great Britain and Ireland at the end of the late war at sixteen millions sterling. But it is needless to say that there are no materials by which to form an estimate of this sort with any pretensions to accuracy. The one in question has been suspected, like most of those put forth by the same learned person, of exaggeration: and we incline to think that, had he estimated the value of the yearly produce of potatoes in the empire at twelve millions, he would have been nearer the mark. But on a point of this sort it is not possible to speak with anything like confidence.

**POUND**, the name given to a weight used as a standard to determine the gravity and quantity of bodies.—(See **WEIGHTS AND MEASURES**.)

**POUND**, a money of account, = 20s.

**POWDER, GUN**. See **GUNPOWDER**.

**PRECIOUS METALS**, a designation frequently applied to gold and silver. We have given, under the articles **GOLD**, and **SILVER**, a short account of each metal; and we now propose laying before the reader a few details with respect to their supply and consumption.

To enter fully into this interesting and difficult subject would require a long essay, or rather a large volume. Mr. Jacob published, in 1831, an "Historical Inquiry into the Production and Consumption of the Precious Metals," in which he takes up the subject at the earliest period, and continues it to the above epoch. And, though neither so complete nor satisfactory as might have been expected, this work contains a good deal of valuable information, and deserves the attention of all who take an interest in such inquiries. We confess, however, that several of the learned author's statements and conclusions seem to us to be not a little wide of the mark. We shall notice one or two of them in the course of this article.

1. *Supply of the Precious Metals*.—Since the discovery of America, the far greater part of the supplies of gold and silver have been derived from that continent. Previously to the publication of Humboldt's great work, *Essai Politique sur la Nouvelle Espagne*, several estimates, some of them framed by individuals of great intelligence, were in circulation, of the quantities of gold and silver imported from America. They, however, differed widely from each other, and were all framed from comparatively limited

sources of information.\* But these have been wholly superseded by the more extensive and laborious investigations of Humboldt. This illustrious traveller, besides being acquainted with all that had been written on the subject, and having ready access to official sources of information unknown to the writers already alluded to, was well versed in the theory and practice of mining, and critically examined several of the most celebrated mines. He was, therefore, incomparably better qualified for forming correct conclusions as to the past and present productiveness of the mines, than any of those who had hitherto speculated on the subject. His statements have, indeed, been accused of exaggeration; and we incline to think that there are grounds for believing that this charge is, in some measure, well founded, particularly as respects the accounts of the profits made by mining, and of the extent to which the supplies of the precious metals may be increased. But this criticism applies, if at all, in a very inferior degree, to the accounts Humboldt has given of the total produce of the mines, and the exports to Europe. And making every allowance for the imperfection inseparable from such investigations, it is still true that the statements in question, and the inquiries on which they are founded, are among the most valuable contributions that have been made to statistical science.

According to Humboldt, the supplies of the precious metals derived from America have been as follows:—

	Dollars a Year at an Average.		Dollars a Year at an Average.
From 1492 to 1500 - - -	250,000	From 1600 to 1700 - - -	16,000,000
- 1500 - 1545 - - -	3,000,000	- 1700 - 1750 - - -	22,500,000
- 1545 - 1600 - - -	11,000,000	- 1750 - 1800 - - -	35,300,000

(*Essai sur la Nouvelle Espagne*, iii. 428. 2d ed.)

The following is Humboldt's estimate of the annual produce of the mines of the New World, at the beginning of the present century:—

Annual Produce of the Mines of America at the Commencement of the Nineteenth Century.

Political Divisions.	Gold.		Silver.		Value of the Gold and Silver in Dollars.
	Marcos of Castile.	Kilogs.	Marcos of Castile.	Kilogs.	
Vice-royalty of New Spain - -	7,000	1,609	2,338,220	537,512	23,000,000
Vice-royalty of Peru - - -	3,400	784	611,090	140,475	6,240,000
Captain-generalship of Chili -	12,212	2,907	39,700	6,927	2,060,000
Vice-royalty of Buenos Ayres -	2,300	506	461,830	110,764	4,350,000
Vice-royalty of New Granada -	20,505	4,714	- - -	- - -	2,990,000
Brazil - - - - -	29,900	6,373	- - -	- - -	4,360,000
Total - - - - -	75,317	17,291	3,460,840	798,581	43,500,000

Taking the dollar at 4s., this would give 8,700,000*l.* as the total annual produce of the American mines. Humboldt further estimated the annual produce of the European mines of Hungary, Saxony, &c., and those of Northern Asia, at the same period, at about 1,000,000*l.* more.

The quantity of gold produced in America at the beginning of the century, was to the quantity of silver as 1 to 46; in Europe, the proportions were as 1 to 40. The value of equal quantities of gold and silver were then in the proportion of 15 or 15½ to 1. Latterly, the quantity of gold produced has increased, as compared with the quantity of silver.

From 1800 to 1810, the produce of the American mines was considerably increased; but in the last-mentioned year the contest began, which terminated in the dissolution of the connection between Spain and the South American colonies. The convulsions and insecurity arising out of this struggle; the proscription of the old Spanish families, to whom the mines principally belonged, who repaired, with the wrecks of their fortunes, some to Cuba, some to Spain, and some to Bordeaux and the south of France; caused the abandonment of several of the mines, and an extraordinary falling off in the amount of their produce. There are no means of accurately estimating the precise extent of this decline; but according to Mr. Jacob, who collected and compared all the existing information on the subject, the total average produce of the American mines, inclusive of Brazil, during the 20 years ending with 1829, may be estimated at 4,036,838*l.* a year: being less than ¼ their produce at the beginning of the century!—(*Jacob*, ii. 267.)

Since the publication of Mr. Jacob's work, some farther light has been thrown on the

\* Humboldt has brought these estimates together as follows:—

Authors.	Epochs.	Dollars.	Authors.	Epochs.	Dollars.
Ustariz -	1492-1734	3,536,000,000	Gerboux -	1734-1800	1,600,000,000
Solorzano -	1492-1628	1,800,000,000	The Author of the <i>Recherches sur le Commerce, Amst.</i> 1779.	1492-1775	5,072,000,000
Moncada -	1492-1595	2,000,000,000			
Navarrete -	1519-1817	1,536,000,000			
Raynal -	1492-1790	5,154,000,000			
Robertson -	1492-1775	8,800,000,000			
Necker -	1703-1777	304,900,000	(Essai sur la Nouvelle Espagne, tome III p. 412.)		

subject, principally by the publication of returns transmitted by the British consuls in South America and elsewhere. And notwithstanding the anarchy in which most of the new states in that quarter of the world have been unceasingly involved, the returns in question show that there has been of late years a considerable increase in the produce of the mines. Probably it is all but needless to add, that all investigations into matters of this sort are liable to be affected by so many sources of error, that, even when they are most skilfully and cautiously conducted, their results are not always to be depended on. But these remarks do not apply to the following

Account of the Coinage in Gold and Silver of the Mints of the Mexican Republic in 1840 and 1841. — (*Parl. Paper No. 476. Sess. 1843.*)

Mints.	Gold.		Silver.		Totals.	
	1840.	1841.	1840.	1841.	1840.	1841.
	Dollars.	Dollars.	D. Havs.	Dollars.	Dollars.	Dollars.
Mexico - - -	71,207	97,628	1,917,617	2,151,496	1,988,824	2,249,124
Zacatecas - - -	-	-	4,066,310	4,386,641	4,066,310	4,386,641
Guanaxuato - - -	437,168	440,240	3,459,500	3,296,000	3,896,668	3,736,240
Durango - - -	243,082	155,140	747,907	823,348	990,989	978,488
Chihuahua - - -	-	63,050	172,406	359,000	172,406	422,050
San Luis - - -	-	-	1,137,967	1,110,247	1,137,967	1,110,247
Guadalajara - - -	-	-	881,546	655,015	881,546	655,015
	751,457	756,058	12,383,183	12,781,747	13,134,610	13,537,405

It is well known, however, that a very considerable quantity of gold and silver is raised and exported without being brought to the mints to be coined. Of this no account can be taken, though perhaps we may not be far wrong in estimating it at about 4,000,000 doll., making the entire produce of the Mexican mines about 17,500,000 doll. a year.

Mr. B. H. Wilson, consul for Peru, estimates the produce of the Peruvian mines at about 5,210,000 dollars a year. — (*Parl. Paper No. 476. Sess. 1843, p. 27.*) And he farther supposes that of this sum, about 3,500,000 dollars are exported on English account, and that about 500,000 dollars more are exported on French, German, Spanish, &c. account.

It appears from the consular returns, that the coinage of gold and silver in the Bolivian mints in 1837, and the three preceding years amounted to about 2,300,000 doll. a year; so that, making allowance for the metal raised and not coined, their entire produce can hardly have been under 3,000,000 doll.

The produce of the Chilian mines probably exceeds at this moment the estimate of their produce given by Humboldt. At all events it appears from the statements furnished by the consul, that the exports of silver from the republic amounted in 1841, (taking the marc at 8½ doll.) to 1,191,046 doll.; and those of gold, taking the marc at 144¼ doll., including the amount coined at the mint, to 613,779 doll. And adding to these the quantities retained for home use and clandestinely exported, we shall probably be within the mark in estimating the produce of the Chili mines at about 2,500,000 doll. a year. — (*Parl. Paper No. 476. Sess. 1843, p. 36.*)

We regret there are no returns, on which any dependence can be placed, from any other part of South or Central America. Considerable quantities of gold are produced in New Granada and Panama: but though there are mines of the precious metals in Ecuador, they are not wrought. Perhaps, on the whole, 1,000,000 doll., principally gold, may be annually exported from Colombia and Central America.

The produce of the Brazilian mines and washings has been supposed to amount, of late years, to about 1,500,000 doll. a year; a sum which is not more than adequate to meet the demands of the country.

The mines that formerly belonged to La Plata, or Buenos Ayres, are now principally included in those of Bolivia; but the produce of those that still belong to the former republic continues to be considerable; and may be moderately estimated at 1,200,000 dollars a year. The above results, when brought together, give —

Estimated Produce of the American Mines, in 1840.

	Dollars.		Dollars.
Mexican - - -	17,500,000	Panama - - -	1,000,000
Peruvian - - -	5,210,000	Brasil - - -	1,500,000
Bolivian - - -	3,000,000		
Chilian - - -	2,500,000	Total - - -	20,710,000

We are pretty well satisfied that, speaking generally, these estimates are rather under than over the mark; and that the export of the precious metals from South America and Mexico may, at present (1843), be safely estimated at 28,000,000 doll. or (taking the dollar at 4s.) 5,600,000l. a year.

Besides the sources now mentioned, a good deal of gold has of late years been ob-

tained from washings in Carolina, Georgia, and other parts of the U. States. Since 1835, however, the supply from this source has been diminished, and it is doubtful whether it will ever be very considerable. We subjoin

An Account of the Value of the Gold annually produced in the U. States, and sent to the different Mints of the Union to be coined, since 1828.

	Dollars.		Dollars.
1828	- - - 46,000	1835	- - - 698,500
1829	- - - 140,000	1836	- - - 467,000
1830	- - - 466,000	1837	- - - 383,000
1831	- - - 520,000	1838	- - - 435,000
1832	- - - 678,000	1839	- - - 385,240
1833	- - - 868,000	1840	- - - 426,185
1834	- - - 898,000	1841	- - - 542,117

But, exclusive of the late gradual increase in the produce of the S. American and Mexican mines, there has been an unprecedented increase in the produce of the Russian mines and washings, particularly the latter. This is evident from the following

Account of the Produce in Gold of the Washings in Siberia, carried on upon account of the Crown, and of Individuals, from 1830 to 1842, both inclusive.

	Poods.	Livres.	Zolotniks.		Poods.	Livres.	Zolotniks.
1830	- - - 5	32	59	1838	- - - 193	6	47
1831	- - - 10	18	35	1839	- - - 183	8	16
1832	- - - 21	34	62	1840	- - - 255	27	26
1833	- - - 26	32	53	1841	- - - 358	33	14
1834	- - - 65	18	90	1842	- - - 631	5	21
1835	- - - 93	12	46				
1836	- - - 106	9	41	Total	- 2,093	38	46
1837	- - - 122	29	84				

But in addition to the above quantity of 631 poods obtained from washings in Siberia in 1842, the silver obtained from the mines of Kolyvan yielded, in the course of the same year, 30 poods of gold, while the washings and mines of the Oural mountains yielded no fewer than 310 poods; making the total produce 971 poods; equal to 35,030 lbs. avoirdupois, or 42,571 lbs. Troy, which at 46*l*. 1*4s*. 6*d*. per lb. is equivalent to 1,989,138*l*. 11*s*.—(*Supplement au Journal de l'Interieur* for 1842, p. 16.)

It is necessary, however, to bear in mind that the Russian government imposes a duty, varying, according to circumstances, from 20 to 25 per cent., on the produce of the mines and washings; and there can be no doubt that the temptation to avoid so heavy a duty, and the speculation on the part of the agents for the crown, must give rise to a great deal of smuggling. Perhaps, under such circumstances, we should not be far wrong if we estimated the metal of which no account is taken at  $\frac{1}{4}$ th part of the above; but taking it at only  $\frac{1}{10}$ th part, we have a sum of no less than 2,386,000*l*. for the produce of the Russian gold mines and washings in 1842.

It may be supposed, perhaps, that it would be wrong to take the produce of the Russian washings and mines in 1842 as a fair criterion of their future produce, seeing that the produce of the washings in that year was not far from being twice as great as it had been in any previous year. But it is to be observed, that the produce in question has been progressively and rapidly augmenting during the 13 years ending with 1842; and it is stated in the official journal whence we have borrowed these details, *that selon toute probabilité, et à moins qu'on ne manque d'ouvriers, le chiffre de l'année 1843, offrira de nouveau sur celui de l'année dernière un excédant très considérable.*\*

In addition to this vast quantity of gold, Russia produces a quantity of silver which may, perhaps, be estimated, at an average, at about 1,300 poods a year, worth, at 5*s*. 2*d*. an ounce, 193,440*l*.

We have seen no very recent accounts of the produce of the Saxon, Hungarian, and other European mines on which it would be at all safe to place much reliance. We incline, however, to think that their produce may be safely estimated at about 750,000*l*. a year.

Hence, supposing we are nearly right in these estimates, the total available produce of the American, European, and Russo-Asiatic mines will be, S. American and Mexican, 5,600,000*l*.; U. States, 100,000*l*.; European, 750,000*l*.; Russo-Asiatic, 2,600,000*l*.; making in all, 9,050,000*l*. And therefore, should these estimates be not very wide of the mark, it may be concluded, in opposition to the commonly received opinions on the subject, that the supply of the precious metals is at present but little inferior to what it amounted to when the American mines were most productive.

2. *Consumption of the Precious Metals.*—Gold and silver serve either as coin, or are made use of in the arts. There are no means whatever by which to discover the proportion in which they are applied, at any given period, to these purposes; and the proportion is perpetually varying with the varying circumstances of each country; as, for

\* We have since learned, as this article was going to press, that the produce of the Russian gold mines and washings in 1843 amounted to no less than 1,342 poods! being equivalent, adding  $\frac{1}{10}$ th of the quantity not brought to account, to 2,398,962*l*. 11*s*. 1*d*. sterling; an increase which is altogether extraordinary, and will have the most powerful influence.

example, with the greater or less abundance of paper money, and the degree in which the use of coins is saved by the various devices resorted to by means of banking and otherwise for economising currency, the greater or less wealth of the inhabitants, the fashion as to plate, the feeling of security at the moment, and a thousand other circumstances, — all of which are liable to great and sometimes sudden changes.

According to Mr. Jacob, the value of the precious metals annually applied to ornamental and luxurious purposes in Europe, may be estimated as follows: viz. Great Britain, 2,457,921; France, 1,200,000; Switzerland, 350,000; remainder of Europe, 1,605,494; making in all, 5,613,711. And adding to this the sums directly applied to the same purposes in America, the whole will be about 5,900,000.

The data upon which this estimate has been founded, were necessarily vague and unsatisfactory. It can hardly, indeed, be looked upon as any thing better than a mere guess, and, as such, we do not know that it was a very happy one. Chabrol (whose researches are far more worthy of confidence than those of Chaptal, to which Jacob refers) estimated the consumption of gold and silver in the arts in Paris at 14,552,000 francs a year — (*Récherches Statistiques sur la Ville de Paris*, 1823, Tab. No. 85.); which corresponds with the elaborate estimate of Benoiston de Châteauneuf — (*Récherches sur les Consommations de Paris en 1817*, 2de partie, p. 78.). Both these authorities agree that the consumption of the precious metals in the arts in Paris is double that of the rest of France; so that we have 21,828,000 francs, or 866,190*l.* for the consumption of the whole kingdom; and allowing for the increase in the interim, the consumption may now be taken at 1,000,000*l.*

Probably, at the time when Jacob's work was printed, his estimate of the consumption of the precious metals in the U. Kingdom might not have been very far from the mark; but during the last dozen years there has been a greatly increased expenditure on the gilding of houses and furniture, as well as on plate, jewellery, and hardware, harness, bookbinding, &c.; so that, making allowance for this increase, we are not disposed to estimate the present consumption of the U. Kingdom at less than 2,500,000*l.* a year.

The manufacture of gold and silver watches, jewellery, &c. is carried on in Switzerland upon a very large scale; so much so that, notwithstanding its poverty, the consumption of bullion in it may be fairly estimated at 450,000*l.* or 500,000*l.* a year.

There are no means by which to form anything like a correct estimate of the consumption of the other European countries; but, considering the rapid progress of population, wealth, and refinement in Russia, Prussia, Germany, &c., Mr. Jacob's estimate for these countries may now, perhaps, be safely adopted, or even increased.

Mr. Jacob estimated the consumption of the precious metals in the U. States and Canada at 300,000*l.* a year; but their wealth and population have more than doubled in the interval, and we shall certainly be within the mark in estimating their consumption at 500,000*l.* a year.

According to this view of the matter, the present annual consumption of the precious metals in the arts will be — the U. Kingdom, 2,500,000*l.*; France, 1,000,000*l.*; Switzerland, 450,000*l.*; the rest of Europe 1,600,000*l.*; in all, 5,550,000*l.* To which adding 500,000*l.* for the consumption of N. America, the total consumption will be 6,050,000*l.*

Those who are inclined to defer to the authority of Humboldt may, perhaps, be disposed to regard this estimate as exaggerated. In the 2d ed. (iii. 464.) of his *Nouvelle Espagne*, he estimated the total consumption of the precious metals in Europe, for other purposes than those of coin, at only 87,182,800 fr., equal, at the exchange of 25*·*20, to 3,459,714*l.* But we incline to think that it would not be difficult to show that this estimate was at the time considerably below the mark; and, independently of this, it was made a dozen years ago, and there has been a very great increase of population and wealth in the interval, and a proportionally great increase in the consumption of gold and silver.

It is material to observe that a portion of the gold and silver annually made use of in the arts is derived from the fusion of old plate, the burning of lace, picture frames, &c. Here, however, we have to lament the impossibility of ascertaining the proportion the supply from this source bears to the total quantity wrought up. Jacob estimates it at only  $\frac{1}{10}$ th part, or 2½ per cent.; but so small a sum seems to be quite out of the question. Most part of the precious metals employed in plating, gilding, &c. is destroyed; but the quantity of metal so made use of is admitted by every one to be decidedly less than the quantity used in the manufacture of plate, watch-cases, and other articles of that description. And these, when they either become unfashionable, or are broken or injured, are, for the most part, sent to the melting pot. According to the statement of Necker, quoted and sanctioned by Humboldt, a half of the gold and silver used in France by goldsmiths and others in the arts, is supposed to be obtained from the fusion of old plate, &c. — (*Nouvelle Espagne*, tome iii. p. 467.)

But, notwithstanding the high authority by which this estimate is supported, we believe that it is quite as much above the mark as Jacob's is certainly below it.

Assuming, therefore, that, at a medium, 20 per cent. or  $\frac{1}{5}$ th part of the precious metals annually made use of in the arts is obtained from the fusion of old plate, we shall have, by deducting this proportion from the 6,050,000*l.* applied to the arts in Europe and America, 4,840,000*l.* as the total annual appropriation of the new gold and silver dug from the mines to such purposes, leaving about 4,200,000*l.* a year to be manufactured into coin, and exported to India, Australia, &c.

It is not much more easy to determine the consumption of the precious metals when manufactured into coin, than when in plate. Jacob has entered into some curious details (vol. ii. c. 28.) to determine the abrasion or loss of coins from wear, which he estimates at  $\frac{1}{100}$ th part a year for gold, and  $\frac{1}{200}$ th part for silver coins. This, however, does not give the total wear and tear of the coins. To determine the latter, the quantities lost by fire, shipwrecks, and other accidents must be taken into account. The loss from these sources can only be guessed at; but adding it to the loss by abrasion, perhaps we shall not be far wrong in estimating the whole at 1 per cent. And if we estimate the value of the entire metallic currency of Europe and the U. States at 160 millions sterling, 1,600,000*l.* a year will, on this hypothesis, be required to maintain it at its present level.

It is singular that, in estimating the consumption of gold and silver, Jacob should not have made the slightest allusion to the practice which has uniformly prevailed in all countries harassed by intestine commotions, or exposed to foreign invasion, of burying treasure in the earth. Of the hoards so deposited, a very considerable proportion has been altogether lost; and there can be no doubt that this has been one of the principal means by which the stock of the precious metals has been kept down to its present level. Every one is aware that, during the middle ages, *treasure trove*, or money dug from the ground by chance finders, belonged to the Crown, and formed no inconsiderable part of the royal revenue of this and other countries. The practice has always prevailed to a very great extent in the East. — (*Bernier, Voyage de Mogol*, Amst. 1710, tome i. p. 209.; *Scrafton on the Government of Hindostan*, p. 16, &c.) But it is not confined to that quarter. Wherever property is insecure, it is invariably resorted to. Mr. Wakefield tells us that it used to be common in Ireland. (*Account of Ireland*, vol. i. p. 593.); and we believe it is still pretty prevalent in that country. It has always been acted on to a considerable extent in Russia and France; and in the latter, during the revolutionary anarchy, immense sums were buried, of which it is abundantly certain a large proportion will never be resuscitated. The wars and convulsions by which Europe was desolated for more than 20 years extended the practice to all parts of the Continent; withdrawing, in this way, from circulation a very considerable part of the increased produce of the mines. — (*Storch, Economie Politique*, tome i. p. 221. Paris, 1823.) And no doubt considerable sums are still disposed of in this way.

3. *Exportation of the Precious Metals to the East.* — It must be well known to all our readers, that from the remotest æra down to a comparatively late period bullion formed one of the principal and most advantageous articles of export to the East. Humboldt estimated that, of the entire produce of the American mines at the beginning of this century, amounting, as already seen, to 43,500,000 dollars, no less than 25,500,000 were sent to Asia, 17,500,000 by the Cape of Good Hope, 4,000,000 by the Levant, and 4,000,000 through the Russian frontier. — (*Nouvelle Espagne*, iii. 443.) Latterly, however, this immense drain has been very much diminished, and in 1832 and 1833 it actually began to set in an opposite direction. — (See *antè*, p. 206. for an account of the exports and imports of bullion from and into India from 1814–15 to 1839–40.) In so far, however, as respects India, the drain has since recovered its old direction; the excess of the imports of bullion into that country over the exports having amounted during the 3 years ending with 1839–40 to above 2,000,000*l.* a year. — (See *ubi supra*.)

We believe, however, that the great import of bullion into India has been a good deal influenced by the peculiar state of the Indian trade, and that the probability is that it will decline. — (See *ubi supra*.) There has latterly, also, been a very considerable increase in the exportation of bullion from China. We do not now allude to the remittances on account of the payments stipulated in the late treaty, but to the shipments of bullion that were previously made in the ordinary course of trade. These amounted, in 1838, after deducting the imports, to 8,223,341 dollars, or 1,644,668*l.*, partly shipped for Europe, but principally for India. — (See *antè*, p. 235.) A considerable part of this large export consists of native silver, of which there are mines in several provinces. China has also mines of gold; and in some late years her exports of that metal have been rather extensive; she is, however, an importer as well as an exporter of gold, having for a lengthened period drawn considerable supplies of that metal from Borneo, Celebes, and the Malay peninsula. A few years ago, the efflux of bullion from Russia to China, by way of Kiachta, which had continued for a lengthened period, wholly ceased. — (*Jacob*, ii. 320.) But since bullion began to increase so

rapidly in Russia, it is most probable that it is again exported by this route. Indeed, the Russian official accounts of the trade of the empire for 1841 (TABLE XI. p. 51.) admit that the value of the imports from, exceeds the value of the exports to, China.

4. *Influence of the Productiveness of the Mines on Prices.*—It has been customary in this country to ascribe almost the whole fall that has taken place in the price of most commodities since the peace, to the diminished supply of bullion from the mines, which existed down to a recent period. But we doubt whether this circumstance was not fully counterbalanced by others, and whether it had any influence in the way now mentioned. The great diminution of the drain to the East, even admitting that Humboldt over-rated its amount, would of itself have gone far to countervail the decreased productiveness of the mines; and in addition to this, the greater security and tranquillity enjoyed on the Continent since the peace, has not only checked that burying of money, formerly so prevalent, but has caused the bringing to light of a good many of the subterranean hoards. The institution of savings banks, now so common every where, has also, no doubt, tended to prevent hoarding, and to bring a good deal of coin into circulation, that would otherwise be locked up. These circumstances, coupled with others that might be mentioned, such as the cessation of the demand for military chests, the greater employment of bills in mercantile transactions, &c., afford good grounds for doubting whether the quantity of the precious metals applicable to the purposes of circulation was not about as great in 1825 and 1830 as in 1809 or 1810, when the American mines were at the acmé of their productiveness. No doubt, however, had the produce of the mines continued stationary at their reduced rate, there could hardly have failed to be, in the end, a material rise in the value of bullion. But instead of continuing stationary, or falling off, there has latterly been a very rapid increase in the produce of the mines; and there is no longer any ground for apprehending a rise in the value of the precious metals, but the reverse. The augmentation, as we have seen, has been principally in gold; and should its production continue to increase for a few years more, in any thing like the ratio it has done during the last half dozen years, its value will necessarily sink; and were it to sink to any considerable extent, the circumstance would exercise a powerful and, we believe, a salutary influence over the condition of this and such other countries as have adopted gold for the standard of their currency. These, however, are prospective and contingent results which may never be realised, and on which it would be wrong to lay any considerable stress.

We believe that the increase in the supply of bullion has continued for too short a time, and been too limited, to have hitherto had any sensible influence over prices; but, however this may be, we have no hesitation in affirming that there is not, without any exception whatever, a single commodity that has fallen in price since 1814, the fall of which may not be satisfactorily accounted for without reference to the diminished supply of bullion from 1810 to 1837. — (See *antè*, p. 80.) Multiplied proofs of what is now stated will be found in various articles throughout this work. And we have little doubt that those who investigate this matter with any degree of care, will agree with us in thinking, that were the influence of the former decreased productiveness of the mines on prices estimated at from 3 to 5 per cent., it would be very decidedly beyond the mark. Its influence was, in fact, hardly perceptible.

5. *Probable future Supply of Gold and Silver.*—Little can be added under this head, to what has previously been stated. On the whole, however, we should think that there are not merely probable but good grounds on which to anticipate a large future increase of the annual produce of the mines and washings in most parts of the world. The late increase of the latter in Russia has been quite extraordinary; and if it should go on for any considerable period, it would have a powerful influence over the value of gold, and would not only sink it as compared with silver, but as compared with all other things not produced with the same increased facilities. It is reasonable, also, to suppose that the produce of the South American mines should be gradually increased. The anarchy which has so long disgraced and desolated the country cannot continue for ever; and means have lately been taken for reducing the price of quicksilver, the high cost of which has latterly contributed more, perhaps, than any thing else to paralyse the efforts of the miners.

#### PREMIUM See INSURANCE.

PRICES. By the price of a commodity is meant its value estimated in money, or, simply, the quantity of money for which it will exchange. The price of a commodity rises when it fetches more, and falls when it fetches less money.

1. *Price of freely produced Commodities.*—The exchangeable value of commodities—that is, their power of exchanging for or buying other commodities—depends, at any given period, partly on the comparative facility of their production, and partly on the relation of the supply and demand. If any 2 or more commodities respectively required the same outlay of capital and labour to bring them to market, and if the supply of each were adjusted exactly according to the effectual demand—that is, were they all in

sufficient abundance, and no more, to supply the wants of those able and willing to pay the outlay upon them, and the ordinary rate of profit at the time—they would each fetch the same price, or exchange for the same quantity of any other commodity. But if any single commodity should happen to require less or more capital and labour for its production, while the quantity required to produce the others continued stationary, its value, as compared with them, would, in the first case, fall, and in the second, rise; and, supposing the cost of its production not to vary, its value might be increased by a falling off in the supply, or by an increase of demand, and conversely.

But it is of importance to bear in mind that all variations of price arising from any disproportion in the supply and demand of such commodities as may be *freely produced in indefinite quantities*, are *temporary* only; while those that are occasioned by changes in the cost of their production are *permanent*, at least as much so as the cause in which they originate. A general mourning occasions a transient rise in the price of black cloth: but supposing that the fashion of wearing black were to continue, its price would not permanently vary; for those who previously manufactured blue and brown cloths, &c., would henceforth manufacture only black cloth; and the supply being in this way increased to the same extent as the demand, the price would settle at its old level. Hence the importance of distinguishing between a variation of price originating in a change of fashion or other accidental circumstance—such, for example, as a deficient harvest—and a variation occasioned by some change in the cost of production. In the former case, prices will, at no distant period, revert to their old level; in the latter, the variation will be lasting.

When the *price* of a freely produced commodity rises or falls, such variation may evidently be occasioned either by something affecting its value, or by something affecting the value of money. But when the generality of commodities rise or fall, the fair presumption is that the change is not in them, but in the money with which they are compared. This conclusion does not, however, apply in all cases; and we believe that most part of that fall in the price of commodities, which has taken place since the peace, and which has been so generally ascribed to a rise in the value of money, occasioned by a decline in the productiveness of the mines, has been caused by the increased productiveness of industry, arising from the abolition of oppressive restraints on commerce, the opening of new and more abundant sources of supply, and the discovery of new means and improved methods of production. — (See *PRECIOUS METALS*.)

2. *Price of monopolised Commodities.*—Exclusive, however, of the commodities now alluded to, there is a considerable class, whose producers or holders enjoy either an *absolute* or a *partial* monopoly of the supply. When such is the case, prices depend entirely or principally on the proportion between the supply and demand, and are not liable to be influenced, or only in a secondary degree, by changes in the cost of production. Antique statues and gems; the pictures of the great masters; wines of a peculiar flavour, produced in small quantities, in particular situations; and a few other articles; exist under what may be called absolute monopolies;—their supply cannot be increased; and their price must, therefore, depend entirely on the competition of those who may wish to buy them, without being in the slightest degree influenced by the cost of their production.

Monopolies are sometimes established by law; as when the power to supply the market with a particular article is made over to one individual or society of individuals, without any limitation of the price at which it may be sold; which, of course, enables those possessed of the monopoly to exact the highest price for it that the competition of the buyers will afford, though such price may exceed the cost of production in any conceivable degree. Monopolies of this sort used to be common in England, particularly in the reign of Elizabeth: but they were finally abolished by the famous act of the 21 Jac. 1. c. 3.—an act which, by establishing the freedom of competition in all businesses carried on at home, has been productive of the greatest advantage. — (See *MONOPOLY*.)

The corn laws establish a partial monopoly of the supply of Great Britain with corn in favour of the agriculturists; but, as competition is carried to as great an extent in agriculture as in any other business, this monopoly does not enable them to obtain a higher price for their produce than is sufficient to pay the expenses of its production, though, owing to the peculiar circumstances under which this country is placed, this price is higher than the price in the surrounding countries. Hence it results that the monopoly is injurious to the public, without being of any advantage to those engaged in the business of agriculture. Neither, indeed, can it be truly said to be advantageous to the landlords. — (See *anté*, p. 404.)

The rights conveyed by patents sometimes establish a valuable monopoly; for they enable the inventors of improved methods of production to maintain, during the continuance of the patent, the price of the article at a level which may be much higher than is required to afford them the ordinary rate of profit. This advantage, however, by stimulating invention, and exciting to new discoveries, of which it is the natural and appropriate reward, instead of being injurious, is beneficial to the public. — (See *PATENTS*.)

There are also partial monopolies, depending upon situation, connection, fashion, &c. These, and other inappreciable circumstances, sometimes occasion a difference of 30 per cent. or more in the price of the same article in shops not very distant from each other.

Generally speaking, the supply of monopolised commodities is less liable to vary than the supply of those which are freely produced; and their prices are commonly more steady. But there are various exceptions to this rule, and of these the corn monopoly is one. The great variations in the harvests of particular countries, and their average equality throughout the world, exposes a nation which shuts foreign corn out of its ports to destructive vicissitudes of price, from which it would enjoy a comparative exemption were the ports open. — (See *anté*, p. 401.) Sometimes the expiration of a monopoly—a patent, for example—has occasioned a sudden and extraordinary increase of supply, and consequent fall of price; entailing, of course, a serious loss on the holders of large stocks of goods produced under the monopoly.

3. *New Sources of Supply.*—The effects on prices produced by the opening of new markets, or new sources of supply, are familiar to every one. The fall that has taken place in the price of pepper, and of most sorts of commodities brought from the East, since the opening of the trade in 1814, is a conspicuous proof of what is now stated.

4. *Influence of War on Prices.*—The effect of war in obstructing the ordinary channels of commercial intercourse, and occasioning extreme fluctuations in the supply and price of commodities, is well known. In this respect, however, the latter part of the late war is, perhaps, entitled to a pre-eminence. We had then to deal with an enemy who had extended his sway over most part of the Continent; and who endeavoured, by every means in his power, to shut us out of the Continental markets. Mr. Tooke has given, in his elaborate and valuable work on *High and Low Prices*, a variety of details which strikingly illustrate the effect that the regulations then adopted by the belligerent powers had on prices. “Among the means,” says Mr. Tooke, “devised by the ingenuity and enterprise of adventurers to elude or overcome the obstacles presented by the decrees of the enemy, one in particular, which was resorted to on an extensive scale, deserves mention, as illustrating in a striking manner the degree in which those obstacles were calculated to increase the cost to the consumer. Several vessels laden with sugar, coffee, tobacco, cotton twist, and other valuable commodities, were despatched from England, at very high rates of freight and insurance, to Salonica, where the goods were landed, and thence conveyed on mules and horses through Servia and Hungary to Vienna, for the purpose of being distributed over Germany, and, possibly, into France. Thus it might happen that the inhabitants of that part of the Continent most contiguous to this country could not receive their supplies from us, without an expense of conveyance equivalent to what it would be, if they were removed to the distance of a sea voyage twice round the globe, but not subject to fiscal and political regulations.” And in consequence of these, and other causes of the same sort, Mr. Tooke mentions that the price of sugar in France, and other parts of the Continent, during the latter years of the war, was as high as 5s. and 6s. a pound; that coffee rose to 7s., indigo to 18s., and so on.

But the sums charged for freight and insurance were the most extraordinary. Mr. Tooke states, that he has known instances in which the licence, freight, and other charges on account of a vessel of about 100 tons burden, making a voyage from Calais to London and back, have amounted to the almost incredible sum of 50,000*l.*! A ship, of which the whole cost and outfit did not amount to 4,000*l.*, earned during the latter period of the war, a gross freight of 80,000*l.* on a voyage from Bordeaux to London and back! The freight of indigo from London to the Continent does not at present exceed 1*d.* a pound; whereas it amounted, at the period referred to, to about 4s. 6*d.* — (*High and Low Prices*, 2*d* ed. p. 212.)

5. *Influence of Taxes on Prices.*—It is unnecessary to dilate on a topic so familiar to every one. When a tax is laid on a commodity, its price necessarily rises in a corresponding proportion; for otherwise the producers would not obtain the ordinary rate of profit, and would, of course, withdraw from the business. The rise in the price of several of the articles in the annexed table is principally to be ascribed to the increase of taxation.

These statements will probably suffice to give our readers a general idea of the principles which determine the value of commodities. To go deeper into the subject would involve us in discussions that belong to political economy, and are among the most intricate in that science. The influence of speculation on prices must not, however, be passed over in a work of this sort.

6. *Influence of Speculation on Prices.*—It very rarely happens that either the actual supply of any species of produce in extensive demand, or the intensity of that demand, can be exactly measured. Every transaction in which an individual buys produce in order to sell it again, is, in fact, a speculation. The buyer anticipates that the demand for the article he has purchased will be such, at some future period, either more or less

distant, that he will be able to dispose of it with a profit; and the success of the speculation depends, it is evident, on the skill with which he has estimated the circumstances that must determine the future price of the commodity. It follows, therefore, that in all highly commercial countries, where merchants are possessed of large capitals, and where they are left to be guided in the use of them by their own discretion and foresight, the prices of commodities will frequently be very much influenced, not merely by the actual occurrence of changes in the accustomed relation of the supply and demand, but by the anticipation of such changes. It is the business of the merchant to acquaint himself with every circumstance affecting the particular description of commodities in which he deals. He endeavours to obtain, by means of an extensive correspondence, the earliest and most authentic information with respect to every thing that may affect their supply or demand, or the cost of their production; and if he learned that the supply of an article had failed, or that, owing to changes of fashion, or to the opening of new channels of commerce, the demand for it had been increased, he would most likely be disposed to become a buyer, in anticipation of profiting by the rise of price, which, under the circumstances of the case, could hardly fail of taking place; or, if he were a holder of the article, he would refuse to part with it, unless for a higher price than he would previously have accepted. If the intelligence received by the merchant had been of a contrary description, — if, for example, he had learned that the article was now produced with greater facility, or that there was a falling off in the demand for it, caused by a change of fashion, or by the shutting up of some of the markets to which it had previously been admitted, — he would have acted differently: in this case he would have anticipated a fall of prices, and would either have declined purchasing the article, except at a reduced rate, or have endeavoured to get rid of it, supposing him to be a holder, by offering it at a lower price. In consequence of these operations, the prices of commodities, in different places and periods, are brought comparatively near to equality. All abrupt transitions, from scarcity to abundance, and from abundance to scarcity, are avoided; an excess in one case is made to balance a deficiency in another, and the supply is distributed with a degree of steadiness and regularity that could hardly have been deemed attainable.

It is obvious, from what has now been stated, that those who indiscriminately condemn all sorts of speculative engagements, have never reflected on the circumstances incident to the prosecution of every undertaking. In truth and reality, they are all speculations. Their undertakers must look forward to periods more or less distant; and their success depends entirely on the sagacity with which they have estimated the probability of certain events occurring, and the influence which they have ascribed to them. Speculation is, therefore, really only another name for foresight; and though fortunes have sometimes been made by a lucky hit, the character of a successful speculator is, in the vast majority of instances, due to him only who has skillfully devised the means of effecting the end he had in view, and who has outstripped his competitors in the judgment with which he has looked into futurity, and appreciated the operation of causes producing distant effects. Even in the securest businesses, such as agriculture and manufactures, there is, and must be, a great deal of speculation. An unlooked for change of season frequently disappoints the apparently reasonable expectations of those who undertake the former; while the equally capricious variations of fashion have to be encountered by those engaged in the latter; and each is, besides, liable to be affected by legislative enactments, by new discoveries in the arts, and by an endless variety of circumstances which it is always very difficult, and sometimes quite impossible, to foresee. On the whole, indeed, the gains of the undertakers are so adjusted, that those who carry them on obtain, at an average, the common and ordinary rate of profit. But the inequality in the gains of individuals is most commonly very great: and while the superior tact, industry, or good fortune of some enable them to realise large fortunes; the want of discernment the less vigilant attention, or the bad fortune of others, frequently reduces them from the situation of capitalists to that of labourers.

The great cotton speculation of 1825 took its rise partly and chiefly from a supposed deficiency in the supply of cotton, partly from an idea that there was a greatly increased demand for raw cotton in this country and the Continent, and partly from a belief that the stocks on hand were unusually low. Now it is obvious that the success of those who embarked in this speculation depended entirely on two circumstances; viz. *first*, that they were right in the fundamental supposition on which the whole speculation rested, that the supply of cotton was no longer commensurate with the demand; and *second*, that their competition did not raise the price so high as to diminish the consumption by the manufacturers in too great a degree to enable them to take off the quantity to be actually brought to market. If the merchants had been well founded in their suppositions, and if their competition had not raised the price of cotton too high, the speculation would certainly have been successful. But, instead of being well founded, the hypothesis on which the whole thing rested was perfectly visionary. There was no deficiency in the supply of cotton, but, on the contrary, a great super-

None supplied since 1888.

as stated in the account. It is also necessary to remark, that the blue cloth now used for the Pensioners' coats is of a quality of 10 per cent.; and in the case of bricklayers', masons', and plumbers' wages, to a deduction of 7½ per cent.

abundance ; and though there had been such a deficiency, the excess to which the price was carried must have checked consumption so much as to occasion a serious decline. The falling off in the imports of cotton from America, in 1824, seems to have been the source of the delusion. It was supposed that this falling off was not accidental, but that it was a consequence of the price of cotton having been for a series of years so low as to be inadequate to defray the expenses of its cultivation. The result showed that this calculation was most erroneous. And besides, in entering on the speculation, no attention was paid to Egypt and Italy, — countries from which only about 1,400,000 lbs. of cotton were obtained in 1824, but from which no less than 23,800,000 lbs. were obtained in 1825! This unlooked-for importation was of itself almost enough to overturn the combination of the speculators; and, coupled with the increased importation from America and other countries, actually occasioned a heavy glut of the market.

The risk to which merchants are exposed, when they either sell off any commodity at a reduced price in anticipation of a fall, or buy at an advanced price in anticipation of a future rise, is a consequence principally of the extreme difficulty of ascertaining the true state of the fact with respect to the grounds on which an abundant or a deficient supply, or an increasing or decreasing demand, may be expected. Rules can here be of no service; every thing depends upon the talent, tact, and knowledge of the party. The questions to be solved are all practical ones, varying in every case from each other; the skill of the merchant being evinced by the mode in which he conducts his business under such circumstances, or by his sagacity in discovering coming events, and appreciating their character and the extent of their influence. Priority, but, above all, accuracy of intelligence, is, in such cases, of the utmost consequence. Without well authenticated data to go upon, every step taken may only lead to error. The instances, indeed, in which speculations, apparently contrived with the greatest judgment, have ended in bankruptcy and ruin, from a deficiency in this essential requisite, are so very numerous, that every one must be acquainted with them. Hence the importance of selecting acute and cautious correspondents; and hence, also, the necessity of maturely weighing their reports, and of endeavouring, by the aid of information gleaned from every authentic accessible source, to ascertain how far they may be depended upon.

When a few leading merchants purchase in anticipation of an advance, or sell in anticipation of a fall, the speculation is often pushed beyond all reasonable limits, by the operations of those who are influenced by imitation only, and who have never, perhaps, reflected for a moment on the grounds on which a variation of price is anticipated. In speculation, as in most other things, one individual derives confidence from another. Such a one purchases or sells, not because he has any really accurate information as to the state of the demand and supply, but because some one else has done so before him. The original impulse is thus rapidly extended; and even those who are satisfied that a speculation, in anticipation of a rise of prices, is unsafe, and that there will be a recoil, not unfrequently adventure, in the expectation that they will be able to withdraw before the recoil has begun.

It may, we believe, speaking generally, be laid down as a sound practical rule, to avoid having any thing to do with a speculation in which many have already engaged. The competition of the speculators seldom fails speedily to render an adventure that might have been originally safe, extremely hazardous. If a commodity happen to be at an unusually reduced price in any particular market, it will rise the moment that different buyers appear in the field; and supposing, on the other hand, that it is fetching an unusually high price, it will fall, perhaps far below the cost of production, as soon as supplies begin to be poured in by different merchants. Whatever, therefore, may be the success of those who originate a speculation, those who enter into it at an advanced period are almost sure to lose. To have been preceded by others ought not, in such matters, to inspire confidence; on the contrary, it ought, unless there be something special in the case, to induce every considerate person to decline interfering with it.

The maintenance of the freedom of intercourse between different countries, and the more general diffusion of sound instruction, seem to be the only means by which those miscalculations, that are often productive of great national as well as private loss, can be either obviated or mitigated. The effects consequent to such improvident speculations being always far more injurious to the parties engaged in them than to any other class, the presumption is that they will diminish, both in frequency and force, according as the true principles of commerce come to be better understood. But, whatever inconvenience may occasionally flow from them, it is abundantly plain, that instead of being lessened, it would be very much increased, were any restraints imposed on the freedom of adventure. When the attention of many individuals is directed to the same line of speculation; when they prosecute it as a business, and are responsible in their

own private fortunes for any errors they may commit ; they acquire a knowledge of the various circumstances influencing prices, and give by their combinations a steadiness to them, which it is easy to see could not be attained by any other means. It is material, too, to bear in mind, as was previously stated, that many, perhaps it might be said most, of those who press so eagerly into the market, when any new channel of commerce is opened, or when any considerable rise of price is anticipated, are not merchants, but persons engaged in other businesses, or living, perhaps, on fixed incomes, who speculate in the hope of suddenly increasing their fortune. This tendency to gambling seldom fails to break out upon such occasions ; but, fortunately, these are only of comparatively rare occurrence ; and in the ordinary course of affairs, mercantile speculations are left to be conducted by those who are familiar with business, and who, in exerting themselves to equalise the variations of price caused by variations of climate and of seasons, and to distribute the supply of produce proportionally to the effective demand, and with so much providence that it may not at any time be wholly exhausted, perform functions that are in the highest degree important and beneficial. They are, it is true, actuated only by a desire to advance their own interests ; but the results of their operations are not less advantageous than those of the agriculturist who gives greater fertility to the soil, or of the mechanist who invents new and more powerful machines.

7. *Tables of Prices.* — It is superfluous, perhaps, to observe, that the precious metals are liable to all the variations of value already alluded to. Not only, therefore, are prices, as was already remarked, affected by variations in the cost and supply of commodities, but they are also affected by changes in the cost and supply of gold and silver, whether arising from the exhaustion of old, or the discovery of new mines, improvements in the art of mining, changes of fashion, &c. Hence it is, that Tables of the prices of commodities extending for a considerable period, communicate far less solid information than is generally supposed, and, unless the necessary allowances be made, may lead to the most unfounded conclusions. The cost or real value of any commodity depends on the quantity of labour required for its production ; but supposing that we were to set about inferring this cost, or the ultimate sacrifice required to obtain the commodity, from its price, it might happen (had the quantity of labour required for its production declined, but in a less degree than the quantity required to produce gold and silver) that its value would appear to rise, when it had really been diminished. When, however, the rate of wages, as well as the price of commodities, is given upon authentic data, a Table of prices is valuable, inasmuch as it shows the extent of the command over the necessities and conveniences of life enjoyed by the bulk of the community during the period through which it extends. The foregoing Table (pp.1012, 1013.) of the prices of various commodities, and of the wages paid to different descriptions of tradesmen, at Greenwich Hospital, for the last 100 years, is the most complete of the sort that has been published ; and is one of the few that are founded upon data the accuracy of which cannot be questioned. Unfortunately, it applies only to a small part of the country. But many important conclusions may, notwithstanding, be deduced from it. The reader will find, under the more important articles described in this work, pretty ample accounts of their prices. Sometimes, as in the case of corn, these accounts go back to a very distant period.

Those desirous of detailed information as to the prices of commodities in Great Britain, in remoter ages, may consult the elaborate Tables in the 3d volume of Sir F. M. Eden's work on the *Poor* ; and the 4th volume of *Macpherson's Annals of Commerce*. *Arbutnot's Tables of Ancient Coins, Weights, Measures, Prices, &c.* are well known ; but the statements are not much to be depended upon. *The Traité de Métrologie* of M. Pauton, 4to, Paris, 1780, is the best work on this curious and difficult subject.

**PRICE CURRENT** ; a list or enumeration of the various articles of merchandise, with their prices, the duties (if any) payable thereon when imported or exported, with the drawbacks occasionally allowed upon their exportation, &c. Lists of this description are published periodically, generally once or twice a week, in most great commercial cities and towns. — (For examples, see the articles *GENOA*, *HAVRE*, *TRIESTE*, &c. in this work.)

**PRIMAGE**, is a certain allowance paid by the shipper or consignee of goods to the mariners and master of a vessel for loading the same. In some places it is 1d. in the pound ; in others 6d. for every pack or bale ; or otherwise, according to the custom of the place.

**PRINTS**, impressions on paper, or some other substance, of engravings on copper, steel, wood, stone, &c., representing some particular subject or composition.

Prints, like paintings, embrace every variety of subject ; and differ very widely in the manner in which they are engraved. Their prices vary according to the style of the engraving, the fineness of its execution, the goodness of the impression, its rarity, &c. The art seems to have taken its rise in the 15th century. But, as a dissertation on one of the most beautiful of the fine arts would be singularly out of place in a work of this

sort, we have introduced it for the purpose merely of stating the law with respect to the copyright of prints.

This is laid down in the acts 8 Geo. 2. c. 13., 7 Geo. 3. c. 38., and 17 Geo. 3. c. 57. By these acts, the copyright of all sorts of prints, including maps and charts, is secured to the engraver, or author, for *twenty-eight years*. The last-mentioned act declares that every individual who shall, within the said 28 years, engrave, etch, or work, or in any other manner copy, in the whole or in part, by varying, adding to, or diminishing from the main design; or shall print, reprint, or import for sale, or shall publish, sell, or otherwise dispose of any copy of any print whatever, which has been or shall be engraved, etched, drawn, or designed in Great Britain, without the express consent of the proprietor thereof first obtained in writing, signed by him with his own hand, in the presence of, and attested by, two or more credible witnesses, then every such proprietor may, by a special action upon the case to be brought against the person so offending, recover such damages as a jury, on the trial of such action, or on the execution of a writ of inquiry thereon, shall give or assess, together with double costs of suit.

In questions as to the piracy of prints, the courts proceed upon the same principles that are followed in those with respect to the piracy of books. — (See Books; see also Mr. Goddard's excellent work on the *Law of Patents and Copyrights*, pp. 297–301.)

*Regulations as to Importation.* — Where prints or maps are contained in and form part of a book, and serve merely to explain or illustrate the subject of such book, they are to be deemed a part of the work, and are charged with duty, by weight, as books; but when prints or maps are bound or stitched together without letter-press, or when the letter-press is merely descriptive of the prints or maps, then they are to be charged with duty by tale, as prints or maps. — (*Min. Com. Cus.* 5th of Sept. 1829.) But if satisfactory proof be adduced, that prints or maps, although imported separately, do really form part of a work, they may be charged with the book duty by weight; but in other cases they are to be charged with duty by tale. — (*Treas. Order*, 3d of June, 1830.)

Pictures, sketches, and drawings, brought from the Continent, and accompanied by the proprietor, are to be admitted to entry free of duty, upon proof, by oath of the proprietor, that the same were wholly executed by him for his amusement, and not intended for sale in this country. — (*Treas. Order*, 5th of Aug. 1817.)

PRISAGE, or BUTLERAGE, was a right of taking 2 tons of wine from every ship importing into England 20 tons or more; which was changed by Edward I. into a duty of 2s. for every ton imported by merchant strangers, and called butlerage, because paid to the king's butler. The term is now fallen into disuse. — (*Blackstone*.)

PRIVATEERS, ships of war fitted out by private individuals, to annoy and plunder the public enemy. But before commencing their operations, it is indispensable that they obtain *letters of marque and reprisal* from the government whose subjects they are, authorising them to commit hostilities, and that they conform strictly to the rules laid down for the regulation of their conduct. All private individuals attacking others at sea, unless empowered by letters of marque, are to be considered pirates; and may be treated as such, either by those they attack, or by their own government.

1. *Policy of Privateering.* — The policy of this system is very questionable. It seems to be a remnant of that species of private war exercised by all individuals in early ages, but which gradually disappears as society advances. In wars carried on by land, the property of the peaceable inhabitants who take no part in the operations of the armies is uniformly protected; and it is difficult to discover any solid grounds why the same rule should not be followed at sea. Privateers rarely attack ships of war. Their object is merely to plunder and destroy merchantmen. They cause an infinite deal of mischief to individuals, and aggravate all the miseries of war, without having the slightest influence on the result of the contest. Experience has also shown that it is not possible, whatever precautions may be adopted, to prevent the greatest abuses from being perpetrated by privateers. The wish to amass plunder is the only principle by which they are actuated; and such being the case, it would be idle to suppose that they should be very scrupulous about abstaining from excesses. A system of this sort, if it be ever useful, can be so only to nations who have little trade, and who may expect to enrich themselves during war by fitting out privateers to plunder the merchant ships of their enemies. In all other cases it seems to be productive only of mischief; though it is, of course, most injurious to those states that have the greatest mercantile navy. Instead, therefore, of encouraging the practice of privateering, we think that a due regard to the rights and interests of humanity would suggest to the great powers the expediency of abolishing it altogether. A few efforts have, indeed, been already made towards this desirable object. Thus, it was stipulated in the treaty between Sweden and the U. Provinces, in 1675, that neither party should, in any future war, grant letters of marque against the other. In 1767, Russia abstained from licensing privateers: and in the treaty between the U. States and Prussia, in 1785, a stipulation was inserted as to privateers, similar to that in the treaty between Sweden and the U. Provinces in 1675. But nothing short of a convention and agreement to that effect amongst the great powers will be able to effect this desirable object. — (*Martens, Essai concernant les Armateurs*, 1794.)

2. *Appointment of Privateers.* — The captain of a privateer is nominated by the owners, who may dismiss him at pleasure. The commission or letters of marque given to the owners, authorises them to attack and seize the ships of the power or powers specified therein; but they are not to look upon their property, or to appropriate them, or any part of them, to their own use, *till they have been legally condemned*. Besides the stimulus afforded by the hope of booty, government has been in the habit of allowing them B. for every man on board such enemy's ships of war or privateers as they may capture. — (33 Geo. 3. c. 66.) A privateer cruising under letters of marque against one state may, on obtaining authentic information of hostilities being commenced by her government against another, capture its ships

with full advantage to herself. The king has in all cases the right to release any prize previously to its condemnation; this being an implied exception in the grant of prizes by the Crown.—(*Chitty on Commercial Law*, vol. i. c. 8.)

In some privateering adventures, the crew are engaged on the terms of no prize no pay; and, in such cases, the produce of whatsoever prizes may be taken goes half to the ship (for the owners), and half to the men, divided among them according to the articles of agreement; but when the men sail for wages, the captures belong entirely to the owners, except a small share, which is commonly stipulated to be given to the crew, over and above their wages, in order to stimulate their enterprise. Both ways of arming are regulated by the articles entered into between the owners and crews.

Privateers are forbidden from doing any thing contrary to the law of nations, as to assault an enemy in a port or haven, under the protection of any prince or republic, be he friend, ally, or neutral; for the peace of such places must be preserved inviolable.—(*Molloy, De Jure Maritimo*, book i. c. 3.)

When letters of marque are granted, it is usual, in most countries, to exact security that the regulations with respect to the conduct of privateers shall be observed. In Great Britain, a bond for 1,500*l.* must be given by responsible persons, not concerned in the ship, for all ships carrying less than 150 men, and 3,000*l.* for every ship carrying more, that they will give full satisfaction for any damage or injury they may commit at sea, contrary to the regulations under which they are to act, and to their duty as privateers.

If privateers willfully commit any spoil, depredation, or other injury, on friendly or neutral ships, or on the ships or goods of their fellow subjects, they are to be punished, according to the crime, either with death, or otherwise; and the vessels are subject to forfeiture.

Whether a ship taken be lawful prize, or not, shall be tried in the admiralty; and no ship or cargo, or part of a ship or part of a cargo, is to be sold, or disposed of in any way, till after judgment has been obtained.

If 2 ships with letters of marque accidentally meet with a prize at sea, though only one attack and take her, yet the other, being in sight, shall have an equal share of the prize, though he afforded no assistance in the capture; because his presence may be presumed to have struck terror into the enemy, and made him yield; which perhaps he would not have done, had his conqueror been single: so that all ships that are in sight, though they cannot come up to assist in the engagement, are entitled by the common law to a distribution of the spoil.—(*Beawes, Lex Mercatoria*, art. *Privateers*.)

If those to whom letters of marque are granted, should, instead of taking the ship and goods appertaining to that nation against which the said letters are awarded, willfully take or spoil the goods of another nation in amity with us, this would amount to piracy; and the person so offending would, for such fault, forfeit their vessel, and the penalties in which their securities are, according to custom, bound on taking out such letters. But such penalties would not follow, unless the capture were made in a piratical manner. For if the circumstances incident to the captured vessel were such as to afford a strong presumption that she really belonged to the country against which the letters were granted, the captors would not be liable to punishment, though they might be to damages. "It being impossible," says Beawes, "always to determine an affair of this sort at sea, it is allowable to bring a dubious capture into port, in order to more nice and just scrutiny and inspection; otherwise the goods of an enemy would often escape. However, to guard against unlawful seizures, the government have wisely directed sufficient caution to be given (as before mentioned) for the due observance of the letters according to law, before they permit their issuing; and when there is a breach committed, the penalties are inflicted."—(*Lex Mercatoria*, art. *Privateers*.)

3. *Regulations for the Government of Privateers, &c.*—The following instructions to privateers were issued under an order in council, at the commencement of the last war with France, 16th of May, 1803:—

Art. I. *Against what, and where, Letters of Marque may act hostily.*—It shall be lawful for the commanders of ships authorized by letters of marque and reprisals for private commerce of war, to set upon by force of arms, and subdue and take the men-of-war, ships and vessels, goods, wares, and merchandises, belonging to the French republic, or to any person being subjects to the French republic, or inhabitants within the territories of the French republic; but so that no hostility be committed, nor prize attacked, seized, or taken within the harbours of princes or states in amity with us, or in their rivers or roads, within the sphere of commerce, and under the protection of such princes or states, or their commanders or governors in chief of such places.

Art. II. *Captures to be brought into Port.*—The commanders of the ships and vessels so authorized as aforesaid, shall bring all ships, vessels, and goods, which they shall seize and take, into such port of England, or some other port of our dominions, as shall be most convenient for them, in order to have the same legally adjudged by our High Court of Admiralty of England, or before the judge of any other admiralty court, lawfully authorized, within our dominions.

Art. III. *Conduct of the Captors after the Capture is brought into Port.*—After such ships, vessels, and goods shall be taken and brought into any port, the taker, or one of his chief officers, or some other person present at the capture, shall be obliged to bring or send, as soon as possibly may be, 3 or 4 of the principal of the company (whereof the master, supercargo, mate, or boatswain, to be always 3) of every ship or vessel so brought into port, before the judge of our High Court of Admiralty of England, or his surrogate, or before the judge of such other admiralty court as within our dominions, lawfully authorized as aforesaid, or sent as shall be lawfully commissioned in that behalf, to be sworn and examined upon such interrogatories as shall tend to the discovery of the truth, concerning the interest or property of such ship or ships, vessel or vessels, and of the goods, merchandises, and other effects found therein; and the taker shall be further obliged, at the time he produced the company to be examined, and before any mention shall be made, to bring in and deliver into the hands of the judge of the High Court of Admiralty of England, his surrogate, or the judge of such other admiralty court within our dominions, lawfully authorized, or others commissioned as aforesaid, all such ships, papers, sea-bills, chartersparties, bills of lading, cocketts, and other documents and writings, as shall be delivered up or found on board any ship; the taker, or one of his chief officers, or some other person who shall be present at the capture, and saw the said papers and writings as aforesaid, or delivered up, or otherwise found, at the time of the capture, making oath that the said papers and writings are brought and delivered in as they were received and taken, without any fraud, addition, subtraction, or embellishment whatever, or otherwise to account for the same upon oath to the satisfaction of the court.

Art. IV. *Not to break bulk before Judgment.*—The ships, vessels, goods, wares, merchandises, and effects taken by virtue of letters of marque and reprisals as aforesaid, shall be kept and preserved, and no part of them shall be sold, spoiled, wasted, or diminished, and the bulk thereof shall not be broken, before judgment be given in the High Court of Admiralty of England,

or some other court of admiralty lawfully authorized in that behalf, that the ships, goods, or merchandises are lawful prize.

Art. V. *Privateers to assist Ships in Distress.*—If any ship or vessel belonging to us, or our subjects, shall be found in distress by being in fight set upon or taken by the enemy, or by reason of old age or accident, the commanders, officers, and crew of such merchant ships or vessels as shall have letters of marque and reprisals as aforesaid, shall use their best endeavours to give aid and succour to all such ship and ships, and shall, to the utmost of their power, labour to tow the same from the enemy, or any other distress.

Art. VI. *Application to the Admiralty for Letters of Marque.*—The commanders or owners of such ships and vessels, before taking out letters of marque and reprisals, shall apply for application in writing, subscribed with their hands, to our high admiral of Great Britain, or our commissioners for executing that office for the time being, or the lieutenant or judge of the said High Court of Admiralty, or his surrogate, and shall therein set forth a particular, true, and exact description of the ship or vessel for which such letter of marque and reprisals is requested, specifying the burden of such ship or vessel, and the number and nature of the guns, and what other warlike furniture and ammunition are on board the same, to wit: the number of the guns, and the name or names of the principal owner or owners of such ship or vessel, and the number of men intended to be put on board the same, and for what time they are vinted; also the names of the commander or commanders, or of the ship.

Art. VII. *Correspondence with the Admiralty.*—The commanders of ships and vessels having letters of marque and reprisals as aforesaid shall hold and keep, and are hereby enjoined to hold and keep, a correspondence, by all conveniences, and upon all occasions, with our high admiral of Great Britain, or our commissioners for executing that office for the time being, or their secretary, so as from time to time to render or give him or them, not only an account or intelligence of the captures and proceedings by virtue of such commission, but also of whatever else shall seem unto them, or be discovered and declared to them, or found out by them, or by examination or conference with, any mariners, or officers, or crew of the ships or vessels taken, or by any other ways or means whatsoever, touching or concerning the designs of the enemy, or any of their fleets, ships, vessels or parties, and of the stations, movements, and places, and of their intentions, of the ships or vessels of the enemy bound out or borne, or where cruising, as they shall hear of; and of what else material in these cases may arrive at their knowledge; to the end such correspondence may be thorough taken, and such orders given, as may be requisite.

Art. VIII. *What Colours a Privateer is to wear.*—No commander of any ship or vessel having a letter of marque and reprisals as aforesaid shall presume, as they will answer it at their peril, to wear any jack, pendant, or other rags or colours usually borne by our ships; but, besides the colours usually borne by merchant ships, they shall wear a red jack, with the union jack described in the caution, at the upper corner thereof, near the staff.

Art. IX. *Not to ransom any Capture.*—No commander of any ship or vessel, having a letter of marque and reprisals as

aforesaid, shall ransom, or agree to ransom, or quit or set at liberty, any ship or vessel, or their cargoes, which shall be seized and taken.

Art. X. *To deliver their Prisoners to the proper Commissioners.*—All captains or commanding officers of ships having letters of marque and reprisals shall send an account of, and deliver over, what prisoners shall be taken on board any prizes, to the commissioners appointed, or to be appointed, for the exchange of prisoners of war, or the persons appointed in the sea-port towns to take charge of prisoners; and such prisoners shall be subject only to the orders, regulations, and directions of the said commissioners; and no commander or other officer of any ship, having a letter of marque or reprisal as aforesaid, shall presume, upon any pretence whatsoever, to ransom any prisoner.

Art. XI. *Commission forfeited for acting contrary hereto.*—In case the commander of any ship, having a letter of marque and reprisals as aforesaid, shall act contrary to these instructions, or any such further instructions of which he shall have due notice, he shall forfeit his commission to all intents and purposes, and shall, together with his bail, be proceeded against according to law, and be condemned to costs and damages.

Art. XII. *Copies of Journals.*—All commanders of ships and vessels having letters of marque and reprisals shall, by every opportunity, send exact copies of their journals to the secretary of the admiralty, and proceed to the condemnation of the prizes as soon as may be, and without delay.

Art. XIII. *To deliver up all Orders and Letters of ships and vessels having letters of marque and reprisals shall, upon due notice being given to them, observe all such other instructions and orders as we shall think fit to direct from time to time, for the better carrying on this service.*

Art. XIV. *Violating these Instructions.*—All persons who shall violate these or any other of our instructions, shall be severely punished, and also required to make full reparation to persons injured contrary to our instructions, for all damages they shall sustain by any capture, embezzlement, demurrage, or otherwise.

Art. XV. *Bail to be given.*—Before any letter of marque or reprisal for the present aforesaid shall be issued, it shall be given with sureties, before the lieutenant and judge of our High Court of Admiralty of England, or his surrogate, in the sum of 3,000*l.* sterling, if the ship carries above 150 men; and if a less number, in the sum of 1,500*l.* sterling; which bail shall be to the effect and in the form following:—

Which day, time and place, personally appeared \_\_\_\_\_ who submitting themselves to the jurisdiction of the High Court of

Admiralty of England, obliged themselves, their heirs, executors, and administrators, unto our Sovereign Lord the King, in the sum of \_\_\_\_\_ pounds of lawful money of Great Britain, to this effect; that in so many, that \_\_\_\_\_ is duly authorized by letters of marque and reprisals, with the ship called the \_\_\_\_\_ of the burthen of about \_\_\_\_\_ tons, whereof he the said \_\_\_\_\_ hath a copy of certain instructions, approved of and passed by his Majesty in council, as by the tenour of the said letters of marque and reprisals, and instructions thereto relating, more at large appareth: if therefore nothing be done by the said \_\_\_\_\_ or any of his officers, mariners, or company, contrary to the true meaning of the said instructions, and of all other instructions which may be issued in like manner hereafter, and whereof due notice shall be given him; but that such letters of marque and reprisals aforesaid, and the said instructions, shall in all particulars be well and duly observed and performed, as far as they shall the said ship, master, and company any way concern: and if they shall give any satisfaction for any damage or injury which shall be done by them or any of them to any of his Majesty's subjects, or of foreign states in amity with his Majesty, and also shall duly and truly pay, or cause to be paid, to his Majesty, or the customer or officers appointed to receive the same for his Majesty, the usual customs due to his Majesty, of and for all ships and goods so as aforesaid taken and adjudged as prize; and moreover if the said \_\_\_\_\_ shall not take any ship or vessel, or any goods or merchandise, belonging to the enemy, or otherwise liable to confiscation, through consent or clandestinity, or by collusion, by virtue, colour, or pretence of his said letters of marque and reprisals, that then this bail shall be void, and the sum of \_\_\_\_\_ which they shall so do, they do all hereby severally consent that execution issue forth against them, their heirs, executors, and administrators, goods and chattels, wheresoever the same may be found, to the value of the sum of \_\_\_\_\_ pounds before mentioned; and in testimony of the truth thereof they have herunto subscribed their names.

By his Majesty's command.  
(Signed) \_\_\_\_\_ PELHAM.

## PROMISSORY NOTES. See BANKS AND BANKING.

**PROTECTION**, in mercantile navigation, a privilege granted to certain descriptions of seamen, by which they are protected from impressment. — (See IMPRESSMENT.)

**PROVISIONS**. Under this term, taken in its most extensive sense, in reference to man, may be comprised all those articles used as food by the inhabitants of this and other countries; but among British merchants and in parliamentary language, it is understood to comprise only fresh and salted butchers' meat, hams, and bacon, butter and cheese, eggs, and a few other articles. We shall, however, avail ourselves of this opportunity to give, in addition to the details of the recent importation of the above articles, an account of the recent importation of cattle.

Our readers are aware that previously to the 9th of July, 1842, the importation of cattle, sheep, and hogs, and of all sorts of fresh butchers' meat, was prohibited; and that a duty of 12*s.* a cwt. was imposed on all foreign salt meat when entered for consumption, and of 28*s.* a cwt. on bacon and hams. But in the tariff act of 1842, which came into operation at the above date, the prohibition of importing foreign cattle, sheep, hogs, and fresh meat was repealed, and their entry for home consumption admitted under fair and reasonable duties; the duty on salted meat being, at the same time, reduced from 12*s.* to 8*s.*, and that on bacon and hams from 28*s.* to 14*s.* a cwt. We have already (art CATTLE) endeavoured to show that this wise and liberal measure, which will always reflect high credit on the administration of Sir Robert Peel, would not, as was generally supposed, occasion either a large importation of provisions or of cattle, and would, most probably, have but little influence over prices. And the experience of the period that has elapsed since the tariff took effect fully justifies these conclusions. In fact, though we expected nothing great, we are a good deal surprised at the limited extent of the importation, which sets in the most striking point of view the fallacy of the statements so frequently made of the comparatively high price of provisions in this country. We have already seen (*ante*, p. 257.) that from the 9th of July, 1842, when the new system came into operation, down to the 5th of January, 1843, only 4,377 head of cattle, including calves, were imported, and only 648 sheep and lambs: and though the Continental graziers have in the interim become better acquainted with the British markets, and the imports of cattle and sheep have been materially increased during the current year, (1845), they continue to be comparatively inconsiderable. Contrary to what was generally

expected by well-informed parties, the imports of bacon, beef, and hams have not been perceptibly augmented, and are quite trifling.

Account of the Numbers of Cattle, Sheep, Hogs, &c., and of the Quantities of Provisions, Imported and entered for Consumption in the U. Kingdom, with the Rates of Duty on the same, in the 10 Months from the 5th of January to the 5th of November, 1845.

Ditto, foreign	31,927	1,233		

It is impossible to say in how great a degree these importations may be increased in time to come; but it is most probable that they will be gradually augmented according as foreigners become better acquainted with the qualities suitable for our markets. We have, however, no idea that they will ever amount to any considerable proportion of our supply. The truth is, that the cheapness of cattle and provisions in foreign markets, of which we used to hear so much, was in great part imaginary; and that, where it did occur, it depended more on the difficulty of conveying them to other markets, or on their inferiority, than on any thing else. The imports of fat cattle from Holstein and Holland, and of beef from Hamburg, with which our markets were to be glutted, have not hitherto done our graziers the smallest injury, and would not injure them though they were increased in a tenfold proportion; and the importation of lean cattle, so far from being injurious, is highly for their interest. The imports of American pork have hitherto been too insignificant to deserve notice.

PRUNES AND PRUNELLOES, a species of dried plums, of which there are many varieties. The finest are imported from France, in the south of which this fruit is very abundant. The best prunes are packed in hampers or baskets made of white osiers, weighing from 6 to 10 lbs. each; the second quality in quarters, and the third in puncheons. The duty on prunes, which was previously fixed at the extravagant rate of 27s. 6d. a cwt., was most properly reduced in 1834 to 7s. a cwt. This reduced duty produced, in 1840, 5,776*l.*, showing that 16,563 cwt. had been entered for consumption. Previously to the reduction of the duty, the entries seldom exceeded 6,000 cwt.

Prunes, the produce of Europe, may not be imported for home consumption except in British ships or ships of the country of which they are the produce, or from which they are exported, on penalty of the forfeiture thereof and of 10*l.* by the master of the ship. — (3 & 4 *Will. 4. c. 52. §§ 2, 22.*)

PRUSSIAN BLUE, or PRUSSIATE OF IRON (Ger. *Berlinerblau*; Fr. *Bleu de Prusse*; It. *Azzurro Prussiano*; Sp. *Azul de Prussia*; Rus. *Лазор Берлинская*), a beautiful deep blue powder, accidentally discovered at Berlin in 1710. It is of considerable importance in the arts, being extensively used by painters: it is manufactured in this country. Many attempts have been made to render Prussian blue available for the dyeing of broad cloths, but without much success. The difficulty is to diffuse the colour equally over the surface; for, from its extraordinary vivacity and lustre, the slightest inequalities strike and offend the eye. Prussian blue resists the air and sun extremely well; but it cannot be used in the dyeing of cottons, or any sort of stuff that is to be washed with soap, as the alkali contained in the soap readily dissolves and separates the colouring matter. — (*Bancroft on Colours*, vol. ii. pp. 60—94.)

Blue is a favourite colour with the Chinese, and in 1810-11 the imports of Prussian blue into Canton from England amounted to 1,899 piculs, or 263,290 lbs. But, for some years past, the Chinese have not imported a single pound weight. The cause of the cessation of the trade deserves to be mentioned. A common Chinese sailor, who came to England in an East Indiaman, having frequented a manufactory where the drug was prepared, learned the art of making it; and on his return to China, he established a

## 1068 PRUSSIAN OR GERMAN COMMERCIAL UNION.

similar work there, with such success that the whole empire is now amply supplied with native Prussian blue ! The West has derived many important arts from the East ; but we incline to think that this is the first well authenticated instance of any art having ever been carried from the West to the East, by a native of the latter. But, in all that respects industry, ingenuity, and invention, the Chinese are incomparably superior to every other people to the east of the Indus.

**PRUSSIAN OR GERMAN COMMERCIAL UNION.** Next to the efforts of the Prussian government to diffuse the blessings of education, their efforts to introduce a free commercial system into Germany constitute their best claim to the gratitude and esteem of their own subjects, and of the world. Germany, as every one knows, is divided into a vast number of independent, and mostly petty, states. Until a very recent period, every one of these states had its own custom-houses, and its own tariff and revenue laws ; which frequently differed very widely indeed from those of its neighbours. The internal trade of the country was, in consequence, subjected to all those vexatious and ruinous restrictions that are usually laid on the intercourse between distant and independent states. Each petty state endeavoured either to procure a revenue for itself, or to advance its own industry, by taxing or prohibiting the productions of those by which it was surrounded ; and customs officers and lines of custom-houses were spread all over the country ! Instead of being reciprocal and dependent, every thing was separate, independent, and hostile : the commodities admitted into Hesse were prohibited in Baden, and those prohibited in Wirtemberg were admitted into Bavaria. It is admitted on all hands that nothing has contributed so much to the growth of industry and wealth in Great Britain, as the perfect freedom of internal industry we have so long enjoyed, and that intimate correspondence among the various parts of the empire, which has rendered each the best market for the products of the other. How different would have been our present condition had each county been an independent state, jealous of those around it, and anxious to exalt itself at their expense ! But, until within these few years, this was the exact condition of Germany ; and, considering the extraordinary obstacles such a state of things opposes to the progress of manufactures, commerce, and civilisation, the wonder is, not that they are comparatively backward in that country, but that they should be so far advanced as they really are.

But, thanks to the intelligence and perseverance of Prussia, this selfish anti-social system has been well nigh suppressed ; and the most perfect freedom of commerce is now established among the great bulk of the Germanic nations. The disadvantages of the old system had long been seen and deplored by well-informed men ; but so many interests had grown up under its protection, and so many deep-rooted prejudices were enlisted in its favour, that its overthrow seemed to be hopeless, or, at all events, exceedingly distant. The address and resolution of the Prussian government have, however, triumphed over every obstacle. Being fully impressed with a strong sense of the many advantages that would result to Prussia and Germany from the introduction of a free system of internal intercourse, they pursued the measures necessary to bring it about with an earnestness that produced conviction, and with a determination, *comme qui coûte*, to carry their point.

The first treaties in furtherance of this object were negotiated by Prussia with the principalities of Schwarzburg Sondershausen and Schwarzburg Rudolstadt, in 1818 and 1819, on the principle that there should be a perfect freedom of commerce between these countries and Prussia ; that the duties on importation, exportation, and transit, in Prussia and the principalities, should be identical ; that these should be charged along the frontier of the dominions of the contracting parties ; and that each should participate in the produce of such duties, in proportion to its population. All the treaties subsequently entered into have been founded on this fair and equitable principle ; the only exceptions to the perfect freedom of trade in all the countries comprised within the league or tariff alliance being confined, 1st, to articles constituting state monopolies, as salt and cards, in Prussia ; 2d, to articles of native produce, burdened with a different rate of duty on consumption in one state from what they pay in another ; and, 3d, to articles produced under patents conferring on the patentees certain privileges in the dominions of the states granting the patents. With these exceptions, which are not very important, and are daily decreasing, the most perfect freedom of commerce exists among the allied states.

Since 1818, when the foundations of the alliance were laid, it has progressively extended, till it now comprises more than three fourths of the Germanic states, exclusive of Austria. Ducal Hesse joined the alliance in 1828, and Electoral Hesse in 1831 ; the kingdoms of Bavaria, Saxony, and Wirtemberg joined it afterwards, as have Baden, Nassau, and almost all the smaller states by which it had not been previously joined, with the exception of Mecklenburg Schwerin, and Mecklenburg Strelitz. Hanover is not included within the league.

In December, 1840, the tariff alliance comprised —

	German Sq. Miles.	Population.
Prussia, without Neuchâtel, but inclusive of the small parcels of other territories surrounded by her state	5,158	15,276,582
Bavaria and her detached territories	1,598	4,375,586
Saxony (Kingdom of)	272	1,706,276
Württemberg and Hohenzollern-Sigmaringen	386	1,705,258
Hesse (Electoral)	203	709,598
Hesse (Duchy of) and Homburg	154	890,507
The Thuringian States	237	855,214
Baden (Duchy of) and part of Hohenzollern	275	1,291,131
Brunswick (Duchy of)	50	155,607
Nassau	85	398,095
Frankfort	2	66,338
<b>Totals</b>	<b>8,256</b>	<b>27,448,592</b>

Throughout the whole extent of this immense country, from Aix-la-Chapelle, on the confines of the Netherlands, eastward to Tilsit, on the confines of Russia, and from Stettin and Dantzic southwards to Switzerland and Bohemia, there is nothing to interrupt the freedom of commerce. A commodity, whether for consumption or transit, that has once passed the frontier of the league, may be subsequently conveyed, without let or hindrance, throughout its whole extent. Instead of being confined within the narrow precincts of their own territories, the products of each separate country of the alliance may now be sent to every one else; each will, in consequence, apply itself, in preference, to those departments in which it has some natural or acquired advantage; and each will have to depend for its success, not on the miserable resource of customs regulations, but on its skill and industry. The competition thence arising will be most salutary; and, should the peace of Europe be preserved, we run little risk in saying, that all sorts of industry will make more progress among the states comprised within the tariff alliance, during the next ten years, than they have done during the previous half century.

An assembly of representatives from the allied states meets annually, to hear complaints, adjust difficulties, and make such new enactments as may seem to be required. The Prussian tariff has been adopted, with certain modifications. The duties are received into a common treasury, and are apportioned according to the population of each of the allied states. In addition to its other advantages, the new system has reduced the cost of collecting the duties to a mere trifle, compared with its former amount; and has enabled hundreds of custom-houses, and thousands of customs officers, to be employed in the different departments of industry.

The existing discrepancy in the weights and measures used in different parts of Germany occasions considerable inconvenience; and we are glad to observe that the equalisation of weights and measures, and their reduction to a common standard in all the allied states, is declared to be one of the objects of the league.

It is also expressly provided that the tolls, or other charges in lieu thereof, shall, in all cases, whether they belong to the public or to private individuals, be limited to the sums required to keep the roads in a proper state of repair; and that the tolls existing in Prussia shall be considered as the highest that are to be levied, and shall not in any case be exceeded.

It was at first supposed by many persons in this country, and the opinion is not yet entirely abandoned, that the Prussian league was in some degree directed against us, and that, at all events, it threatened to be very injurious to our trade with Germany; we do not, however, believe that there is any foundation whatever for either of these opinions. The alliance was planned, and brought to its present advanced state, in the view, and with the intention, of putting down the galling and innumerable restraints by which the intercourse of the German states with each other was formerly interrupted; and not with the intention of throwing any obstacles in the way of the trade of the alliance with foreign countries: it is, indeed, quite absurd to suppose that it should have this effect. The freedom of internal commerce will do ten times more to promote the industry and prosperity of the allied states than any other measure, or system of measures, that their governments could have adopted; and, as population increases, and the inhabitants become more industrious and wealthy, there will, no doubt, be an augmented demand for foreign products. The league is now no new thing. It was formed several years since, and has been progressively augmented: but, hitherto, it has not had the slightest influence in diminishing our intercourse with Germany; our exports to it, including Holland and Belgium, being greater at present than at any former period!—(See *ante*, p. 691.) Generally speaking, the duties on imports are reasonable; at least, on all the finer descriptions of goods. It never, in fact, can be the policy of the alliance to make them oppressive; for, though certain states might erroneously suppose that their interests would be promoted by such means, others would undoubtedly be of a different opinion, and would resist any attempt to carry them beyond a reasonable amount. It is a mistake to suppose that Prussia has an overwhelming influence in the assembly. She must conciliate the other states, and carry them along with her; and this can only be

done by acting on liberal principles, and with a view to the common interest of the alliance.

Besides, if any of the existing duties be exorbitant, or if any of them, that are at present moderate, should be subsequently raised to an exorbitant pitch; does any one suppose that the over-taxed articles would not be immediately smuggled into all parts of the league? We, who occupy an island, and have revenue cruisers and coast guards on all the seas and shores most accessible to the smuggler, know from experience that it is not possible to hinder over-taxed commodities from making their way, in immense quantities, into our markets. But the facilities for smuggling into the territories of the league are incomparably greater. It has a land frontier of several thousand miles: and though the whole Prussian army were employed for that purpose, it would be found that it was utterly impotent to prevent the territories of the league from being deluged with such over-taxed commodities as were in demand by the inhabitants.

It must be admitted that we have done not a little to provoke Prussia, and that we had no reason to be surprised had she manifested symptoms of irritation. She has only three great staple articles of export—corn, timber, and wool. Now, of these, we admit only the last on anything like fair terms; in ordinary years we entirely exclude corn, and we lay a duty of no less than 25*s.* and 32*s.* a load on Prussian timber, while we admit the inferior timber of N. America on payment of a duty of 1*s.* and 2*s.*! Had, therefore, the Prussian tariff been levelled against us, we should have had but slender grounds for complaint; but such is not really the case. It may, indeed, be fairly inferred, that, by agreeing to lower the oppressive duties on timber and corn, we might prevail on Prussia to use her influence to get the alliance duties on cotton stuffs, hardware, &c. abated; but, till we consent to moderate our duties on the articles in question, it is not to be supposed that Prussia will pay much attention to the exceptions we may take to any of the duties.

We are glad to be able to strengthen our view of the influence and objects of the Prussian commercial league, by laying before the reader the following extract from a work printed by order of the House of Representatives of the American States. "Prussia," it is there said, "has evidently taken the lead in this wise and important measure, to which the smaller states have gradually acceded. The whole commercial policy of this enlightened power has been distinguished for its liberality, being founded on the desire of placing her intercourse with all nations on the basis of reciprocity. The commercial league of Germany is intended to carry out this principle, and not to be directed, as has been supposed, against any particular nation; as it is well known that Prussia, in her treaties with maritime powers, has invariably adopted the system of reciprocity, to whatever extent those with whom she negotiates are willing to carry it. The establishment of this community of commercial interests forms a part of the fundamental compact, by which the new Germanic confederation was created, after the dissolution of the Confederation of the Rhine; to be subsequently adopted, however, at the option of such of the co-states as should choose to accede to it. Its effects cannot fail to promote commerce, and every other branch of industry, as it removes all those vexatious and endless difficulties which previously obstructed the freedom of intercourse. Navigable rivers and highways are now opened to the unfettered use of the German people; the custom and toll houses, with their officers and barriers, have been withdrawn from the interior, and the whole intercommunication resembles that of the subjects of any one of the states within its own territories. To these benefits may be added the assured prospect of improvement in the finances of the great and smaller sovereignties composing the league. 'This advantage will grow out of the simplicity or unity of the new system, a saving in the cost of collection, and from the increased consumption which renovated industry and progressive prosperity so invariably cause.'—(*Digest of Customs Laws*, vol. iii. p. 227.)

*Prussian Duty on Cottons.*—The duty on cotton goods being that in which we are most interested, we have taken some pains to ascertain its real influence. This duty amounts (see *post*) to 50 rix-dollars per Prussian quintal on all cotton goods, without respect to quality or price; and, taking the quintal at 113 lbs. avoirdupois, and the rix-dollar at 3*s.*, it is equal to 7*l.* 10*s.* per 113 lbs. Now, we have learned from statements obligingly furnished to us by a large wholesale house in the city,—

1st. That a quintal (113 lbs.) of *coarse shirting*, worth 4*d.* per yard, contains 497 yards; it consequently costs 8*l.* 6*s.*, and the Prussian or tariff alliance duty of 7*l.* 10*s.* on it is, therefore, equivalent to an *ad valorem* duty of 90 per cent.

2d. That a quintal of *superior shirting*, worth 1*s.* a yard, contains 457-65 yards; it consequently costs 22*l.* 17*s.* 7*d.*, making the Prussian duty on such goods 32½ per cent.

3d. That a quintal of *printed cottons*, worth 1*s.* 6*d.* a yard, contains 633 yards; it consequently costs 47*l.* 9*s.*, making the Prussian duty on such goods 15½ per cent.

4th. That a quintal of *fine printed cottons*, worth 2*s.* 6*d.* a yard, contains 678 yards; it consequently costs 84*l.* 15*s.*, making the Prussian duty on such goods 8½ per cent.

It is plain, therefore, that, except on the coarsest and cheapest species of goods, the

Prussian or tariff alliance duty is very far from being oppressive; and, as the value of coarse goods is principally dependent on the cost of the raw cotton and the wages of labour, being but little influenced by superiority of machinery, it is not very probable that we should export them largely to Prussia, even were the duty materially reduced. No doubt, however, it would conduce greatly to the interests of the people comprised within the league, though we do not know that it would sensibly affect us, were the duty assessed on an *ad valorem* principle, and made 20 or 30 per cent. on all goods; and we should think that this might be done without any material difficulty.

The subjoined translation of the more important clauses of the customs treaty of the 23d of March, 1833, sets the principles on which the alliance is founded in the clearest point of view.

*Customs Treaty*, concluded the 23d March, 1833, between the Kings of Bavaria and Wirtemberg, on the one part; and the King of Prussia, the Prince Electoral Co-regent of Hesse, and the Grand Duke of Hesse, on the other part.

I. The existing customs unions between the states above named shall henceforth constitute a general Union, united by a common system of customs and commerce, embracing all the countries comprised therein.

II. In this general re-union are also comprised the states which have already adhered, either for the whole of their territory, or for a part, to the system of customs and commerce of one or other of the contracting states, having regard to their special relations, founded upon the conventions of adhesion concluded with the states which have intervened.

III. But there will remain excluded from the general re-union the parts separated from the countries of the contracting states which, because of their situation, are not yet included either in the re-union of the Bavarian or Wirtemberg customs, nor in those of Prussia and Hesse. Nevertheless, the regulations now in force to facilitate the commerce of these territories with the principal country will be maintained. Other favours of this kind cannot be accorded without the unanimous consent of the contracting states.

IV. In the contracting states there shall be established uniform laws for the duties of import, of export, and of transit, except such modifications as, without injury to the common object, result necessarily from the particular legislation of each contracting state, or from local interests.

Thus, exceptions and modifications to the common tariff may take place, as to rates of duties of entry, of export, and of transit, (according as the direction of the routes of commerce may require,) established upon articles recognised as of minor consequence in extensive commerce; provided always, that these modifications be preferred by separate states, and that they shall not be disadvantageous to the general interests of the Association.

The administration of the duties of import, export, and transit, as well as the organisation of the authorities which are engaged therein, in all the states of the Association, shall be established upon a uniform footing, having regard, however, to the particular relations existing in those countries. The laws and ordinances which, according to those principles, ought to be uniform in the contracting states, and which are to constitute the law of the tariff and the regulations of the customs, shall be considered as an integral part of the present treaty, and shall be published at the same time.

V. There can neither be alterations, or additions, or exceptions, to the acts above mentioned (Art IV.), but by the unanimous consent of all the contracting parties, and in the form required for the making (confection) of the laws.

The preceding applies equally to all the ordinances which would establish, for the administration of the customs, dispositions entirely different.

VI. Liberty of commerce, and community of the receipts of customs, as regulated by the following article, will commence simultaneously with the operation of the present treaty.

VII. Dating from this epoch, all duties of import, of export, and of transit shall cease on the common frontier of the Bavaro-Wirtemberg and Prusso-Hessian customs re-unions. All articles of free commerce in one of those territories may be imported freely and without duty into all the others, except only as follows:—

A. Articles monopolised by the states (playing cards and salt) conformably to Articles IX. and X.

B. Indigenous articles, now subject in the interior of the contracting states to different duties, or excepted from all duty in one state, and imported into another, and which according to article II. ought consequently to be subject to a duty of compensation.

Finally, C. Articles which, without prejudice to patent rights or conceded privileges in one of the contracting states, cannot be imitated or imported, and ought consequently to be excluded during the existence of the patents and privileges from importation into the state which has granted them.

VIII. Notwithstanding the freedom of commerce, and the exemption from duties, established by

Article VII., the transport of articles of commerce, subject by the common tariff to duties of import or export on the frontiers of the Association, cannot take place between the states of Bavaria and Wirtemberg, and the states of Prussia, of Electoral Hesse, or of Grand Ducal Hesse, and reciprocally, except by the public roads, military routes, and navigable rivers. For this purpose there shall be established, on the interior frontiers, common *bureaux* of verification, to which the conductors of merchandise must, on exhibiting their licences, declare what are the articles which they are employed to transport from one territory to another.

This disposition will not be applicable to retail commerce in raw materials, nor to the petty commerce of the frontiers or the fairs, nor to the effects of travellers. Process for the verification of merchandise will go no farther than is required for security of the duties of compensation.—(See Art. VII. B.)

XIII. The contracting parties reciprocally renew their adhesion to the principle, that the tolls, or other charges in lieu thereof, shall only be sufficient to defray the expense of maintenance and repairs of the roads; whether the tax be for the state or for private rights. It was thus that has been approved the supplement to the duty of customs, created in Bavaria and Wirtemberg, to replace the duty of tolls, paving, causeways, bridges, and generally of all analogous taxes.

The tolls, &c. now existing in Prussia, according to the general tariff of 1828, shall be considered as the *highest rates*, and shall not be exceeded in any of the contracting states.

In accordance with the principle thus announced, the individual duty for closing the gates of cities shall be abolished; as also the duty of paving of causeways, where it still exists; and all paved roads will be considered as causeways of a description liable only to the duty on causeways established by the general tariff.

XIV. The contracting governments agree to unite their efforts to introduce into the states a uniform system of coins, weights, and measures; to commence immediately the requisite negotiations for this purpose; and, subsequently, to direct their efforts towards the adoption of uniform custom-house weights.

The contracting states, in the impossibility of establishing this uniformity before this treaty goes into operation, agree, for facilitating the forwarding of merchandise where it has not already been done, to revise their tariff as to weights and measures, assuming for a basis the tariff of the other contracting

states. They will cause such modifications to be published, for the government of the public and of their custom-house *bureaus*.

The common tariff (Art. IV.) shall be divided into two principal divisions, according to the system of weights, measures, and monies of Bavaria, and that of Prussia.

The declaration of the weights and measures of articles subject to duty shall, in Prussia, be according to Prussian weights and measures; in Bavaria and Wirtemberg, according to those of Bavaria; and in the two Hesses, according to the weights and measures there legally established.

In expediting custom-house acts, the quantity of merchandise must be expressed according to the two principal divisions of the common tariff.

Until the contracting states agree upon a system of common money, the payment of duties in each state shall be made in the same currency as is in use for payment of its other taxes.

But, from the present time, the gold and silver coins of all the contracting states, with the exception of small money (*schillingen*), shall be received in all the *bureaus* of receipt of the Association; and for this purpose, tables of value shall be published.

XV. The duties of navigation upon the rivers, comprising therein those which apply to vessels, shall always be mutually acquitted according to the acts of the Congress of Vienna, or of special conventions, upon all the rivers to which these regulations apply, unless other determinations be adopted in this respect.

The contracting states agree to enter, without delay, into negotiations for that which particularly regards the navigation upon the Rhine and the neighbouring streams, in order to effect an arrangement by which the import, export, and transit of the productions of all the states of the Union upon said streams shall be, if not absolutely free, at least relieved as far as possible from duties of navigation, under the reserve of charges of reconnaissance.

All the advantages granted by one state of the Union to its subjects, in the exercise of the navigation upon said streams, shall extend equally to the navigation of the other associated states.

Upon the other streams to which neither the acts of the Congress of Vienna, nor any other treaties apply, the duties of navigation shall be according to the special regulations of the governments interested. Nevertheless the subjects of the contracting states, their merchandise and vessels, shall throughout be treated on those streams with perfect equality.

XVI. Dating from the day on which the general custom-house regulations of the Union shall come into operation, the duties of public stores (*depôts*), and of trans-shipments (*umschlagrechte*), which still exist in the territories belonging to the Association, shall cease, and no one shall be liable to forced delay, nor to the discharging and storage of his merchandise, except in cases authorised by the common regulations of the customs or navigation.

XVII. No duties shall be claimed for canals, locks, bridges, ferries, cranes, weighing and storage; and the establishments destined to facilitate commerce shall not be allowed rent, except when actually used. Charges cannot be increased; and the subjects of the other contracting states shall be on a perfect equality with the subjects of the country having those establishments.

If the establishments for weighing and cranes are only used by the custom-houses, no charge shall be made, if the articles have been previously weighed at a custom-house.

XVIII. The contracting states engage to continue their common efforts for the encouragement of industry by the adoption of uniform regulations, so that the subjects of each state may enjoy, as extensively as possible, the privilege of seeking work and occupation in every other state.

From the coming into operation of the present treaty, the subjects of any one of the contracting states, trading or seeking employ in the territory of any other of those states, shall not be subject to any impost which does not equally affect the native similarly employed. Manufacturers and merchants who are only making purchases for their trade, or travellers who have not goods with them, but simply patterns for the purpose of soliciting commissions, shall not, when thus employed, have any duty to pay in another state if authorised to carry on such commerce in the state where they have their domicile; or if employed in the service of native manufacturers or merchants.

When trading in the markets and fairs, or when they are selling the produce of the soil and fabrics, in any one of the states of the Association, the subjects of the other contracting states shall be treated in all respects as subjects of the same states.

XIX. The seaports of Prussia shall be open for commerce to all the subjects of the states of the Union, on payment of the same duties as are paid by Prussian subjects, and the consuls of the several states in the seaports or places of foreign commerce, shall be bound, in cases of need, to assist with their advice and support the subjects of the other contracting states.

XX. To protect against contraband their common custom-house system, and to insure the regular payment of the duty of consumption in the interior, the contracting states have concluded a reciprocal cartel, which shall be enforced as soon as possible, but, at the farthest, at the same time with the present treaty.

XXI. The community of receipts of the contracting states, stipulated by the present treaty, shall comprehend the product of duties of entry, of export, and of transit, in the Prussian states, the kingdoms of Bavaria and Wirtemberg, the Electorate, and the Grand Duchy of Hesse, comprising therein those countries which have down to the present time acceded to the custom-house system of the contracting states.

The following are excluded from the community of receipts, and remain reserved for the particular benefit of the respective governments:—

1. The imposts collected in the interior of each state on indigenous products, comprising therein the compensatory duties reserved in Article XI.

2. The toll on rivers, to which are applicable the regulations of the acts of the Congress of Vienna, or special conventions. (Article XV.)

3. Duties of paving, of causeways, of bridges, of ferries, of canals, of locks and ports, charges of weighing and storage, as well as similar receipts, whatever may be their name.

4. The fines and confiscations which, beyond the part allowed to informers, remain the property of each government throughout its territory.

XXII. The produce of the duties received into the common treasury shall be divided among the states of the Association, in proportion to the population which may be found in the Union, subject to deduction, 1st, of the expenses specified in Article XXX.; 2d, of the restitution of erroneous receipts; 3d, of the restoration of duties and diminutions made in consequence of special common conventions.

The population of every state which has entered or may enter into the Association, by treaty with one or other of the contracting states, under the engagement made by the latter, to make an annual contribution, for the participation of the former to the common revenue of the customs, shall be added to the population of the states which make this contribution.

There shall be made every three years, dating from a period to be hereafter fixed, an exact enumeration of the population of the associated states: the states shall reciprocally communicate the results thereof.

XXIII. All restitutions of duties not authorised by the legislation of the customs, shall remain charged to the treasury of the government which shall have granted it.

Conventions, hereafter to be concluded, will regulate in what cases similar restitutions may be accorded.

XXIV. In conformity with the object of this association of customs tending to facilitate a freer and more natural commercial intercourse, the favours accorded for the payment of custom-house duties at certain places in which fairs are held, especially the privileges of abatement (*rabat privilèges*), cannot be extended to those states of the Association where they do not exist; on the contrary, they shall be

restricted and abolished as far as possible, regard being had to the means of subsistence of the places heretofore favoured, and to the commercial relations which they have with foreigners; but others can on no account be granted without the general consent of the contracting parties.

XXXIII. There shall every year, on the 1st day of June, be an assembly of plenipotentiaries of the governments of the Union empowered generally to deliberate; and each state may send thither a duly authorised representative.

The plenipotentiaries will choose from among themselves a president, who, however, shall have no pre-eminence over the other members.

The first assembly shall be held at Munich.

At the close of each annual assembly, the place of next meeting will be determined, having reference to the nature of those subjects which will then come under discussion.

XXXIV. The assembly of plenipotentiaries will have under its consideration the following subjects:—

A. To consider the complaints which may have arisen in any of the states of the Association, concerning the execution of the general treaty, of special conventions, of the law, and of custom-house regulations; also of the tariff, when these shall not have been adjusted during the year by correspondence between the different ministers.

B. The definitive repatriation among the states of the Union of the total common receipts, based upon the observations made by the superior authorities, and verified by the central *bureau*, as may be rendered necessary by the common interest.

C. To deliberate upon propositions and suggestions made by the governments for the perfection of the administration.

D. Discussions upon alterations demanded by any of the contracting states, in the laws, tariffs, and custom-house regulations, as well as in the organisation of the administration, and in general upon the development and perfection of the general system of customs and commerce.

XXXV. If, in the course of the year, when the plenipotentiaries are not in session, extraordinary incidents should occur, which require prompt decision on the part of the states of the Union, the contracting parties will consult upon these through their diplomatic agents, or they will order an extra sitting of their plenipotentiaries.

# ROYAL TARIFF OF THE PRUSSIAN STATES, AND OF THE GERMAN CUSTOMS UNION.

To be in force from the 1st January, 1843.

## I. Articles not liable to any Duty.

Trees for transplantation, and vines; bee-hives with live bees; blood of slaughtered cattle, both in a liquid and dry state; glass of brandy (dogwash); animal and other sorts of manure; eggs; clay and ore, not specially charged with duty, as bolus, pumicaceous, bloodstone, brownstone, plaster, yellow clay, &c.; agricultural produce, and cattle of an estate separated by the frontier; fresh fish and crabs; grass, fodder, and hay; fresh garden produce, — as, flowers, vegetables, succory (not dried), potatoes and turnips, edible roots, &c.; poultry, and small game of every kind; potters' ore (argillaceous); gold and silver, coined, in bars and fragments, excluding foreign small coin of silver; furniture and effects, worn clothes and linen, tools that have been used by individuals settling in the country; also, by particular permission, new clothes, linen, and effects, if they belong to persons settling in the country through marriage; wood (both for fuel and timber), if transported by land and not destined for shipping; carpets, mats, and brooms, and willow for baskets; travellers' and seamen's clothes and linen, and travellers' carriages, waggon, and boats for transporting persons and goods, furniture of vessels, and provisions used for travelling; instruments, and patterns carried by travellers for their own use only; post and tan for fuel; milk; fresh fruit; paper chippings and written papers (docs, waste paper, &c.); seeds of forest trees, shaves

grass, reeds for roofing, &c. refuse wool; stones, bawn and rough, chaff, slate, tiles and bricks, mill and grindstones transported by land, and not destined for shipping; straw, chaff, cut straw; all kinds of animals for which no duty is mentioned in the tariff; turf and charcoal; husks of grain and of grapes.

## II. Articles which are liable to Duty on Importation or Exportation.

Fifteen silver grochen, or half a dollar, is the general duty on importation for one quintal (hundred weight) Prussian gross weight; and no further tax on consumption is levied in the country, nor then when the article is exported.

Exceptions, however, occur with all articles, which either, according to the preceding regulations, are entirely exempt from duty, or, according to the following sections, are liable to duty; as:—

Articles subject to a higher or lower import duty than half a dollar for one quintal; or, Articles subject to a duty on exportation.

The following are those articles on which the affixed duties are levied:—

[We subjoin a note of the duties imposed on some of the principle articles of Import.\*]

\* The Prussian dollar, of 30 silver grochen, is equal to about 2s. 11½d. sterling; but in estimating duties it is usually taken at 2s. The quintal or centnar of 110 lbs. is equal to 115.381 lbs. avoirdupois.

Silk and silk goods: — Dyed and white or fiolet silk (twisted and untwisted), also thread of raw silk - - -	Quin.	1	8	-	-	{ 18 in chests, 10 in bales.	Unmilled woollens and mixed wares of cotton and wool, if printed, embroidered, or worked, &c. — Carpets of wool and other animals' hair mixed with linen - - -	1	20	-	-	-	{ 20 lbs. in chests, 7 lbs. in bales.
Silk stuffs, and stockings, cloth shawls, ribbands, lace, blond lace, gauze, buttons, &c., needlework, and milliners' articles; woven silk and galoon, mixed with metal thread, unconnected with iron, glass, wood, leather, brass, or steel; finally, all the above wares made of fiolet silk (baurre de soie) or silk - - -	Lb.	1	1	-	-	{ 22 in chests, 15 in bales.	<i>Note.</i> — Oil cloths made of horse hair pay the general importation duty.						
All the above articles mixed with other woven materials exclusive of silk; as, wool, or other hair, of animals, cotton, and linen - - -	1	15	-	-	-	{ 22 in chests, 12 in bales.							

N.B. — The duty on wheat, beans, and peas, imported into Prussia from Poland by the Vistula and the Niemen and exported by Dantzic, &c., has recently been raised to 3 silver gros per scheffel; do. on rye, barley, and oats, 2 silver do. Formerly it was only half as much. This increase of duty, intended to operate as a retaliation on Russia, shows pretty conclusively that in commercial affairs Russian indifference does not go for much in Prussia.

**PUBLICANS**, are persons authorised by licence to retail beer, spirits, or wines. Under the term publicans are comprised innkeepers, hotel keepers, alehouse keepers, keepers of wine vaults, &c. An inn differs from an alehouse in this, — that the former is a place intended for the lodging as well as the entertainment of guests, whereas the latter is intended for their entertainment only. If, however, ale or beer be commonly sold in an inn, as is almost invariably the case, it also is an alehouse; and if travellers be furnished with beds, lodged, and entertained in an alehouse, it also is an inn. It is not material to the character of an innkeeper that he should have any sign over his door;

it is sufficient that he makes it his business to entertain passengers and travellers, providing them with lodgings and other accommodations.

1. *Licensing of Publicans.* — The provisions with respect to the licensing of public houses are embodied in the 9 Geo. 4. c. 61., of which we subjoin an abstract.

*General Meetings.* — There shall be annually holden in county divisions, cities, and towns, a special session of justices, to be called the "*General Annual Licensing Meeting*," for the purpose of granting licences to persons keeping or about to keep inns, alehouses, &c.; such meetings to be held, in Middlesex and Surrey, within the first 10 days of the month of March; and in every other place between the 20th of August and the 14th of September, both inclusive.

*Notice of General Meeting.* — Within every division, 21 days before the annual licensing meeting, a petty session of justices to be held, a majority of whom shall fix the day and hour for holding the general annual meeting; and shall direct a precept to the high constable, requiring him, within 5 days after the receipt thereof, to order the petty constables to affix on the door of the church, chapel, or other public place, a notice of such annual meeting, and give or leave at the dwelling-house of each justice acting for the division, and of each person keeping an inn, or who shall have given notice of his intention to apply for a licence to keep an inn, a copy of such notice. — § 2.

The annual meeting may be adjourned, but the adjourned meeting is not to be held on any of the 5 days immediately following the adjournment; and every adjournment to be held in the month of March in Middlesex and Surrey, and in August or September in every other county. — § 3.

*Sessions for Transfer of Licences.* — At the annual meeting, justices to appoint not less than 4 nor more than 8 special sessions, to be held as near as possible at equidistant periods, for the purpose of transferring licences. — § 4.

Notice of holding any adjourned meetings, or of any special session for the transfer of licences, to be given in the same manner and to the same parties as mentioned above. — § 5.

*Justices disqualified.* — No justice who is a common brewer, distiller, maker of malt for sale, or retailer of malt or any excisable liquor, shall act or be present at any annual licensing meeting, or adjournment, or special session for transferring licences, or take part in the adjudication upon any application for a licence, or upon an appeal; nor in the case of licensing any house, of which he is owner, or agent of the owner, or of any house belonging to any common brewer, maker of malt, &c. to whom he shall be, either by blood or marriage, the father, son, or brother, or with whom he shall be partner in any other trade; in any of these cases knowingly or wilfully to act, subjects to a penalty of 100*l*. But disqualification does not arise, where a justice, having no beneficial interest in a house licensed or about to be licensed, holds only the legal estate therein as trustee or for a charitable or public use. — § 6.

When in any liberty, city, or town, 2 qualified justices do not attend, the county justices may act. — § 7.

The power given to county justices not to extend to the Cinque Ports. — § 8.

Questions respecting licences to be determined, and licences to be signed, by a majority of the justices present. — § 9.

*Application for a Licence.* — Persons intending to apply for a licence to a house *not before licensed*, to affix a notice on the door of such house, and on the door of the church or chapel of the parish, and, where there shall be no church or chapel, on some other conspicuous place within the parish, on *three several Sundays*, between the 1st of January and the last day of February in the counties of Middlesex and Surrey, and elsewhere between the 1st of June and the last day of July, at some time between the hours of 10 in the forenoon and 4 in the afternoon, and shall serve a copy of such notice upon one of the overseers of the poor, and upon one of the constables or peace-officers of the parish, within the month of February in the counties of Middlesex and Surrey, and elsewhere within the month of July, prior to the annual meeting; such notice to be in a legible hand, or printed and signed by the applicant. The application must state the Christian and surname of the party, with the place of his residence, and his trade or calling during the 6 months previous to the serving of the notice. — § 10.

*Notice to transfer Licence.* — Persons desirous of transferring a licence, and intending to apply to the next special sessions, must, 5 days previously, serve a notice upon one of the overseers and one of the constables of the parish. Persons hindered, by sickness or other reasonable cause, from attending any licensing meeting, and proof thereof adduced *on oath*, may authorise another person to attend for them. — § 12.

Licences to be in force, in Middlesex and Surrey, from the 5th of April; elsewhere from the 10th of October, for one whole year. — § 13.

*Provision for Death or other Contingency.* — If any person licensed shall die, or become incapable, or a bankrupt or insolvent, or if he or his heirs, executors, or assigns, shall remove or neglect to apply for a continuation of his licence, the justices at special session may grant a licence to the heirs, executors, or assigns of such party, or to any new tenant; or if any man's house should be, or be about to be, pulled down for a public purpose, or rendered, by fire, tempest, or other unforeseen calamity, unfit for the purposes of an inn, licence may be granted to the occupier, if he intend to open another house as an inn. Such transferred licences shall continue only in force to the end of the year; and in case of removal to another house, notice must be given on some Sunday, within 6 weeks before the special session, in the manner and form before described. — § 14.

*Fees for Licences.* — The clerk of the justices may lawfully receive from every person to whom a licence is granted, for trouble and all expenses, the following sums —

For constable or officer serving notices	-	-	-	-	-	s.	d.
For clerk of justices for licence	-	-	-	-	-	1	0
For precept to the high constable, and notices to be delivered by the petty constable	-	-	-	-	-	5	0
	-	-	-	-	-	1	6

Clerks demanding or receiving more than these fees, to forfeit *5*l**. — § 15.

No sheriff's officer, or officer executing the process of any court of justice, qualified to hold or use any licence under this act. — § 16.

*Excise Licences.* — No licence for the sale of any excisable liquors, to be consumed on the premises, shall be granted by the excise to any person, unless such person be previously licensed under this act. — § 17.

*Penalties.* — Any person *without a licence* selling or exchanging, or for valuable consideration disposing of, any excisable liquor by retail, to be consumed in his premises; or *with a licence*, and so selling in premises other than those specified in his licence, shall for every offence, on conviction before 1 justice, forfeit not exceeding 20*l*. nor less than *5*l**. with costs; but the penalty not to attach in case of death or insolvency, and sale by the heir or assigns, prior to the next special sessions. — § 18.

Every licensed person shall, if required, sell all liquors by retail (except in quantities less than a  $\frac{1}{2}$  pint) by the gallon, quart, pint, or  $\frac{1}{2}$  pint, sized according to the standard; in default thereof to forfeit the illegal measure, and pay not exceeding 40*s*. with costs, to be recovered within 30 days before 1 justice. — § 19.

In cases of riot, or probability of riot, houses licensed in the neighbourhood may be closed by the order of 2 justices. — § 20.

Any person convicted of a *first offence*, before 2 justices, against the tenour of his licence, to forfeit not exceeding *5*l**. with costs; guilty of a *second offence* within three years of the first, to forfeit not exceeding 10*l*. with costs; and guilty of a *third offence* within 3 years, to forfeit not exceeding 50*l*. with costs; or

the case in the last instance may be adjourned to the petty sessions, for the annual meeting, or the general quarter sessions; and if the offender is found guilty by a jury, he may be fined 100*l.*, or adjudged to forfeit his licence or both, and rendered incapable of selling any exciseable liquor in any inn kept by him for 3 years. — § 21.

Proceedings at the session in certain cases may be directed by the justices to be carried on by the constable, and the expenses defrayed out of the county rates. — § 22.

Witnesses refusing to attend without lawful excuse may be fined not more than 10*l.* — § 23.

Penalties against justices may be sued for in any court of Westminster; a moiety to the king and a moiety to the party suing. — § 24.

Penalties adjudged by justices may be recovered by distress or the party imprisoned 1, 3, or 6 calendar months. — § 25.

The next sections relate to the mode of prosecuting actions.

The last section of the act bears that the word "*inn*" shall include any inn, alehouse, or victualling house, in which is sold by retail any exciseable liquor, to be drunk or consumed on the premises; and the words exciseable liquor are to include all such fermented or spirituous liquors as may now or hereafter be charged with any custom or excise duty. — § 27.

The act does not affect the Universities, nor the privileges of the Vintners' Company, except those freemen who have obtained their freedom by redemption; and it does not alter the time of granting licences in the city of London.

Innkeepers are bound, by the tenour of their licence, to keep order in their houses, to prevent drunkenness and disorderly conduct, and gambling. If they fail in these respects, they forfeit their licence, and subject themselves to the penalties mentioned before. Allowing seditious or immoral books to be read in an inn, also forfeits the licence, and subjects to penalties. — (39 Geo. 3. c. 79. § 31.)

**2. Duties of Innkeepers.** — Innkeepers are bound by law to receive guests coming to their inns, and they are also bound to protect their property when there. They have no option to reject or refuse a guest, unless their house be already full, or they are able to assign some other reasonable and sufficient cause. Neither can they impose unreasonable terms on such as frequent their houses: if they do, they may be fined, and their inns indicted and suppressed. An innkeeper who has stables attached to his premises, may be compelled to receive a horse, although the owner does not reside in his house; but he cannot, under such circumstances, be compelled to receive a trunk or other dead thing. By the annual Mutiny Act, constables, or, in their default, justices of the peace, may quarter soldiers in inns, livery-stables, alehouses, &c., under the conditions and regulations set forth in the statute.

**3. Responsibility of Innkeepers.** — An innkeeper is bound to keep safely whatever things his guests deposit in his inn, or in his custody as innkeeper; and he is civilly liable for all losses, except those arising from irresistible force, or what is usually termed the act of God and the king's enemies. "It has long been holden," says Sir William Jones, "that an innkeeper is bound to restitution, if the trunks or parcels of his guests, committed to him either personally or through one of his agents, be damaged at his inn, or stolen out of it by any person whatever (except the servant or companion of the guest); nor shall he discharge himself of this responsibility by a refusal to take care of the goods, because there are suspected persons in the house, for whose conduct he cannot be answerable; it is otherwise, indeed, if he refuse admission to a traveller because he really has no room for him, and the traveller, nevertheless, insist upon entering, and place his baggage in a chamber without the keeper's consent. Add to this, that if he fail to provide honest servants and honest inmates, according to the confidence reposed in him by the public, his negligence in that respect is highly culpable, and he ought to answer civilly for their acts, even if they should rob the guests that sleep in their chambers. Rigorous as this law may seem, and hard as it may actually be in one or two particular instances, it is founded on the great principle of public utility, to which all private considerations ought to yield; for travellers, who must be numerous in a rich and commercial country, are obliged to rely almost implicitly on the good faith of innholders, whose education and morals are usually none of the best, and who might have frequent opportunities of associating with ruffians or pilferers, while the injured guest could never obtain legal proof of such combinations, or even of their negligence, if no actual fraud had been committed by them. Hence the prætor declared, according to Pomponius, his desire of securing the public from the dishonesty of such men; and by his edict gave an action against them, if the goods of travellers or passengers were lost or hurt by any means except by inevitable accident (*damno fatali*): and Ulpian intimates, that even this severity could not restrain them from knavish practices or suspicious neglect." — (*Essay on the Law of Bailments*, 2d ed. pp. 95, 96.)

Even if an innkeeper bid the guest take the key of his chamber and lock the door, telling him that he cannot undertake the charge of the goods, still, if they be stolen, he is held to be responsible. In all such cases it is not competent to the innkeeper to plead that he took ordinary care, or that the force which occasioned the loss was truly irresistible. A guest is not bound to deliver the goods in special custody to the innkeeper, nor, indeed, to acquaint him that he has any. If he have property with him, or about his person, the innkeeper must be responsible for it without communication. But the innkeeper may require that the property of his guest be delivered into his hands, in order that it may be put into a secure place; and if the guest refuse, the innkeeper is not liable for its safety. The guest exonerates the innkeeper from liability when he takes upon himself the exclusive custody of the goods, so as to deprive the innkeeper of having

any care over them: thus, if a guest demand and have exclusive possession of a room, for the purpose of a shop or warehouse, he exonerates the landlord from any loss he may sustain in the property which he keeps in that apartment: but it is otherwise if he have not the exclusive possession of the room. The innkeeper cannot oblige the guest to take charge of his own goods; for this, in effect, would be a refusal to admit them into the inn. And it is no excuse for an innkeeper to say that he delivered the key of the chamber whence the property was stolen to the guest, who left the door open. A case of this sort occurred a few years ago, at Brighton. A lady having left the door of her bed-room, of which she had the key, open for a few minutes, 50*l.* were abstracted from her reticule. The innkeeper contended that the plaintiff, by selecting particular apartments, and taking the key, had exonerated him from his liability. The jury found for the plaintiff; and upon a motion for a new trial, Lord Tenterden said,—"By the common law of this country, and also by the civil law, the principle of the liability of innkeepers was founded on two reasons: first, to compel the landlord to take care that no improper company was admitted into his house; and, secondly, to prevent collusion. — The principle, as stated in the civil law, was this — '*Ne, quisquam pulet graviter hoc in eos constitutum esse; nam est in ipsorum arbitrio nequem recipiant; et nisi hoc esset statutum, malicia crederetur cum furibus, adversus eos quos recipiunt, coeundi: cum ne nunc quidem abintestit hujusmodi fraudibus.*' It was true that, in the present state of society, it was very difficult to prevent the intrusion of improper company into inns. But still the principle was such as he had stated it to be, and it would be dangerous to relax it; and he did not think that the taking rooms in this way was sufficient to discharge the landlord. Then, as to the objection that the cases did not extend to money, it was clear that money was as much within the principle as goods, and that no substantial distinction could be made. He was therefore of opinion that the verdict was right." — Rule refused.

A landlord may exempt himself from liability, if he can show that the loss was occasioned by the misconduct of the guest; as, if his goods are stolen by his own servant or companion.

It has been decided that a man is a guest at an inn, if he leave his horse at it, though he has not gone into it himself. If a man come to an inn, and make a contract for lodging for a set time, and do not eat or drink there, he is no guest, but a lodger, and, as such, not under the innkeeper's protection; but if he eat and drink, or pay for his diet there, it is otherwise. Any innkeeper or alehouse keeper, knowingly receiving and harbouring any person convicted of an offence against the revenue laws, for which he has been in prison, or for which he has fled, shall forfeit 100*l.*, and have no licence for the future.

4. *Remedy of an Innkeeper against His Guest.* — An innkeeper may, without any agreement to that effect, detain the person of a guest who has eaten in his house, until payment; and he may do the same by the horses in his stable.

An innkeeper is not entitled to recover for spirits supplied to his guests, of the value of 30*s.* and upwards, unless supplied or contracted for at one time. — (33 *Geo.* 2. c. 40.)

By the custom of London and Exeter, if a man commit a horse to an hostler, and the expense of his keep become equivalent to his price, the hostler may appropriate the horse to himself upon the appraisal of four of his neighbours, or may have him sold. But innkeepers in other parts of the country have no power to sell horses detained by them.

A horse committed to an innkeeper cannot be detained as a security for the board of his master.

It is enacted by 11 & 12 Will. 3. c. 15. that innkeepers, alehouse keepers, &c., refusing to specify in an account the number of pints or quarts for which demand is made, or selling in unmarked measures, shall have no power to detain any goods or other things belonging to the person from whom demand is made, but shall be left to their action for recovery of the same.

**PUMICE-STONE** (Ger. *Bimstein*; Fr. *Pierre ponce*; It. *Pietra pomice*; Sp. *Piedra pomez*; Lat. *Pomez*), a light, spongy, vitreous stone, found usually in the neighbourhood of volcanoes. It is used for polishing metals and marble, and smoothing the surface of wood and pasteboard. It is said to form a good glaze for pottery. The lighter pumice stones swim on water, their specific gravity not exceeding .914. The island of Lipari, in the Mediterranean, is chiefly formed of pumice stone, and may be said to be the magazine whence all Europe is supplied with this useful article. There are several species of pumice stones; but those only that are light and spongy are exported. The price varies in the London market from 8*l.* to 10*l.* a ton.

**PUTCHOCK.** An article of this name is imported in considerable quantities from the north-west coast of India into China, and is regularly quoted in the Canton price currents. It is the root of a plant that grows abundantly in Sindh. When burned, it yields a fine smoke, and a grateful and diffusive smell. The Chinese beat it into a fine powder, which they burn as incense in the temples of their gods. — (*Hamilton's New Account of the East Indies*, vol. i. p. 126.)

## Q.

**QUARANTINE**, a regulation by which all communication with individuals, ships, or goods, arriving from places infected with the plague, or other contagious disease, or

supposed to be peculiarly liable to such infection, is interdicted for a certain definite period. The term is derived from the Italian *quaranta*, forty; it being generally supposed, that if no infectious disease break out within 40 days, or 6 weeks, no danger need be apprehended from the free admission of the individuals under quarantine. During this period, too, all the goods, clothes, &c. that might be supposed capable of retaining the infection, are subjected to a process of purification. This last operation, which is a most important part of the quarantine system, is performed either on board ship, or in establishments denominated *lazarettos*. — (See *post*.)

*Policy of Quarantine.* — The regulations as to quarantine are entirely precautionary; they have their origin in the belief that various diseases, but especially the plague, are contagious; and supposing such to be the case, the propriety of subjecting those coming from an infected or suspected place to a probation is obvious. Indeed, no government could, until the belief in question be proved to be ill founded, abstain from enforcing precautionary measures, without rendering itself liable to the charge of having culpably neglected one of its most important duties, — that of providing, by every means in its power, for the safety of its subjects. Latterly, however, it has been contended that the plague is never imported; that it is always indigenous; originating in some peculiar state of the atmosphere, or in something peculiar in the condition of the people; and that, consequently, quarantine regulations merely impose a heavy burden on commerce, without being of any real utility. But though there does not seem to be any reason for doubting that infectious diseases have originated in the way described, the fact that they have, in innumerable instances, been carried from one place to another, seems to be established beyond all question. Even if the evidence as to the importation of infectious diseases were less decisive than it is, or the opinions of medical men more divided, it would not warrant the repeal of the restraints on the intercourse with suspected ports. This is not a matter in which innovations should be rashly introduced; wherever there is doubt, it is proper to incline to the side of security. In some cases, perhaps, quarantine regulations have been carried to a needless extent; but they have more frequently, we believe, been improperly relaxed.

*Institution of Quarantine.* — The notion that the plague was imported from the East into Europe, seems to have prevailed in all ages. But it would appear that the Venetians were the first who endeavoured to guard against its introduction from abroad, by obliging ships and individuals from suspected places to perform quarantine. The regulations upon this subject were, it is most probable, issued for the first time in 1484. — (*Beckmann, Hist. of Invent.* vol. ii. art. *Quarantine*.) They have since been gradually adopted in every other country. Their introduction into England was comparatively late. Various preventive regulations had been previously enacted; but quarantine was not systematically enforced till after the alarm occasioned by the dreadful plague at Marseilles in 1720. The regulations then adopted were made conformably to the suggestions of the celebrated Dr. Mead, in his famous "Discourse concerning Pestilential Contagion."

*Lazarettos or Pest-houses* are establishments constructed to facilitate the performance of quarantine, and particularly the purification of goods. They have usually a port in which ships from a suspected place may anchor; and, when perfect, are provided with lodgings for the crews and passengers, where the sick may be separated from the healthy; and with warehouses, where the goods may be deposited; all intercourse between the lazaretto and the surrounding country being, of course, interdicted, except by permission of the authorities. The lazarettos at Leghorn, Genoa, and Marseilles are the most complete of any in Europe. The facilities they afford to navigation are very great; for, as ships from suspected places may discharge their cargoes in the lazaretto, they are not detained longer than they would be were there no quarantine regulations. The goods deposited in the lazaretto, being inspected by the proper officers, and purified, are then admitted into the market.

Compared with these, the quarantine establishments in this country are exceedingly defective. There is not, even in the Thames, a lazaretto where a ship from a suspected place may discharge her cargo and refit: so that she is detained, frequently at an enormous expense, during the whole period of quarantine; while, if she have perishable goods on board, they may be very materially injured. It is singular that nothing should hitherto have been done to obviate such grievances. The complaints as to the oppressiveness of quarantine regulations are almost wholly occasioned by the want of proper facilities for its performance. Were these afforded, the burdens it imposes would be rendered comparatively light; and we do not know that many more important services could be rendered to the commerce of the country, than by constructing a proper quarantine establishment on the Thames.

*Bills of Health.* — The period of quarantine varies, as respects ships coming from the same place, according to the nature of their bills of health. These are documents, or certificates, signed by the consul or other competent authority in the place which, the

ship has left, describing its state of health at the time of her clearing out. A *clean* bill imports that at the time of her sailing, no infectious disorder was known to exist. A *suspected*, or, as it is more commonly called, a *touched* bill, imports that rumours were afloat of an infectious disorder, but that it had not actually appeared. A *foal* bill, or the *absence of clean bills*, imports that the place was infected when the vessel sailed. — (See *BILLS OF HEALTH*.) The duration of the quarantine is regulated by the nature of these instruments. They seem to have been first issued in the Mediterranean ports in 1665, and are obviously of great importance.

**Quarantine Regulations.** — The existing quarantine regulations are embodied in the act 6 Geo. 4. c. 78., and the different orders in council issued under its authority. These orders specify what vessels are liable to perform quarantine; the places at which it is to be performed; and the various formalities and regulations to be complied with. The publication in the *Gazette* of any order in council with respect to quarantine is deemed sufficient notice to all concerned; and no excuse of ignorance is admitted for any infringement of the regulations. To obviate, as far as possible, any foundation for such plea, it is ordered that vessels clearing out for any port or place with respect to which there shall be at the time any order in council subjecting vessels from it to quarantine, are to be furnished with an abstract of the quarantine regulations; and are to furnish themselves with quarantine signal flags and lanterns, and with materials and instruments for fumigating and immersing goods. The following are the clauses in the act as to signals: —

Every commander, master, or other person having the charge of any vessel liable to quarantine, shall, at all times, when such vessel shall meet with any other vessel at sea, or shall be within 2 leagues of the coast of the U. Kingdom, or the islands of Guernsey, Jersey, Alderney, Sark, or Man, hoist a signal to denote that his vessel is liable to quarantine; which signal shall in the day time, if the vessel shall have a clean bill of health, be a large yellow flag, of 6 breadths of bunting, at the main-topmast-head; and if such vessel shall not have a clean bill of health, then a like yellow flag, with a circular mark or ball, entirely black, in the middle thereof, whose diameter shall be equal to 2 breadths of bunting; and in the night time, the signal shall in both cases be a large signal lantern with a light therein (such as is used on board his Majesty's ships of war), at the same mast-head: and such commander, master, or other person, shall keep such signals hoisted during such time as the said vessel shall continue within sight of such other vessel, or within 2 leagues of the said coast or islands, and while so in sight, or within such distance, until such vessel so liable to quarantine shall have arrived at the port where it is to perform quarantine, and until it shall have been legally discharged from the performance thereof; on failure whereof, such commander, master, or other person shall forfeit 100*l*. — § 8.

Every commander, master, or other person having the charge of any vessel on board whereof the plague or other infectious disease highly dangerous to the health of his Majesty's subjects shall actually be, shall at all times, when such vessel shall meet with any other vessel at sea, or shall be within 2 leagues of the coast of the U. Kingdom, or the islands of Guernsey, Jersey, Alderney, Sark, or Man, hoist a signal, to denote that a vessel has the plague or other infectious disease; which signal shall be in the day time a flag of yellow and black, borne quarterly, of 8 breadths of bunting, at the main-topmast-head; and in the night time, the signal shall be 2 large signal lanterns, commonly used on board ships of war, one over the other, at the same mast-head: and such commander, master, or other person shall keep such signal hoisted during such time as the said vessel shall continue within sight of such other vessel, or within 2 leagues of the coast or islands aforesaid, while so in sight, or within such distance, until such vessel shall have arrived at the port where it is to perform quarantine, and until it shall have been legally discharged from the performance thereof; on failure whereof, such commander, master, or other person shall forfeit 100*l*. — § 9.

If any commander, master, or other person, knowing that the same is not liable to the performance of quarantine, shall hoist such signal, by day or night, such commander or other person shall forfeit 50*l*. — § 10.

But, instead of printing the act, and the various orders in council that have grown out of it, it will be sufficient to lay the following abstract of them before the reader. This abstract has been prepared by the Custom-house; and contains a distinct summary of the various rules and regulations to be complied with.

#### ABSTRACT OF QUARANTINE REGULATIONS.

It is in the first place to be observed, that all persons are presumed to know and are bound to take notice, not only of the quarantine regulations established by act of parliament (as they are of any other public act), but likewise of every order in council made for the performance of quarantine, and published in the *London Gazette*; and as it is easily in their power to inform themselves of such regulations, and particular care is taken by this and other means to promulgate such of them as apply to their respective situations, *previously to their being actually put under quarantine*, when they will receive directions for their guidance from the quarantine officers, no plea of ignorance will be admitted as an excuse for any neglect, breach, or violation thereof; but, for the sake of example, and for the security of the public health, the pains, penalties, and punishments of the law will be enforced with the utmost severity.

#### Duty of Commanders and Masters of Vessels.

Upon arrival off the coast of the U. Kingdom, or the islands of Guernsey, Jersey, Alderney, Sark, or Man,

To deliver to the pilot who shall go on board, a written paper, containing a true account of the name of the place at which his ship loaded, and of all the places at which he touched on the homeward voyage. Neglecting or refusing to deliver such papers, or making any false representation or wilful omission therein, subjects him to a penalty of 100*l*.

Upon entering or attempting to enter any port, and being spoke by any quarantine officers,

To give a true answer in writing or otherwise, and upon oath or not upon oath (according to what shall be required), to the preliminary questions put to him by such quarantine officer, for the purpose of ascertaining whether his vessel is or is not liable to quarantine. Neglecting or refusing to bring his vessel to as soon as it can be done with safety, in obedience to the regulation of the quarantine officer, subjects him to a penalty of 100*l*.

Refusing to answer such questions, or giving any false answer thereto (if not upon oath), subjects him to a penalty of 200*l*.

If upon oath, to the punishment for wilful and corrupt perjury.

If any infectious disease shall appear on board, the master is to repair to such place as his Majesty shall direct, and make known his case to the officer of customs, and he is to remain at that place until directions are given by the Lords of the Privy Council. He is not to permit any of the crew or passengers on board to go on shore, and he, his crew and passengers, are to obey such directions as are received from the Lords of the Privy Council.

Not acting in conformity to the regulations herein directed, or acting in disobedience to such directions as shall be received from the privy council, he incurs the penalty of 100*l*.

If informed by the pilot that his vessel has become liable to quarantine, by reason of any proclamation made subsequent to his departure, to hoist and keep hoisted a like signal, under the same penalty of 100*l*.

To give to the pilot coming on board a written paper containing a true account of the different articles composing his cargo. Neglecting or refusing to do so, or making a false representation or wilful omission, subjects him to a penalty of 50*l*.

Masters of vessels liable to quarantine, and other persons on board them or having communication with them, are to repair to the appointed quarantine stations, and may be compelled to do so by force.

The master of any vessel having disease on board, on meeting with any other vessel at sea, or within 2 leagues of the coast of the U. Kingdom, or the Islands of Guernsey, Jersey, Alderney, Sark, or Man, is to hoist a signal to denote that his vessel has such disease on board, and is to keep such signal hoisted during such time as he shall continue within sight of such vessel, or within 2 leagues of the coast or islands aforesaid, while so in sight or within such station, until the vessel shall arrive at the port where she is to perform quarantine, and until she shall be legally discharged from the performance thereof. Failing herein, the master incurs the penalty of 100*l*.

If he shall refuse or omit to disclose the circumstances of such infection prevailing either at any place at which he has been, or on board his vessel, in his answers to the preliminary questions put to him by the quarantine officer, or if he shall wilfully omit to hoist, and to keep hoisted, the proper quarantine signal to denote that his ship is liable to quarantine, he incurs the penalty of 300*l*.

Upon attempting to enter any port, which is not the port at which he ought to perform quarantine, he may be compelled to desist therefrom, in order that he may proceed to the proper quarantine ports, by guns being fired upon the ship, or any other kind of force being used that may be necessary for the attainment of that object.

Quitting or knowingly suffering any seamen or passenger to quit his ship, by going on shore, or by going on board any other vessel or boat, before discharged from quarantine, or

Not repairing to the proper quarantine station within a convenient time after due notice given, incurs a penalty of 100*l*.

To repair in all cases to the proper quarantine port, as herein-after stated in the Appendix, according as he shall or shall not be furnished with a clean bill of health, and according to the port or place to which he shall be bound, as herein stated.

But if through ignorance, or by stress of weather, damage, loss, or accidents of the seas, he shall have passed the proper quarantine port, he may having a clean bill of health on board, and upon giving satisfactory proof thereof upon oath, and by the oath of the pilot, if any on board, and that the same was not wilfully or intentionally done or occasioned, be permitted to proceed to some other quarantine port, in the discretion of the quarantine officer, keeping the proper quarantine signal hoisted during the whole time.

Upon his arrival at the proper quarantine port, to give true answers upon oath to all the quarantine questions, and to make oath to the truth of his log-book, and the times at which the entries were therein made: failing herein, he incurs the penalty of wilful and corrupt perjury.

He is also to repair to the particular station which shall be appointed by the quarantine officer for the said ship or vessel.

To deliver up to the quarantine officer his bill of health, manifest, log-book, and journal.

Wilfully refusing or neglecting so to do, subjects him to a penalty of 100*l*.

If not bound to any port of the U. Kingdom, or the islands aforesaid, and attempting to enter any port thereof (except to wait for orders, or in consequence of stress of weather or accidents of the seas), he shall give satisfactory proof thereof to the quarantine officer, and give true answers upon oath to the preliminary questions, and strictly conform to all such directions as he shall receive from the quarantine officer, touching his continuance at such port, or departure from thence, or repairing to any other; and also with respect to all other quarantine regulations; in default of which, he may be compelled to proceed to sea by any means or by any kind of force that shall be necessary for that purpose.

Having performed quarantine in any foreign lazaret, the vessel is to be put under quarantine at some of the ports herein-after appointed, until the master shall produce to the quarantine officer the proper documents in proof thereof; upon production whereof the said vessel shall not be obliged to perform quarantine, but shall remain at such station until released by order in council.

Unshipping, or moving in order to unship, any goods from on board any vessel liable to quarantine, subjects to a penalty of 500*l*.

Claudestinely conveying, or secreting or concealing for the purpose of conveying, any letter, goods, or other articles, from any vessel actually performing quarantine, subjects to a penalty of 100*l*.

*Note.*— Every commander or master of any vessel clearing out or about to sail for any port or place in the Mediterranean, or in the West Barbary on the Atlantic Ocean, or for any port or place respecting which there shall at the time be any order of his Majesty in council in force, subjecting vessels coming from thence to quarantine, is to receive from the principal officer of the customs at such port or place, this printed Abstract of the Quarantine Regulations, which such commander or master is to cause to be affixed on some convenient and conspicuous part of his said vessel, and to remain so affixed until his return with his said vessel to some port or place in the U. Kingdom or the islands aforesaid.

And every such commander and master is likewise to provide and take on board 1 at least of each of the proper quarantine signal flags and lanterns, and likewise materials and instruments for fumigation and immersion, and to keep the same on board, to be used upon his return to the U. Kingdom or the islands aforesaid.

#### *Duty of Pilots.*

Pilots are strictly to observe the following directions:—

To receive an account in writing from every commander or master of any vessel coming from foreign parts, of the places at which his vessel loaded, and at which he touched on his said homeward voyage.

To give notice to such commander or master of any proclamation, or order in council, made after the departure of such vessel from the U. Kingdom or the islands aforesaid, and then in force, by which vessels coming from any place mentioned in such account shall be liable to quarantine. Neglecting or omitting to give such notice subjects them to a penalty of 100*l*.

To give a like notice of any proclamation then in force, by which vessels having on board any of the articles mentioned in the master's account shall be liable to quarantine. Neglecting or omitting to give such notice subjects them to a penalty of 100*l*.

To remain on board in the same manner as any of the officers, crew, or passengers, and not to quit the said vessel before or after the arrival, either by going on shore, or by going on board any other vessel or boat with intent to go on shore, until she is regularly discharged from quarantine; and they may be compelled by any persons whatsoever, and by any kind of necessary force, to return on board the same. If they offend herein, they incur a penalty of 300*l*. and 6 months' imprisonment.

Not to bring any such vessel into any port or place other than the port or place appointed for the reception of vessels so liable to quarantine as stated in the Appendix, unless compelled by stress of weather, adverse winds, or accidents of the sea, of which the pilot, as well as the commander or master of the vessel, is to give satisfactory proof upon oath. If they offend herein, they incur a penalty of 300*l*. To bring the ship to, as soon as it can be done with safety, in obedience to the requisition of the quarantine officer. Failing herein subjects them to a penalty of 100*l*.

#### *Duty of other Persons.*

When any infectious disease actually appears on board any vessel, all persons on board are to obey the direction of the privy council, under a penalty of 100*l*.

Not to quit such vessel, either by going on shore, or by going on board any other vessel or boat with intent to go on shore, until regularly discharged from quarantine; and if they quit the ship, they may be compelled by any persons whatsoever, and by any kind of necessary force, to return on board the same; and are also liable to a penalty of 300*l*. and 6 months' imprisonment.

Whether liable to quarantine, or actually performing quarantine, or having had any intercourse or communication with any such persons so liable to or under quarantine, all persons are to obey all such orders as they shall receive from the quarantine officer, and to repair to the lazaret, vessel, or place appointed for the performance of quarantine. Willfully refusing or neglecting to repair forthwith, when required so to do by such officers, or escaping from or out of such lazaret, vessel, or place may be compelled to repair or return thereto by any kind of necessary force, and are subject to a penalty of 300*l*.

Landing or unshipping, or moving in order to the landing or unshipping, of any goods, packets, packages, baggage, wearing apparel, books, letters, or any other articles whatever, from vessels liable to quarantine, are liable to a penalty of 500*l*.

Clandestinely conveying, or secreting or concealing for the purpose of conveying, any goods, letters, or other articles as aforesaid, from any vessel actually performing quarantine, or from the lazaret or other place where such goods or other articles shall be performing quarantine, are liable to a penalty of 100*l*.

Having quitted or come on shore from any vessel liable to or under quarantine, or having escaped from any lazaret or other place appointed in that behalf, may be seized and apprehended by any constable or other peace officer, or by any other person whatever, and carried before a Justice of the peace, who may grant his warrant for conveying such person to the vessel, lazaret, or other place from which he shall have escaped, or for confining him in any place of safe custody (not being a public gaol) until directions can be obtained from the privy council.

Knowingly and wilfully forging or counterfeiting, interlining, erasing, or altering, or procuring to be forged, &c., any certificate directed by any order in council touching quarantine, or publishing the same as true, or uttering any such certificate with intent to obtain the effect of a true certificate, knowing its contents to be false, are guilty of felony.

#### *What Vessels are liable to Quarantine.*

All vessels (as well ships of war as all others) with or without clean bills of health, coming — From or having touched at any place in the Mediterranean, or the West Barbary on the Atlantic Ocean.

From any other place from which his Majesty shall from time to time adjudge it probable (and shall so declare by proclamation or order in council) that the plague, or any other infectious disease or distemper highly dangerous to the health of his Majesty's subjects, may be brought.

*Note.*—They are considered as liable to quarantine from the time of their leaving any of the said places.

All vessels having communication with any of the before-mentioned ships or vessels, or receiving —

Any person whatever from or out of such vessel, whether such person shall have come from any of the said places, or shall have gone on board of such vessel, either in the course of her voyage, or upon her arrival off the coast of the U. Kingdom, &c. — Or,

Any goods, wares, or merchandise, packets, packages, baggage, wearing apparel, goods, letters, or any other articles whatever, from or out of such ship or vessel.

*Note.*—They are liable to quarantine from the time of their receiving any such persons or goods.

All vessels coming from any port or place in Europe without the Straits of Gibraltar, or on the continent of America, and having on board —

Any of the articles enumerated (a list of which articles see in the Appendix); And not producing a declaration upon oath, made by the owner, proprietor, shipper, or consignee, stating either that such articles are not the growth, produce, or manufacture of Turkey, or of any place in Africa within the Straits of Gibraltar, or in the West Barbary on the Atlantic Ocean, or stating of what place they are the growth, produce, or manufacture.

All vessels and boats receiving —

Any of the said goods, wares, and merchandise, or other articles enumerated.

#### *Signals.*

For vessels with the plague or other highly infectious disease actually on board —

In the day time — A flag of yellow and black, byrne quarterly, of 8 breadths of bunting, at the main-topmast-head.

In the night time — Two large signal lanterns, with a light therein, such as are commonly used on board his Majesty's ships of war, one over the other, at the same mast-head.

For vessels with clean bills of health —

In the day time — A large yellow flag, of 6 breadths of bunting, at the main-topmast-head.

In the night time — A large signal lantern, with a light therein, such as is commonly used on board his Majesty's ships of war, at the same mast-head.

For vessels without clean bills of health —

In the day time — A large yellow flag, with a circular mark or ball, entirely black, in the middle thereof, whose diameter shall be equal to 2 breadths of bunting, at the main-topmast-head.

In the night time — Same as for vessels with clean bills of health.

*Note.*—Every commander or master of a vessel about to sail for the Mediterranean, or for any place respecting which an order in council shall be in force, subjecting vessels coming from thence to quarantine, to be provided with the quarantine signals above mentioned, and to keep the same on board, to be used on his return to the U. Kingdom.

Any commander or master hoisting either of the said quarantine signals, by day or night, knowing that his vessel is not liable to quarantine, incurs a penalty of 50*l*.

#### *APPENDIX. — A List of Articles enumerated considered as most liable to Infection.*

Apparel of all kinds  
Artificial flowers  
Bast or any articles made thereof  
Beads, bracelets, or necklaces in strings  
Beds and bed ticks  
Books  
Rooms of all kinds  
Brushes of all sorts  
Hurdets  
Lanterns

Canvass  
Carmine wood  
Carpets  
Corlars not tarred  
Cotton wool  
Cotton yarn  
Cotton thread  
All articles wholly made of or mixed with cotton, silk, wool, thread, or yarn  
Down

Feathers  
Flax  
Furriers waste  
Goats' hair  
Gold or silver on thread, cotton, hair, wool, or silk, or any other substance heretofore mentioned  
Groggins  
Hats, caps, or bonnets of straw, cloth, case, or any other material

Hemp  
Hoods  
Horn and horn tips  
Hair of all sorts  
Leather  
Linen  
Lute strings, bathings or hary strings  
Mats  
Mattresses  
Mats and matting  
Mohair yarn  
Nets new or old  
Paper

Packthread  
Parchment  
Pelts  
Plaiting of bast, chip, cane, straw, or horse hair  
Quills  
Rags  
Sails and sail cloths  
Silk, viz.—crapes, and tiffanies, frisks and knuba, raw silk, thrown and orgazine silk, waste silk, wrought silk  
Skins, hides, and furs, and parts or pieces of skins, hides, and furs, whether un-

dressed, or in part or wholly tanned, tawed, or dressed  
Sponges  
Straw, or any article made or mixed with straw  
Stockings of all sorts  
Thread, tow, vellum, whisks, wool whether raw or anywise wrought  
Yarn of all sorts  
And all other goods whatsoever, if they shall have arrived in or with packages consisting wholly or in part of any of the said articles.

**QUARANTINE PORTS.**—*For Vessels liable to Quarantine not coming from any Place actually infected, nor having any Infection actually on Board.*

*Without clean Bills of Health.*

All vessels, ships of war, &c., herein-after specified, to perform quarantine at *Stangate Creek* or *Milford Haven*.  
Ships of war, transports, or other ships in the actual service of government, under the command of a commissioned officer in the service of his Majesty's navy, whithersoever bound, to perform quarantine at the *Motherbank*, near *Portsmouth*, at a place marked out by yellow buoys.

*With clean Bills of Health.*

All ships and vessels bound to the following places, to perform quarantine at *Stangate Creek* :—  
London, Rochester, Faversham, or any creeks or places belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *Whitehead Road*, between *Hull* and *Grimby* :—

Leigh	Wl-beach
Maldon	Boston
Colchester	Grimby
Harwich	Hull
Ipswich	Bridlington
Woodbridge	Warborough
Aldborough	Whitby
Southwold	Stockton
Yarmouth	Nunderland
Blackney and Clay	Newcastle
Wells	Barwick
Lynn	

And any creeks or places belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *Bombard's Pool* near *Liverpool*, or *Milford Haven* :—

Carlisle	Liverpool
Whitehaven	Chester
Lancaster	Besmaris
Preston	Isle of Man

And any creeks or places belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at the *Motherbank*, near *Portsmouth* :—

Bandwich	Arundel
Dual	Chichester
Dover	Portsmouth
Rye	Southampton
Newhaven	Covea
Shoreham	

And any creeks or places belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *St. Just's Pool*, within the mouth of the harbour of *Falmouth* :—

Poole	Poole
Weymouth	Falmouth
Lyme	Gweek
Exeter	Penryn
Dartmouth	Truro
Plymouth	Fenance
Loce	Scilly

And any creeks or places belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *King Road* and *Portsmouth Hill* :—

Bridgewater	Chepstow
Minehead	Cardiff
Bristol	Swansea
Gloucester	

And any creeks or places belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *Milford Haven* :—

St. Ives	Jennally
Pedestow	Pembroke
Bideford	Milford
Barnstaple	Cardigan
Ilfracombe	Aberystwith

Or any creeks or places belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at the *Motherbank*, near *Portsmouth*, or *St. Just's Pool*, within the mouth of the harbour of *Falmouth* :—

Jersey	Sark
Guernsey	Alderney

Or either of them, or any part of them, or either of them.

All ships and vessels bound to the following places, to perform quarantine at *Inverchilling Bay* :—

The eastern coasts of Scotland, comprehending the ports of Leith	Arneruther
Barrowstoness	Preemans
Alton	Dundee
Sanbar	Perth
Kirkcaldy	Montrose
	Aberdeen

Or any member, creek, or other place belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *Holy Loch*, in the *Firth of Clyde* :—

The western coast of Scotland, comprehending the ports of Glasgow	Rathay
Glasgow	Port William
Greenock	Ayr
Irvine	Port Patrick
Campbell Town	Stranraer
Oban	Wigtown

Or any member, creek, or other place belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *Inverchilling Bay* :—

The northern ports of Scotland, comprehending the ports of Inverness	Orkney
	Caithness
	Sornaway
	Zetland

Or any member, creek, or other place belonging to or within any or either of the above ports.

All ships and vessels bound to the following places, to perform quarantine at *Holy Loch*, in the *Firth of Clyde* :—

The south-west ports of Scotland, comprehending the ports of Dumfries and Kircudbright, or any member, creek, or other place belonging to or within any or either of the above ports.

*Preliminary Questions.*

1. What is the name of the vessel, and the name of the commander or master?
2. Are you the commander or master? Where does she belong?
3. From whence do you come?
4. To what place are you bound?
5. At what ports have you touched since you left the port of your lading on your homeward voyage?
6. What vessels have you had intercourse or communication with on your passage, and from whence did they come?
7. Did the plague or any other infectious disease or distemper prevail in any degree at the place from whence you sailed on your homeward voyage or at any of the places at which you have touched? If at any, say at which, and when? Are any persons on board your ship suffering under any infectious disease? or have any persons died or been ill of a disease of that nature on the homeward passage? and if any, what number? And if any have died or been ill of such disease, were their bedding and clothes destroyed?

[If the vessel shall have sailed from any port in Europe without the Straits, or on the continent of America.]

8. Have you on board any goods enumerated in this list [Handing up a list of articles enumerated.]

If you have, specify the same, and whether they are of the growth, produce, or manufacture of Turkey, or of any place in Africa within the Straits of Gibraltar, or in the West Indies, or the Atlantic Ocean, or of what other place? Have you any declaration to prove of what place they are the growth, produce, or manufacture?

[If the vessel comes from the Mediterranean, or from any other place respecting which there is any order in council in force concerning quarantine.]

9. Have you any, and what bill of health?
10. What number of officers, mariners, and passengers have you on board?
- [And in cases of vessels coming from or having touched at any port or place on the continent of America, or the islands adjacent thereto, or coming from or having touched at any ports in the West Indies, the following questions are to be put, in addition to the aforesaid questions:]
11. In the course of your voyage have any persons on board suffered from sickness of any kind? What was the nature of such sickness? and when did it prevail? How many persons were affected by it? and have any of them died in the course of the voyage?
12. How long after sailing from your port of lading, or having touched at any port on the continent of America or the islands adjacent thereto, or any of the ports in the West Indies, was the first appearance of disease observed?
13. How had the persons attacked been employed before they came on board?
14. Had they been employed in loading or unloading the vessel before they left the port?
15. Had the place which they inhabited, before they sailed, the reputation of being healthy? or was it subject particularly to the fever incident to the country?
16. Had the fever been frequent in the place before the vessel sailed?
17. Did the persons who were ill on board your vessel fall sick nearly about the same time, or within a few days of each other? Or, did the disorder spread successively from one to another, and increase considerably? Or, did it abate gradually, and come to multiply as the distance from the ports you sailed from or touched at as aforesaid increased?
18. What was the greatest number of persons ill at the most sickly period of your voyage?
19. What was the whole number of persons on board your vessel when you sailed?
20. What is the whole number of persons now ill on board your vessel?

21. Can you state what were the symptoms of illness with which your crew were first attacked; and what was the daily succession and change in them till their death?
22. Whether any and what medicines have been used? and what methods have been adopted to prevent its spreading among the crew which you took in the cargo you have now on board?
23. Whether attention has been paid to cleanliness and ventilation on board your vessel?
24. When did you sail from the port or place from whence you took on board your outward cargo? and at what place did you touch before you arrived at the port or place where you took in your present cargo?
25. Did you carry any bill of health with you to the port or place where you took in the cargo you have now on board? From what place? Were the said bills of health clean, unclean, or suspected?

#### Quarantine Questions.

1. What is the name of the vessel, and the name of her commander or master?
2. Are you the commander or master?
3. To what port or place does she belong?
4. When did you sail from the port or place from whence you took on board your outward cargo? and at what place did you touch before you arrived at the port or place where you took in your present cargo?
5. Did you carry any bill or bills of health with you to the port or place where you took in the cargo you have now on board? From what place? Were the said bills of health clean, unclean, or suspected?
6. From what port or place does she now come? When did you sail from such port or place? and at what place or places have you taken in the cargo you have now on board?
7. Have you any bill or bills of health on board? From what place or places? Are the same clean, unclean, or suspected? Produce them.
8. If the vessel shall have sailed from any port or place in Europe without the Straits, or on the continent of America.
9. Of what articles does your cargo consist? Have you on board any goods enumerated in this list?  
[Handing up a list of articles enumerated.]  
If you have, specify the same, and whether they are of the growth, produce, or manufacture of Turkey, or of any place in Africa, within the Straits of Gibraltar, or in the West Indian or the Atlantic Ocean, or of what other place. Have you any declaration to prove of what place they are the growth, produce, or manufacture?
10. At what place or places was the cargo or any part thereof taken on board? On what day did you arrive at the place or places where you took in the whole, or any and what part of the cargo? And on what day did you sail from such place or places? And what part of your cargo was taken in at each place, and when?
11. Did the plague or any other infectious disease or distemper prevail in any degree at the place from whence you sailed, or at any of the places at which your cargo was taken on board, or at which you touched? If at any, say at which, and when.
12. Did you hear of any report, or are you aware of any suspicion having existed, at the time of your sailing, that the plague or any other infectious disease prevailed at the place from whence you sailed, or at any other place in the Mediterranean (or in America or the West Indies, as the case may be)?
13. What number of officers, mariners, passengers, or other persons have you on board? Describe the number of each.
14. At what port did you take on board your passengers?
15. Were they residents at that place, or did they, been embarked as passengers on board any other vessel from any other place? and from what place, and at what time?
16. Do the said officers, mariners, passengers, and other persons consist of the same individuals as were on board at the port from which you sailed upon your homeward voyage? If any other persons have been taken on board, or if any of your officers, crew, or passengers, have quitted your vessel since you sailed from such port, or before your arrival at this place, or if any other alterations in that respect have taken place, specify the same, the causes and the time or times of such alterations.

17. Have any of your officers, mariners, or other persons of your crew, who sailed with you on your outward voyage, died or left the vessel?
18. In the course of your voyage outwards or homewards, or at any port at which you have touched, have any persons on board suffered from sickness of any kind? What was the nature of such sickness? When did it prevail? How many persons were affected by it? Are there any complaints on board? Or, are all persons on board at present in good health?
19. Were any of those who died, or who have been sick in the course of the voyage, or any part at which you have touched, afflicted, or suspected to have been affected, by any infectious disease or distemper? Were the bedding and clothes of such diseased and sick persons destroyed? If so, when and in what manner were any of the persons immediately employed about the sick afterwards taken ill? If so, of what disease? and in how many days after having been so employed?
20. At what precise time did such deaths happen? In how many days after being so employed? and how many persons were the most obvious appearances of the disease?
21. Have you spoken to or otherwise had any communication with any vessels at sea, during the voyage? What was the nature of such communication? and at what place did they belong? From what ports or places were they coming, or at what ports or places had they touched at their voyage? and to what country, ports, or places were they bound? What did you know respecting the state of health on board such vessels?
22. Have there been any letters, parcels, or other articles delivered out of or received on board, from any vessel, or boat met with on the voyage, or before or since your arrival at this place? And what were such letters, parcels, or articles? And where were the same delivered or received? and into or out of what vessel or boat?
23. Have you any packages or parcels which you have taken charge of? If so, what are their contents? and where did you take them on board?
24. Did you see or hear of, or have the shores of the Kingdom, or from the islands of Sicily, Guernsey, Jersey, Alderney, Sark, or Man, have been or are now on board your vessel, or have had any communication whatever with the ship's commander, or any of the passengers, during the voyage homewards, or before or since your arrival at this place? If any such pilots or other persons have come on board, and have afterwards quitted your vessel, specify the names of such persons, and the time, manner, and circumstances of their so quitting your vessel.
25. Did you leave any British vessels at any of the ports you sailed from? If you did, mention their names and the names of their commanders.
26. Were such vessels loading? were they near their departure? and whither were they bound?
27. Did you meet with any British vessels at any of the places you touched at? If you did, say where, whence, and what were the names and destinations of such vessels; and at what ports or places did they belong?
28. Do you know whether any foreign vessels loading at the port from which you sailed, were bound beyond the limits of Gibraltar? And if so, what were they? and whither were they bound?
29. Do you know whether any person whatsoever employed in loading your vessel, or in bringing any articles ashore, or in any communication, or in any manner, or in any way, was ill during such employment or communication? or whether, by the absence of such person or persons in the course of such employment, any suspicion was entertained of that person or persons? If so, specify the same.
30. Do you know whether or not your cargo, or any part thereof, had been long in warehouse before its being taken on board? If you do, say how long. Have you any knowledge of its being packed or handled on shore, or conveyed on shore, or stored on board, by persons affected with the plague or any other infectious disease or distemper?

**QUASSIA** (Ger. *Quassienholz*; Fr. *Bois de quassie*; Sp. *Leno de quassia*), a beautiful tall tree (*Quassia amara*), growing in North and South America, and the West Indies. The wood is of a pale yellow colour, and inodorous; it, as well as the fruit and bark of the tree, has a place in the materia medica. Its taste is intensely bitter. It is said to have been sometimes used by the brewers in the preparation of beer, instead of hops; but the use of it for this purpose is prohibited, under severe penalties.—(See **ALE AND BEER**.) The price of quassia in bond varies from 1*l.* 4*s.* to 1*l.* 6*s.* a cwt. The duty is 8*l.* 17*s.* 6*d.*; it is, of course, intended to be prohibitory; and is one of the few imposed for such a purpose, against which no good objection can be urged.

**QUEBEC**, the capital of Canada, and of the British possessions in North America, on the north-west bank of the river St. Lawrence, about 340 miles from its mouth, at lat. 46° 48' 49" N., lon. 71° 10' 45" W. Population, in 1842, 31,809.

Quebec is situated on a ridge, or promontory, formed by the St. Lawrence on the S. and W., and the river St. Charles on the E. The extremity of this headland, called Cape Diamond, is about 345 feet above the level of the water, and on it the citadel is built. The town extends from the citadel, principally in a north-east direction, down to the water; and is, from the difference of elevation, divided into the upper and lower towns. The fortifications, which are very strong, extend across the peninsula; the circuit within them being about 2½ miles. From their situation, many of

the streets are uneven: they are also, for the most part, narrow; but they are either well paved or Macadamised. The greater number of the houses are built of stone, with shingle roofs. Some of the public buildings are elegant, and well adapted for their purposes. The harbour, or basin, lies between the town and the island of Orleans. It is safe and commodious: the water is about 28 fathoms deep, with a tide rising from 17 to 18 feet; and at springs from 23 to 25 ditto. Quebec was founded by the French in 1608. In 1629, it was taken by the English; but was restored in 1632. It was again taken by the English under General Wolfe, who fell in the engagement, in 1759; and was finally ceded to us by the treaty of Paris in 1763.

The rapid increase of population in, and of emigration to, Upper Canada has occasioned a proportional increase of intercourse between Quebec and Montreal, and the Canadian ports on Lakes Ontario and Erie, &c. The first steam boat that plied on the St. Lawrence was launched in 1812; but there are now a great number of steamers, some of them of large burden, employed in the conveyance of goods and passengers between Quebec and Montreal; and in the trade between Quebec and Halifax in Nova Scotia. And by means of the Rideau and Welland canals, an uninterrupted line of steam communication is formed between the Atlantic and Amherstburgh, one of the remote settlements of Upper Canada, — a distance of more than 1,500 miles; which we may soon expect to see extended to the head of lake Huron, and eventually to the western extremity of lake Superior, about 700 miles beyond Amherstburgh; giving to Quebec a command of internal navigation inferior only to that of New Orleans. The navigation at Quebec closes at the end of November or beginning of December, and opens in April. Below Quebec the river is seldom frozen over; but the masses of floating ice, kept in constant agitation by the flux and reflux of the tide, render navigation impracticable. The waters of the St. Lawrence are very pure; and in point of depth and magnitude it is one of the noblest rivers in the world. — (*Bouchette's British Dominions in America*, vol. i. p. 272.) Quebec is a free warehousing port.

*Immigration.* — The conveyance of emigrants to Quebec is a principal part of the trade with Canada, and is the only one, perhaps, that is not forced and factitious. The vast extent of this trade is evident from the following

Account of the Number of Immigrants that have annually arrived at Quebec, since 1829, specifying the Countries whence they emigrated, and the Number of Immigrants from each. — (*Parl. Paper* No. 109. Sess. 1843, p. 11.)

This immense mass of emigrants proceed principally to Upper Canada, whence large numbers are in the habit of re-emigrating to the U. States. A tax of 5s. currency was imposed in 1842 on all adult emigrants arriving in the ports of the colony, the produce of which is expended in affording assistance to the poorer descriptions of immigrants.

The average length of the voyages made by the ships with emigrants from the U. Kingdom to Quebec, in 1841, amounted to very near 45 days; and in 1842 to 46½ days. The shortest passage made in the two years was 24, and the longest 78 days.

*Exports and Imports.* — The trade with Canada is, as already seen, (see *anté*, p. 322.) in great part, a consequence of the high discriminating duties laid on the importation of timber and other products from the North of Europe. The influence of this system in forcing importation from Canada, is evident from the subjoined statement, which shows that of the total value of the exports from Canada in 1837, amounting to 908,702*l.*, timber made no less than 651,786*l.* though, had the duty in England on this timber been the same as on that brought from the Baltic, it is more than doubtful whether the export would have reached 200,000*l.* The only other articles of any importance exported from Canada, down to a very late period, have been potashes, furs, and fish. Within the last 3 or 4 years, however, a good deal of flour has been brought from Canada; and it is not improbable that its importation may be increased under the provisions of the late act. — (See *anté*, p. 398.)

We have already given (see *ante*, p. 338.) sundry statements as to the amount and value of the trade and navigation of Canada, and our other possessions in North America. The acts 3 & 4 Will. 4. c. 59., regulating the colonial trade and the duties upon the different articles imported into Canada and the other colonies, are also given (*ante*, pp. 339—347.) But the following statements illustrate some of these points in detail, while others refer particularly to the trade, charges, &c. peculiar to Quebec and the St. Lawrence.

Statement showing the Coins chiefly in use in the British North American Colonies, with their Values in the respective Colonies, in Halifax Currency (Fractions omitted).

Weights same as in England.

**Measures.**—Standard wine gallon, liquid measure of the province. The Canada pint for all grain, &c. except where specially agreed upon to the contrary; and this measure is about 1-8th larger than the Winchester bushel. The English Winchester bushel, when specially agreed for. The Paris foot, for all measures of lands granted previous to the conquest, and all measures of length, except an agreement is made to the contrary. The English foot, for measure of lands granted since the conquest, and wherever specially agreed upon. The standard yard or measure of length. The English ell, when specially agreed upon.

**Rates of Pilotage for the River St. Lawrence.**

	Per Foot.	£	s.	d.
From Bic to Quebec (153 miles distance) —				
From the 2d to the 10th April, inclusive		1	0	0
From the 1st May to the 10th Nov., inclusive		0	18	0
From the 11th to the 18th November, inclusive		0	3	0
From the 19th Nov. to the 1st March, inclusive		1	8	0
From Quebec to Bic —				
From the 2d to the 30th April, inclusive		0	18	0
From the 1st May to the 10th November, inclusive		0	15	0
From the 11th to the 18th November, inclusive		1	0	9
From the 19th Nov. to the 1st March, inclusive		1	5	9

Rates of pilot water and poudage on pilot money are payable at the Naval Office, by masters and commanders of vessels, viz. :—  
For every foot of water for which masters or commanders of vessels are bound to pay their pilots, from Bic to Quebec, and from Quebec to Bic, 2s. 6d. currency per foot —

For vessels going to Three Rivers or Montreal, £  
Of 100 to 150 tons, inclusive - - - 2 currency.  
Of 151 to 200 tons, inclusive - - - 3 -  
Of 201 to 250 tons, inclusive - - - 4 -  
Of 251 tons and upwards - - - 5 -  
On settling with pilots, masters or commanders of vessels, or the consignees of such vessels, are to deduct 1s. in the pound for the amount of the sums to be paid for pilotage, which will be exacted by the naval officer at clearing out; the same being funded by law, under the direction of the Trinity House, for the relief of decayed pilots, their widows and children.

**Regulations for the Payment of Pilotage above Bic to Quebec.**  
At or above the anchorage of the Brandy Pot, 2-3ds of the present rate for a full pilotage.  
Above the point of St. Roc, 1-3d do.  
Above the Point aux Pins, on the Ile aux Grues, and below Patrick's Hole, 1-4th do.

At and above Patrick's Hole - - - £ s. d.  
For shifting a vessel from one wharf to another, between Brehaut's wharf and Point à Carci; or from or to the stream, from or to any of the above wharfs - - - 0 11 8  
For shifting a vessel from the stream, or from either of the above wharfs to St. Patrick's Hole, or to the basin of Montmorency, or to the ballast-ground, the basin of the Chaudière, Wolfe's Cove, and as far as the River up Rouge - - - 1 5 4

**Rates above the Harbour of Quebec.**

From Quebec to Port Neuf, 41. currency.	For vessels of registered measurement not exceeding 200 tons - - -	To Quebec from Port Neuf, 41.10s. currency.
5s.	If above 200 and not exceeding 250 tons - - -	3s. 10s.
6s.	If above 250 tons - - -	4s.
To Three Rivers, or above Port Neuf, 61. currency.	For vessels not exceeding 200 tons - - -	From Three Rivers, and above Port Neuf, 41. currency.
7s.	If above 200 tons and not exceeding 250 tons - - -	4s. 10s.
8s.	If above 250 tons - - -	6s. 10s.
To Montreal, and above Three Rivers, 111. currency.	For vessels not exceeding 200 tons - - -	From Montreal, and above Three Rivers, 71. 10s. currency.
13s.	If above 200 tons and not exceeding 250 tons - - -	8s. 15s.
16s.	If above 250 tons - - -	10s. 15s.

Pilots are at liberty to leave vessels 48 hours after the arrive at the place of their destination.

Total value of Exports to British North American colonies in 1842, £2,333,525.

MONTREAL, the second town of Canada, is situated on the south side of an island of the same name, in the St. Lawrence, about 180 miles above Quebec, in lat. 45° 31' N., lon. 73° 35' W. Population, in 1842, 40,202, being very considerably greater than that of Quebec, or of any other town in British America. The harbour is not large, but it is safe and commodious; the facilities for navigation afforded by the noble river on which it is situated being such, that vessels of 600 tons burden may ascend thence far without difficulty. The North American fur trade principally centres in Montreal; which also enjoys the principal share of the commerce between Canada and the U. States. It is increasing faster than Quebec, or than any city in British America. Imports and exports included in those of Quebec.

**QUERCITRON BARK**, the bark of a species of oak growing in many parts of North America. It is used in dyeing yellow colours. — (See BARK.)

**QUILLS** (Fr. *Plumes à écrire*; Ger. *Feder*, *Federkiel*; It. *Penna da scrivere*; Rus. *Stiroli*; Sp. *Canones para escribir*), the hard and strong feather of the wings of geese,

Freights are, at an average, about — Hamburg and Bremen, linen 15s. per ton, woollen, 30s.; Rostock, 30s.; Ancona and Leghorn, 25s. to 35s.; Trieste and Sicily, 25s. to 30s. Linen rags are almost all selected and assorted previously to their shipment from the foreign port. Their distinguishing marks and prices per cwt. in the London market, January, 1844, were as follows: viz.

Rostock.	Bremen.	Hamburg.	Trieste.	Leghorn.
S P F F - 35s.	S P F F - 26s.	S P F F F, 24s. to 25s.	S P F F F, 25s.	Finest, 13s. to 24s.
N P F - 25s.	S P F F - 25s. 6d.	S P F F 21s. to 22s. 6d.	S P F F 20s. to 25s. 6d.	Seconds, 15s. to 19s.
P F - 22s.	P F - 20s.	P F 18s. to 19s.	S P F 17s. to 21s.	Thirds, 13s. to 14s. 6d.

**RAIL-ROAD, TRAM or WAGGON ROAD**, a species of road having tracks or ways formed of iron, stone, or other solid material, on which the wheels of the carriages passing along it run. The object in constructing such roads is, by diminishing the friction, to make a less amount of power adequate either to impel a carriage with a greater velocity, or to urge forward a greater load.

**Construction of Rail-roads.**—The friction on a perfectly level rail-road, properly constructed, is estimated to amount to from  $\frac{1}{10}$ th to  $\frac{1}{4}$ th only of the friction on an ordinary level road; so that, supposing the same force to be applied in both cases, it would move a weight from 10 to 7 times as great on the former as on the latter. But if there be a very moderate ascent, such as 1 foot in 50, which in an ordinary road would hardly be perceived, a great increase of power on the rail-road is required to overcome the resistance that is thus occasioned. The reason is, that the ordinary load on a level rail-road is about seven times as great as on a common turnpike road; so that when the force of gravity is brought into operation by an ascending plane, its opposing power, being *proportioned to the load*, is 7 times as great as on a common road. Hence the vast importance of having rail-roads either level or as nearly so as possible.

It is also of great importance that rail-roads should be straight, or, at least, free from any abrupt curves. Carriages being kept on the road by *flanges* on the wheels, it is obvious, that where the curves are quick, the friction on the sides of the rails, and consequent retardation, must be very great. In the Manchester and Liverpool rail-road, the curves form segments of a circle which, if extended, would embrace a circumference of 15 miles.

Iron rail-roads, the kind now generally used, are of 2 descriptions. The *flat rail*, or *tram road*, consists of cast-iron plates about 3 feet long, 4 inches broad, and  $\frac{1}{4}$  inch or 1 inch thick, with a flaunch, or turned up edge, on the inside, to guide the wheels of the carriage. The plates rest at each end on *sleepers* of stone or wood, sunk into the earth, and they are joined to each other so as to form a continuous horizontal pathway. They are, of course, double; and the distance between the opposite rails is from 3 to  $4\frac{1}{2}$  feet, according to the breadth of the carriage or waggon to be employed. The *edge rail*, which is found to be superior to the tram rail, is made either of wrought or cast iron; if the latter be used, the rails are about 3 feet long, 3 or 4 inches broad, and from 1 to 2 inches thick, being joined at the ends by cast metal sockets attached to the sleepers. The upper edge of the rail is generally made with a convex surface, to which the wheel of the carriage is attached by a groove made somewhat wider. When wrought iron is used, which is in many respects preferable, the bars are made of a smaller size, of a wedge shape, and from 12 to 18 feet long; but they are supported by sleepers, at the distance of every 3 feet. In the Liverpool railroad the bars are 15 feet long, and weigh 95 lbs. per lineal yard. The waggons in common use run upon 4 wheels of from 2 to 3 feet in diameter. Rail-roads are either made double, 1 for going and 1 for returning; or they are made with *slidings*, where the carriages may pass each other.—(See the able and original *Essays on Rail-roads*, by Charles Maclaren, Esq., in the *Sentinel* for 1824; see also Mr. Booth's Pamphlet on the Liverpool and Manchester Rail-road; the articles on Railways, in the *Encyc. Britannica*, the *Penny Cyclopædia*, &c.)

**Speed of Carriages on Rail-roads, &c.**—The effect of rail-roads in diminishing friction is familiar to every one; and they have long been used in various places of this and other countries, particularly in the vicinity of mines, for facilitating the transport of heavy loads. But it is only since the application of locomotive engines as a moving power, that they began powerfully to attract the public attention, and that their value has been fully appreciated. These engines were first brought into use on the Darlington and Stockton rail-road, opened on the 27th of December, 1825; but it was not till the opening of the rail-way between Manchester and Liverpool that the vast importance of this novel means of intercourse was fully perceived. This splendid work, though now far surpassed in magnitude by other rail-roads, cost nearly a million sterling. It has the advantage of being nearly level; for, with the exception of a short distance at Rainhill, where it is inclined at the rate of 1 foot in 96, there is no greater inclination than in the ratio of 1 foot in 880. The length of the railway is about 31 miles; and it was usual

from its opening to perform this journey in handsome carriages attached to the locomotive engines, in 1½ hours, or less ! So far, indeed, as respects the facility of passing from the one to the other, this railway has brought Manchester and Liverpool as near to each other as the western part of London is to the eastern part !

The opening of this railway having more than verified the most sanguine anticipations as to the success of such undertakings, and gone far, in fact, to strike time and space out of the calculations of the traveller, gave an extraordinary stimulus to similar undertakings in all parts of the country ; and, in no long period, there were hardly any two considerable places in Great Britain, how distant soever, which it was not proposed to connect by railways. An immense number of companies were formed, and a very large amount of capital subscribed, for carrying on these undertakings ; and though, as was to be anticipated, not a few of them appear to have been commenced without due consideration, and hold out very indifferent prospects to the subscribers, there can be no doubt that the country has profited very largely by the railway system, the facility of intercourse having been prodigiously extended, at the same time that the greater number of the principal lines of road have proved, in a pecuniary point of view, exceedingly beneficial to the parties engaged in them.

Among the greater lines of railway now (1843) existing, may be specified that from London to Manchester and Liverpool, which has been already extended to Lancaster, and will probably, at no distant period, be farther prolonged to Glasgow ; but, taking it as it now stands, it is one of the greatest public works ever executed in any country, and is a striking result of the wealth, science, and civilisation of modern times. The railway from London to Bath and Bristol is also a magnificent work ; and is, in some respects, superior to any other in the kingdom. Among the other leading railways may be specified those from London to Southampton, Brighton, and Dover ; the Eastern Counties, Midland, North Midland, and North of England railways ; and those from Carlisle to Newcastle, from Edinburgh to Glasgow and Ayr, with a host of others.

*Railway Legislation.*—But, notwithstanding the vast advantages which the opening of so many new and improved lines of communication have conferred on the country, we cannot help thinking that these advantages might have been much greater, and that, in the instance of railway legislation, the public interests have been overlooked to a degree that is not very excusable. It is, we admit, no easy matter to decide how far the interference of government should be carried in matters of this sort. But, at all events, this much is obvious, that when parliament is called upon to pass an act authorising private parties to execute a railway or other public work, it is bound to provide, in as far as practicable, that the public interests shall not be prejudiced by such act, and that it should be framed so that it should not, either when passed, or at any future period, stand in the way of the public advantage. We believe, however, that a little consideration will serve to satisfy most persons that this important principle has, in the case of railways, and indeed of most descriptions of public works, been, in this country, all but wholly neglected.

The practice is for a railway act to authorise the company in whose favour it is granted, to appropriate a certain line of road, and to charge certain specified rates of toll on the passengers and goods to be conveyed by such road, not for 15, 20, or even 50 years, but *in all time to come* ! Now, as it appears to us, this is a singularly injudicious arrangement on the part of the public. There is, between any two or more places that may be named, a certain railway line that is preferable to any other that can be pointed out. The probability is that this line will in all cases be the first to be selected ; and the act that gives it up to a company confers on the latter a virtual and substantial monopoly. The rates of charge imposed by the act are calculated to remunerate the projectors, supposing every thing to remain on its present footing. But the probability is that manufactures and population, in the places communicating by most lines of railway, will continue to increase in time to come, as they have done in time past ; and it is all but certain that great improvements will be effected in the construction of roads and engines. Whatever, therefore, may be the chances of success at the outset, the fair presumption is, that most great lines of road will in the end be exceedingly productive. But, if we continue to abide by the present system, the public will be effectually excluded from all participation in these prospective advantages ; and a few private associations will be able to make enormous profits, by monopolising improvements, and keeping up the expense of transit at an exorbitantly high level. It is idle to trust to competition to remedy a grievance of this sort. There may only be one practicable line of railway between two places ; and if so, no other can, of course, come into competition with it. But though this were not the case, a company in possession of the best line might, if an opposition were threatened, reduce its rates till the opposition was defeated, and then raise them to the old level. Supposing, however, that a second road is made, its managers would most likely come to an understanding with the first,

so that the tolls, instead of being reduced by the instrumentality of the new road, may be raised; and were it otherwise, the question is, was the second road really necessary? Could not the first road have sufficed for the whole traffic to be carried on by both lines? If this be the case, it is clear the second road has been merely resorted to as a device for reducing the tolls charged on the first; as a means, in fact, for doing that, by an outlay of some hundreds of thousands, or, it may be, millions of pounds, which might have been quite as effectually done by limiting the duration of the act authorising the first road, or by inserting a clause in it providing for the periodical revision of the tolls.

We are clear, indeed, that no act, authorising a private association to construct a railway or canal, to lay down gas pipes, to convey water into a town, or for any such purpose, should ever be passed without reserving to parliament power periodically to revise the tolls granted under it. Such revision would secure to the public a participation in future improvements, not in the contemplation of the parties when the project was entered upon; and it would do this without in any degree clogging the spirit of enterprise. Undertakings of this sort are not engaged in because there is a vague expectation, or even a considerable probability, of their yielding 20 or 30 per cent. profit some 30 or 40 years hence; but because it is believed that they will immediately, or in the course of a few years, yield a reasonable profit; that is, a return of 8, 10, or 12 per cent. The chances of realising more than this at the distance of 20 or 25 years are rarely taken into account, and are worth very little indeed. This, however, is *all* that would be taken away by the revision in question; and, while a reservation of this sort would not stand in the way of any legitimate enterprise, the history of several of our existing companies shows that it may come to be of essential service to the public. Had this principle been formerly acted upon in the formation of companies for the execution of public works, the charges on some of the principal lines of canal might, long since, have been reduced to less than half their present amount; and the water brought into the city of London by the New River Company might have been sold for less than one fourth part of what it now costs; and so in a vast number of cases.

It has been objected to the proposal now made, that the reserving to the public of power to revise the charges on railways, and other public works, would be of no use, inasmuch as the parties would contrive so to swell their charges as to make their revenue appear not more than a fair return on their outlay. And such, most probably, would be the case, were the statements of the parties to be taken without examination. But who ever proposed that this should be done? If charges are to be revised, government must be authorised to appoint parties to inquire carefully into the management of all concerns with which it is proposed to interfere: and it would be the duty of such parties to prescribe every useless expense; and to ascertain how the railway could be carried on, supposing it were wrought under a system of open competition, and at the least expense, and to frame their report accordingly.

We do not even know that it is now too late to interfere with existing railways, in some such way as has been here suggested. Suppose it were enacted that it should be lawful for government to revise the rates of charge, and to lay down new regulations for the government of all railways, at 25 or 30 years hence, very little injury would be done to the existing interests of individuals, at the same time that provision would be made for securing those of the public. The fact that the rates of charge on the Birmingham and Great Western railways were to be revised, and most probably reduced, in 1869 or 1874, would have little or no influence over the present value of shares in these concerns; and such being the case, the proposed reduction could entail no real injury on the railway proprietors, inasmuch as those who may not choose to be subject to future revision may withdraw at present from the concerns, with little or no loss.

The well-informed author of an elaborate pamphlet on "Railway Reform," proposes that government should buy up all the railways at the prices of the day, take them into its own charge, and subject them to a uniform and economical system of administration! But, were it really desirable, which is by no means clear, it is needless to say there is not the smallest prospect of any such sweeping change being ever effected in our railway system. And it would be most unwise, by wasting our energies in attempting to bring about unattainable reforms, to miss the good that may be within our reach.

*Regulations for the Prevention of Accidents.* — Considering the great extent of railways in this country, and the vast number of passengers conveyed by them, the fewness of accidents is most remarkable. Indeed their greater security appears to be nowise inferior to their greater speed. Still, however, this is a matter in which as little as possible should be left to accident or individual discretion; and considering the immense number of persons frequently conveyed by a single train, and the tremendous consequences that might ensue from a collision or other accident, we do think that a carefully drawn up code of regulations should be enacted with a view to secure the

safety of travellers by railways; and that, should an accident occur, either through the neglect of such regulations, or from not complying with their provisions, the offending parties should be subjected to penalties of a severe and stringent description. A government which neglects taking precautions of this sort, neglects one of its most important functions; and allows the lives of those whom it is bound to protect to be endangered or sacrificed by the cupidity, ignorance, or carelessness of the managers and servants (how incompetent soever they may be) of every railway association in the kingdom. We subjoin

An Account of the Length, Number of Shares, Sums paid up, Selling Price of the Shares, &c., of the principal British and French Railways, in December 1843.

A duty is paid to government, by the railway companies, of 5 per cent. of all the sums received by them for the conveyance of passengers. In 1842 this duty produced about 168,000*l.*; but about 140,000*l.* was repaid by government to the different railway companies for the conveyance of the mails. When the post-office and a railway company differ as to the sum to be paid to the latter for conveying the mail, the matter is referred to arbitration.

**Continental Railways.**—The railway system has made great progress on the Continent and in the U. States. Paris and Rouen have already been united by a railway, which is in the course of being extended to Havre. A railway has also been constructed from Paris to Orleans; and one is now being made from Paris to Lyons, which will most probably be prolonged to Marseilles. This last will be of peculiar importance to this country, from the influence it will have in facilitating the correspondence with the East. A large amount of English capital has been invested in the French railways; and some of them have been constructed by English engineers.

Belgium, as everybody knows, has numerous railways; and they have already been extended to a degree that one could hardly have anticipated. We subjoin a return taken from the *Algemeine Zeitung*, being

An Account of the various Railways open in Germany in September 1843, specifying their Length (in English Miles), the Number of Passengers conveyed along them in that Month, and in the Nine Months ending therewith.

Name.	Length.	Passengers in Sept.	Passengers in first 9 Months of 1843.	Name.	Length.	Passengers in Sept.	Passengers in first 9 Months of 1843.

Hamburg to Bergedorf	10	23,138	168,109	Cologne to Aix la Chapelle	43	33,933	217,843
Berlin to Anhalt	93½	37,430	262,146				
Berlin to Potsdam	16	45,915	355,393	Total	1,083		
Berlin to Snettin	82½	26,648	170,241				

The number of passengers in September 1843 was 966,535. In September 1842 it was 761,866. The receipts in September 1843 were 1,252,294 florins, or 125,000*l.* In September 1842 they were 90,000*l.* Other railways are now, also, in the course of being constructed in various parts of Germany, some of which are of great length and importance.

In a late number of the *Scotsman* some peculiarities of the German railways are noticed as follows:—

1st. A great number of them have been undertaken either directly at the expense of the state, or upon security being given by the state for 3 per cent. interest on the capital invested. To prevent jobbing in shares, a law has been enacted in most German states, that 10 per cent. of the sum must be paid forthwith after subscribing.

2d. German railways would appear to pay better than English ones. It is said that two yield 15 per cent. clear profit; others from 7 to 10 per cent.; and none has begun with less than 4 per cent. dividend. This, we presume, must be owing to the greater facility with which the railways have been constructed, and the all but total want of any other means of expeditious travelling.

The railways of the U. States are exceedingly numerous, and some of them are of

great length. But, speaking generally, they are not so substantially executed, and have not been nearly so expensive, as those of this country. Many of them consist only of a single pair of rails, with double pairs at certain intervals to admit of the trains passing.

**RAISINS** (Fr. *Raisins secs, ou passés*; Ger. *Rosinen*; It. *Uve passe*; Por. *Passas*; Rus. *Issum*; Sp. *Passas*), the dried fruit of the vine. They are produced from various species of vines; deriving their names partly from the place where they grow, as Smyrnas, Valencias, &c.; and partly from the species of grape of which they are made, as muscateles, blooms, sultanas, &c. Their quality appears, however, to depend more on the method of their cure than on any thing else. The finest raisins are cured in two methods; — either by cutting the stalk of the bunches half through, when the grapes are nearly ripe, and leaving them suspended on the vine till the watery part be evaporated, and the sun dries and candies them; or by gathering the grapes when they are fully ripe, and dipping them in a ley made of the ashes of the burnt tendrils; after which they are exposed to the sun to dry. Those cured in the first way are most esteemed, and are denominated raisins of the sun. The inferior sorts are very often dried in ovens. — (*Thomson's Dispensatory*.)

Raisins are imported in casks, barrels, boxes, and jars. The finest come in jars and  $\frac{1}{2}$  boxes weighing about 25 lbs. Some of the inferior sorts are brought to us in mats.

Malaga raisins are in the highest estimation. The muscateles from Malaga fetch fully a third more than any other description of raisins. The Smyrna black is the cheapest variety, and may average from 2s. to 30s. a cwt., duty included; muscateles vary from 35s. to 60s., duty included. But the price depends much on the season, and the period of the year. — (*See MALAGA*.)

The duty on raisins, which formerly amounted to 20s. a cwt. on the inferior sorts, and to 42s. 6d. on the finest, was reduced in 1834 to 15s. a cwt. on all classes. This reduction has occasioned a very considerable increase of consumption; but the truth is, that the duty is still quite exorbitant, being no less than 100 per cent. *ad valorem* (and sometimes more) on the price of most descriptions. Raisins are a luxury that can at present be enjoyed only by the richer classes. But were the duty reduced, as it should be, to 5s. a cwt. on the cheapest sorts, and 10s. on the dearest, we are well assured that they would be very largely consumed by the middle and even lower classes. Nothing but the magnitude of the duties prevents them from becoming of very considerable importance as an article of food: and it is really quite monstrous, that the public should be debarred from the use of a desirable article, on the stupid pretence of its being necessary, in order to keep up the revenue, that it should be loaded with an oppressive duty. We admit the importance of keeping up the revenue; but so far from exorbitant duties having such an effect, they contribute more than any thing else to its reduction. They invariably limit the consumption of the articles on which they are laid to the very richest classes, or cause them to be clandestinely supplied, or force recourse to other articles; reducing the revenue as well as the consumption far below the level to which it would attain were the duties moderate. But it is needless to reason speculatively on such a point. Have we not seen the revenue derived from spirits increased, by reducing the duty from 8s. 6d. a gallon to 2s. 6d.? and the revenue derived from coffee quadrupled by reducing the duty from 1s. 7d. per lb. to 6d.? And, as most qualities of raisins are but little less overtaxed, have we not every reason to expect that a like effect would be produced by an adequate reduction of the duties by which they are burdened?

Exclusive of raisins, a considerable quantity of undried grapes is annually imported from Spain and Portugal, in jars packed in sawdust. The duty on these grapes, which is 5 per cent. *ad valorem*, produced, in 1840, 1,686*l*.

Raisins, the produce of Europe, may not be imported for home consumption, except in British ships, or in ships of the country of which they are the produce, or from which they are imported, on forfeiture of the goods and of 10*l*. by the captain of the ship. — (3 & 4 Will. 4. c. 54. § 1. 2. 22.)

No abatement of duty is made on account of any damage received by raisins. — (3 & 4 Will. 4. c. 52. § 32.)

Account of the Quantities of Raisins Imported into the U. Kingdom during each of the 7 Years ending with 1841, specifying the Countries whence they were brought, and the Quantities brought from each.

The duty on raisins produced, in 1842, 147,081*l*. 12s. 4d.

**RANGOON**, a commercial port and town of the Burmese dominions, about 26 miles from the sea, on the left bank of the eastern branch of the river Irawaddy, in lat. 16° 42' N., lon. 96° 20' E. The town and suburbs extend lengthwise about 1 mile along the bank of the river, being about  $\frac{1}{2}$  of a mile in depth: but the houses are very unequally scattered over this area. The fort, or rather wooden stockade, which contains the town, properly so called, is a regular square about 14 feet high, composed of heavy beams of teak timber. It appears from a census, taken a short time previously to the commencement of the war in 1824, that the population was 18,000, which, probably, is not far from its present amount, though it has been stated considerably higher.

Rangoon is the chief, and, indeed, almost the only port of foreign trade in the Burmese dominions, which extend from between the 16th and 18th, up to the 26th and 27th degrees of N. lat., and from the 96th to the 98th degree of E. lon., containing an area of about 184,000 square miles, with a population of about 4,000,000. Its situation is extremely convenient for commercial purposes, being situated so near the sea, and commanding the navigation of the Irawaddy, which extends to Ava, the capital, a distance of

nearly 500 miles. Rangoon is accessible to ships of even 1,200 tons burden; the navigation, although somewhat intricate, being safe and practicable with the assistance of the ordinary native pilots.

The town has many advantages for ship building. At neaps the tide rises and falls about 18 feet; and at springs from 25 to 30 feet. The principal teak forests are, at the same time, at a comparatively short distance, and there is a water conveyance for the timber nearly the whole way. Ship-building has, in fact, been carried on at Rangoon since 1786, and in the 38 years which preceded our capture of it, there had been built 111 square-rigged vessels of European construction, the total burden of which amounted to above 35,000 tons. Several of these were of from 800 to 1,000 tons. Under the direction of European masters, the Burmese were found to make dexterous and laborious artisans; in this respect, greatly surpassing the natives of our Indian provinces.

There are 2 considerable markets, where the ordinary necessities of life, according to Burmese usage, are cheap and abundant: these are rice, excellent fish, and poultry.

**Money.**—The Burmese currency consists, for small payments, of lead; for larger ones, of gold and silver, but chiefly of the latter. There are no coins. At every payment, the metal must be weighed, and very generally assayed,—a rude and very inconvenient state of things. The weights used in the weighing of money are the same as those used on ordinary occasions; the kyat or tical, and the palktha or vis, being by far the most frequent. Silver may be considered as the standard. Gold is generally held to be about 17 times more valuable than silver. The weighing and assaying of the metals, used as currency, gives employment to a class of persons as brokers, money changers, and assayers. Every new assay costs the owner, if the metal be silver, 2½ per cent.; 1½ per cent. being the established commission of the assayer, while 1 per cent. is lost, or supposed to be lost, in the operation. If it be repeated 40 times, it follows that the original amount is wholly absorbed—a fact which shows the enormous waste of metal arising out of this rude substitute for coin.

**Weights.**—The weights in use at Rangoon, and throughout the Burman dominions, are as follow:—

2 Small Rws (red bones) = 1 Large Rwd.	2 Mus. = 1 Muth.
4 Large do. = 1 Bal.	4 Muths = 1 Kyat, vulgo Tical
2 Bal. do. = 1 Mu.	100 Kyats = 1 Palktha, vulgo Vis. = 3-65 lbs. avoiz.

**Measures of capacity are as follow:—**

2 Lamyets = 1 Lamé	4 Sals = 1 Pyl.	2 Sats = 1 Sott.
2 Lames = 1 Sald.	2 Pyls = 1 Sarot.	4 Sats = 1 Ten.

This last measure is what is usually called by us "a basket," and ought to weigh 16 vis of clean rice, or 58-4 lbs. avoirdupois: it has commonly been reckoned at ½ a cwt. All grains, pulses, certain fruits, natron, salt, and lime are bought and sold by measure: other commodities by weight.

**Commercial Regulations.**—The following commercial treaty, entered into between the government of England and the Court of Ava, in 1826, regulates the intercourse between the two countries:—

Art. 1.—Peace being made, &c. &c. — when merchants with an English certified pass from the country of the English ruler, and merchants from the kingdom of Burma pass from one country to the other, selling and buying merchandise, the sentinels at the passes and entrances, the established gate-keepers of the country, shall make inquiry as usual, but without demanding any money; and all merchants coming truly for the purpose of trade, with merchandise, shall be suffered to pass without hindrance or molestation. The governments of both countries, also, shall permit ships with cargoes to enter ports and carry on trade, giving them the utmost protection and security. And in regard to duties, there shall none be taken beside the customary duties at the landing places of trade.

Art. 2.—Ships whose breadth of beam on the inside (opening of the hold) is 8 royal Burman cubits, of 19-1 English inches each, and all ships of smaller size, whether merchants from the Burmese country entering an English port under the Burmese flag, or merchants from the English country, with an English stamped pass, entering a Burmese port under the English flag, shall be subject to no other demands beside the payment of duties and 10 ticals, 25 per cent. (10 sicca rupees), for a passport on leaving. Nor shall pilotage be demanded, unless the captain voluntarily requires a pilot. However, when ships arrive, information shall be given to the officer stationed at the entrance of the sea. In regard to vessels whose breadth of beam exceeds 8 royal cubits, they shall remain, according to the 9th article of the treaty of Yandabo, without unshipping their rudders or landing their guns, and be free from trouble and molestation as Burmese vessels in British ports. Besides the royal duties, no more duties shall be given or taken than such as are customary.

Art. 3.—Merchants belonging to one country, who go to the other country and remain there, shall, when they desire to return, go to whatever country and by whatever vessel they may desire, without hindrance. Property owned by merchants they shall be allowed to sell. And property not sold, and household furniture, they shall be allowed to take away, without hindrance, or incurring any expense.

Art. 4.—English and Burmese vessels meeting with contrary winds, or sustaining damage in masts, rigging, &c., or suffering shipwrecks on the shore, shall, according to the laws of charity, receive assistance from the inhabitants of the towns and villages that may be near, the master of the wrecked ship paying to those that assist suitable salvage, according to the circumstances of the case; and whatever property may remain, in case of shipwreck, shall be restored to the owner.

**Commerce.**—A considerable intercourse is carried on between the Burmese and Chinese dominions by an annual caravan, of which the merchants are all Chinese. The imports from China consist of manufactured articles, the chief export from Burma being cotton wool. The trade with foreign countries seaward is carried on with the ports of Chittagong, Dacca, and Calcutta, in Bengal; Madras and Masulipatam, on the Coromandel coast; the Nicobar Islands, in the Bay of Bengal; Penang, in the Straits of Malacca; and occasionally with the Persian and Arabian Gulphs. The largest trade is with Calcutta, owing to the great consumption of teak timber in the latter, and the facility with which she supplies the demand of the Burmese for Indian and British cotton goods. The articles exported to foreign countries from Rangoon are the following:—Teak wood, terra Japonica, or catechu, stick lac, bees' wax, elephants' teeth, raw cotton, orpiment, commonly called in India hural, gold, silver, rubies, sapphires, and borses, or rather the small, hardy pony of the country, which is much esteemed, particularly at Madras. By far the most important of these commodities is teak timber; the quantity of this wood annually exported is said to be equal to 7,500 full-sized trees, which, for the most part, consist of what India ship-builders call *shimbrs*, which are planks hewn out of the log with the adze at an immense waste. The teak forests of Pegu are by far the most abundant in India. The teak is nowhere to be found in the low alluvial lands to which the tide reaches, but abounds in the high lands beyond its influence. It seems to be very generally disseminated throughout the Burmese dominions. In the territory ceded to the British in Malabar, there are some fine forests, the timber of which is cut down for exportation, and where it is believed that saw-mills have very recently been established by some European settlers. The most accessible and extensive forests of Teak in the Burmese dominions are in the province of Sarawadi, about 150 miles to the north of Rangoon, with which there is a water communication. The principal imports into Burma are cotton piece goods from India and Britain, British woollens, iron, steel, quicksilver, copper, cordage, borax, sulphur, gunpowder, saltpetre, fire-arms, coarse porcelain, English glass ware, opium, tobacco, cocoa and areca nuts, sugar, and spirits. Of these, by far the most important is cotton piece goods. The Burmese have few cotton manufactures of their own, and appear, from very early times, to have been furnished with the principal part of their supply from the Coromandel coast. To these were afterwards added the cheaper fabrics of Bengal; and both are now, in a great measure, superseded by British manufactures, the use of which has spread very rapidly since the opening of the trade in 1814. In 1826-27, the exports and imports of the port of Rangoon:

were estimated each at the rate of 300,000*l*. — (We are indebted for this valuable article to our esteemed friend, John Crawford, Esq., who ascertained the particulars on the spot.)

**RAPE**, a biennial plant of the turnip kind (*Brassica napus* Lin.), but with a woody fusiform root scarcely fit to be eaten. It is indigenous, flowers in May, and ripens its seeds in July. It is cultivated in many parts of England, particularly in Lincoln and Cambridge; partly on account of its seed, which is crushed for oil, and partly for its leaves as food for sheep. The culture of rape for seed has been much objected to by some, on account of its supposed great exhaustion of the land; but Mr. Loudon says that, where the soil and preparation are suitable, the after-culture properly attended to, and the straw and offal, instead of being burnt, as is the common practice, converted to the purposes of feeding and littering cattle, it may, in many instances, be the most proper and advantageous crop that can be employed by the farmer. The produce, when the plant succeeds well, and the season is favourable for securing the seed, amounts to from 40 to 50 bushels an acre. The seed is sold by the last of 10 quarters; and is crushed in mills constructed for that purpose. — (*London's Encyc. of Agriculture*.) We subjoin an

Account of the Quantities of Rape Seed imported into the U. Kingdom during each of the 7 Years ending with 1841, specifying the Countries from which they were imported, and the Quantities brought from each.

The duty on rapeseed was reduced in 1843 from 1*s*. to 1*d*. per quarter.

Rape-seed, the produce of Europe, may not be imported for home consumption, except in British ships, or in ships of the country of which it is the produce, or from which it is imported. — (3 & 4 W<sup>m</sup>. 4. c. 34. § 2. 22.)

**RAPE CAKE**, is the adhering masses of the husks of rape-seed, after the oil has been expressed. They are reduced to powder by a malt-mill or other machine; and are used either as a top-dressing for crops of different kinds, or are drilled along with turnip seed. Rapeseed oil pays a duty of 6*d*. a ton on importation.

**RATTANS**, or **CANES**, the long slender shoots of a prickly bush (*Calamus rotang* Lin.), one of the most useful plants of the Malay peninsula, and the Eastern islands. They are exported to Bengal, to Europe, and above all to China, where they are consumed in immense quantities. For cane work they should be chosen long, of a bright pale yellow colour, well glazed, and of a small size, not brittle, or subject to break. They are purchased by the bundle, which ought to contain 100 rattans, having their ends bent together, and tied in the middle. In China they are sold by the picul, which contains from 9 to 12 bundles. Such as are black or dark coloured, snap short, or from which the glazing flies off on their being bent, should be rejected. When stowed as dunnage, they are generally allowed to pass free of freight. — (*Milburn's Orient. Com. &c.*) The imports into this country are very considerable.

"The rattan," says Mr. Crawford, "is the spontaneous product of all the forests of the Archipelago; but exists in great perfection in those of the islands of Borneo, Sumatra, and of the Malayan peninsula. The finest are produced in the country of the *Bataks* of Sumatra. The wood-cutter, who is inclined to deal in this article, proceeds into the forest without any other instrument than his *parang* or cleaver, and cuts as much as he is able to carry away. The mode of performing the operation is this: — he makes a notch in the tree at the root of which the rattan is growing, and cutting the latter, strips off a small portion of the outer bark, and inserts the part that is peeled into the notch. The rattan now being pulled through as long as it continues of an equal size, is by this operation neatly and readily freed from its *epidermis*. When the wood-cutter has obtained by this means from 300 to 400 rattans, — being as many as an individual can conveniently carry in their moist and undried state, — he sits down, and ties them up in bundles of 100, each rattan being doubled before being thus tied up. After drying, they are fit for the market without further preparation. From this account of the small labour expended in bringing them to market, they can be sold at a very cheap rate. The Chinese junk men obtain them in Borneo at the low rate of 5 Spanish dollars per 100 bundles, or 5 cents for each 100 rattans, or 27 for 1*d*. The natives always vend them by tale; but the European residents and the Chinese sell them by weight, counting by piculs. According to their quantity, and the relative state of supply and demand, the European merchants dispose of them at from 1½ to 2½ dollars the picul. In China, the price is usually about 2½ dollars per picul, or 75 per cent. above the average prime cost. In Bengal they are sold by tale, each bundle of about 100 rattans bringing about 20*d*." — (*Indian Archipelago*, vol. iii. p. 423.)

**REAL**, in the Spanish monetary system, is of two sorts; viz. a *real of plate*, and a *real vellon*. The former is a silver coin, varying in value from about 6*d*. to 5*d*. — (See **COIN**.) A *real vellon* is a money of account, worth about ½*d*.

**REAM**, a quantity of paper. The ream of writing paper consists of 20 quires, each of 24 sheets; but the ream of printing paper, or, as it is sometimes called, the *printer's ream*, extends to 21½ quires, or 516 sheets. Two reams of paper make a *bundle*.

**RECEIPT**, is an acknowledgment in writing of having received a sum of money, or other valuable consideration. It is a voucher either of an obligation or debt discharged, or of one incurred.

The 35 Geo. 3. c. 55. enacts, that every note, memorandum, or writing whatever, given to any person on the payment of money, acknowledging such payment, on whatever account it be, and whether signed, or not, shall be considered a receipt, and liable to a stamp duty.

And every person who shall write, or cause to be written, any receipt for money on unstamped paper, (except in certain excepted cases hereafter enumerated,) or on a lower stamp than the proper one, shall forfeit 10*l.* if for a sum under 100*l.*; if above, 20*l.*

(Giving receipts for less than actually paid, writing off sums, or other fraudulent contrivances, penalty 50*l.*; but receipts may be stamped if brought within fourteen days after date, on payment of a penalty of 5*l.* over and above the duty; and if brought within one calendar month, on payment of a penalty of 10*l.* and the duty.)

Any person refusing to give a receipt upon demand, or to pay the amount of the stamp, is liable to a penalty of 10*l.*

*Scale of Stamp Duties per 55 Geo. 3. c. 184.*

	£	s.	d.
Receipt or discharge, given for or upon the payment of money, amounting to 5 <i>l.</i> and under 10 <i>l.</i> . . . . .	0	0	3
10 <i>l.</i> and under 20 <i>l.</i> . . . . .	0	0	6
20 <i>l.</i> . . . . .	0	1	0
50 <i>l.</i> . . . . .	0	1	6
100 <i>l.</i> . . . . .	0	2	6
200 <i>l.</i> . . . . .	0	4	0
500 <i>l.</i> . . . . .	0	5	0
1,000 <i>l.</i> . . . . .	0	7	6
1,000 <i>l.</i> or upwards . . . . .	0	10	0

And where any sum shall be therein expressed to be received in full of all demands . . . . . 0 10 0

And any note, memorandum, or writing whatsoever, given to any person for or upon the payment of money, whereby any sum of money, debt, or demand, or any part of any debt or demand, therein specified, and amounting to 5*l.* or upwards, shall be

expressed to have been paid, settled, balanced, or otherwise discharged or satisfied, or which shall import or signify any such acknowledgment, and whether the same shall or shall not be signed with the name of any person, shall be deemed to be a receipt for a sum of money of equal amount with the sum so expressed to have been paid, settled, balanced, or otherwise discharged or satisfied, and shall be charged with a duty accordingly.

Previously to 1833 all receipts for sums of 2*l.* and under 5*l.* were charged with a stamp duty of 2*d.*; but the act 3 & 4 Will. 4. c. 23. exempts all receipts for sums under 5*l.* from the duty.

*Exemptions.*—Receipts exempted from stamp duty by any act relating to the assessed tax. Receipts given by the Treasurer of the Navy. Receipts on account of the pay of the army or ordnance. Receipts by any officer, seaman, marine, or soldier, or their representatives. Receipts for the consideration money for the purchase of any parliamentary stocks or funds, and for any dividend paid on any share of the said stocks or funds. Receipts on exchequer bills. Receipts given for money deposited in the Bank of England, or in the hands of any banker, to be accounted for on demand; provided the same be not expressed to be received of, or by the hands of, any other than the person to whom the same is to be accounted for. Receipts written upon promissory notes, bills of exchange, drafts, or orders for the payment of money. Receipts given upon bills or notes of the Bank of England. Letters by the general post acknowledging the safe arrival of any bills of exchange, promissory notes, or other securities. Receipts indorsed upon any bond, mortgage, or other security, or any conveyance whatever. Refuses or discharges for money by deeds duly stamped. Receipts or discharges for drawbacks or bounties. Receipts or discharges for the return of duties of customs. Receipts indorsed upon navy bills. Receipts upon victualling and transport bills. Receipts given for the duty on insurance against fire.

In 1842, the net produce of the receipt duty was as follows:—Great Britain, 158,559*l.* 1*4s.* 2*d.*; Ireland, 21,200*l.* 9*s.* 9*d.*

**REGISTRY**, in commercial navigation, the registration or enrolment of ships at the Custom-house, so as to entitle them to be classed among, and to enjoy the privileges of, British-built ships.

The registry of ships appears to have been first introduced into this country by the Navigation Act (12 Car. 2. c. 18. anno 1660). Several provisions were made with respect to it by the 7 & 8 Will. 3. c. 22.; and the whole was reduced into a system by the 27 Geo. 3. c. 19.

It may be laid down in general, that a vessel, in order to be admitted to registry, and consequently to enjoy the privileges and advantages that exclusively belong to a British ship, must be the property of her Majesty's subjects in the U. Kingdom or some of its dependencies; and that it must have been built in the said U. Kingdom, &c., or been a prize vessel legally condemned, or a vessel legally condemned for a breach of the revenue laws.

The great, and, perhaps, the only original object of the registration of ships, was to facilitate the exclusion of foreign ships from those departments in which they were prohibited from engaging by the navigation laws, by affording a ready means of distinguishing such as were really British. It has also been considered advantageous to individuals, by preventing the fraudulent assignment of property in ships; but Lord Tenterden has observed, in reference to this supposed advantage, that "the instances in which fair and honest transactions are rendered unavailable through a negligent want of compliance with the forms directed by these and other statutes requiring a public register of conveyances, make the expediency of all such regulations, considered with reference to private benefit only, a matter of question and controversy."—(*Law of Shipping*, part i. c. 2.)

The existing regulations as to the registry of ships are embodied in the act 8 & 9 Vict. c. 89., which, on account of its importance, is subjoined nearly entire.

ACT 8 & 9 VICT. c. 89., FOR THE REGISTERING OF BRITISH VESSELS.

*Commencement of Act.*—From the 4th of August, 1845.—§ 1.

*No Vessel to enjoy Privileges until registered.*—No ship or vessel shall be entitled to any of the privileges or advantages of a British-registered ship unless the person or persons claiming property therein shall have caused the same to have been registered in virtue of the act 3 & 4 Will. 4. c. 55. or of the act 6 G. 4. c. 110. Intituled an act for registering British vessels, or of the act 4 G. 4. c. 41. Intituled an act for the registering of British vessels, or until such person or persons shall have caused the same to be registered in manner herein after mentioned, and shall have obtained a certificate of such registry from the person or persons authorized to make such registry and grant such certificate as herein-after directed, the form of which certificate shall be as follows; viz.

"This is to certify, that in pursuance of an act passed in the session of parliament holden in the 18th and 19th years of the reign of Queen Victoria, intituled 'An Act (here insert the title of this act, the names, occupations, and residence of the subscribing owners), having made and subscribed the declaration required by the said act, and having declared that [he or they] together with [the names, occupations, and residence of non-subscribing owners] is [or are] sole owner [or owners] in the proportions specified on the back hereof of the ship or vessel called the [ship's name] of [place in which the vessel belongs], which is of the burden of [number of tons], and [insert master's name] is master, and that the said ship or vessel was [when and where built, or condemned as prize, referring to builder's certificate, judge's certificate, or certificate of last registry, then delivered up to be cancelled], and [insert name and position of surveying officer] having certified to you that the said ship or vessel has [number] decks and [number] masts, that her length

from the inner part of the main stem to the fore part of the stern-post aloft is [ ] feet [ ] inches, her breadth in midships is [ ] feet [ ] inches, her depth in hold at midships is [ ] feet [ ] inches, that she is [how rigged] rigged, with a [standing or running] bowsprit, is [description of stern] sterned, [carvel or clinker] built, has [whether any or not] gallery, and [find of head, if any] head; and the said subscribing owners have consented and agreed to the above description, and having caused sufficient security to be given as required by the said act, the said ship or vessel called the [name] has been duly registered at the port of [name of port]. Certified under our hands at the Custom-house in the said port of [name of port], this [date] day of [name of month], in the year [words of length].

[Signed]  
[Signed]

Collector.  
Comptroller."

And on the back of such certificate of registry there shall be set out in full the names of the several persons mentioned and described in each certificate, in the form and manner following:—

Names of the several owners within mentioned.

[Name]  
[Name]  
[Name]

Collector.

Comptroller.  
Collector. — § 2.

**Persons authorized to make Registry, &c.**—The persons authorised and required to make such registry and grant such certificates shall be the several persons herein-after mentioned and described; (that is to say,)

The collector and comptroller of customs in any port in the U. K. of Great Britain and Ireland and in the Isle of Man respectively, in respect of ships or vessels to be there registered:

The principal officers of customs in the islands of Guernsey or Jersey, together with the governor, lieutenant-governor, or commander-in-chief of those islands respectively, in respect of ships or vessels to be there registered:

The collector and comptroller of customs of any port in the British possessions in Asia, Africa, and America, or the collector of any such port at which no appointment of a comptroller has been made, in respect of ships or vessels to be there registered:

The collector of duties in any port in the territories under the government of the E. I. Company, within the limits of the

charter of the said company, or any other person of the rank in the said company's service of master, merchant, or of 6 years' standing in the said service, being respectively appointed to act in the execution of this act by any of the governments of the said company, in respect of ships or vessels to be there registered:

The collector of duties at any British possession within the said limits, and not under the government of the said company, and at which a custom house is not established, together with the governor, lieutenant-governor, or commander-in-chief of such possession, in respect of ships or vessels to be there registered:

The governor, lieutenant-governor, or commander-in-chief of Malta, Gibraltar, and Heligoland respectively, in respect of vessels or ships to be there registered:

Provided always, that no ship or vessel shall be registered at Heligoland, except such as is wholly of the build of that place, and that ships or vessels registered at Malta, Gibraltar, or Heligoland shall not be registered elsewhere; and that ships or vessels registered at Malta, Gibraltar, or Heligoland shall not be entitled to the privileges and advantages of British ships in any trade between the said U. K. and any of the British possessions in America: provided also, that wherever in and by this act it is directed or provided that any act, matter, or thing shall and may be done or performed by, to, or with any collector and comptroller of customs, the same shall and may be done or performed by, to, or with the several persons respectively herein-before authorised and required to make registry and to grant certificates of registry as aforesaid, and according to the same act, matter, or thing is to be done or performed at the said several and respective places, and within the jurisdiction, of the said several persons respectively: provided also, that wherever in and by this act it is directed or provided that any act, matter, or thing shall or may be done or performed by, to, or with the commissioners of customs, the same shall or may be done or performed by, to, or with the governor, lieutenant-governor, or commander-in-chief of any place where any ship or vessel may be registered under the authority of this act, so far as such act, matter, or thing can be applicable to the registering of any ship or vessel at such place. — § 3.

**Ships exercising Privileges before Registry to be forfeited.**—In case any ship or vessel not being duly registered, and not having obtained such certificate of registry as aforesaid, shall exercise any of the privileges of a British ship, the same shall be subject to forfeiture, and also all the guns, furniture, ammunition, tackle, and apparel to the same ship or vessel belonging, and shall and may be seized by any officer or officers of H. M.'s customs: provided always, that nothing in this act shall extend or be construed to extend to affect the privileges of any ship or vessel duly registered prior to the commencement thereof. — § 4.

**What Ships are entitled to be registered.**—No ship or vessel shall be registered, or having been registered shall be deemed to be duly registered by virtue of this act, except such as are wholly of the build of the said U. K., or of the Isle of Man, or of the islands of Guernsey or Jersey, or of some of the colonies, plantations, islands, or territories in Asia, Africa, or America, or of Malta, Gibraltar, or Heligoland, which belonged to H. M., her heirs or successors, at the time of the building of such ships or vessels, or such ships or vessels as shall have been condemned in any court of admiralty as prize of war, or such ships or vessels as shall have been condemned in any competent court as forfeited for the breach of the laws made for the prevention of the slave trade, and which shall wholly belong and continue wholly to belong to H. M.'s subjects duly entitled to be owners of ships or vessels registered by virtue of this act. — § 5.

**Mediterranean Pass may be issued at Malta or Gibraltar.**—No Mediterranean pass shall be issued for the use of any ship as being a ship belonging to Malta or Gibraltar, except such as be duly registered at those places respectively, or such as, not being entitled to be so registered, shall have wholly belonged, before the 10th of October 1827, and shall have continued wholly to belong, to persons actually residing at those places respectively as inhabitants thereof, and entitled to be owners of British ships there registered, or who, not being so entitled, shall have so resided upwards of 15 years prior to the said 10th of October 1827. — § 6.

**Ships disqualified if Foreign Repairs exceed 20s. per Ton.**—No ship or vessel shall continue to enjoy the privileges of a British ship after the same shall have been repaired in a foreign country, if such repairs shall exceed the sum of 20s. for every ton of the burden of the said ship or vessel, unless such repairs shall have been necessary by reason of extraordinary damage sustained by such ship or vessel during her absence from H. M.'s dominions, to enable her to perform the voyage in which she shall have been engaged, and to return to some port or place in the said dominions; and whenever any ship or vessel which has been so repaired in a foreign country shall arrive at any port in H. M.'s dominions as a British-registered ship or vessel, the master or other person having the charge or command of the same shall, upon the first entry thereof, report to the collector or comptroller of customs at such port that such ship or vessel has been so repaired, under penalty of 20s. for every ton of the burden of such ship or vessel according to the admeasurement thereof; and if it shall be proved to the satisfaction of the commissioners of customs that such ship or vessel was seaworthy at the time when she last departed from any port or place in H. M.'s dominions, and that no greater quantity of such repairs have been done to the said vessel than was necessary as aforesaid, it shall be lawful for the said commissioners, upon a full consideration of all the circumstances, to direct the collector and comptroller of the port where such ship or vessel shall have arrived, or where she shall then be, to certify on the certificate of the registry of such ship or vessel that it has been proved to the satisfaction of the commissioners of customs that the privileges of the said ship or vessel have not been forfeited, notwithstanding the repairs which have been done to the same in a foreign country. — § 7.

**Ships declared unseaworthy to be deemed Ships lost or broken up.**—If any ship or vessel registered under the authority of this or any other act shall be deemed or declared to be stranded or unseaworthy, and incapable of being recovered or repaired to the advantage of the owners thereof, and shall for such reasons be sold by order or decree of any competent court for the benefit of the owners of such ship or vessel or other persons interested therein, the same shall be taken and deemed to be a ship or vessel lost or broken up to all intents and purposes within the meaning of this act, and shall never again be entitled to the privileges of a British-built ship for any purposes of trade or navigation. — § 8.

**British Ships captured not to be again entitled to Registry.**—No British ship or vessel which has been or shall hereafter be captured by and become prize to an enemy, or sold to foreigners, shall again be entitled to the privileges of a British ship: provided always, that nothing contained in this act shall

extend to prevent the registering of any ship or vessel whatever which shall afterwards be condemned in any court of admiralty as prize of war, or in any competent court, for breach of laws made for the prevention of the slave trade.—§ 9.

*Ships shall be registered at the Port to which they belong.*—No such registry shall hereafter be made, or certificate thereof granted, by any person or persons herein-before authorized to make such registry and grant such certificate, in any other port or place than the port or place to which such ship or vessel shall properly belong, except so far as relates to such ships or vessels as shall be condemned as prizes in any of the Islands of Guernsey, Jersey, or Man, which ships or vessels shall be registered in manner herein-after directed; but all and every registry and certificate made and granted in any port or place to which any ship or vessel does not properly belong shall be utterly null and void to all intents and purposes, unless the officers aforesaid shall be specially authorized and empowered to make such registry and grant such certificate in any other port by an order in writing under the hands of the commissioners of customs, which order the said commissioners are hereby authorized and empowered to issue if they shall see fit; and at every port where registry shall be made in pursuance of this act a book shall be kept by the collector and comptroller, in which all the particulars contained in the form of the certificate of the registry herein-before directed to be used shall be duly entered; and every registry shall be numbered in progression, beginning such progressive numeration at the commencement of each and every year; and such collector and comptroller shall forthwith, or within one month at the furthest, transmit to the commissioners of customs a true and exact copy, together with the number of every certificate which shall be by them so granted.—§ 10.

*Port to which Vessels shall be deemed to belong.*—Every ship or vessel shall be deemed to belong to some port at or near to which some or one of the owners, who shall make and subscribe the declaration required by this act before registry be made, shall reside; and whenever such owner or owners shall have transferred all his or their share or shares in such ship or vessel, the same shall be registered *de novo* before such ship or vessel shall sail or depart from the port to which she shall then belong, or from any other port which shall be in the same part of the U. K., or the same colony, plantation, island, or territory, as the said port shall be in: provided always, that if the owner or owners of such ship or vessel cannot in sufficient time comply with the requisites of this act, so that registry may be made before it shall be necessary for such ship or vessel to sail or depart upon another voyage, it shall be lawful for the collector and comptroller of the port where such ship or vessel may then be to certify upon the back of the existing certificate of registry of such ship or vessel that the same is to remain in force for the voyage upon which the said ship or vessel is then about to sail or depart: provided also, that if any ship or vessel shall be built in any of the colonies, plantations, islands, or territories in Asia, Africa, or America, to H. M. belonging, for owners residing in the U. K., and the master of such ship or vessel, or the agent for the owner or owners thereof, shall have produced to the collector and comptroller of the port at or near to which such ship or vessel was built the certificate of the builder required by this act, and shall have made and subscribed a declaration before such collector and comptroller of the names and descriptions of the principal owners of such ship or vessel, and that she is the identical ship or vessel mentioned in such certificate of the builder, and that no foreigner, to the best of his knowledge and belief, has any interest therein, the collector and comptroller of such port shall cause such ship or vessel to be surveyed and measured in like manner as is directed for the purpose of registering any ship or vessel, and shall give the master of such ship or vessel a certificate under their hands and seals, purporting to be under the authority of this act, and stating when and where and by whom such ship or vessel was built, the description, tonnage, and other particulars required on registry of any ship or vessel, and such certificate shall have all the force and virtue of a certificate of registry under this act, during the term of 2 years, unless such ship shall sooner arrive at some place in the U. K.; and such collector and comptroller shall transmit a copy of such certificate to the commissioners of customs.—§ 11.

*Foreigners and Persons residing in Foreign Countries may not be Owners.*—No person who has taken the oath of allegiance to any foreign state, except under the terms of some capitulation, unless he shall afterwards become a denizen or naturalized subject of the U. K. by H. M.'s letters patent or by act of parliament, nor any person usually residing in any country not under the dominion of H. M., his heirs and successors, unless he be a member of some British factory, or agent for or partner in any house or copartnership actually carrying on trade in Great Britain or Ireland, shall be entitled to be the owner in whole or in part, directly or indirectly, of any ship or vessel required and authorized to be registered by virtue of this act.—§ 12.

*Declaration to be made by subscribing Owners previous to Registry.*—No registry shall henceforth be made or certificate granted until the following declaration be made and subscribed, before the person or persons herein-before authorized to make such registry shall grant such certificate respectively, by the owner of such ship or vessel if such ship or vessel is owned by or belongs to one person only, or in case there shall be 2 joint owners, then by both of such joint owners if both shall be resident within 20 miles of the port or place where such registry is required, or by one of such owners if one or both of them shall be resident at a greater distance from such port or place, or, if the number of such owners or proprietors shall exceed 2, then by the greater part of the number of such owners or proprietors, if the greater number of them shall be resident within 20 miles of such port or place as aforesaid, not in any case exceeding 3 of such owners or proprietors, unless a greater number shall be desirous to join in making and subscribing the said declaration, or by one of such owners if all or all except one, shall be resident at a greater distance:

"I A. B. of [place of residence and occupation] do truly declare, that the ship or vessel [name] of [port or place], whereof [master's name] is at present master, being [kind of build, burden, or capacity, as described in the certificate of the surveyor], was [when and where built, or, if prize or forfeited, capture and condemnation as such], and that I the said A. B. [and the other owners, names and occupations, if any, and where they respectively reside, viz. town, place, or parish, and country, or if member of or resident in any factory in foreign parts, or in any foreign town or city, being an agent for or partner in any house or copartnership actually carrying on trade in Great Britain or Ireland, the name of such factory, foreign town, or city, and the names of such house or copartnership] am [or are] sole owner [or owners] of the said vessel, and that no other person or persons whatever hath or have any right, title, interest, share, or property therein or thereto; and that I the said [and the said other owners, if any] am [or are] truly and bond-

side a subject [or subjects] of Great Britain, and that I the said A. B. have not [nor have any of the other owners, to the best of my knowledge and belief] taken the oath of allegiance to any foreign state whatever [except under the terms of some capitulation, describing the particulars thereof], or that since my taking [or his or their taking] the oath of allegiance to [naming the foreign state respectively to which he or any of the said owners shall have taken the same] I have [or he or they hath or have] become a denizen [or denizens, or naturalized subject or subjects, as the case may be], of the U. K. of Great Britain and Ireland, by H. M.'s letters patent, or by an act of parliament [naming the times when such letters of denization have been granted respectively, or the year or years in which such act or acts for naturalization have passed respectively], and that no foreigner, directly or indirectly, hath any share or part interest in the said ship or vessel:—"

Provided always, that if it shall become necessary to register any ship or vessel belonging to any corporate body in the U. K., the following declaration in lieu of the declaration herein-before directed shall be taken and subscribed by the secretary or other proper officer of such corporate body; (that is to say,)

"I A. B., secretary [or officer] of [name of company or corporation], do truly declare, that the ship or vessel [name] of [port] whereof [master's name] is at present master, being [kind of build, burden, &c., as described in the certificate of the

surveying officer], was [when and where built, or, if prize or forfeited, capture and condemnation as such], and that the same doth wholly and truly belong to [name of company or corporation].—"

*Addition to Declaration in case the required Number of Owners do not attend.*—In case the required number of joint owners or proprietors of any ship or vessel shall not personally attend to make and subscribe the declaration herein-before directed to be made and subscribed, then and in such case such owner or owners, proprietor or proprietors, as shall personally attend and make and subscribe the

declaration aforesaid, shall further declare that the part owner or part owners of such ship or vessel then absent is or are not resident within 30 miles of such port or place, and hath or have not, to the best of his or their knowledge or belief, wilfully absented himself or themselves in order to avoid the making of the declaration herein-before directed to be made and subscribed, or is or are prevented by illness from attending to make and subscribe the said declaration. — § 14.

*Vessels to be surveyed previous to Registry.* — In order to enable the collector and comptroller of customs to grant a certificate truly and accurately describing every ship or vessel to be registered in pursuance of this act, and also to enable all other officers of H. M.'s customs, on due examination, to discover whether any such ship or vessel is the same with that for which a certificate is alleged to have been granted, be it enacted that previous to the registering or granting of any certificate of registry as aforesaid some one or more person or persons appointed by the commissioners of H. M.'s customs (taking to his or their assistance, if he or they shall judge it necessary, one or more person or persons skilled in the building and admeasurement of ships,) shall go on board of every such ship or vessel as is to be registered, and shall strictly and accurately examine and admeasure every such ship or vessel as to all and every particular contained in the form of the certificate herein-before directed, in the presence of the master or of any other person, who shall be appointed for that purpose on the part of the owner or owners, or in his or their absence by the said master, and shall deliver a true and just account in writing of all such particulars of the build, description, and admeasurement of every such ship or vessel as are specified in the form of the certificate above recited to the collector and comptroller authorised as aforesaid to make such registry and grant such certificate of registry; and the said master or other person attending on the part of the owner or owners is hereby required to sign his name also to the certificate of such surveying or examining officer, in testimony of the truth thereof, provided such master or other person shall consent and agree to the several particulars set forth and described therein. — § 15.

N. B. The 16th, 17th, 18th, 19th, 20th, 21st, and 22nd clauses of this act relating to the mode of ascertaining the tonnage of ships, are given under the word *Tonnage*.

*Bond to be given at the Time of Registry.* — At the time of obtaining of the certificate of registry as aforesaid sufficient security by bond shall be given to her H. M., her heirs and successors, by the master and such of the owners as shall personally attend as is herein-before required, such security to be approved of and taken by the person or persons herein-before authorised to make such registry and grant such certificate of registry, at the port or place in which such certificate shall be granted, in the penalties following; viz. if such ship or vessel shall be a decked vessel, or be above the burden of 15 tons, and not exceeding 50 tons, then in the penalty of 100*l.*; if exceeding the burden of 50 tons, and not exceeding 100 tons, then in the penalty of 300*l.*; if exceeding the burden of 100 tons, and not exceeding 200 tons, then in the penalty of 500*l.*; if exceeding the burden of 200 tons, and not exceeding 300 tons, then in the penalty of 800*l.*; and if exceeding the burden of 300 tons, then in the penalty of 1000*l.*; and the condition of every such bond shall be, that such certificate shall not be sold, lent, or otherwise disposed of to any person or persons whatever, and that the same shall be solely made use of for the service of the ship or vessel for which it is granted; and that in case such ship or vessel shall be lost or taken by the enemy, burnt or broken up, or otherwise prevented from returning to the port to which she belongs, or shall on any account have lost and forfeited the privileges of a British ship, or shall have been seized and lawfully condemned for illicit trading, or shall have been taken in execution for debt, and sold by due process of law, or shall have been sold to the crown, or shall under any circumstances have been registered *de novo*, the certificate, if preserved, shall be delivered up within one month after the arrival of the master in any port or place in H. M.'s dominions to the collector and comptroller of some port in Great Britain, or of the Isle of Man, or of the British plantations, or to the governor, lieutenant-governor, or commander-in-chief for the time being of the Islands of Guernsey or Jersey; and that if any foreigner, or any person or persons for the use and benefit of any foreigner, shall purchase or otherwise become entitled to the whole or to any part or share of or any interest in such ship or vessel, and the same shall be within the limits of any port of Great Britain, or of the Islands of Guernsey, Jersey, or Man, or of the British colonies, plantations, islands, or territories aforesaid, then and in such case the certificate of registry shall, within 7 days after such purchase or transfer of property in such ship or vessel, be delivered up to the person or persons herein-before authorised to make registry, and grant certificate of registry, at such port or place respectively as aforesaid; and if such ship or vessel shall be in any foreign port when such purchase or transfer of property shall take place, then that the certificate shall be delivered up to the British consul or other chief British officer resident at or nearest to such port, or if such ship or vessel shall be at sea when such purchase or transfer of property shall take place, then that the certificate shall be delivered up to the British consul or other chief British officer at the foreign port or place in or at which the master or other person having or taking the charge or command of such ship or vessel shall first arrive after such purchase or transfer of property at sea, immediately after his arrival at such foreign port; but if such master or other person who had the command thereof at the time of such purchase or transfer of property at sea shall not arrive at a foreign port, but shall arrive at some port of Great Britain, or of the Islands of Guernsey, Jersey, or Man, or of H. M.'s said colonies, plantations, islands, or territories, then that the certificate shall be delivered up in manner aforesaid within 14 days after the arrival of such ship or vessel, or of the person who had the command thereof in any port of Great Britain, or of the Islands of Guernsey, Jersey, or Man, or of any of H. M.'s said colonies, plantations, islands, or territories: provided always, that if it shall happen that at the time of registry of any ship or vessel the same shall be at any other port than the port to which she belongs, so that the master of such ship or vessel cannot attend at the port of registry to join with the owner or owners in such bond as aforesaid, it shall be lawful for him to give a separate bond to the like effect at the port where such ship or vessel may then be, and the collector and comptroller of such other port shall transmit such bond to the collector and comptroller of the port where such ship or vessel is to be registered; and such bond, and the bond also given by the owner or owners, shall together be of the same effect against the master and owner or owners, or either of them, as if they had bound themselves jointly and severally in one bond. — § 22.

*When Master is changed, new Master to give similar Bond.* — When and so often as the master or other person having or taking the charge or command of any ship or vessel, registered in manner herein-before directed, shall be changed, the master or owner of such ship or vessel shall deliver to the person or persons herein-before authorised to make such registry, and grant such certificates of registry, at the port where such change shall take place, the certificate of registry belonging to such ship or vessel, who shall thereupon endorse and subscribe a memorandum of such change, and shall forthwith give notice of the same to the proper officer of the port or place where such ship or vessel was last registered pursuant to this act, who shall likewise make a memorandum of the same in the book of registers which is hereby directed and required to be kept, and shall forthwith give notice thereof to the commissioners of H. M.'s customs: provided always, that before the name of such new master shall be endorsed on the certificate of registry he shall be required to give and shall give a bond in the like penalties and under the same conditions as are contained in the bond herein-before required to be given at the time of registry of any ship or vessel. — § 24.

*Bonds liable to same Duties as Bonds for Customs.* — All bonds required by this act shall be liable to the same duties of stamps as bonds given for or in respect of the duties of customs are or shall be liable to under any act for the time being in force for granting duties of stamps. — § 25.

*Certificate of Registry to be given up by all Persons.* — If any person whatever shall at any time have possession of and wilfully detain any certificate of registry granted under this or any other act, which ought to be delivered up to be cancelled, according to any of the conditions of the bond herein-before

required to be given upon the registry of any ship or vessel, such person is hereby required and enjoined to deliver up such certificate of registry in manner directed by the conditions of such bond in the respective cases and under the respective penalties therein provided. — § 26.

*Name of Vessel which has been registered never afterwards to be changed, and to be painted on the stern.*—It shall not be lawful for any owner or owners of any ship or vessel to give any name to such ship or vessel other than that by which she was first registered in pursuance of this or any other act; and the owner or owners of all and every ship or vessel which shall be so registered shall, before such ship or vessel after such registry shall begin to take in any cargo, paint or cause to be painted in white or yellow letters, of a length of not less than four inches, upon a black ground, upon some conspicuous part of the stern, the name by which such ship or vessel shall have been registered, and the port to which she belongs, in a distinct and legible manner, and shall so keep and preserve the same; and if such owner or owners, or master or other person having or taking the charge or command of such ship or vessel, shall permit such ship or vessel to begin to take in any cargo before the name of such ship or vessel has been so painted as aforesaid, or shall wilfully alter, erase, obliterate, or in anywise hide or conceal, or cause or procure or permit the same to be done, (unless in the case of square-rigged vessels in time of war,) or shall, in any written or printed paper or other document describe such ship or vessel by any name other than that by which she was first registered, or shall verbally describe or cause or procure or permit such ship or vessel to be described by any other name to any officer or officers of H. M.'s revenue in the due execution of his or their duty, then and in every such case such owner or owners, or master or other person having or taking the charge or command of such ship or vessel, shall forfeit the sum of 100*l.* — § 27.

*Builder's Certificate of Particulars of Ship.*—All and every person and persons who shall apply for a certificate of the registry of any ship or vessel shall and they are hereby required to produce to the person or persons authorized to grant such certificate a true and full account, under the hand of the builder of such ship or vessel, of the proper denomination of such vessel, and of the time when and the place where such ship or vessel was built, and also an exact account of the tonnage of such ship or vessel, together with the name of the first purchaser or purchasers thereof, (which account such builder is hereby directed and required to give under his hand, on the same being demanded by such person or persons so applying for a certificate as aforesaid,) and shall also make and subscribe a declaration before the person or persons herein-before authorized to grant such certificate that the ship or vessel for which such certificate is required is the same with that which is so described by the builder as aforesaid: provided always, that where by reason of the death of such builder, or some other unavoidable cause, such certificate cannot be produced, it shall be lawful for the commissioners of customs, on proof being made to their satisfaction of all the particulars required as aforesaid, to dispense with the account hereby required under the hand of the builder, and to allow the certificate of registry to be granted. — § 28.

*Certificate of Registry lost or mislaid.*—If the certificate of registry of any ship or vessel shall be lost or mislaid so that the same cannot be found or obtained for the use of such ship or vessel when needful, and proof thereof shall be made to the satisfaction of the commissioners of customs, such commissioners shall and may permit such ship or vessel to be registered *de novo*, and a certificate thereof to be granted: provided always, that if such ship or vessel be absent and far distant from the port to which she belongs, or by reason of the absence of the owner or owners, or of any other impediment, registry of the same cannot then be made in sufficient time, such commissioners shall and may grant a licence for the present use of such ship or vessel, which licence shall, for the time and to the extent specified therein, and no longer, be of the same force and virtue as a certificate of registry: provided also, that before such registry *de novo* be made the owner or owners and master shall give bond to the commissioners aforesaid, in such sum as to them shall seem fit, with a condition that if the certificate of registry shall at any time afterwards be found the same shall be forthwith delivered to the proper officers of customs to be cancelled, and that no illegal use has been or shall be made thereof with his or their privity or knowledge; and further, that before any such licence shall be granted as aforesaid the master of such ship or vessel shall also make and subscribe a declaration that the same has been registered as a British ship, naming the port where and the time when such registry was made, and all the particulars contained in the certificate thereof, to the best of his knowledge and belief, and shall also give such bond and with the same condition as is herein-before mentioned: provided also, that before any such licence shall be granted such ship or vessel shall be surveyed in like manner as if a registry *de novo* were about to be made thereof, and the certificate of such survey shall be preserved by the collector and comptroller of the port to which such ship or vessel shall belong; and in virtue thereof it shall be lawful for the said commissioners and they are hereby required to permit such ship or vessel to be registered after her departure, whenever the owner or owners shall personally attend to take and subscribe the declaration required by this act before registry be made, and shall also comply with all other requisites of this act, except so far as relates to the bond to be given by the master of such ship or vessel, which certificate or registry the said commissioners shall and may transmit to the collector and comptroller of any other port, to be by them given to the master of such ship or vessel upon his giving such bond, and delivering up the licence which had been granted for the then present use of such ship or vessel. — § 29.

*Persons detaining Certificate of Registry for forfeit 100*l.**—In case any person who shall have received or obtained, by any means or for any purpose whatever, the certificate of the registry of any ship or vessel, (whether such person shall claim to be the master or to be the owner or one of the owners of such ship or vessel or not,) shall wilfully detain and refuse to deliver up the same to the proper officers of customs for the purposes of such ship or vessel, as occasion shall require, or to the person or persons having the actual command, possession, and management of such ship or vessel as the ostensible and reputed master, or as the ostensible and reputed owner or owners thereof, it shall be lawful to and for any such last-mentioned person to make complaint, on oath, of such detainer and refusal to any justice of the peace residing near to the place where such detainer and refusal shall be in Great Britain or Ireland, or to any member of the supreme court of justice, or to any deamster or justice of the peace, in the islands of Jersey, Guernsey, or Man, or in any colony, plantation, island, or territory to H. M. belonging in Asia, Africa, or America, or in Malta, Gibraltar, or Heligoland, where such detainer and refusal shall be in the places last mentioned; and on such complaint the said justice or other magistrate shall and is hereby required, by warrant under his hand and seal, to cause the person so complained against to be brought before him to be examined touching such detainer and refusal; and if it shall appear to the said justice or other magistrate, on examination of such person or otherwise, that the said certificate of registry is not lost or mislaid, but is wilfully detained by the said person, such person shall be thereof convicted, and shall forfeit and pay the sum of 100*l.*, and on failure of payment thereof he shall be committed to the common goal, there to remain without bail or mainprize for such time as the said justice or other magistrate shall in his discretion deem proper, not being less than 3 months, nor more than 12 months: and the said justice or other magistrate shall certify the aforesaid detainer, refusal, and conviction to the person or persons who granted such certificate of registry for such ship or vessel, who shall, on the terms and conditions of law being complied with, make registry of such ship or vessel *de novo*, and grant a certificate thereof conformably to law, notifying on the back of such certificate the ground upon which such ship or vessel was so registered *de novo*; and if the person who shall have detained and refused to deliver up such certificate of registry as aforesaid, or shall be verily believed to have detained the same, shall have absconded, so that the said warrant of the justice or other magistrate cannot be executed upon him, and proof thereof shall be made to the satisfaction of the commissioners of customs, it shall be lawful for the said commissioners to permit such ship or vessel to be registered *de novo*, or otherwise, in their discretion, to grant a licence for the present use of

such ship or vessel, in like manner as is herein-before provided in the case wherein the certificate of registry is lost or mislaid. — § 30.

*Ship altered in certain Manner to be registered de novo.* — If any ship or vessel, after she shall have been registered, shall in any manner whatever be altered so as not to correspond with all the particulars contained in the certificate of her registry, in such case such ship or vessel shall be registered *de novo*, in manner herein-before required, as soon as she returns to the port to which she belongs, or to any other port which shall be in the same part of the U. K., or in the same colony, plantation, island, or territory as the said port shall be in, on failure whereof such ship or vessel shall to all intents and purposes be considered and deemed and taken to be a ship or vessel not duly registered. — § 31.

*Vessels condemned as Prize, or for Breach of Laws against Slave Trade.* — The owner or owners of all ships and vessels taken by any of H. M.'s ships or vessels of war, or by any private or other ship or vessel, and condemned as lawful prize in any court of admiralty, or of ships or vessels condemned in any competent court as forfeited for breach of the laws for the prevention of the slave trade, shall, for the purpose of registering any such ship or vessel, produce to the collector and comptroller of customs a certificate of the condemnation of such ship or vessel under the hand and seal of the judge of the court in which such ship or vessel shall have been condemned (which certificate such judge is hereby authorized and required to grant), and also a true and exact account in writing of all the particulars contained in the certificate herein-before set forth, to be made and subscribed by 1 or more skillful persons or persons to be appointed by the court then and there to survey such ship or vessel, and shall also make and subscribe a declaration before the collector and comptroller that such ship or vessel is the same vessel which is mentioned in the certificate of the judge aforesaid. — § 32.

*Prize Vessels not to be registered at Guernsey, Jersey, or Man, but at certain Ports.* — No ship or vessel which shall be taken and condemned as prize or forfeiture as aforesaid shall be registered in the islands of Guernsey, Jersey, or Man, although belonging to H. M.'s subjects residing in those islands, or in some one or other of them, but the same shall be registered either at Southampton, Weymouth, Exeter, Plymouth, Falmouth, Liverpool, or Whitehaven by the collector and comptroller at such ports respectively, who are hereby authorized and required to register such ship or vessel, and to grant a certificate thereof in the form and under the regulations and restrictions in this act contained. — § 33.

*Transfer of Interest to be made by Bill of Sale.* — When and so often as the property in any ship or vessel, or any part thereof, belonging to any of H. M.'s subjects, shall, after registry thereof, be sold to any other or others of H. M.'s subjects, the bill of sale shall be transferred by bill of sale or other instrument in writing containing a recital of the certificate of registry of such ship or vessel, or the principal contents thereof, otherwise such transfer shall not be valid or effectual for any purpose whatever either in law or in equity: provided always, that no bill of sale shall be deemed void by reason of any error in such recital, or by the recital of any former certificate of registry instead of the existing certificate, provided the identity of the ship or vessel intended in the recital be effectually proved thereby. — § 34.

*Property in Ships to be divided into 64 Parts or Shares.* — The property in every ship or vessel of which there is more than one owner shall be taken and considered to be divided into 64 equal parts or shares, and the proportion held by each owner shall be described in the registry as being a certain number of 64th parts or shares, and that no person shall be entitled to be registered as an owner of any ship or vessel in respect of any proportion of such ship or vessel which shall not be an integral 64th part or share of the same; and upon the first registry of any ship or vessel, the owner or owners who shall take and subscribe the declaration required by this act before registry be made shall also declare the number of such parts or shares then held by each owner, and the same shall be so registered accordingly: provided always, that if it shall at any time happen that the property of any owner or owners in any ship or vessel cannot be reduced by division into any number of integral 64th parts or shares, it shall and may be lawful for the owner or owners of such fractional parts as shall be over and above such number of integral 64th parts or shares into which such property in any ship or vessel can be reduced by division to transfer the same one to another, or jointly to any new owner, by memorandum upon their respective bills of sale, or by fresh bill of sale, without such transfer being liable to any stamp duty: provided also, that the right of any owner or owners to any such fractional parts shall not be affected by reason of the same not having been registered: provided also, that it shall be lawful for any number of such owners named and described in such registry, being partners in any house or copartnership actually carrying on trade in any part of H. M.'s dominions, to hold any ship or vessel, or any share or shares of any ship or vessel, in the name of such house or copartnership, as joint owners thereof, without distinguishing the proportionate interest of each of such owners; and that such ship or vessel, or the share or shares thereof so held in copartnership, shall be deemed and taken to be partnership property to all intents and purposes, and shall be governed by the same rules both in law and equity as relate to and govern all other partnership property in any other goods, chattels, and effects whatsoever. — § 35.

*Only 32 Persons to be Owners of any Ship at one Time.* — No greater number than 32 persons shall be entitled to be legal owners at one and the same time of any ship or vessel as tenants in common, or to be registered as such: provided always, that nothing herein contained shall affect the equitable title of minors, heirs, legatees, creditors, or others, exceeding that number, duly represented by or holding from any of the persons within the said number registered as legal owners of any share or shares of such ship or vessel: provided also, that if it shall be proved to the satisfaction of the commissioners of customs that any number of persons have associated themselves as a joint-stock company for the purpose of owning any ship or vessel, or any number of ships or vessels, as the joint property of such company, and that such company have duly elected or appointed any number not less than 3 of the members of the same to be trustees of the property in such ship or vessel or ships or vessels so owned by such company, it shall be lawful for such trustees, or any 3 of them, with the permission of such commissioners, to make and subscribe the declaration required by this act before registry be made, except that instead of stating therein the names and descriptions of the other owners, they shall state the name and description of the company to which such ship or vessel or ships or vessels shall in such manner belong. — § 36.

*Bills of Sale not effectual until produced to Officers of Customs, &c.* — No bill of sale or other instrument in writing shall be valid and effectual to pass the property in any ship or vessel, or in any share thereof, or for any other purpose, until such bill of sale or other instrument in writing shall have been produced to the collector and comptroller of the port at which such ship or vessel is already registered, or to the collector and comptroller of any other port at which she is about to be registered *de novo*, as the case may be, nor until such collector and comptroller respectively shall have entered in the book of such last registry in the one case, or in the book of such registry *de novo*, after all the requisites of law for such registry *de novo* shall have been duly complied with, in the other case, (and which they are respectively hereby required to do upon the production of the bill of sale or other instrument for that purpose,) the name, residence, and description of the vendor or mortgagor, or of each vendor or mortgagor if more than one, the number of shares transferred, the name, residence, and description of the purchaser or mortgagee, or of such purchaser or mortgagee if more than one, and the date of the bill of sale or other instrument and of the production of it; and further, if such ship or vessel is not about to be registered *de novo*, the collector and comptroller of the port where such ship is registered shall and they are hereby required to endorse the aforesaid particulars of such bill of sale or other instrument on the certificate of registry of the said ship or vessel, when the same shall be produced to them for that purpose, in manner and to the effect following; viz.,

"Custom-house [port and date]; name, residence, and description of vendor or mortgagor [as transferred by bill of sale or other instrument], dated [date]; number of shares [to name, residence, and description of purchaser or mortgagee]."

A. B. Collector.  
C. D. Comptroller."

and forthwith to give notice thereof to the commissioners of customs; and in case the collector and comptroller shall be desired so to do, and the bill of sale or other instrument shall be produced to them for that purpose, then the said collector and comptroller are hereby required to certify by endorsement upon the bill of sale or other instrument that the particulars before mentioned have been so entered in the book of registry, and endorsed upon the certificate of registry as aforesaid. — § 37.

*Entry of Bill of Sale to be valid, except in certain cases.* — When and so soon as the particulars of any bill of sale or other instrument by which any ship or vessel, or any share or shares thereof, shall be transferred, shall have been so entered in the book of registry as aforesaid, the said bill of sale or other instrument shall be valid and effectual to pass the property thereby intended to be transferred as against all and every person and persons whatsoever, and to all intents and purposes, except as against such subsequent purchasers and mortgagees who shall first procure the endorsement to be made upon the certificate of registry of such ship or vessel in manner herein-after mentioned. — § 38.

*When a Bill of Sale has been entered for any Shares, Thirty Days shall be allowed for endorsing the Certificate.* — When and after the particulars of any bill of sale or other instrument by which any ship or vessel, of any share or shares thereof, shall be transferred, shall have been so entered in the book of registry as aforesaid, the collector and comptroller shall not enter in the book of registry the particulars of any other bill of sale or instrument purporting to be a transfer by the same vendor or mortgagor or vendors or mortgagors of the same ship or vessel, share or shares thereof, to any other person or persons, unless thirty days shall elapse from the day on which the particulars of the former bill of sale or other instrument were entered in the book of registry, or in case the ship or vessel was absent from the port to which she belonged at the time when the particulars of such former bill of sale or other instrument were entered in the book of registry, then unless thirty days shall have elapsed from the day on which the ship or vessel arrived at the port to which the same belonged; and in case the particulars of two or more such bills of sale or other instruments as aforesaid shall at any time have been entered in the book of registry of the said ship or vessel, the collector and comptroller shall not enter in the book of registry the particulars of any other bill of sale or other instrument as aforesaid, unless thirty days shall in like manner have elapsed from the day on which the particulars of the last of such bills of sale or other instrument were entered in the book of registry, or from the day on which the ship or vessel arrived at the port to which she belonged, in case of her absence as aforesaid; and in every case where there shall at any time happen to be 2 or more transfers by the same owner or owners of the same property in any ship or vessel entered in the book of registry as aforesaid, the collector and comptroller are hereby required to endorse upon the certificate of registry of such ship or vessel the particulars of that bill of sale or other instrument under which the person or persons claims or claim property, who shall produce the certificate of registry for that purpose within 30 days next after the entry of his said bill of sale or other instrument in the book of registry as aforesaid, or within 30 days next after the return of the said ship or vessel to the port to which she belongs, in case of her absence at the time of such entry as aforesaid; and in case no person or persons shall produce the certificate of registry within either of the said spaces of 30 days, then it shall be lawful for the collector and comptroller and they are hereby required to endorse upon the certificate of registry the particulars of the bill of sale or other instrument to such person or persons as shall first produce the certificate of registry for that purpose, it being the true intent and meaning of this act that the several purchasers and mortgagees of such ship or vessel, share or shares thereof, when more than one appear to claim the same property, or to claim security on the same property, in the same rank and degree, shall have priority one over the other, not according to the respective times when the particulars of the bill of sale or other instrument by which such property was transferred to them were entered in the book of registry as aforesaid, but according to the time when the endorsement is made upon the certificate of registry as aforesaid: provided always that if the certificate of registry shall be lost or mislaid, or shall be detained by any person whatever, so that the endorsement cannot in due time be made thereon, and proof thereof shall be made by the purchaser or mortgagee, or his known agent, to the satisfaction of the commissioners of H. M.'s customs, it shall be lawful for the said commissioners to grant such further time as to them shall appear necessary for the recovery of the certificate of registry, or for the registry *de novo* of the said ship or vessel under the provisions of this act; and thereupon the collector and comptroller shall make a memorandum in the book of registers of the further time so granted, and during such time no other bill of sale shall be entered for the transfer of the same ship or vessel, or for the same share or shares thereof, or for giving the same security thereon. — § 39.

*Bills of Sale may be produced after Entry at other Ports than those to which Vessels belong, and Transfers endorsed.* — If the certificate of registry of such ship or vessel shall be produced to the collector and comptroller of any port where she may then be after any such bill of sale shall have been recorded at the port to which she belongs, together with such bill of sale containing a notification of such record, signed by the collector or comptroller of such port as before directed, it shall be lawful for the collector and comptroller of such other port to endorse on such certificate of registry (being required so to do) the transfer mentioned in such bill of sale, and such collector and comptroller shall give notice thereof to the collector and comptroller of the port to which such ship or vessel belongs, who shall record the same in like manner as if they had made such endorsement themselves, but inserting the name of the port at which such endorsement was made: provided always, that the collector and comptroller of such other port shall first give notice to the collector and comptroller of the port to which such ship or vessel belongs of such requisition made to them to endorse the certificate of registry, and the collector and comptroller of the port to which such ship or vessel belongs shall thereupon send information to the collector and comptroller of such other port whether any and what other bill or bills of sale have been recorded in the book of the registry of such ship or vessel; and the collector and comptroller of such other port having such information shall proceed in manner directed by this act in all respects to the endorsing of the certificate of registry as they would do if such port were the port to which such vessel belonged. — § 40.

*If upon Registry de novo any Bill of Sale shall not have been recorded, it shall then be produced.* — If it shall become necessary to register any ship or vessel *de novo*, and any share or shares of such ship or vessel shall have been sold since she was last registered, and the transfer of such share or shares shall not have been recorded and endorsed in manner herein-before directed, the bill of sale thereof shall be produced to the collector and comptroller of customs, who are to make registry of such ship or vessel, otherwise such sale shall not be noticed in such registry *de novo*, except as herein-after excepted: provided always, that upon the future production of such bill of sale, and of the existing certificate of registry, such transfer shall and may be recorded and endorsed as well after such registry *de novo* as before. — § 41.

*Upon Change of Property Registry de novo may be granted if desired.* — If upon any change of property in any ship or vessel the owner or owners shall desire to have the same registered *de novo*, although not required by this act, and the owner or proper number of owners shall attend at the custom house at the port to which such ship or vessel belongs for that purpose, it shall be lawful for the collector and comptroller of H. M.'s customs at such port to make registry *de novo* of such ship or vessel at the same port, and to grant a certificate thereof, the several requisites herein-before in this act mentioned and directed being first duly observed and complied with. — § 42.

*Copies of Declarations, &c., and of Extracts from Books of Registry, admitted in Evidence.* — Whereas great inconvenience hath arisen from the registering officers being served with subpoenas, requiring them to bring with them, and produce on trials in courts of law relative to the ownership (*sic in orig.*) of vessels or otherwise, the oaths or declarations required to be taken by the owners thereof prior to the registering

**REPORT.** In commercial navigation, a paper delivered by the masters of all ships arriving from parts beyond seas to the Custom-house, and attested upon oath, containing an account of the cargo on board, &c. — (See *anté*, p. 669.)

**REPRISALS.** Where the people of one nation have unlawfully seized and detained property belonging to another state, the subjects of the latter are authorised, by the law of nations, to indemnify themselves, by seizing the property of the subjects of the state aggressing. This is termed making reprisals; and commissions to this effect are issued from the Admiralty. — (See *PRIVATERS*.)

**RESPONDENTIA.** See *BOTTOMRY AND RESPONDENTIA*.

**REVENUE AND EXPENDITURE.** Though not properly belonging to a work of this sort, we believe we shall do an acceptable service to our readers by laying before them the following comprehensive Table of the revenue and expenditure of the United Kingdom in 1840, 1841, and 1842. — (See pp. 1057, 1058.) It contains more information in a brief space than most parliamentary papers. It was originally framed according to the suggestion, and printed upon the motion, of Mr. Pusey; and there are not very many members who can refer to so useful a memorial of their parliamentary career.

**RHUBARB** (Du. *Rhubarber*; Fr. *Rhubarbe*, *Rubarbe*; It. *Rabarbaro*, *Reo-barbaro*; Sp. *Ruibarbo*; Rus. *Rewen*; Arab. *Rawend*; Chin. *Tu-hwang*), the root of a plant, a native of China and Tartary. Three varieties of rhubarb are known in the shops; viz. Russian, Turkey, and East Indian or Chinese rhubarb. The first two resemble each other in every respect. They are, in fact, the same article, being both derived from Tartary. The portion destined for the Petersburg market being selected and sorted at Kiachta, acquires the name of Russian rhubarb; while the portion that is sent from Tartary to Smyrna and other places in Turkey is called Turkey rhubarb. The best pieces only are sent to Petersburg; and according to the contract with the government, on whose account it is bought, all that is rejected must be burnt; and that which is approved undergoes a second cleaning before being finally packed up for Petersburg. The best pieces of Russian and Turkey rhubarb are roundish, and perforated with a large hole, of a reddish or yellow colour on the outside, and when cut or broken exhibit a mottled texture, and alternate streaks of red and gray. Its odour is peculiar, and its taste nauseous, bitter, and astringent. It should not be porous, but rather compact and heavy. East Indian or Chinese rhubarb is in oblong flat pieces, seldom perforated; has a stronger odour, and is more nauseous to the taste, than the other; it is heavier, more compact, breaks smoother, and affords a powder of a redder shade. — (*Thomson's Dispensatory*; *Ainslie's Mat. Indica*, &c.)

Of 98,701 lbs. of rhubarb imported in 1841, 43,640 were brought from China, 8,349 from the Philippines, 7,290 from the East Indies, and 33,710 from the U. States. Only 1,462 lbs. were brought from Russia. The entries for consumption amounted to 42,330 lbs. The duty on rhubarb is 8d. per lb.

**RICE** (Fr. *Riz*; It. *Riso*; Arab. *Arus*; Hind. *Chawf*), one of the most valuable of the cereal grasses, the *Oryza sativa* of botanists. It is raised in immense quantities in India, China, and most Eastern countries; in the West Indies, Central America, and the U. States; and in some of the southern countries of Europe. It, in fact, occupies the same place in most intertropical regions as wheat in the warmer parts of Europe, and oats and rye in those more to the north. Forming, as it does, the principal part of the food of the most civilised and populous Eastern nations, it is more extensively consumed than any other species of grain. It is light and wholesome, but is said to contain less of the nutritive principle than wheat. When rough, or in its natural state in the husk, it is called *paddy*. There is an immense variety in the qualities of rice. That which is principally exported from Bengal has received the name of *cargo rice*. It is of a coarse reddish cast, but is sweet and large grained, and is preferred by the natives to every other sort. It is not kiln-dried, but is parboiled in earthen pots or caldrons, partly to destroy the vegetative principle, so that it may keep better, and partly to facilitate the process of husking. Patna rice is more esteemed in Europe than any other sort of rice imported from the East. It is small grained, rather long and wiry, and remarkably white. But the rice raised on the low marshy grounds of South Carolina is unquestionably very superior to any brought from any part of India. It may, perhaps, be worth mentioning, that rice, like wheat, oats, and barley, is not indigenous to America. It was first raised in South Carolina from seeds brought from Madagascar, near the end of the 17th century. Its culture increased so rapidly that in 1724 no fewer than 18,000 tierces, or barrels, were exported. — (*Pitkin's American Statistics*, 1835, p. 100.) According to the returns under the census of 1840, the total annual produce of rice in the U. States may be estimated at 80,841,422 lbs., or above 36,000 tons, of which about 3-4ths are raised in South Carolina. The value of the exports of rice from the U. States amounted, in 1839, to 2,460,198 dollars; in 1840, to 1,942,076 dollars; and in 1841, to 2,010,107 dollars.

The produce of lands naturally or artificially irrigated is, as far as rice is concerned, from 5 to 10 times greater than that of dry land having no command of water: and hence the vast importance of irri-

An Account of the Public Revenue and Expenditure of the U. Kingdom in 1845, 1846, and 1847, exhibiting in detail the various Items embraced in the one and the other.—(*Part. Paper, No. 724. Sess. 1848.*)

\* No part of this income is at present paid for the use of King Leopold. The trustees, after discharging certain annuities and pensions to the servants and establishments of the late Princess Charlotte, repay the balance of the annuity to the Exchequer: the sum so repaid in the last year was 36,000*l*.

gation in all countries where this grain is cultivated. But it is worthy of remark, that, owing to the not unfrequent occurrence of severe droughts, there is a greater variation in the crops of rice than in those of any other species of grain. Those who, like the Hindoos, depend almost entirely on it for subsistence, are, consequently, placed in a very precarious situation. There can be no doubt that famines are at once more frequent and severe in Hindostan than in any other quarter.

A few years ago, England was principally supplied with cleaned rice from Carolina. Latterly, however, the imports of Carolina rice have been much reduced. An improved method of separating the husk, which throws out the grain clean and unbroken, has been successfully introduced into this country; and as the grain, when in the husk, is found to preserve its flavour and sweetness better during a long voyage than when shelled, large quantities are now imported rough from Bengal and the U. States. Unquestionably, however, the late oppressive discriminating duty of 14s. a cwt. on American and other foreign cleaned rice did more than any thing else to increase the imports of rough grain; and the fact of the duty on paddy from Bengal being only 1d. per quarter, while that on paddy from Carolina was 2s. 6d. a bushel, sufficiently accounts for the increased imports from the former. But the duty on foreign cleaned rice having been reduced in 1842 to 6s. a cwt., and on rice in the husk to 7s. a quarter, it is probable that the imports from Carolina will be materially increased. Independently of duties, the consumption is materially dependent on the price of wheat, increasing when its price increases, and falling when it falls. In bad seasons, when wheat is soft and damp, it is usual to mix rice with it in grinding.

RIGA, a city of European Russia, the capital of Livonia, on the Duna, about 9 mile from the sea, lat.  $56^{\circ} 56' 5''$  N., lon.  $24^{\circ} 0' 4''$  E. Population in 1838, including garrison, 71,228.

*Harbour.*—A light-house has been erected on Fort Comet, on the western side of the mouth of the river. It has 2 lights: the first, elevated about 104 feet (English) above the level of the sea, may be seen under favourable circumstances, at the distance of 4 leagues; and the second, elevated about 24 feet, may be seen at the distance of  $\frac{1}{2}$  league. The bar at the mouth of the river has usually from 12 to 13 feet water; and vessels drawing more than this frequently load and unload part of their cargoes by means of lighters at Bolderaa, a small town on the west side of the river, near its mouth. There is a bar-way beacon without the bar, in 5 fathoms water; and within, the channel is buoyed with black and white buoys; the black being left on the right or starboard side when entering, and the white on the larboard. Vessels bound for Riga take pilots at Bolderaa, who carry them to their anchorage. No ballast is allowed to be discharged, except at Poderague. Regulations as to clearing, &c. similar to those at Petersburg. — (*Coulier sur les Phares*, 2d. ed.; and *Regulations published by the Russian Authorities*.)

*Trade.*—Owing to its advantageous situation near the mouth of a great navigable river, the trade of Riga is very extensive; being, of the Russian towns on the Baltic, in this respect second only to Petersburg. The trade is chiefly carried on by foreign merchants, particularly by the English. The principal exports are flax and hemp, linseed and hemp seed, timber, corn, tobacco, hides, wool, tallow, &c.; the imports are salt, sugar, coffee, and groceries of all sorts, herrings, indigo, dye woods, cotton and cotton twist, silks, wines, &c.

The mast trade is extensive. The burghers of Riga send persons who are called mast brokers into the provinces to mark the trees, which are purchased standing. They grow mostly in the districts which border on the Dnieper, are sent up that river to a landing place, transported 20 versts to the Duna, when, being formed into rafts from 50 to 200 pieces, they descend the stream to Riga. The tree which produces the largest masts is the Scotch fir. Those pieces which are from 18 to 25 inches in diameter are

called masts; under those dimensions, spars, or, in England, Norway masts, because Norway exports no trees more than 18 inches in diameter. Great skill is required in distinguishing those masts that are sound from those which are in the least internally decayed. They are usually from 70 to 80 feet in length.

The best kind of flax shipped from Riga is grown in White Russia, and is called *Druana rakhter*; its colour is very white, and the threads long, fine, and loose, but it has sometimes black spots; the next quality, coming from the province of Tverkie in Lithuania, is called *Lithuanian rakhter*, and is very little inferior to *Druana*, but its colour is a little brown; of this kind the best sort is *Thiesenhausen*. The best kind of Courland flax shipped from Riga is *Marienburger*; that grown in Livonia is inferior. There are two kinds of linseed: that of the last crop, which is used for sowing; and that of former years, for crushing. To prevent deception, the year of its growth is stamped on the barrel by sworn inspectors (*brackers*). Hemp-seed is mostly shipped for Holland. Riga wheat is inferior to that of Dantick. Two descriptions are shipped—one the growth of Russia, the other of Courland; the last is the best, being larger bodied and of a brighter colour than the Russian; still, however, it makes but indifferent flour. Oats are of a good quality, and are largely exported; peas are also occasionally exported.

In shipping masts, the rest of the cargo generally consists of deals and wainscot logs; the latter are much exported to England, and are very superior.

*Money.*—For the monies of Riga, see *PETERSBURG*.

*Weights and Measures.*—The commercial pound is divided into 2 marcs, or 32 loths; and also into halves, quarters, &c. It contains 6,452 English grains. Hence 100 lbs. of Riga = 92·17 lbs. avoirdupois = 41·8 kilog. = 86·32 lbs. of Hamburg = 84·64 lbs. of Amsterdam. The lipspound = 20 lbs.; the shipspound = 20 lipspounds.

The loof is the measure for grain: 48 loofs = 1 last of wheat, barley, or linseed; 45 loofs = 1 last of rye; and 60 loofs = 1 last of oats, malt, and beans. According to Kelly, the loof = 1·9375 Winchester bushels; and, consequently, the last of wheat = 11·625 quarters. *Neikenbrecher* does not value the loof quite so high as Kelly.

The fuder, the measure for liquids, is divided into 6 ahms, 24 ankers, 120 quarts, or 720 stoofs. The anker = 10½ English wine gallons.

The foot of Riga = 10·79 English inches. The ell = 2 feet; the clafer = 6 feet.

The following accounts of the trade of Riga have been taken from the official statements given in the excellent articles on Riga, published in the *Supplément au Journal de l'Interieur* for 1843 (pp. 33—48.) a detailed official account of the imports into and exports from Riga in 1841 will be found in the art. *PETERSBURG*.

Account of the Value of the Imports into and Exports from the Port of Riga during each of the 19 Years ending with 1842, and of the Number and Tonnage of the Ships engaged in its Trade during each of these Years.

We borrow from a different, but not less authentic source, the following details as to the trade of Riga in 1842.

No fewer than 446 British ships arrived at Riga in 1842. The value of merchandise exported in 1842 was £2,618,373. 8s. 4d., being an increase of £90,677. 8s. 4d. over the previous year. The value of that shipped for the U. Kingdom was £1,527,710. 8s. 4d., being more than a moiety of the total exports.

There have been shipped, in 1842, 29,171 tons of flax, and 224 tons cordilla, the exportation to the U. Kingdom being —

Tons. Tons.  
In 1842, 23,598 flax, 708 cordilla  
In 1841, 22,948 — 696 —

The exports of flax to France were 2,422 tons, to Spain about 500 tons, and to Portugal 767 tons. The flax in hand at the end of the shipping season was of the new growth, the quality of which, especially the Livonian flax, is generally approved. The last prices for fresh flax were —

£ s. d.  
P. T. R. 35 2 4  
P. T. R. 34 2 4  
D. C. 31 10 0  
R. T. 25 17 6  
Crown 26 2 8  
Superior H. 21 11 0  
H. 33 10 5

There have been exported in —

Tons. Tons.  
1842, 17,644 hemp, and 2,185 cordilla  
1841, 16,324 — 1,585 —

Of these were shipped to the U. Kingdom —

Tons. Tons.  
In 1842, 9,758 hemp, 1,797 cordilla  
1841, 10,471 — 353 —

The prices of hemp in January 1841 were —

£ s. d.  
R. H. 27 14 0  
O. H. 26 5 0  
P. H. 25 8 0

It may be well to mention that the hemp shipped for the British navy contract cost in many instances, from its superior quality, 40s. and even 100s. per ton more than the common R. H. as above quoted.

There were shipped to all countries 172,251 barrels of flax, of which 48,629 barrels were for the U. Kingdom. The exports of hempseed were 164,251 barrels, of which only 450 barrels went to the U. Kingdom.

The shipments of corn were —

Quarters. Quarters. Quarters. Quarters.  
1842, 2,552 wheat, 26,218 rye, 15,299 barley, 20,265 oat  
1841, 15,516 — 7,943 — 15,843 —

2,777 quarters wheat, the whole of the oat (20,265 quarters) and barley (2,779 quarters) were shipped for the U. Kingdom.

The exportation of all sorts of wood to the U. Kingdom is as follows: —

Years.	Wainscot Logs.	Half Logs.	Pipe Hhd. Staves.	Deals.	Timber.		Spars and Sleepers.
					Square.	Round.	
1842	2,343	198	2,516	116,422	17,134	1,705	42
1841	2,412	73	2,960	171,441	15,886	1,768	22

The total exportation being —

Years.	Wainscot Logs.	Half Logs.	Pipe Hhd. Staves.	Deals.	Timber.		Spars and Sleepers.
					Square.	Round.	
1842	2,350	242	375,561	515,634	79,999	4,220	120
1841	2,576	121	300,160	516,277	67,338	4,220	120

The quality of timber denominated "crown fir timber" has lately become very scarce, so that the greater part of the Riga exports consist of the second quality, or what is called "Veruchifunge brack timber." There is no essential dif-

ference in the quality of crown timber, and timber of the second quality, except that the latter is known to be firmer.

RIO DE JANEIRO, the capital of Brazil, on the Atlantic, in lat. 22° 54' 15" S. lon. 43° 15' 50" W. Population 200,000. The harbour of Rio is one of the finest in the world, both as respects capaciousness and security for all sorts of vessels. In coming from the N.E. it is usual to make Cape Frio, in lat. 23° 1' 18" S, lon. 42° 3' 19" W. being about 4 leagues nearly E. of Rio. The entrance to the harbour is marked by a remarkable hill in the form of a sugarloaf, 900 feet high, close to its west side; while on the east, or opposite side of the bay, at the distance of about 1½ mile, is the fort of Santa Cruz. But the wood-cut in the next page, taken from a chart published by order of the Brazilian authorities, gives a much better idea of this noble harbour than could be obtained from any description.

*Entrance to the Harbour.* — Vessels bound for Rio, coming from the N., should, after rounding Cap Frio, steer due W., keeping about 8 leagues from the coast, until they come within 5 or 6 miles of the Ilha Rasa, or Flat Island lying almost due S. from the mouth of the harbour, at the distance of about 1 league. A light-house, the lantern of which is said to be elevated nearly 300 feet above the level of the sea, was erected on this island in 1829. The light is a revolving one, including its revolution in 3 minutes, and exhibiting alternately a white and a red light. There is also a light-house in the fort of Santa Cruz, the light of which is fixed, and elevated about 80 feet above the level of the sea. — *Coastwise near Rio.* (See chart, ed.) Having got within 5 or 6 miles of the Ilha Rasa, ships may enter by day or by night, the dotted line in the cut marking the fair-way into the harbour. There are no pilots to be met with; and as there are no hidden dangers of any kind, their services are not wanted. On entering, vessels must pass within half of Fort Santa Cruz, to be ready to answer any questions that may be put to them. They then proceed to Fort Vilganhon, below or opposite to which they must bring to, or come to anchor, allowing no boats to come alongside, but those of the government, until they have received *pratique*, when they will be permitted to proceed to the usual place of anchorage for the merchant shipping.

The sea breeze generally sets in about 11 A.M., and lasts till about sunset. It is strong enough to enable ships to overcome the ebb. High water at full and change at 2 in the afternoon.

*Money, Weights, and Measures.* — All payments are made in paper money, which has been over-issued, and is excessively depreciated. But in ordinary cases the par of exchange may now be assumed at about 31d. sterling per patriotic dollar, of 1620 reis paper. Weights and long measures are the same as those

of Lisbon, the arroba being 32½ lbs. avoirdupois; but measures of capacity are different, a medida being equal to 5954 Imperial galls., and an alquiere to 111 ditto.

*Trade.* — The trade of Rio is extensive, and has increased rapidly of late years. It is now by far the greatest mart for the export of coffee. The shipments of this important article, which in 1830 amounted to 396,785 bags, have increased with such unexampled rapidity, that, in 1846, they amounted to 1,511,096 bags, that is (taking the bag at

154 lbs.), to 232,708,784 lbs., or 103,888 tons; being nearly equal to all the exports of coffee from all the other ports in the world! Sugar is also an important article of export from Rio, though latterly it has been decreasing, and hardly now exceeds 10,000 cases (13 cwt. each). The other great articles of export from Rio are hides, rice, tobacco, rum, tapioca, ipecacuanha, manioc flour, and other inferior articles. The export of cotton has almost entirely ceased; and that of gold, diamonds, &c. is mostly clandestine. Diamonds are principally exported from Bahia. We subjoin,

An Account of the Quantities of the Principal Articles of Native Produce exported from Rio during each of the Five Years commencing with 1846; showing also the increase or Diminution, in 1846, upon the Average of the Five Years.

The principal article of import consists of cotton goods, the value of which amounts to full one third of the total value of the imports. Next to cottons are woollen, linen and silk manufactures, wines, jewellery, and ironmongery; flour, meat, fish, butter, and other articles of provision; spirits, salt, earthenware, paper, and a host of other articles.

The total direct importation of manufactured cottons, linens, silks, and woollens, since 1841, has been in 1842, 31,375 packages; 1843, 30,996; 1844, 33,679; 1845, 29,211; 1846, 33,766; giving an average, for the five years, of 34,908 packages.

Of the whole the cottons were, in 1842, 22,692 packages; 1843, 23,603; 1844, 25,773; 1845, 31,169; 1846, 30,086; being an increase, in 1846, upon the average of the five years, of 3,465 packages, or rather more than 13 per cent.

The following statement shows the quantities of cottons received from each of the principal contributing countries during each of the five years ending with 1846.

Imported from	Corross. — Packages.				
	1842.	1843.	1844.	1845.	1846.
Great Britain	-	14,059	19,805	20,000	22,986
United States	-	5,337	7,358	8,831	4,866
France	-	1,317	1,109	1,527	1,343
Hanse Towns	-	678	677	402	404

The customs duties at Rio, in 1840, amounted to 1,929,822 rs. on imports, and to 1,920,406 rs. on exports. Of the 668 ships that cleared outwards from Rio in 1846 for foreign ports 67 were British, their total burden being 18,646 tons, the rest being Americans, French, &c.

The entire exports of sugar from Brazil may amount to from 90,000 to 95,000 tons a year: viz. from Rio, 8,000 tons; Bahia (the principal port for the export of sugar), 50,000 tons; Pernambuco, 30,000 tons; Santos, and other ports 7,000 tons; making, in all, 95,000 tons. But the exports have not increased within the last few

years: and now that labour is becoming scarcer and dearer, in consequence of the increasing difficulties thrown in the way of the importation of slaves, it is doubtful whether they will be maintained, and whether the exports of coffee will not also decline. The latter, indeed, is now selling at a price hardly sufficient to defray the cost of its production. The exports of cotton are not very extensive, and have for a lengthened period been nearly stationary. Hides are a very important article of export.

**Port Regulations.**—The captain of every ship entering Rio, or any other port of Brazil, is ordered by a law enacted in 1836—

1. To go directly with his vessel from the entrance of the harbour to the anchorage ground in *Praya*; and if on account of the tide, contrary wind, or any other just cause, he should be compelled to come to anchor, and shall remain anchored for twelve hours after said hindrances are removed (except in case of being quarantined), he shall pay a fine of 100,000 reis, and shall be compelled, by the fort, or by a government vessel of war, (whichever may be nearest,) to proceed immediately to the *Frangula* anchoring ground.

2. He shall not suffer any kind of vessel to board him, nor any person to come on board or to leave his vessel, before he has been visited from the custom-house, excepting only the pilot, health officer, the head officer at the entrance, when there is one, and in the case of the sailing of the vessel.

3. Even after the custom-house visit on arrival, and until the vessel is discharged, he shall allow no person to come on board without a written permission from the inspector of the customs; and this permission shall be given in the following cases, viz.:—

A. To allow the buyers of goods to go on board to examine the cargo they wish to purchase, when sufficient specimens cannot be seen on shore.

B. To workmen or labourers necessary to put the cargo in order, taking care to have them examined when they go on board and return. In case of the infraction of the above regulations, a fine shall be imposed on the captain of 100,000 reis for every vessel he allows to board him, and of 500,000 for each person who shall enter or leave his vessel without licence, unless he be a passenger, or belonging to the crew; and every other person who enters or leaves the vessel shall pay 100,000 reis fine, and be kept in custody until payment is made. The one third part of these fines shall be divided among the watchmen or military who shall have taken up the offender.

4. He shall deliver to the *guarda-mor* (chief customs officer), when he makes his visit on arrival, his passport and cargo book.

5. He shall deliver to the commander of the guard-boat without the port, if he be there, or at the *Frangula*, if he be there, the manifest as described below.

6. He shall enter at the custom-house, within 24 hours after the *guarda-mor* has been on board, not counting the days on which the custom-house is shut, and present himself to the inspector, and swear, or affirm, that he has not on board of his vessel any merchandise other than what is described in the manifest he has delivered, and that he has no further declaration to make; and if he do not enter within the 24 hours, he shall pay 100,000 reis for each day's delay additional.

7. If he shall detain his vessel at either of the anchorages more than 24 hours, when he shall be directed by the *guarda-mor*, or his representative, to remove thence, he shall pay 100,000 reis for every day he delays.

8. He shall discharge no part of his cargo but by an order in writing from the inspector; and if he land any without such order, he shall pay 100,000 reis for every article so landed.

9. He shall give notice to the officer attending the discharge of the vessel, as soon as his cargo is discharged, that he has nothing remaining on board. If he omit to do this on the same day, so that the vessel may be immediately examined, he shall be fined 100,000 reis.

10. The master of every vessel going with a cargo to any part of the empire, must have two manifests of the cargo, exact copies of each other, exhibiting the name, class, and tonnage of the vessel; the name of the captain, whose signature must follow the date; the name of the port where the articles stated in the manifest were taken on board; the name of the port or ports for which the vessel is destined; the marks or counter-marks and numbers of the packages, and their description, as bales, cases, pipes, half-pipes, barrels, &c.; a declaration of the quantity and quality of the merchandise of each package, or several similar ones of the same mark; and also of what is on board in bulk; the names of the consignees, or to order; all to be written at length, except the numbers of the packages.

11. When the vessel has taken her cargo at more than one port, there must be two copies of the manifest.

12. At the end of the manifest, the captain shall declare the number of passengers, whether cabin or steerage, and the baggage for the use of each, and in addition any declaration necessary for his security, with the date he shall declare whether he has any package to add to the manifest, or whether any are deficient, with the cause of it, as no after declaration will relieve him from responsibility, for he will not be exempted upon the vague declarations frequently made, which do not account for deficiencies or differences.

13. The captain of any vessel bound to Brazil, when he has completed his cargo in the port or ports from which he is to sail, and made the manifest, as required in the 9th article, shall present his documents to the Brazilian consul residing in the port, who shall examine them, and if agreeable to these regulations, certify them.

14. In those ports where there is no Brazilian consul or substitute, the manifest shall be certified by two Brazilian resident merchants; or, if there be none, by two merchants of the place. In either case, the signatures to be authenticated by legal authority.

15. Should any greater quantity of goods be found on board than are stated in the manifest or the declaration of the captain, the surplus shall be seized and divided amongst those who seize them, after payment of duties, and the captain shall pay a fine of half the value of the goods.

16. If there are any goods missing of those stated in the manifest or declaration of the captain, they shall be reputed to be concealed or embezzled, and he shall pay the value thereof to

those who have discovered the deficiency, and half the value to the national treasury. These condemnations shall take place on the simple fact of there being an overplus or deficiency of goods, without further proof being required.

17. For each difference in the quality or mark of the package, the captain shall pay 5,000 reis, although in every other respect the goods discharged may agree with the manifest.

18. The captain whose manifests are not conformable to these regulations, shall be fined from 100,000 reis to one *conto de reis*, at the will of the collector, according to the degree of culpability that shall appear, and he cannot discharge until the fine is paid.

19. In case the captain brings no manifest, he may still be allowed to discharge, by paying 5 per cent. on the value of the cargo, in addition to the usual duties.

**Frangula.**—Vessels proceeding to Brazil, and when it is wished to dispose of their cargoes at different ports, must clear for "Brazil and other ports," or for "Pernambuco, Bahia, Rio de Janeiro, and other ports." They are then entitled to the privilege of *Frangula*, and may land a part of their cargoes at one port, paying duties only on the goods so landed, and proceeding with the remainder to other ports. But if they clear out for one port only, they are compelled to make a complete entry, and discharge the whole of the cargo.

In proceeding from one Brazilian port to another, it is necessary that a bill of health should be taken from the local authorities of each port; and where any part of the cargo is landed, the same must be noted on the original manifest by the customs officer of the port.

**Anchorages.**—Foreign vessels pay, in all ports of the empire, 10 reis per ton per day, from the 5th day after their entry.

**Light-house.**—The light-house duty, 100 reis per ton, for all vessels over 40 tons departing from ports where there is a light-house. Vessels under 40 tons are exempted from this duty.

**Port-duty.**—On all vessels not crossing the bar at the harbour of Rio de Janeiro, the following charges are levied, viz.: of three masts, 15,000 reis; of two masts, 9,000 reis; and of one mast, 6,400 reis.

**Duties.**—The duty is 40 reis for every written half-sheet.

**Health.**—Visit of the physician is fixed at 8,000 reis; but in case the vessel is made to perform quarantine, then another sum of 8,000 reis is payable on the admission of the vessel to free pratique.

**Hospitality.**—A vessel of three masts pays 6,000 reis; brig, corvette, and yachts, 4,000; pinnaces, 1,500; barks, 1,200. Each one of the ship's companies of vessels sailing for a foreign port pays 400 reis.

**Usage of Merchants.**—It is customary that the expense of loading and shipping a cargo on freight should be paid by the vessel, unless the contrary be stipulated in the bills of lading.

When hard Spanish dollars are bargained for, in contracts of freight, they should be so expressed in the instrument of contract, to prevent dispute.

Purchases of produce are paid for in cash, and sales are made on stipulated credits, but nominally for cash.

If bills on London are sent out for the purchase of produce in Brazil, the credit must have the confirmation of the London house.

**Anchorage Due in Brazil Ports.**—The anchorage dues fixed by law of 22d October, 1836, are now superseded by a tax of 3 *reis*-dollar per ton, payable, one half on entering, and one half on sailing, by all merchant vessels on foreign trading, with the following restrictions:—

Ships arriving in ballast, and going away the same, will pay the old anchorage; if taking cargoes, they will pay half the present dues.

Ships entering to get fresh provisions, or in "*Frangula*," to try the market, but do not discharge, pay only the old anchorage. If they merely discharge part of cargo, pay only half of present dues.

Ships entering under average or in distress, pay nothing if they do not discharge, or only discharge the necessary for repaireing.

Ships carrying colonists subject to some modifications.

Ships entering three times in one year, only pay anchorage dues the first two voyages.

The government is authorised to modify the impost, as soon as it agrees with Great Britain, or as may seem most suitable for the encouragement of the national shipping trade to foreign ports, or to the whale fisheries. The anchorage dues on foreign shipping may not be increased.

Rio, June 3d, 1845.

#### Rate of Commission charged at Rio.

- 5 per cent. on sales of merchandise.
- 24 per cent. on purchases of merchandise, with funds in hand, on amount of cost and charges.
- 24 per cent. guaranty on amount of sales on credit.
- 24 per cent. for drawing or indorsing, and negotiating bills.
- 24 per cent. on purchase or sale of vessels by private contract.
- 5 per cent. on amount of vessels condemned by surveyors.
- 24 per cent. for procuring or collecting freights.
- 24 per cent. on disbursements of vessels in common cases, with funds in hand.
- 5 per cent. on disbursements of vessels when funds are advanced, or in case of condemnation, or in vessels entering for repairs only.
- 1 per cent. on receiving and forwarding goods; and
- 24 per cent. on amount of responsibilities incurred thereon.
- 1 per cent. on receiving and paying money on which no other commission is derived.
- 4 per cent. on purchase or sale of specie.

per cent. for effecting marine insurance on the amount insured; and when the premium exceeds 10 per cent., 5 per cent. on the amount of premium.

1 per cent. on remittances on bills not indorsed.

On consignments of merchandise withdrawn or reshipped, full commission to be charged to the extent of advances or responsibilities incurred, and half commission on the residue of the value.

1 per cent. per month on all cash advanced.

No interest allowed on money on deposit.

1 per cent. storage on all dry goods.

In the case of discharging and reshipping the cargoes of vessels in distress, on the invoice amount, 14 per cent.

24 per cent., or half the consumption charged on value of merchandise, will be returned to consignees, but nothing on investments or other business.

*Remarks on the Trade of Brazil.* — The imports into Brazil, which are chiefly from Great Britain, consist principally of our cottons, woollens, linen, hardware, and other manufactures, amounting in all, in ordinary years, as seen above, to about 2,600,000*l*. It is frequently, no doubt, said that our exports to Brazil amount to double that sum, or to more than 5,000,000*l*. But there is no room or ground for any such statement. The return is not derived from Brazil, but from our own Custom-house; and there is no reason why the merchants should undervalue the exports to Brazil more than to any other country.

The duties on all imports have for several years past been 15 per cent. on the tariff value, which averages fully 20 per cent. or more on the real value of British goods.

There are, also, duties on exports, which vary on different articles, and at different ports. On coffee they amount to about 10, and on sugar to about 12 per cent. But it is unnecessary to enter into any lengthened statements with respect to these duties, as it is all but certain that they will speedily undergo very material changes. Indeed a commission was appointed on the 17th May, 1843, for the avowed purpose of framing a new tariff, in which the duties on most articles were to be fixed at from 24 to 60 per cent. *ad valorem*! Our readers are aware that the mission recently sent by the British government to Rio to negotiate a new commercial treaty in the place of that which expires in November next (1844), failed of its object. This failure was occasioned, as is alleged, by our declining to make any sufficient reduction in the present exorbitant duty on Brazil sugar. It is certain, however, that such reduction would be even more advantageous to us than to the Brazilians. It would not only give a great stimulus to our trade with Brazil, by allowing it to flow in a direct instead of forcing it into an indirect channel, but it would also be of signal advantage to all classes of people in this country.

A reduction of the duty on Brazil and other foreign sugar to 30s. or 32s. a cwt. would go far to enable us to get 2 lbs. of sugar for the same price we now pay for 1 lb. And we have elsewhere shown that it is mere drivelling to suppose we should give, by so doing, any greater encouragement to slavery in Brazil than we give to it by our present system. — (See art. SUGAR.) The existing exorbitant duty on Brazil sugar is good for nothing, unless it be to deprive our people of an adequate supply of a most important necessary, to narrow our exports to Brazil, to force us to carry our returns in the first place to Hamburg and other continental emporiums, instead of bringing them direct to England, and, consequently, by laying our merchants under difficulties, to give a bonus to the Americans, Hanseatics, Austrians, and other foreigners now engaged in the trade. The truth is, that in insisting upon an effectual reduction of the duty laid in this country on foreign sugar, the Brazilians insisted on that which was most for our advantage. If we but reduce the duty in question, we need give ourselves, in so far at least as this matter is concerned, no further trouble about any thing else. Should the Brazilian government enact an oppressive tariff, it will redound only to their own disadvantage, and will have little or no influence over our interests. It will not be more effectual than the edicts of the Chinese against the importation of opium. If we open our ports under reasonable duties to the peculiar produce of Brazil, we may be quite sure that our products will, despite every obstacle, find their way to the Brazilian markets.

The commerce of Brazil has sustained great injury from the wretched state of the currency and of the finances; the value of the former, which consists almost wholly of paper, being excessively depreciated and liable to extreme fluctuations, and the revenue being inadequate to meet the expenditure. Latterly, however, vigorous efforts have been made to increase the revenue; and it is hoped that, in the event of the finances being placed on a better footing, measures may also be taken to improve the currency.

#### *Trade between Brazil and the Hanse Towns in 1842.*

The following statement of the trade between Brazil and the Hanse Towns, Hamburg, and Bremen, for the year 1842, is derived from Brazilian official documents: —

Arrived from Hamburg, in the different ports of the empire, 66 vessels, measuring 19,192 tons, with 791 men as crews, and 124 passengers, of which 31 Hamburgers, 21 Danes, 5 Swedes, 7 Bremen, Lubec, and Prussia, 1 English, with cargoes of an official value of \$1,618,217. The exports to Hamburg were effected in 119 vessels, measuring 36,908 tons, and 1,480 men, of which 63 loaded at Rio Janeiro, 35 at Bahia, 10 at Pernambuco, 9 at Maranhon and Rio Grande. Of these, 35 were Hamburgers, 24 English, 23 Danes, 17

Swedes, 10 Bremen, Dutch, and Prussian, 3 French, 3 Portuguese, 2 Russian, 2 American, 2 Austrian, 119; with cargoes of an official value of \$7,754,201, showing an export in favour of Brazil of no less than \$6,615,938. This export consists of 244,349 bags, 155 bbls., coffee; 22,309 chests, 3,843 bbls., bags, boxes sugar; 56,934 pieces hides; 1,171 bales cotton; 1,146 bags cocoa; 298,746 coconuts; besides Jacaranda wood, chouchouc, roll tobacco, balsam, copal, arapapilla, &c. Arrived from Bremen, 15 ships, 2,677 tons, 125 men, of which 3 American vessels and 13 ships sailed to Bremen, 2,966 tons, 139 men, of which 1 American, value of export \$846,700; import \$80,868.

"The quantity of precious stones shipped is now very considerable. In most cases they are sent to a losing market; being, in fact, more valuable in Brazil than in London or Paris. Aquamarines — (see BERYL) — of a very large size has been found. In January, 1811, one was found in the Riberao das Americanas, near the diamond district, which weighed 15 lbs.; and in the same place, in the October following, one was discovered weighing 4 lbs. Topazes of fine quality, but seldom large, amethysts, and chrysolites, are also articles of exportation; and, at times, some fine specimens of these gems are to be met with in the jewellers' shops.

"Correctly speaking, there are no trading companies in Rio de Janeiro: there is a society for effecting maritime assurances, but no other.

"The Bank of Brazil has had very extensive concessions made in its favour, and ought to be in a flourishing state. It has the power of issuing notes; and all disputed monies and property of the deceased and absent (*mortes e ausentes*) must be placed in its hands, and 2 per cent. per annum charged for the care and trouble. This, in addition to the interest which might be obtained for the deposit, would alone, in an active mercantile country, form no inconsiderable revenue. Specie is prohibited from being carried coastwise; merchants who wish to deposit cash in one of the northern ports, where the largest purchases are made, are therefore forced to take hand bills, and pay a premium for them, varying from 3 to 5 per cent.

"Some enormous capitals have been amassed; but generally the speculations of the native merchants are conducted on a very limited scale.

"The legal rate of interest is 6 per cent.; but money can seldom be obtained under 12." — (*Caldclough's Travels in South America*, vol. i. pp. 63—69.)

ROADS, pathways formed through the country with more or less art and care, for facilitating the transit of individuals, carriages, &c. between different places. They are

of every variety of form—from rude, narrow, rugged, and unformed paths, carried over mountains, interrupted by every petty rivulet, and almost impracticable to any but foot passengers, to smooth, broad, and level ways, formed of solid materials, winding round or cut through mountains, and carried over swamps and rivers at an immense expense, and admitting of the easy passage of carriages and of all sorts of goods.

The laying out of improved roads, and their construction, forms an important part of what is denominated the science of civil engineering. But as it would be quite foreign to our purpose to enter into any details as to the formation of roads, we shall satisfy ourselves with laying before the reader the following statements as to their importance in a commercial point of view.

*Importance and Utility of improved Roads.*—Next to the introduction of money, and weights and measures, the formation of good roads and bridges gives the greatest facility to commerce, and contributes more powerfully, perhaps, than any thing else to the progress of improvement. They have been denominated national veins and arteries; and the latter are not more indispensable to the existence of individuals, than improved communications are to a healthy state of the public economy. It were vain to attempt to point out in detail the various advantages derived from the easy means of communication that exist in Great Britain. There is not a single district that is not indebted to others for a large part of its supplies, even of some of the bulkiest commodities. Besides the coals, metals, minerals, timber, corn, &c. conveyed from one part of the empire to another by sea, immense quantities are conveyed from place to place in the interior, by roads and canals; and every improvement effected in the means of conveyance has obviously the same effect upon the cost of commodities that have to be conveyed, as an improvement in the methods by which they are raised or manufactured.

Wherever the means of internal communication are deficient in a country, the inhabitants must unavoidably disperse themselves over the surface. Cities were originally founded by individuals congregating more, perhaps, for the sake of mutual defence and protection, than for any other cause. But in countries where good government is established, and property is secure, men resort to cities only from a sense of the advantages they afford. The scale on which business is conducted in them presents facilities that cannot be elsewhere afforded for making a fortune; and the extent to which the subdivision of employments is carried opens a field for the exercise of all sorts of talent: at the same time that it improves and perfects all sorts of arts, whether subservient to industrious or scientific pursuits, or to those of pleasure and dissipation. It is this that attracts the aspiring, the industrious, the gay, and the profligate, to cities,—that fills them with the best and the worst part of the species. The competition that takes place in a great town, the excitement that is constantly kept up, the collision of so many minds brought into immediate contact, and all endeavouring to outstrip each other in their respective departments, developes all the resources of the human mind, and renders a great city a perpetually radiating focus of intelligence and invention. There are, however, considerable clogs upon the continued increase of cities. The food and fuel made use of by the inhabitants, and the raw products on which their industry is to be exerted, must all come from the country; and according as the size of a city increases, the distances from which its supplies have to be brought become so much the greater, that ultimately the cost of their conveyance may be so great as to balance or exceed the peculiar advantages resulting from a residence in town. Hence the impossibility of a large or even a considerable city existing any where without possessing extensive means of communication either with the surrounding country, or with other countries; and hence, too, the explanation of the apparently singular fact, of almost all large cities having been founded on or near the sea, or a navigable river. Had London been an inland town, 50 miles from the shore, it is abundantly certain that she could not have attained to one third part her present size; but the facilities afforded, by her admirable situation on the Thames, for the importation of all sorts of produce from abroad, as well as from other parts of England, will enable her, should her commerce continue to prosper, to add to her colossal magnitude for centuries to come.

But all towns cannot be founded on the sea coast, or the banks of navigable rivers: and the growth of those in inland situations must, in all cases, depend on their means of communicating with the surrounding country. Without our improved roads, the great inland manufacturing towns with which England is studded, such as Manchester, Leeds, Birmingham, Sheffield, Bolton, Preston, &c., could not exist. They enable the inhabitants to obtain the rude products of the soil and the mines almost as cheap as if they lived in country villages. There is thus nothing, or next to nothing, to detract from the advantages which the inventive and enterprising artisan may expect to realise from resorting to those great hives of industry. And, owing to the gigantic scale on which all sorts of industry are conducted in them, the scope afforded for the employment of the most powerful machines, and the appropriation of particular sets of workmen to

every separate process, however minute, manufacturing industry is carried to a degree of perfection that almost exceeds belief.

The influence that the growth of a large town has upon agriculture is great and striking. "In the neighbourhood," says Paley, "of trading towns, and in those districts which carry on a communication with the markets of trading towns, the husbandmen are busy and skilful, the peasantry laborious; the land is managed to the best advantage, and double the quantity of corn or herbage (articles which are ultimately converted into human provision) raised from it, of what the same soil yields in remoter and more neglected parts of the country. Wherever a thriving manufactory finds means to establish itself, a new vegetation springs up around it. I believe it is true, that agriculture never arrives at any considerable, much less at its highest, degree of perfection, when it is not connected with trade; that is, when the demand for the produce is not increased by the consumption of trading cities."—(*Moral Philosophy*, book vi. c. 11.)

But the fact of their being mainly conducive to the growth of cities, is not the only advantage which improved roads confer upon agriculture. Without their aid it would be impossible to carry to distant places sufficient supplies of such bulky and heavy articles as lime, marl, shells, and other manures necessary to give luxuriance to the crops of rich soils, and to render those that are poor productive. Not only, too, would inferior roads lessen the market for farm produce, and consequently the quantity raised, but a larger proportional number of horses or other cattle would be required to convey the diminished produce to market. It is plain, therefore, that good roads are both directly and indirectly a prime source of agricultural improvement; directly, by increasing the quantity and reducing the cost of manure, and by increasing the quantity and reducing the cost of conveying farm produce to market; and indirectly, by providing for the growth and indefinite extension of cities and towns, that is, of the markets for agricultural produce.

Increased speed of conveyance is one of the principal advantages that have resulted from the formation of good roads, the invention of steam packets, &c. Suppose that it takes 2 days to travel by an uneven, ill-made road between any 2 places; and that, by improving the road, the journey may be accomplished in 1 day; the effect is the same as if the distance were reduced  $\frac{1}{2}$ ; and there is not only a great saving of time to travellers, but also a great saving of cost from the more speedy conveyance of commodities. This latter is a point of much more importance than is commonly supposed. It is not possible to form any correct estimate of the value of the products that are constantly in the act of being carried from place to place in Great Britain and Ireland. It is certain, however, that it is very great; and every additional facility of conveyance, by bringing such products more rapidly to their destination, and enabling them to be sooner applied to the purposes for which they are intended, renders large quantities of capital available for industrious purposes, that would otherwise be locked up.

*Mode of defraying Costs of Roads.*—Roads of one sort or other must, of course, exist in every country emerged from barbarism, — but in England, the statute of the 28th of Philip and Mary, which is still in force, is the first legislative enactment in which a regular provision was made for the repair of the roads. The preamble to this statute declares, that the roads were tedious and noisome to travel on, and dangerous to passengers and carriages: and therefore it enacts, that in every parish 2 surveyors of the high ways shall be annually chosen, and the inhabitants of all parishes obliged, according to their respective ability, to provide labourers, carriages, tools, &c. for four days each year, to work upon the roads, under the direction of the surveyors. This system, though in many respects exceedingly defective, was at the time justly considered a great improvement, and answered pretty well till the reign of Charles II., when, owing to the increase of carriages, particularly about London, it became necessary to adopt more efficient measures for the formation and repair of roads; and the plan of imposing tolls upon those who made use of them began then to be adopted. But this system was not carried into full effect, and placed upon a solid footing, till about 1767, when it was extended to the great roads to all parts of the country; the contributions of labour under the act of Philip and Mary being then appropriated entirely to the cross or country roads. A money payment is now, however, very frequently made, in the case of the latter, instead of a contribution in labour.

When the plan for extending turnpike roads from the metropolis to distant parts of the country was in agitation, the counties in the neighbourhood of London petitioned parliament against it, alleging that the remoter counties would be able, from the comparative cheapness of labour in them, to sell their produce in London at a lower rate than they could do; and that their rents would be reduced, and cultivation ruined, by the measure! Luckily this interested opposition proved ineffectual; and instead of being injurious to the counties adjoining the metropolis, the improvement of the roads has been quite as beneficial to them as to those at a distance, inasmuch as, by providing for the indefinite extension of the city, it has rendered it a far better market for their pecu-

liar productions, than it would have been had its growth been checked; which must have been the case long ago, had the improvements in question not been made.

The plan of making and repairing roads by contributions of labour is not peculiar to England, but was at one period general all over Europe. By an act of the Scotch parliament, passed in 1669, all persons engaged in husbandry were obliged to labour 6 days each year, before or after harvest, upon the public roads: the farmers and landlords being, at the same time, obliged to furnish horses, carts, &c. according to the extent of land occupied by them. The inconveniences of such a system are many and obvious. Those who get no pay for their work, and who perform it against their will, waste their time and industry; and there is, besides, a great loss incurred by the interruption of the regular pursuits of the labourer. A sense of these disadvantages led, in the early part of the reign of George III., to a commutation of the labour contribution for a money tax on land, rated according to its valuation in the cess books. This measure has been productive of the best effects. Previously to its taking place, the roads, even in the best cultivated districts of Scotland, were in the worst possible state, whereas they are now about the very best in Europe.

A similar system has been followed on the Continent. When Turgot entered on his administration, he sent a circular letter to the road surveyors and engineers of the different provinces of France, desiring them to transmit estimates, framed on the most liberal scale, of the sums of money for which the usual repairs might be made on the old roads, and the ordinary extent of new ones constructed. The average of the estimates showed that a money contribution of about 10,000,000 livres a year would suffice for these objects; whereas Turgot showed, that the execution of these repairs and constructions, by contributions of forced labour, or *corvées*, cost not less than 40,000,000 livres!—(Art. *Taxation*, *Ency. Brit.*)

There is still, however, a great deal of labour performed on the cross and country roads of England under the system established by the act of Philip and Mary. Its continuance is most probably to be ascribed to the want of any ready means for its commutation.

It is the duty of government to furnish assistance towards the formation of roads and bridges in parts of the country where they are necessary, and where the funds required for their formation cannot otherwise be obtained. But it is in such cases extremely desirable, in order to prevent government from being deceived by interested representations, that those more immediately concerned in the undertaking should be bound to contribute a considerable portion of its expense. This has been done in the case of the Highland roads. Down to a very recent period, large tracts in the Highlands were quite inaccessible, and were, consequently, in a great measure shut out from all improvement; while the rugged nature of the country and the poverty of the inhabitants rendered any attempt to construct improved roads an undertaking beyond their means. Under these circumstances, government came forward and engaged to advance the expense of making roads and bridges in certain districts, on condition that the landlords and others interested should advance the other  $\frac{1}{3}$ , and that the work should be executed under the direction of parliamentary commissioners and engineers. This arrangement has been highly beneficial. Through its means above 600 miles of excellent roads have been constructed; and, in consequence of the easy means of communication they afford, a spirit of improvement has been excited even in the wildest and least frequented districts.

Dr. Smith seems to have inclined to the opinion, that the roads of a country would be better attended to, and more economically managed, were they placed under the control of government, than when they are left to be planned and superintended by private individuals. But this opinion does not seem to rest on any good foundation. It is, perhaps, true that a few of the great roads between the principal towns of a country might be better laid out by government surveyors, than by surveyors appointed by the gentlemen of the different counties through which they pass. But these great roads bear but a very small proportion to the total extent of cross and other roads with which every country either is, or should be, intersected; and, besides, it is abundantly certain, that when the formation of the great roads is left, as in Great Britain, to the care of those who, either by themselves or their tenants, have to defray the greater part of the expense of their construction and repair, they will be managed, if not with greater skill, at least with far more economy, than if they were intrusted to the agents of government. M. Dupin has set this matter in the clearest point of view, in his remarks on the administration of the roads in France and England. In the former they are entirely under the control of government; and the consequence is, that while there is a useless expenditure upon a few great roads, the cross roads are almost entirely neglected, and the facilities of internal intercourse are incomparably inferior to ours.

Sir Henry Parnell, who published the best treatise on road-making in the English language, while he approves of the system of local trusts, proposes that measures should

be taken for increasing the responsibility of the trustees, and that every trust should be obliged to submit its accounts to the inspection of some public board. We have no doubt that this plan would be in several respects advantageous. Perhaps, however, the object in view, in making accounts be submitted to a public board, might be attained by the erection of local tribunals for their inspection. We should be extremely jealous of any plan, how advantageous soever in other respects, that might lead to the employment of government surveyors generally in the laying out of roads, or to any material abridgment of the powers of the private trusts.

*Length of Roads, Cost, &c.* — The total length of the different paved streets and turnpike roads in England and Wales amounts to about 20,000 miles. The expenditure by the trustees, on account of these roads, in 1841, amounted to 1,551,336*l*.; the revenue for the same year being 1,574,518*l*. : of the total expenditure, 302,182*l*. went to defray interest of debt. — (*Parl. Paper* No. 580. Sess. 1843.) The length of the various cross roads and other highways, exclusive of turnpikes, is estimated at about 95,000 miles.

*Tolls.* — In fixing the rate of tolls, great care should be taken to keep them as low as possible. When they are either too much multiplied, or too high, they have a very pernicious influence. They then operate as a most oppressive and unequal tax on commerce; and obstruct that intercourse they are intended to promote. The same remark is applicable to all sorts of dock and harbour dues, light-house dues, &c. When confined within due bounds, they cannot justly be objected to; for nothing can be fairer than that those who benefit by such increased facilities and security in the prosecution of their business should pay for them. But whenever they exceed the proper limits, they tempt the navigator to resort to ports where the charges are lower, and to direct his course through more insecure but less costly channels.

*Improvement of Roads.* — It is not easy for those accustomed to travel along the smooth and level roads by which every part of this country is now intersected, to form any accurate idea of the difficulties the traveller had to encounter a century ago. Roads were then hardly formed; and, in summer, not unfrequently consisted of the bottoms of rivulets. Down to the middle of last century, most part of the goods conveyed from place to place in Scotland, at least where the distances were not very great, were carried, not by carts or wagons, but on horseback. Oatmeal, coals, turf, and even straw and hay, were conveyed in this way! At that period, and for long previously, single-horse traffickers (*cadgers*) regularly plied between different places, supplying the inhabitants with such articles as were then most in demand, as salt, fish, poultry, eggs, earthenware, &c. : these were usually conveyed in sacks or baskets, suspended one on each side the horse. But in carrying goods between distant places, it was necessary to employ a cart, as all that a horse could carry on his back was not sufficient to defray the cost of a long journey. The time that the *carriers* (for such was the name given to those that used carts) usually required to perform their journeys seems now almost incredible. The common carrier from Selkirk to Edinburgh, *thirty-eight* miles distant, required a *fortnight* for his journey between the two places, going and returning! The road originally was among the most perilous in the whole country; a considerable extent of it lay in the bottom of that district called Gala-water, from the name of the principal stream, the channel of the water being, when not flooded, the track chosen as the most level, and easiest to travel in!

Even between the largest cities, the means of travelling were but little superior. In 1678, an agreement was made to run a coach between Edinburgh and Glasgow, a distance of 44 miles, which was to be drawn by six horses, and to perform the journey from Glasgow to Edinburgh and back again in six days. Even so late as the middle of last century, it took 1½ day for the stage coach to travel from Edinburgh to Glasgow, — a journey which is now accomplished in 4½ or 5 hours.

So late as 1763, there was but one stage coach from Edinburgh to London, and it set out only once a month, taking from 12 to 14 days to perform the journey. Previously to the late opening of the railway, by which they have been in a great measure superseded, there were, exclusive of steam packets, smacks, &c., 3 or 4 coaches which set out each day from Edinburgh for London, and conversely, performing the journey in from 45 to 48 hours. — (*Robertson's Rural Recol.* pp. 39—44.)

The effects of this extraordinary improvement in the means of travelling, especially since the introduction of railways, have been as striking on the manners as on the industry of all classes. The remark of Smith, that "man is the least transportable species of luggage," is no longer true as applied to Great Britain. During spring, the metropolis is crowded with visitors of all ranks and orders from the remotest provinces; and during summer and autumn vast numbers of the citizens are spread over the country. Hence it is, that manners, as well as prices, are reduced nearly to the same standard. A respectable family in Penzance or Inverness live very much in the same way as a respectable family in London. Peculiarities of all sorts have disappeared; every thing

is, as it were, brought to a level; the fashions and opinions of the metropolis are immediately diffused over every part of the country, while those that originate in the latter powerfully influence the former.

ROPE consists of hemp, hair, &c. spun into thick yarn, of which several strings are twisted together by means of a wheel. When made very small, it is called a cord; and when very thick, a cable. All the different kinds of this manufacture, from a fishing-line, or whip-cord, to the cable of a first-rate ship of war, go by the general name of cordage. — (See CABLE.)

ROSEWOOD (Ger. *Rosenholz*; Fr. *Bois du rose, de Rhode*; It. *Legno rodie*; Sp. *Leno de rosa*; Port. *Pão de rosado*) is produced in Brazil, the Canary Islands; in Siam, whence it is pretty largely exported by the Chinese; and in other places. It is in the highest esteem as a fancy wood. The width of the log imported into this country averages about 22 inches, so that it must be the produce of a large tree. Rosewood has a slightly bitterish, somewhat pungent, balsamic taste, and fragrant smell, whence its name. It should be chosen sound, heavy, of the deepest colour, in the largest pieces that can be procured, and of the most irregular knotty grain. The small, light-coloured and large shivered pieces should be rejected. The more distinct the darker parts are from the purple red, which forms the ground, the more is the wood esteemed. It is usually cut into veneers of nine to an inch. — (*Milburn's Orient. Com.*, &c.)

Rosewood, which is one of the dearest as well as most beautiful of the fancy woods, is principally used in veneering. Its consumption has more than quintupled since 1820. At an average of the 3 years ending with 1822, the entries for home consumption were 277 tons a year, whereas they amounted, during the 3 years ending with 1841, to 1,607 tons a year! This increase is principally to be ascribed to the reduction of the duty, in 1826, from 20*l.* to 10*l.* a ton, and in 1836, to 6*l.* But we are glad to have to state that the duty was further reduced, in 1842, to 1*l.* per ton when imported from a foreign country, and to 5*l.* per ton when imported from a British possession.

ROSIN. "This substance is obtained from different species of fir; as the *Pinus abies, sylvestris, larix, balsamea*. It is well known that a resinous juice exudes from the *pinus sylvestris*, or common Scotch fir, which hardens into tears. The same exudation appears in the *pinus abies*, or spruce fir. These tears constitute the substance called *thus*, or frankincense. When a portion of the bark is stripped off these trees, a liquid juice flows out, which gradually hardens. The juice has obtained different names, according to the plant from which it comes. The *pinus sylvestris* yields common turpentine; the *larix*, Venice turpentine — (see TURPENTINE); the *balsamea*, balsam of Canada — (see BALSAM), &c. All these juices, which are commonly distinguished by the name of turpentine, are considered as composed of two ingredients; namely, oil of turpentine, and rosin. When the turpentine is distilled, the oil comes over, and the rosin remains behind. When the distillation is continued to dryness, the residuum is known by the name of common rosin, or *colophonium*; but when water is mixed with it while yet fluid, and incorporated by violent agitation, the mass is called *yellow rosin*. During winter, the wounds made in the fir trees become incrustated with a white brittle substance, called *barras* or *galipot*, consisting of rosin united to a small portion of oil. The yellow rosin, made by melting and agitating this substance in water, is preferred for most purposes, because it is more ductile, owing, probably, to its still containing some oil. The uses of rosin are numerous and well known." — (*Thomson's Chemistry*.)

ROSTOCK, the principal city of the Grand Duchy of Mecklenburg Schwerin, on the Warnow, about 9 miles above where it falls into the Baltic, lat. 54° N., long. 12° 12' E. Population, in 1837, 18,067. A large fair for merchandises is annually held at Whitsuntide; and there are wool fairs at other seasons of the year.

The output of Rostock is at Warnemünde, at the mouth of the Warnow. The depth of water at the latter varies from 10½ to 12 feet; but when the west pier, now in the course of being constructed, has been completed, it is expected that the depth of water will be from 12 to 14 feet. The depth of water in the river from Warnemünde up to Rostock is usually from 8 to 9 feet; so that vessels drawing more than this must be lightened to get up to the latter. Rostock has a good harbour and commodious quays.

*Money.* — Rostock and all Mecklenburg reckon by rik-dollars new, two thirds of 48 schillings. The rik-dollar contains 199½ grains pure silver, and is worth nearly 2*s.* 4*d.* (2*s.* 3½*d.*) sterling.

*Weights.* — The commercial weights are the same as those of Hamburg, which see. There are, however, other weights, introduced in 1757, which are 5 per cent. heavier than

the above. They are principally used in the trade with Russia.

*Measures.* — The Rostock foot = 11·38 Eng. inches. The ell = 9 feet. The last contains 96 scheffels; the last used in the measuring of oats = 144 imp. quarters = 45 hectolitres; the last used in the measuring of other grain = 14 imp. quarters or 37·5 hectolitres. — (*Kelly's Combi.*)

*Imports.* — The principal articles of import are sugar, coffee, and other colonial products; cottons, woollens, and hardware, with coal, earthenware, salt, iron, horses, &c., from England; hemp, flax, tallow, oil, sail-cloth, &c., from Russia; alum, deals, timber, lime, tar, &c., from Sweden; herrings and fish oil from Norway; wine, brandy, molasses, drugs, &c., from France; with rice, rum, groceries, &c., from Copenhagen and Hamburg. The total value of the imports by sea may be estimated at about 250,000*l.*

*Exports.* — These consist chiefly of very good red wheat, barley, peas, rapeseed, and a few oats; with wool, rags of a very superior quality, oil cake, rape oil, bones, &c. The exports of wheat amounted in 1840 to 97,865 quarters, and in 1841 to 124,267. In 1840, the exports of peas from Rostock only were 9,503 quarters; but from the duchy they amounted to 43,013 quarters; but at an average their export does not exceed from 20,000 to 25,000 quarters. The export of bones amounted during the same year to 1,500,000 lbs. At an average the value of the exports may be estimated at 300,000*l.*

*Shipping.* — The port of Rostock had, in 1840, 220 ships of the burden of 35,232 tons, which trade with most European nations, the U. States, and Brazil. In 1835, there entered the port 540 ships (burden not stated), of which 215 belonged to Mecklenburg, 152 (mostly small craft) to Denmark, 83 to Sweden, 27

to Hanover, 18 to Prussia, 12 to Russia, 19 to Holland, 10 to Lubeck, 2 to Hamburg, and 1 each to France and England. It is only, in fact, when our ports are open to the importation of foreign corn that British ships are met with, in considerable numbers, in the ports of Mecklenburg.

*Port Charges.*—These are the same on native and privileged ships, among which are included those of England, France, America, Prussia, Norway, &c. The port charges on a vessel of 100 tons burden are as follow, viz. :—

	Privileged.	Not privileged.
Inward with cargo	Rls-d. 10 Sch. 3	Rls-d. 10 Sch. 2
Outward ditto	23 44	32 6
Inward in ballast	12 6	12 6
Outward ditto	19 36	31 10
Ditto without either	17 32	33 48

*Duties.*—These are extremely moderate. On most imported articles they amount to only 3 per cent. *ad valorem*. An export duty of about 5d. per quarter is charged on corn, and of about 4s. 8d. per hhd. on wine. Wool is not subject to any duty on export. Goods imported in vessels not privileged pay 50 per cent. additional on the above duties; that is, they pay 4½ instead of 3 per cent. *ad valorem*.

*Wismar*, the second sea-port town of Mecklenburg, at the confluence of the river Stör with the sea, in lat. 53° 49' 25" N., long. 11° 36' 18" E. Population 11,000. The harbour of Wismar is commodious and safe, being nearly land-locked by the islands of Poel and Walsbich. Close to the town there is from 8 to 8½ feet water; in the inner roads there is from 12 to 13 feet; and in the outer from 16 to 20 feet water. The port charges on a native or privileged vessel of 100 tons amount to about 30 rix-dollars. The articles of import and export are the same at Wismar as at Rostock; but owing to the proximity of Lubeck, from which Wismar is not more than 27 miles distant, her foreign trade is comparatively limited. About 35 ships, of the burden of 4,800 tons, belong to this port. There cleared from it, in 1835, 227 ships, of which 11 were English. The duties at Wismar are somewhat higher than at Rostock, being 4½ per cent. *ad valorem* on colonial products, and from 4d. to 8d. per quarter on corn exported. It is believed, however, that they will shortly be reduced to the Rostock level.

*General Remarks on the Trade of the Duchies.*—Mecklenburg is essentially an agricultural, wool-growing, grazing, and breeding country. In some places it is sandy and barren; but it is for the most part very fertile, and the crops and pastures are both luxuriant. Having few manufactures, her imports necessarily consist principally, as already stated, of manufactured goods, and her exports of raw produce. Owing, however, to the circumstance of the south-western part of the province being bounded by the Elbe, and approaching to within about 30 miles of Hamburg, almost all the manufactured goods, as well as a very large proportion of the colonial products used by the population (550,000), are imported by way of Hamburg. Hence, in Mecklenburg, as in Prussia, the direct foreign trade carried on by the sea frontier forms but a very small part of the entire trade of the country. It is impossible, however, to form any precise estimate of what the latter may amount to. Probably there is no European country so little fettered by customs regulations as Mecklenburg. The duties on articles imported by sea amount only, as already stated, to about 3 per cent. *ad valorem*; and those entering by the land frontier are subject merely to a trifling charge, on account of toll, of which we have not seen any account. It is impossible, indeed, that any commercial system can be bottomed on more liberal principles; and this enlightened policy, and her situation near the mouth of the Elbe, and on the western frontier of the Prussian league, give to Mecklenburg far greater importance, as a commercial state, than is indicated by the amount of her population, or her internal consumption.

**ROTTERDAM**, on the north bank of the Maese, in lat. 51° 55' 19" N., lon. 4° 29' 14" E. Population, in 1840, 78,098. Rotterdam is the second commercial city of Holland. It is more advantageously situated than Amsterdam; being nearer the sea, and the canals which intersect it are so deep as to admit of the largest vessels coming up to the quays and warehouses of the merchants. Its commerce, during the last 15 years, has increased more rapidly than that of any town in Holland. The exports and imports are similar to those of Amsterdam. The white Zealand wheat shipped here is of a peculiarly fine quality; and it is the best market for madder and geneva. Our imports of madder from Holland in 1841 amounted to 35,334 cwt., most of which came from Rotterdam.—(See **MADDER**.) Geneva is sold by the sam; but, for the convenience of smuggling to England, it is divided into ankens and ½ ankens. The legitimate imports of geneva from Holland in 1841 amounted to 464,537 gallons.

*N.B.*—The channel from the sea to Rotterdam is exhibited in the chart of the Dutch coast in the ap of Europe in this work.

*Monies, Weights, and Measures.*—See the article **AMSTERDAM**, for an account of the current monies, weights, and measures of Holland.

Two different commercial lbs. were formerly used at Rotterdam: one was the Amsterdam weight, 100 lbs. of which = 108.95 lbs. avoirdupois; the other, used by retailers, was 3 per cent. lighter, 100 lbs. of it being = 103.45 lbs. avoirdupois.

The Rotterdam last of corn = 10-644 Winchester bushels. The sam = 40 English wine gallons very nearly.

A bushel of tax-seed contains from 7½ to 8 Winchester

bushels. Rock salt is sold per great hundred of 404 maesten, containing from 21 to 23 tons. Coals per bood = ¼ a chaldron of Newcastle.

The liquid measures were divided in the same manner as at Amsterdam, but were larger; thus, 100 stoops of Rotterdam were = 67½ English wine gallons. Brandy were sold per 30 vierdes; while oil, per 90 gallons; vegetable oil per 500 stoops.

The ell is the same as at Amsterdam. 100 feet of Rotterdam = 109½ feet of Amsterdam, or 102 English feet.

RUBY, a precious stone, very highly esteemed: but under this name a variety of minerals have not unfrequently been sold, which differ essentially in their characters.

The *Oriental Ruby* is, in fact, a red variety of the sapphire. When perfect, its colour is a cochineal red, presenting a richness of hue the most exquisite and unrivalled: it is, however, in general, more or less pale, and often mixed with blue; hence it occurs rose red, peach blossom red, and lilac blue, passing into the amethyst. It is harder than any other mineral, except the diamond. Easily frangible. Specific gravity from 3.916 to 4.283. Infusible before the blowpipe. Oriental rubies of 10 carats are extremely rare and valuable. One of 22 grains was sold for 160*l.* Rubies in lots, Indian cut, or small sizes, and of different qualities, are at all times to be had, and sell at from 15*s.* to 65*s.* a carat: but a perfect stone of a carat, or 6 grains, may be deemed rare, and falls little short of the value of the diamond: nay, in some cases, rubies of 2, 3, or 4 carats, if *very fine*, are much scarcer, and even more valuable, than diamonds of equal weight. The finest ruby in England, or perhaps, in Europe, is in the collection of the late Mr. Hope, author of "Anastasis."

There are two other species of ruby, the *Spinelle* and *Balaïs*. When perfect, the Spinelle is a gem of great value and scarcity. Its colour is a fine full carmine or rose red, but it never presents that rich mellow tinge that attends the Oriental ruby. It is also inferior to the latter in hardness and specific gravity. Stones of 3 carats and upwards are very rare and valuable.

The *Balaïs Ruby* is a pale variety of the spinelle. It varies in colour from light red to yellowish red. Though not so rare as the spinelle, it is by no means common. It is much admired for its agreeable tinge of colour; and, when pure and perfect, fetches a very high price; though considerably less than the other varieties.

Rubies are not found in any considerable quantity except in Ava. — (See *SAPPHIRE*.) — (*Mace on Diamonds*, 2d ed. pp. 90. 101.; *Thomson's Chemistry*.)

RUM, a well known and highly esteemed spirituous liquor imported from the West Indies, of which it forms one of the staple products. It is obtained, by means of fermentation and distillation, from molasses, the refuse of the cane juice, and portions of the cane, after the sugar has been extracted. The flavour and taste peculiar to rum are derived from the essential oils carried over in distillation. When the distillation has been carelessly performed, the spirit contains so large a quantity of the grosser and less volatile part of the oil as to be unfit for use till it has attained a considerable age. When it is well rectified, it mellows much sooner. Rum of a brownish transparent colour, smooth oily taste, strong body and consistence, good age, and well kept, is the best. That of a clear, limpid colour, and hot pungent taste, is either too new, or mixed with other spirits. Jamaica rum is the first in point of quality; the Leeward Island rum, as it is called, being always inferior to it, both in flavour, strength, and value. The price of the latter is usually 20 per cent. below that of the former. We import all our rum in puncheons, containing from 84 to 90 gallons each. It is customary, in some of the West India islands, to put sliced pine-apples in puncheons of rum: this gives the spirit the flavour of the fruit; and hence the designation, *pine-apple rum*.

Rum is said to be much adulterated by the retail dealers in England, sometimes with corn spirit; but if done with molasses spirit, the tastes of both are so nearly allied, that the cheat is not easily discovered.

*Consumption of, and Duties upon, Rum, &c.* — The following Table shows the

quantity of rum consumed in Great Britain and Ireland since 1800, the rates of duty charged upon it, and the produce of the duties: the price of Jamaica rum in bond since 1814 is also given.

Account, stated in *Imperial Proof Gallons*, of the Rum annually entered for Home Consumption in the U. Kingdom, from 1800 to 1842, both inclusive, distinguishing England, Ireland, and Scotland, the Rates of Duty payable respectively thereon; the Produce of the Duties; and the Price of Rum in Bond since 1814. (This account has been prepared partly from published and partly from unpublished official documents. The column of prices has been supplied by Mr. Cook.)

For an account of the number of gallons of rum imported into the U. Kingdom from the West India colonies, during each of the 11 years ending with 1841, see *and*, p. 331. Exclusive of the supplies from the West Indies, there were imported, in 1841, 95,510 gallons from the Mauritius, and 1,006,549 gallons from the E. India Company's territories. The latter, however, is more nearly allied to arrack than to rum.

Though rum has not been so much over-taxed as brandy, geneva, and wine, still it is obvious that even, in its case, taxation has been carried far beyond its proper limits. During the 3 years ending with 1802, when the duty in Great Britain was about 9s. a gallon, and in Ireland 6s. 8½d., the consumption of the U. Kingdom amounted to 3,150,000 gallons a year; while, notwithstanding the great increase of population, during the 3 years ending with 1823, when the duty in Great Britain was 13s. 11½d. a gallon, and in Ireland 12s. 8½d., the annual consumption amounted to only 2,307,000 gallons! The reduction of the duty in 1826 to 8s. 6d. increased the consumption from about 2,500,000 to above 3,600,000 gallons in 1830. But 6d. having been added to the duty in 1830, the consumption, influenced, no doubt, partly by this, but probably also by other circumstances, has since greatly declined. The extraordinary demand for rum from 1811 to 1815, was occasioned chiefly by the high price and inferior quality of the British spirits that were then manufactured.

The decrease in the consumption of rum in Ireland is most striking. Unfortunately, however, this is not the only instance the sister kingdom affords of the destructive effects of oppressive taxes. The excessive additions made to the duties on brandy, wine, sugar, &c. since 1805, have had similar effects; the quantity of these articles consumed in Ireland being *decidedly less now than it was 30 years ago!*—(See BRANDY, SUGAR, &c.) Exorbitant taxes have gone far to deprive the Irish of a great variety of comforts; and, consequently, have taken from them some of the most powerful incentives to industry and good conduct. The poverty of the people has set at nought

the calculation of our finance ministers; every increase of taxation in Ireland having produced a diminution of revenue and an increase of crime! Surely it is high time to abandon so odious a system; particularly after the experience of the beneficial effects that have resulted from the diminution of the spirit duties.

Rum the produce of the British possessions in America is not liable to the duty charged on sweetened spirits, unless the actual strength exceed the strength denoted by Sykes's hydrometer by more than 10 degrees per cent.; and in lieu of such duty there shall be charged upon every degree per cent. more than 3 degrees, and not more than 10 degrees, by which the actual strength shall exceed the strength denoted by Sykes's hydrometer, a duty of 5s. 6d.: provided, that if the importer cannot make a perfect entry thereof for payment of duty on the actual strength, he may demand in writing, upon the entry, that trial be made of the actual strength (he paying the expenses of such trial), instead of entering such rum for the payment of duty upon any stated number of such excessive degrees of strength: provided also, that all trials of actual strength of such rum shall be made by some skilful person appointed by the commissioners of customs for such purpose. — (7 Geo. 4. c. 48. § 31.)

Rum the produce of the British plantations must be imported in casks containing not less than 20 gallons. — (3 & 4 Will. 4. c. 52.) But rum in casks capable of containing 20 gallons may be imported on the officer being satisfied that the deficiency has been wholly occasioned by absorption or leakage, and not by abstraction. — (Customs Min. 24th of March, 1831.)

Rum in bonded warehouses may be drawn off into casks containing not less than 30 gallons each, as stores for ships, and may be delivered into the charge of the searcher, to be shipped as stores for any ship, without entry or payment of duty, the same being duty borne upon the victualling bill of such ships respectively. — (3 & 4 Will. 4. c. 57.)

Rum of the British plantations in bonded warehouses may also be drawn off into reputed quart or reputed pint bottles, for the purpose of being exported from the warehouse. — (3 & 4 Will. 4. c. 57.)

On applications referring to a former order allowing the admixture of rums of different strengths for exportation, and praying that the rum remaining in the vats after the operation of racking might be admitted for home consumption, the Board were of opinion that the request might be complied with, to the extent of an ullage of 20 gallons, the legal quantity allowed to be exported, and that the duty should be paid, according to the strength, at the time of delivery of the said rum. — (Min. Com. Cus. 27th of Sept. 1837.)

Before any rum shall be entered as being the produce of any British possession in America, or of the Mauritius, the master of the ship importing the same must deliver a certificate of origin to the collector or comptroller, and subscribe a declaration that the goods are the produce of such place. — (3 & 4 Will. 4. c. 52. § 37.; see *ante*, 663.)

**RUSSIA COMPANY**, a regulated company for conducting the trade with Russia. It was first incorporated by charter of Philip and Mary, sanctioned by act of parliament in 1566. The statute 10 & 11 Will. 3. c. 6. enacts, that every British subject desiring admission into the Russia Company shall be admitted on paying 5*l*.; and every individual admitted into the Company conducts his business entirely as a private adventurer, or as he would do were the Company abolished.

Table of Duties payable to the Russia Company.

All goods not enumerated pay 1-8th per cent. *ad valorem* on the declaration of the importer.

**RUSSIA LEATHER** (Fr. *Cuir de Russie*; Ger. *Juchten*; It. *Cuojo di Russia*; Pol. *Jachta*; Rus. *Juft*, *Jouft*; Sp. *Moscovia*) the tanned hides of oxen and other kine, denominated by the Russians *youfts*, or *juffs*, — a designation said to be derived from their being generally manufactured in pairs. The business of tanning is carried on in most towns of the empire, but principally at Moscow and Petersburg. Russia leather is soft, has a strongly prominent grain, a great deal of lustre, and a powerful and peculiar odour. It is principally either red or black: the former is the best, and is largely used in this and other countries in bookbinding; for which purpose it is superior to every other material. The black is, however, in very extensive demand in Russia; large quantities being made up into boots and shoes. The process followed by the Russians in the preparation of this valuable commodity has been frequently

described; but notwithstanding this circumstance, and the fact that foreigners have repeatedly engaged in the business in Russia, with the intention of making themselves masters of its details, and undertaking it at home, the efforts made to introduce the manufacture into other countries have hitherto entirely failed. One of the best tests of genuine Russia leather is its throwing out a strong odour of burnt hide upon being rubbed a little. — (*Ricard, Traité Général du Commerce*, tome i. p. 275. ed. 1781.)

We borrow from Mr. Borrisow's work on the *Commerce of Petersburg* the following details with respect to this article:—Russia leather forms one of the principal export commodities of Petersburg. But since the ports of the Black Sea have been opened, the exports of leather from this port have considerably decreased; Italy, the principal consumer, supplying its wants from Odessa and Taganrog, more easily, cheaply, and expeditiously than from Petersburg. The chief exportation from the latter is to Prussia, Germany, and England. Frankfort on the Maine and Leipzig are of great importance as respects the trade in Russia leather, on account of the fairs held in them.

Juffs are never bought on contract, but always on the spot at cash prices. It nevertheless often happens that agents, in order to secure a lot of juffs, pay a certain sum in advance, and settle for the amount at the first market prices; no prices being fixed in the months of January, February, March, and sometimes even April.

Juffs are assorted or *bracked* when received, according to their different qualities, into *Gross, Recval, Mafja, and Domashna*. The three first sorts are again divided into *heavy and light Gross, heavy and light Recval*, &c. Domashna is the worst, and consequently the cheapest sort. It often happens that juffs are bought unassorted, and then the prices are regulated according as the quantity of Domashna contained in the lot is greater or less. Persons well acquainted with the nature of Russia leather prefer purchasing it in this state.

Juffs are sold by the pood, which consists, as it is commonly expressed, of 4, 4½, 5, 5½, and 6½ hides. By this is understood, that so many hides make a pood, calculated upon the whole lot; and it is to be observed that the lightest juffs are esteemed the best in quality. Heavy juffs, or those of 4 and 4½ hides, are shipped for Italy: the Germans, on the contrary, prefer the lighter sort.

Juffs are packed in rolls, each containing 10 hides; and from 10 to 16 of these rolls are packed together in a bundle, which is well secured by thick matting. There are red, white, and black juffs; but the red are most in demand. Their goodness is determined by their being of a high red colour, of equal size, and unmixed with small hides: they must also be free from holes, well stretched, and equally thin. In a well finished lot, no thick head or feet parts should be found. If spots resembling flowers are seen on the red hides, it is an additional sign of their good quality; and they are then called *bloomed juffs*. The inside should be clean, soft, and white, and, when taken in the hand, should feel elastic. The best connoisseurs of Russia leather can nearly determine the quality by the smell alone.

Great attention must be paid, in shipping juffs, to secure them from being wetted, as damp air alone is sufficient to injure them.

Sixty rolls of juffs make a last; 88 poods nett weight, when shipped for Italy, make a last; and 44 poods a ton in England.

The exports of juffs from Russia, in 1841, amounted to 177,838 poods, and 180,981 pieces, worth together 1,838,191 silver roubles. — (*Official Returns*, p. 13.)

RYE (Ger. *Roghen, Roehen*; Du. *Rog, Rogge*; Fr. *Seigle*; It. *Segale, Segala*; Sp. *Centeno*; Rus. *Rosch, Sel, Jar*; Lat. *Secale*), according to some, is a native of Crete; but it is very doubtful if it be found wild in any country. It has been cultivated from time immemorial, and is considered as coming nearer in its properties to wheat than any other grain. It is more common than wheat in many parts of the Continent; being a more certain crop, and requiring less culture and manure. It is the bread corn of Germany and Russia. In Britain it is now very little grown; being no longer a bread corn; and, therefore, of less value to the farmer than barley, oats, or peas. — (*London's Ency. of Agriculture*.)

For the regulations as to the importation and exportation of rye, see CORN LAWS AND CORN TRADE.

## S.

SABLE (Ger. *Zobel*; Fr. *Zibelline*; It. *Zibellino*; Rus. *Sokol*), an animal of the weasel tribe, found in the northern parts of Asiatic Russia and America, hunted for the sake of its fur. Its colour is generally of a deep glossy brown, and sometimes of a fine glossy black, which is most esteemed. Sable skins have sometimes, though very rarely, been found yellow, and white. The finer sorts of the fur of sables are very scarce and dear. — (See FUR TRADE.)

SADDLES (Fr. *Selles*; Ger. *Sattel*; It. *Selle*; Rus. *Sidla*; Sp. *Selles*), seats adapted to the horse's back, for the convenience of the rider. Those made in England are reckoned the best. Sherborne and Lynn are particularly remarkable for this manufacture. The hogskins, which, when tanned, are used for the seat of the saddle, are mostly imported from Russia.

SAFFLOWER, or BASTARD SAFFRON (Ger. *Safflor*; Du. *Saffloer, Basterd Saffran*; Fr. *Carthame, Saffran batard*; It. *Zaffrone*; Sp. *Alazor, Azafraon bastardo*; Rus. *Polerroi, Prostoi schafraan*), the flower of an annual plant (*Carthamus tinctorius* Lin.) growing in India, Egypt, America, and some of the warmer parts of Europe. It is not easily distinguished from saffron by the eye, but it has nothing of its smell or taste.

The flowers, which are sometimes sold under the name of *saffranon*, are the only parts employed in dyeing. They yield two sorts of colouring matter: one soluble in water, and producing a yellow of but little beauty; the other is *resinous*, and best dissolved by the fixed alkalies: it is this last which alone renders safflower valuable in dyeing; as it affords a red colour exceeding in delicacy and beauty, as it does in costliness, any which can be obtained even from cochineal, though much inferior to the latter in durability. The colour of safflower will not bear the action of soap, nor even that of the sun and air for a long time; and being very costly, it is principally employed for imitating upon silk the fine scarlet (*ponceau* of the French) and rose colours dyed with cochineal upon woollen cloth.

The fine rose colour of safflower, extracted by crystallised soda, precipitated by citric acid, then slowly dried, and ground with the purest talc, produces the beautiful *rouge* known by the name of *rouge végétale*.

Safflower should be chosen in flakes of a bright pink colour, and of a smell somewhat resembling tobacco. That which is in powder, dark coloured, or oily, ought to be rejected.—(*Hasslequist's Voyages*, Eng. ed. p. 252.; *Bancroft's Permanent Colours*, vol. i. pp. 286—289.; *Milburn's Orient. Com.*)

Of 5,352 cwt. of safflower imported in 1840, 5,110 came from the East Indies. The price of safflower in bond varies from 1*l.* to 7*l.* a cwt. The entries of safflower for home consumption amounted, at an average of the years 1840 and 1841, to 1,331 cwt. a year. The duty is 1*s.* a cwt.

**SAFFRON** (Ger. *Saffran*; Du. *Safran*; It. *Zafferano*; Sp. *Saffron*; Fr. *Azafran*; Rus. *Schafra*), a sort of cake prepared from the stigmas, with a proportion of the style, of a perennial bulbous plant (*Crocus sativus* Lin.) cultivated to a small extent in Cambridgeshire. It is also imported from Sicily, France, and Spain; but the English, as being fresher, more genuine, and better cured, is always preferred. When good, saffron has a sweetish, penetrating, diffusive odour; a warm, pungent, bitterish taste; and a rich, deep orange red colour. It should be chosen fresh, in close, tough, compact, cakes, moderately moist, and possessing in an obvious degree all the above mentioned qualities. The not staining the fingers, the making them oily, and its being of a whitish yellow or blackish colour, indicate that it is bad, or too old. Saffron is used in medicine, and in the arts; but in this country the consumption seems to be diminishing. It is employed to colour butter and cheese, and also by painters and dyers.—(*Thomson's Dispensatory*; *Loudon's Ency. of Agriculture*.)

**SAGAPENUM** (Arab. *Sugbenaj*), a concrete gum-resin, the produce of an unknown Persian plant. It is imported from Alexandria, Smyrna, &c. It has an odour of garlic; and a hot, acrid, bitterish taste. It is in agglutinated drops or masses, of an olive or brownish yellow colour, slightly translucent, and breaking with a horny fracture. It softens and is tenacious between the fingers, melts at a low heat, and burns with a crackling noise and white flame, giving out abundance of smoke, and leaving behind a light spongy charcoal. It is used only in medicine.—(*Thomson's Dispensatory*.)

**SAGO** (Malay, *Sagu*; Jav. *Sagu*), a species of meal, the produce of a palm (*Metroxylon Sagu*) indigenous to and abundant in such of the Eastern islands as produce spices, where it supplies a principal part of the farinaceous food of the inhabitants.

The tree, when at maturity, is about 30 feet high, and from 18 to 22 inches in diameter. Before the formation of the fruit, the stem consists of an external wall about 2 inches thick, the whole interior being filled up with a sort of spongy medullary matter. When the tree attains to maturity, and the fruit is formed, the stem is quite hollow. Being cut down at a proper period, the medullary part is extracted from the trunk, and reduced to a powder like sawdust. The filaments are next separated by washing. The meal is then laid to dry; and being made into cakes and baked, is eaten by the islanders. For exportation, the finest sago meal is mixed with water, and the paste rubbed into small grains of the size and form of coriander seeds. This is the species principally brought to England, for which market it should be chosen of a reddish hue and readily dissolving in hot water into a fine jelly. Within these few years, however, a process has been invented by the Chinese for refining sago, so as to give it a fine pearly lustre; and the sago so cured is in the highest estimation in all the European markets. It is a light, wholesome, nutritious food. It is sent from the islands where it is grown to Singapore, where it is granulated and bleached by the Chinese. The export trade to Europe and India is now principally confined to that settlement.—(*Ainslie's Mat. Indica*; *Crawford's East. Archip.* vol. i. pp. 383—393., vol. iii. p. 348.; *Bell's Review of the Commerce of Bengal*, &c.)

The consumption of sago has increased very rapidly since 1820, having then amounted to only about 1,200 cwts. a year; whereas, during the years 1840 and 1841, no fewer than 43,664 cwts. were annually retained for consumption. This large increase is partly ascribable to the reduction in the interval of the oppressive duties by which the article was formerly loaded, and partly, and perhaps principally, to the fact of its being extensively used, along with potato flour, in the adulteration of sugar.—(See *SUGAR*.) The price of common sago in bond varies from 1*s.* to 1*l.*, while pearl sago fetches from 1*s.* to 1*l.* 10*s.* a cwt.; but the price is liable to great fluctuation.

**SAIL**, a coarse linen or canvass sheet attached to the masts and yards of ships, the blades of windmills, &c., to intercept the wind and occasion their movement.

Foreign sails, when imported by, and fit and necessary for, and in the actual use of any British ship, are exempted from duty; but when otherwise disposed of, they pay a duty of 30 per cent. *ad valorem*.—(9 Geo. 4. c. 76, § 12.)

Sails and cordage of British manufacture, exported from Great Britain to the colonies, and afterwards imported into the U. Kingdom, are in all cases, other than those in which they are imported by *bill of lading*, to be deemed foreign; and such sails and cordage, although not liable to duty so long as the vessel continues to belong to the colony, become subject to the duties in question as soon as the vessel becomes the property of persons residing in this country.—(*Treasury Order*, 29th of Jan. 1829.)

**SALEP**, a species of powder prepared from the dried roots of a plant of the orchis kind (*Orchis mascula* Lin.). That which is imported from India is in white oval pieces, hard, clear, and pellucid, without smell, and tasting like tragacanth. As an article of diet, it is said to be light, bland, and nutritious. The plant thrives in England,

but it is not cultivated to any extent; and very little is imported. — (*Ainslie's Mat. Indica; Milburn's Orient. Com.*)

**SALMON** (Ger. *Lachs, Salm*; Fr. *Saumon*; It. *Sermone, Salamone*; Sp. *Salmon*; Rus. *Lemga*). This excellent fish is too well known to require any description. It is found only in northern seas, being unknown in the Mediterranean and other warm regions. In this country it is an article of much value and importance. It is said to be exceedingly abundant in Japan and Kamtschatka.

"Salmon fisheries," Marshall observes, "are copious and constant sources of human food; they rank next to agriculture. They have, indeed, one advantage over every other internal produce, — their increase does not lessen other articles of human subsistence. The salmon does not prey on the produce of the soil, nor does it owe its size and nutritive qualities to the destruction of its compatriot tribes. It leaves its native river at an early state of growth; and going, even naturalists know not where, returns of ample size, and rich in human nourishment; exposing itself in the narrowest streams, as if nature intended it as a special boon to man. In every stage of savageness and civilisation, the salmon must have been considered as a valuable benefaction to this country."

Such salmon as are taken in estuaries or rivers are, of course, the property of those to whom the estuaries or rivers belong. The fisheries in them frequently lending for very large sums; but of late very considerable quantities of salmon have been taken in bays and in the open sea, where the fishing is free to any one who chooses to engage in it. The London market, where the consumption is immense, has been, since 1790, principally supplied from the Scotch rivers. The Tweed fishery is the first in point of magnitude of any in the kingdom; the take is sometimes quite astonishing, several hundreds having been frequently taken by a single sweep of the net! Salmon are despatched in fast sailing vessels from the Spey, the Tay, the Tweed, and other Scotch rivers, for London, packed in ice, by which means they are preserved quite fresh. When the season is at its height, and the catch greater than can be taken off fresh, it is salted, pickled, or dried for winter consumption at home, and for foreign markets. Formerly, such part of the Scotch salmon as was not consumed at home, was pickled and kitted after being boiled, and was in this state sent up to London under the name of Newcastle salmon; but the present method of disposing of the fish has so raised its value, as to have nearly deprived all but the richer inhabitants in the environs of the fishery of the use of salmon. Within the memory of many, now living, salted salmon formed a material article of household economy in all the farm-houses in the vale of the Tweed; inasmuch, that in-door servants used to stipulate that they should not be obliged to take more than two weekly meals of salmon. Its ordinary price was then 2s. a stone of 19 lbs.; but it is now never below 12s., often 36s., and sometimes 42s., a stone. This rise in the price of the fish has produced a corresponding rise in the value of the salmon fisheries, some of which are very valuable. There are considerable fisheries in some of the Irish and English rivers; but inferior to those of Scotland. — (*General Report of Scotland*, vol. iii. p. 327.) The Scotch salmon fisheries seem to have attained their maximum value towards the end of the last war, when the fisheries in the Tweed were let for from 15,000*l.* to 18,000*l.* a year! and those of the Tay, Dee, Spey, &c. were proportionally valuable. But the value of the Scotch salmon fisheries has, speaking generally, declined greatly of late years; in consequence, partly and principally, of a diminished supply of fish in the rivers, but in some degree, also, from the greater facility of the communication between London and Liverpool, and the consequent importation of Irish salmon into the London markets. We have been fortunate enough to obtain from a source on which every reliance may be placed, the following

Account of the Quantity of Salmon packed in Ice imported into London, from Scotland, during each of the 8 Years ending with the 14th of October, 1841, and of the Wholesale Price of the same.

Years ending Oct. 14.	Weight of Fish.	Average Price, about	Total Value.	Years ending Oct. 14.	Weight of Fish.	Average Price, about	Total Value.
	<i>Lbs.</i>	<i>d.</i>	<i>£</i>		<i>Lbs.</i>	<i>d.</i>	<i>£</i>
1834	3,459,900	9½ per lb.	135,590	1838	2,336,900	11½ per lb.	104,160
1835	4,760,960	10½	177,800	1839	1,830,000	11	65,880
1836	2,751,840	10½	120,400	1840	1,697,990	11	77,430
1837	3,617,600	10	150,750	1841	3,192,672	8½	116,400

This, it will be observed, is independent of the pickled salmon brought from Scotland, the quantity and value of which varies as much as that of the fresh salmon. But we are well assured that, at an average of the last eight years, its value has not exceeded 12,000*l.* a year. At an average, the retail price of salmon in London may be taken at from 50 to 75 per cent. above the wholesale price.

We may remark, by the way, that as by far the largest portion of the salmon made use of in London comes from Scotland, the above statement shows that its consumption in the metropolis is not nearly so great as is generally supposed. In fact, it is little used, except by the more opulent classes; and nothing that is not generally used by the middle classes, or by them and the lower, is ever of much importance. The little influence over prices caused by a large increase of supply is also a striking feature in this return.

*Decrease of the Supply of Salmon, Poaching, &c.* — The decrease of salmon in the English and Scotch rivers, particularly of late years, is a fact as to which there can be no manner of doubt. — (*Report of Committee of House of Commons on Scotch Salmon Fishery*, in 1843.) Much unsatisfactory discussion has taken place on the causes of this, probably, on a very diversified character. A good deal has been ascribed to the increase of water machinery on the banks of the different rivers; but we hardly think that this could have much influence, except, perhaps, in the case of the smaller class of rivers. *Weirs*, or salmon traps, have also been much objected to; though, as we have been assured, with still less reason. On the whole, we are inclined to think that the falling off in the supply of this valuable fish is principally to be ascribed to the temptation to over-fish the rivers, caused by the high price of salmon; to the prevalence of poaching; and, more than all, to the too limited duration of the *close time*. In 1836, after a great deal of discussion and inquiry, an act was passed (9 Geo. 4. c. 89.), which has done a good deal to remedy these defects — in so far, at least, as respects the Scotch fisheries. The rivers are shut from the 14th of September to the 1st of February; and every person catching or attempting to catch fish during that period forfeits not less than 1*l.* and not more than 10*l.* for every offence, besides the fish, if he have caught any, and such boats, nets, or other implements, as he may have made use of. Pecuniary penalties are also inflicted upon poachers and trespassers; and provision is made for the watching of the rivers. We understand that this act has had a very good effect; though it is believed that it would be better were the *close time* extended from the 1st of September to the middle of February.

Previously to 1842 the importation of foreign salmon was prohibited; but among the important and beneficial changes effected by the tariff act of that year, the repeal of this prohibition, and the admission of foreign salmon to our markets on payment of a duty of 10s. 6d. (inc. the 5 per cent.) a cwt., is one of the foremost. The importation has not, however, been nearly so great as was anticipated. It appears from the customs returns that during the 11 months ending the 6th of December, 1843, the total imports of foreign salmon amounted to 910 cwt. 2 qrs. and 7 lb., of which 894 cwt. 3 qrs. and 23 lb. (92,364 lb.)

were entered for consumption. This salmon was almost wholly brought from Holland; the anticipated imports from Norway and Sweden having turned out quite trifling. The official returns do not afford the means of discriminating between fresh and pickled salmon; but we believe the larger portion by far of the imports made during last year (1843) was fresh.

Return showing the Export of Salmon from the Port of Bergen, in Norway, with the average Prices of the same free on board, in 1833, 1840, and 1841.

Articles.	Quantity exported.	English Weights and Measures.	Prices in Sterling at the Average Rate of Exchange.
1839. — Smoked, first quality	1,574 lbs.	per lb.	10s. to 8d.

Ditto later in ditto	-	-	8d. — 8d.

Return of the Quantities of Salmon exported from Norway in each of the unmentioned Years.

Year.	Salted Salmon.	Smoked Salmon.	Year.	Salted Salmon.	Smoked Salmon.
1835	barrels 142	lbs. 6,508	1839	barrels 17½	lbs. 3,332
1836	144½	6,557	1840	568 4-15ths.	4,441
1837	108	4,738	1841	169½	7,472
1838	8	6,553			

It is enacted by stat. 1 Geo. 1. st. 2. c. 18., that no salmon shall be sent to any fishmonger or fish-seller in England, of less than 6 lbs. weight, under a penalty of 5*l*. The 58 Geo. 3. c. 43. authorises the justices at quarter sessions to appoint conservators of rivers, and to fix the beginning and termination of the *close time*. The penalty upon poaching and taking fish in *close time* is by the same act fixed at not more than 10*l*. and not less than 5*l*., with forfeiture of fish, boats, nets, &c.

SALONICA, a large city and sea-port of European Turkey, at the north-east extremity of the gulph of the same name, in lat. 40° 38' 47" N., lon. 22° 57' 13" E. Population estimated at 70,000. There is no port at Salonica, but there is excellent anchorage in the roads opposite to the town. The access to them is by no means difficult. Pilots, however, are, for the most part, employed; and of these, some are always on the look-out. During that period of the late war when the anti-commercial system of Napoleon was at its height, Salonica became a great *dépôt* for British goods; whence they were conveyed to Germany, Russia, and other parts of Europe. At all times, however, Salonica has a considerable trade. The exports principally consist of wheat, barley, and Indian corn, timber, raw cotton, wool, raw silk, wax, tobacco, and sesamum. The imports are sugar, coffee, dyewoods, indigo, muslins, calicoes, cotton twists, iron, lead, tin, watches, &c. It is stated in a communication from Salonica, dated the 31st December, 1842, on which every dependence may be placed, that the demand for British cotton goods is rapidly increasing, and that they have "entirely superseded" all others. The value of the direct and indirect imports from England in 1842 was estimated at 73,165*l*.

*Arrivals.* — In 1842 the burden of the vessels that arrived at Salonica amounted to 41,596 tons.

*Money, Weights, and Measures.* — Accounts are kept in piastres of 40 paras, or 120 aspers. The coins are those of Constantinople; which see.

The weights and measures are the same as those of Smyrna, except that the kiseloz, killow, or corn measure of Salonica = 278 kiseloz of Smyrna.

SALT (Ger. *Salz*; Du. *Zout*; Fr. *Sel*; It. *Sale*; Sp. *Sal*, Rus. *Sol*; Lat. *Sal*; Arab. *Melh*; Chin. *Yen*; Hind. *Nimmuck*; Per. *Nun*), the *chloride of sodium* of modern chemists, has been known and in common use as a seasoner and preserver of food from the earliest ages. Immense masses of it are found in this and many other countries, which require only to be dug out and reduced to powder. In that state it is called rock salt. The water of the ocean also contains a great deal of salt; to which, indeed, it owes its taste, and the power which it possesses of resisting freezing till cooled down to 28-5°. When this water is sufficiently evaporated, the salt precipitates in crystals. This is the common process by which it is obtained in many countries. There are various processes by which it may be obtained quite pure. Common salt usually crystallises in cubes. Its taste is universally known, and is what is strictly denominated *salt*. Its specific gravity is 2.125. It is soluble in 8.62 times its weight of cold water, and in 2.76 times its weight of boiling water. — (*Thomson's Chemistry*.)

Besides its vast utility in seasoning food, and preserving meat both for domestic consumption and during the longest voyages, and in furnishing muriatic acid and soda, salt forms a glaze for coarse pottery, by being thrown into the oven where it is baked; it improves the whiteness and clearness of glass; it gives hardness to soap; in melting metals, it preserves their surface from calcination, by defending them from the air, and is employed with advantage in some assays; it is used as a mordant, and for improving certain colours; and enters more or less into many other processes of the arts. Many

contradictory statements have been made as to the use of salt as a manure. Probably it may be advantageous in some situations, and not in others.

*Salt Mines, Springs, &c.* — The principal salt mines are at Wielitka in Poland, Catalonia in Spain, Almonte in Calabria, Loowur in Hungary, in many places in Asia and Africa, and in Cheshire in this country. The mines at Wielitka are upon a very large scale; but the statements that have frequently been published, of their containing villages inhabited by colonies of miners who never saw the light, are altogether without foundation. These mines have been wrought for more than 600 years. — (*Cox's Travels in the North of Europe*, vol. i. 149. 8vo. ed.)

The salt mines in the neighbourhood of Northwich in Cheshire are very extensive. They have been wrought since 1670; and the quantity of salt obtained from them is greater, probably, than that is obtained from any other salt mines in the world. In its solid form, when dug from the mine, Cheshire salt is not sufficiently pure for use. To purify it, it is dissolved in sea water, from which it is afterwards separated by evaporation and crystallisation. The greater part of this salt is exported.

Salt springs are met with in several countries. Those in Cheshire and Worcestershire furnish a large proportion of the salt made use of in Great Britain. The brine, being pumped up from very deep wells, is evaporated in wrought iron pans from 30 to 30 feet square and 10 or 12 inches deep, placed over a furnace.

Most of the salt used in Scotland, previously to the repeal of the duty, was obtained by the evaporation of sea water nearly in the way now mentioned; but most part of the Scotch salt works have since been relinquished.

In warm countries, salt is obtained by the evaporation of sea water by the heat of the sun; and the crystals of salt made in this way are more perfect, and purer, from the greater slowness of the process. French salt is manufactured in this mode, and it has always been in considerable demand in this and other countries; but the principal imports of foreign salt into Great Britain at present are from Portugal. They amount, at an average, to from 300,000 to 350,000 bushels a year.

*Consumption of Salt.* — The consumption of salt in this country is immense. Necker estimated the consumption in those provinces of France which had purchased an exemption from the *gabelle* (*Pays francs rédimés*) at about 194 lbs. (Eng.) for each individual. — (*Administration des Finances*, tome ii. p. 12.) From all that we have been able to learn on the subject, we believe that the consumption of the people of this country may be estimated a little higher, or at 22 lbs.; the difference in our food and habits, as compared with the French, fully accounting for this increased allowance. On this supposition, and taking the population at 18,500,000, the entire consumption will amount to 407,000,000 lbs., or 181,695,000 tons.

Exclusive of this immense home consumption, we annually export very large quantities.

Account of the Quantities and Value of the Salt exported from the U. Kingdom, during each of the 4 Years ending with 1841, specifying the Countries to which it was exported and the Quantity and Value of that sent to each.

The cheapness of this important necessary of life is not less remarkable than its diffusion. Its present cost may be estimated, at a medium, at from 14s. to 16s. a ton.

*Duties on Salt.* — In ancient Rome, salt was subjected to a duty (*vectigal salinarum*; see *Burman, Dissertatio de Vectigalibus Pop. Rom.* c. 6.); and it has been heavily taxed in most modern states. The *gabelle*, or code of salt laws, formerly established in France, was most oppressive. From 4,000 to 5,000 persons are calculated to have been sent annually to prison and the galleys for offences connected with these laws, the severity of which had no inconsiderable share in bringing about the Revolution. — (*Young's Travels in France*, vol. i. p. 598.) In this country, duties upon salt were imposed in the reign of William III. In 1798 they amounted to 8s. a bushel; but were subsequently increased to 15s. a bushel, or about thirty times the cost of the salt! So exorbitant a duty was productive of the worst effects; and occasioned, by its magnitude, and the regulations for allowing salt, duty free, to the fisheries, a vast deal of smuggling. The opinion of the public and of the House of Commons having been strongly pronounced against the tax, it was finally repealed in 1823.

That the repeal of so exorbitant a duty has been productive of great advantage, no one can doubt; but seeing that a large revenue must be raised, we question whether government acted wisely in totally relinquishing the tax. Had the duty been reduced to 2s. or 3s. 6d. a bushel, and no duty-free salt allowed for the fisheries, but a drawback given on the fish exported, a revenue of 1,000,000*l.* a year might have been derived from this source with but little injury. It was not the nature of the salt tax, but the absurd extent to which it had been carried, that rendered it justly odious. When at the highest, it produced about 1,500,000*l.* a year.

**SALTPETRE, OR NITRATE OF POTASH** (Ger. *Salpeter*; Fr. *Nitre*, *Salpêtre*; It. *Nitro*, *Salnitro*; Sp. *Nitro*, *Salitre*; Rus. *Senitra*; Lat. *Nitrum*; Arab. *Ukkir*; Hind. *Shorah*), a salt well known in commerce, and of very great importance. It may be regarded both as a natural and an artificial production; being found on the surface of the soil in many parts of India, Egypt, Italy, &c.; but in these and other places all that is known in commerce is obtained by an artificial process, or by lixiviating earth that has been formed into *nitre* beds. The saltpetre consumed in England is brought from Bengal in an impure state, but crystallised, in bags, each containing 164 lbs. Saltpetre forms the principal ingredient in the manufacture of gunpowder; and is used in various arts. It is also of great utility in the commerce of India, from its fur-

nishing a large amount of dead weight for the shipping engaged in it. Saltpetre possesses considerable antiseptic power. That which is of the best quality and well refined, is in long transparent crystals; its taste is sharp, bitterish, and cooling; it flames much when thrown upon burning coals; is very brittle; specific gravity 1.933. It is not altered by exposure to the air.

Beckmann contends, in a long and elaborate dissertation (*Hist. of Invent.* vol. iv. pp. 525—586. Eng. ed.), that the ancients were unacquainted with saltpetre, and that their *nitrum* was really an alkaline salt. But, as saltpetre is produced naturally in considerable quantities in Egypt, it is difficult to suppose that they could be entirely ignorant of it; though it would appear that they had confounded it with other things. It has been known in the East from a very early period. Beckmann concurs in opinion with those who believe that gunpowder was invented in India, and brought by the Saracens from Africa to the Europeans; who improved its manufacture, and made it available for warlike purposes. — (Vol. iv. p. 571.)

The consumption of saltpetre during periods of war is very great. Its price is consequently liable to extreme fluctuation. In remarking on the varieties in the price of saltpetre, Mr. Tooke observes, "It reached its greatest height in 1795, viz. 170s. a cwt.; in 1796, it fell at one time to 45s., and rose again to 96s. It seems to have been affected considerably by the scale of hostilities on the Continent. But in consequence of the discoveries in chemistry, by which the French were enabled to dispense with a foreign supply, and by the increased importation from India to this country, by which we were enabled to supply the rest of the Continent at a reduced cost, the price declined permanently after 1798-9, when it had reached 145s.; and never after was so high as 100s., except during the short interval of speculation in export, during the peace of 1814, and again upon the breaking out of the war terminated by the battle of Waterloo." The price of saltpetre in the London market varies at this moment (January, 1844) from 24s. to 28s. a cwt. duty (6d.) included.

Account of the Quantities of Saltpetre imported into the U. Kingdom during each of the Seven Years ending with 1841, specifying the Countries whence they were imported, and the Quantities brought from each.

But it is of importance to observe that the saltpetre said in this account to be imported from China and Peru is, in fact, nitrate of soda, consisting of nitric acid and soda, whereas saltpetre consists of nitric acid and potash. Like saltpetre, it is found native in various countries, but especially in the deserts of Tarapaca and Atacama, along the coast of Southern Peru. The deserts in question consist of a vast sandy plain extending between the shore and the foot of the Andes for between 400 and 500 miles. This plain is more than 3,000 feet above the level of the sea; no rain ever falls upon it; and except along the banks of a few streams by which it is intersected, it is quite sterile. In most parts, however, it abounds with nitrate of soda, which sometimes appears on the surface, but is more commonly covered with a stratum of clay and sand, with which the salt is frequently mixed. The principal mines are within about 24 miles of the Peruvian port of Iquique, in 21° 50' S. lat. and 71° 42' W. long. After being dug up, the salt is pulverised, dissolved in boiling water, and allowed to crystallise in shallow wooden troughs. Its price, free on board, including an export duty of about 4 per cent., varies from 2 to 2½ or 3 doli. the quintal of 100 lbs. Having a tendency to attract moisture, it is not so suitable as saltpetre for the manufacture of gunpowder; but it is extremely servicable in various departments of the arts, and is particularly valuable in a commercial point of view, from its affording a return cargo for ships which might otherwise have had to come home in ballast. We subjoin

A Return of the Destination, Quantity, and Price free on board, of the Nitrate of Soda exported from Iquique in each Year, from the Date of the first Shipment of the Article for Europe to the 31st of December, 1841. Exchange, 48d. per dollar.

The price of nitrate of soda in the London market, in January 1844, was, duty (6d.) included, about 14s. 6d. a cwt.; but it was then understood to be very much depressed.

SALVAGE, as the term is now understood, is an allowance or compensation made to those by whose exertions ships or goods have been saved from the dangers of the seas, fire, pirates, or enemies.

The propriety and justice of making such an allowance must be obvious to every one. It was allowed by the laws of Rhodes, Oleron, and Wisby; and in this respect they have been followed by all modern maritime states. At common law, the party who has saved the goods of another from loss or any imminent peril has a *lien* upon them, and may retain them in his possession till payment of a reasonable salvage.

1. *Salvage upon Losses by Perils of the Sea.*—If the salvage be performed at sea, or within high or low water mark, the Court of Admiralty has jurisdiction over the subject, and will fix the sum to be paid, and adjust the proportions, and take care of the property pending the suit: or, if a sale be necessary, direct it to be made; and divide the proceeds between the salvors and the proprietors according to equity and reason. And in fixing the rate of salvage, the court usually has regard not only to the labour and peril incurred by the salvors, but also to the situation in which they may happen to stand in respect of the property saved, to the promptitude and alacrity manifested by them, and to the value of the ship and cargo, as well as the degree of danger from which they were rescued. Sometimes the court has allowed as large a proportion as a *half* of the property saved as salvage; and in others, not more than a *tenth*.

The crew of a ship are not entitled to salvage, or any unusual remuneration for the extraordinary efforts they may have made in saving her; it being their duty as well as interest to contribute their utmost upon such occasions, the whole of their possible service being pledged to the master and owners. Neither are passengers entitled to claim any thing for the *ordinary assistance* they may have been able to afford to a vessel in distress. But a passenger is not bound to remain on board a ship in the hour of danger, provided he can leave her; and if he perform any *extraordinary services*, he is entitled to a proportional recompence.

In the case of valuable property, and of numerous proprietors and salvors, the jurisdiction and proceedings of the Court of Admiralty are well adapted to further the purposes of justice. But, as the delay and expense necessarily incident to the proceedings of a court sitting at a distance from the subject will often be very burdensome upon the parties, in cases where the property saved is not, perhaps, very considerable, the legislature has endeavoured to introduce a more expeditious and less expensive method of proceeding.

The first act for this purpose is the 12 Ann. stat. 2. c. 18. It appears from the preamble, that the infamous practices, once so common, of plundering ships driven on shore, and seizing whatever could be laid hold of as lawful property—(see *Wasek*).—had not been wholly abandoned; or that, if the property was restored to the owner, the demand for salvage was so exorbitant, that the inevitable ruin of the trader was the immediate consequence. To remedy those mischiefs in future, it was enacted, "that if a ship was in danger of being stranded, or being run ashore, the sheriffs, justices, mayors, constables, or officers of the customs, nearest the place of danger, should, upon application made to them, summon and call together as many men as should be thought necessary to the assistance, and for the preservation of such ship in distress, and her cargo; and that if any ship, man-of-war, or merchantman, should be riding at anchor near the place of danger, the constables and officers of the customs might demand of the superior officers of such ship the assistance of her boats, and such hands as could be spared; and that, if the superior officer should refuse to grant such assistance, he should forfeit 100*l*."

Then follows the section respecting salvage. It enacts, "that all persons employed in preserving ships or vessels in distress, or their cargoes, shall, within 30 days after the service is performed, be paid a *reasonable reward* for the same, by the commander, master, or other superior officer, mariners, or owners, of the ship or vessel so in distress, or by any merchant whose vessel or goods shall be so saved; and, in default thereof, the said ship or vessel so saved shall remain in the custody of the officers of customs until all charges are paid, and until the officers of the customs, and the master or other officers of the ship or vessel, and all others employed in the preservation of the ship, shall be *reasonably gratified* for their assistance and trouble, or good security given for that purpose: and if any disagreement shall take place between the persons whose ships or goods have been saved, and the officers of the customs, touching the monies deserved by any of the persons so employed, it shall be lawful for the commander of the ship or vessel so saved, or the owner of the goods, or the merchant interested therein, and also for the officer of the customs, or his deputy, to nominate 3 of the neighbouring justices of the peace, who shall thereupon adjust the *quantum* of the monies or gratuity to be paid to the several persons acting or being employed in the salvage of the said ship, vessel, or goods; and such adjustment shall be binding upon all parties, and shall be recoverable in an action at law; and in case it shall so happen that no person shall appear to make his claim to all or any of the goods that may be saved, that then the chief officer of the customs of the nearest port to the place where the said ship or vessel was so in distress shall apply to 3 of the nearest justices of the peace, who shall put him or some other responsible person in possession of the said goods, such justices taking an account in writing of the said goods, to be signed by the said officer of the customs; and if the said goods shall not be legally claimed, within the space of 12 months next ensuing, by the rightful owner thereof, then public sale shall be made thereof; and, if perishable goods, forthwith to be sold, and, after all charges deducted, the residue of the monies arising from such sale, with a fair and just account of the whole, shall be transmitted to her Majesty's exchequer, there to remain for the benefit of the rightful owner, when appearing; who, upon affidavit, or other proof made of his or their right or property thereto, to the satisfaction of one of the barons of the coif of the exchequer, shall, upon his order, receive the same out of the exchequer."

By a subsequent statute (26 Geo. 2. c. 10.) it is enacted, "that in case any person or persons, not employed by the master, mariners, or owners, or other person lawfully authorised, in the salvage of any vessel, or the cargo or provision thereof, shall, in the absence of the person so employed and authorised, save any such vessel, goods, or effects, and cause the same to be carried, for the benefit of the owners or proprietors, into port, or to any near adjoining custom-house, or other place of safe custody, immediately giving notice thereof to some justice of the peace, magistrate, or custom-house or excise officer, or shall discover to such magistrate or officer where any such goods or effects are wrongfully bought, sold, or concealed, then such person or persons shall be entitled to a *reasonable reward* for such services, to be paid by the masters or owners of such vessels or goods, and to be adjusted, in case of disagreement about the *quantum*, in like manner as the salvage is to be adjusted and paid by 12th Anne, or else as follows:—

"And be it further enacted, that, for the better ascertaining the salvage to be paid in pursuance of the present act and the act before mentioned, and for the more effectually putting the said acts into execution, the justice of the peace, mayor, bailiff, collector of the customs, or chief constable, who shall be nearest to the place where any ship, goods, or effects shall be stranded or cast away, shall forthwith give public notice for a meeting to be held as soon as possible, of the sheriff or his deputy, the justices of the peace, mayors, or other chief magistrates of towns corporate, coroners, or commissioners of the land tax, or any 3 or more of them, who are hereby empowered and required to give aid in the execution of this and the said former act, and to employ proper persons for the saving ships in distress, and such ships,

vessels, and effects, as shall be stranded or cast away; and also to examine persons upon oath, touching the same, or the salvage thereof, and to adjust the quantum of such salvage, and distribute the same among the persons concerned in such salvage, in case of disagreement among the parties or the said persons; and that every such magistrate, &c. attending and acting at such meeting, shall be paid 4s. a day for his expenses in such attendance, out of the goods and effects saved by their care or direction.

"Provided always, that if the charges and rewards for salvage directed to be paid by the former statute and by this act, shall not be fully paid, or sufficient security given for the same, within 40 days next after the said services performed, then it shall be lawful for the officer of the customs concerned in such salvage to borrow or raise so much money as shall be sufficient to satisfy and pay such charges and rewards, or any part thereof then remaining, unpaid or not secured as aforesaid, by or upon one or more bill or bills of sale, under his hand and seal, of the ship or vessel, or cargo saved, or such part thereof as shall be sufficient, redeemable upon payment of the principal sum borrowed, and interest upon the same at the rate of 4l. per cent. per annum."

An act of the 53 Geo. 3. c. 87., continued and extended by the 1 & 2 Geo. 4. c. 76., contains some regulations supplying defects in former statutes. They enact, that goods of a perishable nature, or so much damaged that they cannot be kept, may, at the request of any person interested or concerned in the same, or in saving thereof, be sold, with the consent of a justice, the money being deposited in the hands of the lord of the manor, and an account of the sale transmitted to the deputy vice-admiral. They also authorise the passage of horses, carts, carriages, &c. to the part of the sea coast where a vessel may be wrecked, over the adjoining lands, if there be no road leading as conveniently thereto, under penalty of 100l., the damages to be settled by 3 justices in the event of the parties not agreeing.—(1 & 2 Geo. 4. § 37, 29, 30.)

It is ordered by the same statute, that no lord of the manor, or other person claiming to be entitled to wreck or goods, shall appropriate or dispose of the same until he shall have caused to be given in writing to the deputy vice-admiral of that part of the coast, or to his agents if they reside within 50 miles, if not, then to the corporation of the Trinity House, a report containing an accurate and particular description of the wreck or goods found, and of the place where and time when found, and of any marks thereon, and of such other particulars as may better enable the owner to recover them, and also of the place where they are deposited, and may be found and examined by any person claiming any right to them, nor until the expiration of 1 whole year and a day after the expiration of such notice; the deputy vice-admiral, or his agent, is, within 48 hours of receiving such report, to transmit a copy thereof to the secretary of the corporation of the Trinity House, upon pain of forfeiting, for every neglect to transmit such account, 50l. to any person who shall sue for the same; and the secretary is to cause such account to be placed in some conspicuous situation for the inspection of all persons claiming to inspect and examine it.—(1 & 2 Geo. 4. c. 75. § 26.)

It is further ordered by the same statute, that pilots and others taking possession of anchors, cables, or other wrecked or left materials upon the coast, or within any harbour, river, or bay, shall send notice thereof, within twenty-four hours, to the nearest deputy vice-admiral, or his agent, delivering the articles at such place as may be appointed, under pain of being deemed receivers of stolen goods. The deputy vice-admiral, or his agent, may also seize such articles as have not been reported to him, and is required to keep and report them to the Trinity House as aforesaid; and if he seizes them without previous information, he is to have 1-3d of the value; if he seizes in pursuance of information, the third is to be divided between him and the informer. If the articles are not claimed within a year and a day, they are to be sold, and the money applied as directed by the act of Queen Anne (12 Ann. stat. 2. c. 18., previously quoted), the deputy vice-admiral, or his agent, and the person who may have given information, being in such cases entitled to the salvage allowed upon unclaimed property. And it is further enacted, that if any dispute shall arise between the salvors of any goods found, lodged, and reported as aforesaid, and the owners thereof, as to the salvage to be paid in respect of the same, it is to be determined by the decision of 3 justices; or if they differ, by their nominees, who is to be a person conversant with maritime affairs. Masters and others bound to foreign parts, finding or taking on board anchors, goods, &c., knowing them to be found, are to enter the same in the log book, with the place and time of finding, and to transmit a copy of such entry, by the first possible opportunity, to the Trinity House, and to deliver up the articles on their return home, which, if not claimed, are to be sold within a year and a day, according to the aforementioned statute of Anne. Masters selling such articles incur a penalty of not less than 30l. and not more than 100l.

Pilots, boatmen, or other persons, conveying anchors and cables to foreign countries, and disposing of them there, are to be adjudged guilty of felony, and may be transported for 7 years.

The same statute authorises 3 justices, or their nominee, to decide upon all claims made by boatmen, pilots, and other persons, for services of any description (except pilotage) rendered by them to any ship or vessel, whether in distress or not.

Parties dissatisfied with the award of the justices or their nominee may appeal to the Court of Admiralty; but the justices are in such cases to deliver the goods to the proprietors, or their agent, on their giving good security for double the value. This does not extend to Scotland.

None of the previously mentioned acts have any force within the *Cinque Ports*; but the Lord Warden is directed by stat. 1 & 2 Geo. 4. c. 76. to appoint 3 or more substantial persons in each of these towns, who are authorised to decide upon all claims for services of any sort or description rendered to any vessel, or for saving or preserving, within the jurisdiction, any goods or merchandise wrecked, stranded, or cast away, or for bringing anchors or cables ashore, &c. No commissioner can act for any other place than that in which, or within a mile of which, he is resident. Either party may, within 8 days of the award, declare his intention of bringing the matter before some competent Court of Admiralty; selecting, as he may judge best, the Admiralty of England, or that of the Cinque Ports. The provisions in this statute have been justly eulogised by Lord Tenterden, for the cheap and easy means they afford for settling such questions.

It is impossible, as Mr. Justice Park has observed (*Law of Insurance*, c. 8.), to suppose 3 instances of loss by shipwreck, or other perils of the sea, so similar to each other, that the trouble, danger, and expense of the salvors should be exactly equal; and it would, consequently, be contrary to the first principles of justice to award the same sum for all possible cases of salvage. There was, therefore, no other resource but to appoint competent persons to decide as to the allowance due in any case of salvage that might arise, after taking the various circumstances with respect to it into account.

2. *Salvage upon Recapture.*—It was the practice of our courts, previously to any regulations on the subject, to order restitution of ships or goods, if retaken before condemnation, to be made to the original owners, on payment of a *reasonable salvage* to the recaptors; but by stat. 43 Geo. 3. c. 160. it has been adjudged, that "if any ship or vessel taken as prize, or any goods therein, shall appear, in the Court of Admiralty, to have belonged to any of his Majesty's subjects, which were before taken by any of his Majesty's enemies, and at any time afterwards retaken by any of his Majesty's ships, or any privateer, or other ship or vessel under his Majesty's protection, such ships, vessels, and goods shall, in all cases (save as hereafter excepted), be adjudged to be restored, and shall be accordingly restored, to such former owner or owners, be or they paying for salvage, if retaken by any of his Majesty's ships, one eighth part of the true value thereof, to the flag officers, captains, &c., to be divided as the same act directs; and if retaken by any privateer, or other ship or vessel, one sixth part of the true value of such ships and goods, to be paid to the owners, officers, and seamen of such privateer or other vessel, without any deduction; and if retaken by the joint operation of one or more of his Majesty's ships, and one or more private ships of war, the judge of the Court of Admiralty, or other court having cognisance thereof, shall order such salvage,

and in such proportions, to be paid to the captors by the owners, as he shall, under the circumstances of the case, deem fit and reasonable; but if such recaptured ship or vessel shall appear to have been set forth by the enemy as a ship or vessel of war, the said ship or vessel shall not be restored to the former owners, but shall in all cases, whether retaken by any of his Majesty's ships or any privateer, be adjudged legal prize for the benefit of the captors."

This act is decidedly more favourable to the merchants than the old law, which adjudged that all ships recaptured after sentence of condemnation should be the property of the captors.

In the case of neutral ships captured by an enemy, and retaken by British men-of-war or privateers, the Courts of Admiralty have a discretionary power of allowing such salvage, and in such proportions, as, under the circumstances of each particular case, may appear just; but there is no positive law or binding regulation to which parties may appeal, for ascertaining the rate of such salvage. "The maritime law of England," says Lord Stowell, "having adopted a most liberal rule of restitution on salvage, with respect to the recaptured property of its own subjects, gives the benefit of that rule to its allies, till it appears that they act towards British property on a less liberal principle; in such a case it adopts their rule, and treats them according to their own measure of justice."—(1 *Rob. Adm. Rep.* 54.)

Salvage is one of those charges which are usually provided against by insurance. When, however, the salvage is very high, and the object of the voyage is so far defeated, the insured is, by the laws of this and all other maritime nations, allowed to abandon, and to call upon the insurer as for a total loss.—(See *ABANDONMENT*.)

For further information with respect to salvage, see *Abbott on the Law of Shipping*, part. iii. c. 14; *Park on Insurance*, c. 8.; and *Marshall on Insurance*, book i. c. 12. § 8.

**SAMPLE**, a small quantity of a commodity exhibited at public or private sales, as a specimen. Sugars, wool, spirits, wine, coffee, and, indeed, most species of merchandise, are sold by sample. If an article be not, at an average, equal to the sample by which it is sold, the buyer may cancel the contract, and return the article to the seller.

Subjoined is a list of most articles that may be warehoused, and of the quantities that may be taken out as samples.—(*Customs Min.* Oct. 11. 1825.)

	Sago - 2 lb. per pile.		1 lb. per cask.

**SANDAL WOOD**, the wood of a tree (*Santalum album* Lin.) having somewhat of the appearance of a large myrtle. It is of a deep yellow colour, and yields an agreeable perfume. The tree, when cut down, is usually about 9 inches in diameter at the root but sometimes considerably more. After being felled, it is barked, cut into billets and buried in a dry place for about a couple of months, during which time the white ants or off the outer wood, without touching the heart, which is the sandal. It is then taken up and sorted, according to the size of the billets. The deeper the colour, and the nearer the root, the higher is the perfume. Reject such pieces as are of a pale colour, small decayed, or have white wood about them; and take especial care that it be not mixed with wood resembling sandal, but without its perfume.—(*Milburn's Orient. Com.*)

Sandal wood is extensively employed by the Hindoos as a perfume, in their funeral ceremonies. So the Chinese are its principal consumers. They manufacture it into oils, and small articles of furniture, and use it, when ground into powder, as a cosmetic. During the year ended the 30th of June, 1838, there were imported by British vessels into Canton, 6,166 piculs of sandal wood, valued at 147,564 dollars (see *Ann.*, p. 235.); and the imports in some years are more than twice this amount. The average importation into Calcutta is about 900 tons a year. It grows principally in Malabar, in the mountainous country at a little distance from the low sea coast; in Timor; and in the Foeje Islands in the South Sea. Calcutta is principally supplied from Malabar, while China derives the larger portion of her supplies from Timor and the other islands. It is seldom brought to Europe, except by individuals for their own use, or as presents for their friends.—(*Bell's External Com. of Bengal*, pp. 49. and 55.; *Crawford's Indian Archipelago*, vol. i. p. 519., vol. iii. p. 421. &c.)

**SANDARACH**, a resinous substance, commonly met with in loose granules a little larger than a pea, of a whitish yellow colour, brittle, inflammable, of a resinous smell.

and acrid aromatic taste. It exudes, it is said, in warm climates, from cracks and incisions in the common juniper bush. It is used as a varnish, dissolved in spirits of wine. — (*Ainslie's Mat. Indica.*)

**SANDWICH ISLANDS.** This secluded, but interesting group, is situated in the midst of the Pacific Ocean, in about the 21st degree of N. lat., and the 157th of W. long. It comprises 8 inhabited and 2 uninhabited islands, of which Owhyhee, where Captain Cook was killed, is the most considerable. They are of volcanic formation, and mountainous, some of the peaks rising, in Owhyhee, to between 13,000 and 14,000 feet in height! The population in 1836 is said to have amounted to above 108,000, of which nearly 40,000 belonged to Owhyhee. The islanders are honourably distinguished among the Polynesian nations, by the advances they have made in civilisation; and particularly by their progress in manufactures, navigation, and commerce. Christianity was introduced by the American missionaries in 1890, and is now the religion of the state; schools have been established, churches have been built, and the forms of religion are at least pretty well observed. European usages have become fashionable; and the costume of the better classes, women as well as men, closely resembles that of the Americans.

The principal port is Honolulu or Honoruru, on the S. side of the island of Woahoo, in lat. 21° 18' 3" N., long. 157° 53' W. Population about 8,500, of whom about 450 are Englishmen, Americans, and other foreigners. The harbour, to which the place owes all its importance, has a narrow entrance, but it is easy of access at all times of the tide to vessels not drawing more than 18 ft. water. The bar at its mouth being narrow and composed of soft coral, it might easily be made accessible even for line-of-battle ships. We subjoin a

List of Merchant Vessels arrived at Honolulu during the Year 1842.

	Ships.	Tons.
From Chili and Peru	3	1,115
Mexico	22	4,277
(Guatemala)	2	258
China	1	219
New Zealand and Tahiti	4	450
England	2	636
U. States	5	1,045
Columbia River	6	1,578
	45	9,435

List of Whaling Vessels arrived at the same Port during the Year 1842 (second Visits of the same Vessels not included).

	No.	Tonnage.	Cargoes.	
			Sperm Oil, Tons.	Black Oil, Tons.
American	44	16,780	4,044	2,865
English	16	5,576	1,369	170
French	5	3,470	-	655
Danish	1	236	10	175
	66	25,462	5,523	3,865

About 14 or 15 vessels belong to the port, of which 3 are the property of the government, 3 of native chiefs, and the remainder of the resident foreigners.

A newspaper in the English language is published in the town, in which we have noticed advertisements of ladies' shoes from Paris, *Eau-de-Cologne*, &c. The sovereignty of these islands was ceded, in February 1843, to the British; but the cession was declined by the admiral commanding in chief in the Pacific. — (*Geog. Dict. art. Polynesia; Simpson's Sandwich Islands.*)

**SAPAN WOOD** is obtained from a species of the same tree that yields the Brazil wood (*Cesalpinia Sapan* Lin.). It is a middle sized forest tree, indigenous to Siam, Pegu, the Philippine Islands, &c. It has been employed for dyeing in the greater part of Asia for many centuries. It found its way into Europe some time before the discovery of America; but very little is now imported. Its colouring matter differs but little from that of Brazil wood, but the best sapan wood does not yield more than half the quantity that may be obtained from an equal weight of Brazil wood, and the colour is not quite so bright. — (*Bancroft on Colours*, vol. ii. p. 329.) Its price in the London market varies from 7l. to 12l. a ton.

**SAPPHIRE** (Ger. *Saphir*; Du. *Saffiersteen*; Fr. *Saphir*; It. *Zaffiro*; Sp. *Safiro*, *Safir*; Rus. *Jachant*; Lat. *Sapphirus*), a precious stone in very high estimation. Colours blue and red; also gray, white, green, and yellow. It occurs in blunt-edged pieces, in roundish pebbles, and crystallised. Varies from transparent to translucent. Refracts double. After diamond, it is the hardest substance in nature. The blue variety, or sapphire, is harder than the ruby, or red variety. Brittle. Specific gravity 4 to 4.2.

It is found in Bohemia, Saxony, France, &c.; but the red sapphire, or Oriental ruby, is not found in any considerable quantity anywhere except in Ava. Next to diamond, sapphire is the most valuable of the gems. The white and pale blue varieties, by exposure to heat, become snow white, and, when cut, exhibit so high a degree of lustre, that they are used in place of diamond. The most highly prized varieties are the crimson and carmine red; these are the Oriental ruby of the jeweller: the next is sapphire; and last, the yellow or Oriental topaz. The *asterias*, or star-stone, is a very beautiful variety, in which the colour is generally of a reddish violet, and the form a rhomboid, with truncated apices, which exhibit an opalescent lustre.\* — (See RUBY.)

Mr. Crawford gives the following details with respect to the sapphire and ruby mines of Ava: — "The precious stones ascertained to exist in the Burmese territory are chiefly those of the sapphire family,

\* Professor Jameson says, in his *Mineralogy*, that some peculiarly beautiful sapphires are found in the Capellan mountains, in Pegu. But we are not aware that there are any such mountains in any part of the world; and, in point of fact, there are no mountains in Pegu, nor have any precious stones been ever found in it.

and the spinelle ruby. They are found at 2 places, not very distant from each other, called Mogant and Kysiphan, about 8 days' journey from the capital, in an E. S. E. direction. From what I could learn, the gems are not obtained by any regular mining operations, but by digging and washing the gravel in the beds of rivulets or small brooks. All the varieties of the sapphire, as well as the spinelle, are found together, and along with them large quantities of corundum. The varieties ascertained to exist, are the Oriental sapphire; the Oriental ruby, or red stone; the opalescent ruby, or cat's eye ruby; the star ruby; the green; the yellow and the white sapphires; and the Oriental amethyst. The common sapphire is by far the most frequent, but, in comparison with the ruby, is very little prized by the Burmese, in which they agree with other nations. I brought home with me several of great size, the largest weighing no less than 3,680 grains, or above 907 carats. The spinelle ruby (zebu-gaong) is not unfrequent in Ava, but is not much valued by the natives. I brought with me to England a perfect specimen, both as to colour and freedom from flaws, weighing 22 carats. The sapphire and ruby mines are considered the property of the king; at least he lays claim to all stones that exceed in value a viss of silver, or 100 ticals. The miners, it appears, endeavour to evade this law by breaking the large stones into fragments. In the royal treasury there are, notwithstanding, many fine stones of both descriptions. The year before our visit, the king received from the mines a ruby weighing 124 grains; and the year preceding that, 8 good ones, but of smaller size. No stranger is permitted to visit the mines; even the Chinese and Mohammedans residing at Ava are carefully excluded. — (*Journal of an Embassy to the Court of Ava*, p. 442.)

**SARCOCOLLA**, a subviscid, sweetish, and somewhat nauseous gum resin. It is brought from Arabia and Persia in small grains of a pale yellow colour; the whitest, as being the freshest, is preferred. It is but seldom imported. — (*Milburn's Orient. Com.*)

**SARDINES**, or **SARDINIAS** (Ger. *Sardellen*; Fr. *Sardines*; It. *Sardine*; Sp. *Sardinias*), a species of fish of the herring tribe, but smaller. They are taken in considerable quantities on our coasts, and are exceedingly plentiful on the coasts of Algarve in Portugal, Andalusia and Granada in Spain, and along the shores of Italy. The small sardines, caught on the coast of Provence, in France, are esteemed the best. From 1,000 to 1,200 fishing smacks are engaged in catching these fish on the coast of Brittany, from June to the middle of October. The French frequently cure them in red brine; and when thus prepared, designate them *anchoises*, or *anchovied sardines*. These are packed in vessels previously employed for holding wine, and exported to the Levant. When perfectly fresh, sardines are accounted excellent fish; but if kept for any time, they entirely lose their flavour, and become quite insipid.

**SARDONYX**, a precious stone, a variety of chalcedony.

The ancients selected this substance to engrave upon, no doubt, from its possessing two peculiar and necessary qualities, viz. hardness and tenacity, by which it is capable of receiving the finest touch or stroke of the tool without chipping, and showing the art of the engraver to the highest perfection. — (*Mawe on Diamonds*, 2d ed. p. 131.)

**SARSAPARILLA** (Ger. *Sarsaparille*; Fr. *Salsepareille*; It. *Salsapariglia*; Sp. *Zarzaparilla*), the root of the *Smilax Sarsaparilla*, a plant growing in North America and the West Indies. It is imported in bales. It is known in the London market by the names of Lisbon, Honduras, and Vera Cruz, but it is also brought from Jamaica. The Lisbon root, which is the produce of Brazil, has a reddish or dark brown cuticle, is internally farinaceous, and more free from fibre than the other kinds: the Honduras has a dirty brown, and sometimes whitish, cuticle; it is more fibrous, and has more ligneous matter, than the Lisbon and Vera Cruz. It is in long slender twigs, covered with a wrinkled brown cuticle, and has a small woody heart. The Jamaica differs from the others, in having a deep red cuticle of a close texture; and the red colour partially diffused through the ligneous part. The root is inodorous, and has a mucilaginous, very slightly bitter taste: the bark is the only useful part of the plant; the ligneous part being tasteless, inert, woody fibre. — (*Thomson's Dispensatory*.) The duty of 6d. per lb., with which it was then charged, produced, in 1840, 3,573*l.*, showing that 142,920 lbs. had been entered for consumption. In 1842 the duty was reduced to 1d. per lb.

**SASSAFRAS** (Ger. and Fr. *Sassafras*; It. *Sassafrasso*; Sp. *Sassafras*), a species of laurel (*Laurus Sassafras* Lin.), a native of the southern parts of North America, Cochin-China, and several of the Indian islands. Sassafras wood, root, and bark have a fragrant odour, and a sweetish aromatic taste. The wood is of a brownish white colour; and the bark ferruginous within, spongy, and divisible into layers. Their sensible qualities and virtues depend on an essential oil, which may be obtained separate by distilling the chips or the bark with water. It is very fragrant, hot, and penetrating to the taste, of a pale yellow colour, and heavier than water. It is used only in the materia medica. Very little is imported. — (*Thomson's Dispensatory*.)

**SAUNDERS (RED)** (Arab. *Sundal-ahmer*; Hind. *Ruckat-chundum*), the wood of a lofty tree (*Pterocarpus santalinus*) indigenous to various parts of India, Ceylon, Timor, &c. The wood is brought to Europe in billets, which are very heavy and sink in water. It is extremely hard, of a fine grain, and a bright garnet red colour, which brightens on exposure to the air. It is employed to dye lasting reddish brown colours on wool. It yields its colouring matter to ether and alcohol, but not to water. The quantity imported is but inconsiderable. The price in bond varies at this moment (November, 1843) from 6*l.* to 7*l.* a ton. — (*Thomson's Dispensatory*; *Bancroft on Colours*, vol. ii. p. 236.)

**SCAMMONY** (Ger. *Shammonien*; Fr. *Scammonée*; It. *Scammonea*; Sp. *Esoammones*),

a gum-resin, the produce of a species of convolvulus, or creeper plant, which grows abundantly in Syria. When an incision is made into the roots, they yield a milky juice, which being kept, grows hard, and is the scammony of the shops. It is imported from Aleppo in what are called drums, weighing from 75 to 125 lbs. each; and from Smyrna in cakes like wax, packed in chests. The former is light and friable, and is considered the best; that from Smyrna is more compact and ponderous, less friable, and fuller of impurities. It has a peculiar heavy odour, not unlike that of old cheese; and a bitterish, slightly acrid taste. The colour is blackish or bluish grey, changing to dirty white, or lathering when the surface is rubbed with a wet finger. Its specific gravity is 1.235. It is very liable to be adulterated; and when of a dark colour, heavy, and splintery, it ought to be rejected. It is used only in medicine. — (*Thomson's Dispensatory*.) The duty on scammony, which was formerly as high as 6s. 4d. per lb., was reduced in 1832 to 2s. 6d., and in 1842 to 6d.

**SCULPTURES**, figures cut in stone, metal, or other solid substance, representing or describing some real or imaginary object. The art of the sculptor, or statuary, was carried to the highest pitch of excellence in ancient Greece. Fortunately, several of the works of the Grecian sculptors have been preserved; and serve at once to stimulate and direct the genius of modern artists.

*Models*, are casts or representations of sculptures.

The act 54 Geo. 3. c. 56. vests the property of sculptures, models, copies, and casts in the proprietor for 14 years; provided he cause his name, with the date, to be put on them before they are published; with the same term in addition, if he should be living at the end of the first period. In actions for piracy, double costs to be given. The act 6 Geo. 4. c. 107. prohibits the importation, on pain of forfeiture, of any sculptures, models, casts, &c. first made in the U. Kingdom.

**SEAL** (Lat. *Sigillum*), a stone, piece of metal, or other solid substance, generally round or elliptical, on which is engraved the arms, crest, name, device, &c. of some state, prince, public body, or private individual. It is employed as a stamp to make an impression on sealing wax, thereby authenticating public acts, deeds, &c., or to close letters or packets. Seals were very early invented, and much learning has been employed in tracing their history, and explaining the figures upon them. — See particularly the work of *Hopkinson, De Sigillorum Prisco et Novo Jure*, 4to, 1642.) They are now very generally used.

The best are usually formed of precious stones, on which the crest or the initials of the person's name are engraved, set in gold. But immense numbers are formed of stained glass, and set in gilt copper. They are manufactured at London, Birmingham, &c., and are extensively exported.

**SEAL FISHERY.** The seal, an amphibious animal, of which there are many varieties, is found in vast numbers in the seas round Spitzbergen, and on the coasts of Labrador and Newfoundland. As it frequents the British shores, it is well known, and has been repeatedly described. Seals are principally hunted for their oil and skins. When taken in the spring of the year, when they are fattest, a full grown seal will yield from 8 to 12 gallons of oil, and a small one from 4 to 5 gallons. The oil, when extracted before putrefaction has commenced, is beautifully transparent, free from smell, and not unpleasant in its taste. The skin, when tanned, is extensively employed in the making of shoes; and when dressed with the hair on, serves for the covering of trunks, &c. For an account of the imports of seal-skins, see art. *SKINS*.

"To the Esquimaux the seal is of as much importance as bread to a European. Its flesh forms their most usual food; the fat is partly dressed for eating, and partly consumed in their lamps; the liver, when fried, is esteemed, even among sailors, as an agreeable dish. The skin, which the Esquimaux dress by processes peculiar to themselves, is made waterproof. With the hair off, it is used as coverings, instead of planks, for their boats, and as outer garments for themselves; shielded with which, they can invert themselves and canoes in the water, without getting their bodies wet. It serves also for coverings for their tents, and for various other purposes. The jackets and trowsers made of seal-skin by the Esquimaux are in great request among the whale fishers for preserving them from oil and wet." — ( *Scoresby's Arctic Regions*, vol. 1. p. 510.)

Seals in fine weather prefer the ice to the water, and vast herds of them are frequently found lying on the field ice; the places where they are met with being thence called "seal meadows." The seal hunters endeavour to surprise them while sleeping, and to intercept their retreat to the water. They attack them with muskets and bludgeons, but principally the latter, they being easily despatched by a blow on the nose.

The seal fishery has long been prosecuted to a considerable extent in the northern seas by ships from the Elbe and the Weser; but very few ships have been sent out for *sealing* only from England, though occasionally some of the whale ships have taken large quantities of seals. Latterly, however, the seal fishery has been prosecuted on a large scale, and with extraordinary success, by vessels of from 60 to 120 tons each, having crews of from 16 to 30 men, fitted out from the ports of Newfoundland, Nova Scotia, &c. The business is attended with a good deal of risk, and instances frequently occur of the vessels being crushed to pieces by the collision of the fields of ice. We borrow the following details from Mr. Ellis's tract on the *Trade, Statistics, &c. of Canada and our North American Possessions*.

"There is another department of the colonial fishery which has originated within no distant period, and is now of great extent and importance. The large fields of ice which, in the months of March and April, drift southward from the Polar seas, are accompanied by many herds of seals; these are found sleeping in what are called the seal meadows of the ice, and are there attacked and slaughtered in vast numbers. For this purpose the fishers of Newfoundland, from which island these voyages are principally made, without waiting till the return of spring shall have opened their harbours, saw channels through the ice for their vessels, and set sail in quest of those drifting fields, through the openings of which they work a passage, attended with great difficulties and dangers, till they encounter their prey on the seal

meadows. This bold and hazardous enterprise seems well compensated by its success. The number of seals thus taken is almost incredible, and is greatly on the increase."—(p. 70.) There were captured by the Newfoundland fishermen, in 1838, 375,361 seals; in 1839, 437,501. Large quantities are also taken by the Nova Scotia and Labrador fishermen.

See also *McGregor's British America*, 2d. edit. vol. i. p. 197. &c. There is a good account of the seal in *Laing's Voyage to Spitzbergen*. For the price of seal oil, see *Oil*.

**SEALING WAX** (Ger. *Siegellack*; Fr. *Cire d'Espagne*, *Cire à cacheter*; It. *Cera Lacca*, *Cera di Spagna*; Sp. *Lacre*; Rus. *Surgutsch*), the wax used for sealing letters, legal instruments, &c. It is a composition of gum lac, melted and incorporated with resin, and afterwards coloured with some pigment, as vermilion, verditer, ivory black, &c.

**SEAMEN**, the individuals engaged in navigating ships, barges, &c. upon the high seas. Those employed for this purpose upon rivers, lakes, or canals, are denominated watermen.

A *British Seaman* must be a natural born subject of her Majesty; or be naturalised by act of parliament; or made a denizen by letters of denization; or have become a British subject by the conquest or cession of some newly acquired territory; or (being a foreigner) have served on board her Majesty's ships of war, in time of war, for the space of 3 years.—(3 & 4 Will. 4. c. 54. s. 16.) But her Majesty may, by proclamation during war, declare that foreigners who have served two years in the royal navy, during such war, shall be deemed British seamen.—(s. 17.)

Various regulations have been enacted with respect to the hiring of seamen, their conduct while on board, and the payment of their wages. These regulations differ in different countries; but, in all, they have been intended to obviate the disputes that might otherwise arise between the master and seamen in regard to the terms of the contract between them, to secure due obedience to the master's orders, and to interest the seamen in the completion of the voyage, by making their earnings depend on its successful termination.

The more important particulars in the law of England in regard to seamen will, we believe, be found in the following article. In the first place it is necessary to inquire by whom they may be hired.

1. *Who may hire Seamen*.—Seamen have long been subjected to imposition from the fraudulent practices of persons offering to find them employment, by falsely representing themselves as agents for, or as having an interest in certain ships, and engaging or pretending to engage seamen to serve therein. In the view of obviating such practices in future, a statute was passed in 1845, the 8 & 9 Victoria, c. 116., which enacts, in substance, that from and after the 1st day of November that year no person except the owner, part owner, master or person in charge of a merchant ship, or the ship's husband, will be at liberty to hire, engage, supply, or provide seamen to be entered on board merchant ships, without a licence first obtained from the Lords of the Committee of Her Majesty's Privy Council appointed for the management of trade and plantations. Application for such licences must be made by letter addressed to "The Lords of the Committee of Privy Council for Trade, Whitehall, London." The clauses in the statute are as follows:—

*Board of Trade may license Persons*.—The Board of Trade are empowered to license such persons as they may deem to be requisite and fit; and who may be desirous to take out such licences, to hire, engage, supply, or provide seamen to be entered on board merchant ships; and every such licence shall be granted for such period, upon such terms, and upon such security being given, and shall be revocable upon such conditions, as the Board may at any time or times appoint.—§ 1.

*Manner of granting and revoking Licence*.—Every such licence shall be granted, and every revocation thereof shall be made, by minute or resolution of the Board, and a copy of any such minute or resolution, certified and signed by one of the secretaries or assistant secretaries of said Board, shall be received as evidence of such licence or revocation, without further proof thereof.—§ 2.

*No Person not duly licensed or interested in the Ship to be concerned in procuring Seamen to be engaged*.—No person not licensed as aforesaid, or not being the owner, part owner, master, or person in charge of a merchant ship, or the ship's husband, shall, engage, supply, or provide a seaman to be entered on board any merchant ship; and no person, whether licensed or not, other than the owner, part owner, master, or person in charge of a merchant ship, or the ship's husband, shall demand or obtain the register ticket of any seaman for the purpose or under the pretence of engaging him on board of any merchant ship.—§ 3.

*No Person interested in the Ship shall knowingly receive Seamen hired contrary hereto*.—No owner, part owner, master, or person in charge of any merchant ship, or ship's husband, shall knowingly receive or accept to be entered on board the said ship any seaman who has been hired, engaged, supplied, or provided to be entered on board thereof contrary to the provisions of this act.—§ 4.

*Penalty on every Person guilty of any of the Offences above described*.—Every person guilty of any of the offences above described shall forfeit and pay for each and every seaman hired, engaged, supplied, or provided to be entered on board, and for every register ticket, demanded or obtained contrary to the provisions of this act, or for every seaman knowingly received or accepted to be entered on board contrary to the provisions of this act, any sum of money not exceeding 20*l*. upon conviction thereof for each offence, although several seamen may be included in the same contract, or several tickets may be obtained, or several seamen may be received or permitted to remain at the same time.—§ 5.

*Unlicensed Persons not to be employed for the Purpose of engaging Seamen*.—It shall be unlawful for any person to employ any unlicensed person or persons for the purpose of engaging or providing seamen to be entered on board merchant ships; and any licensed person knowingly employing any unlicensed person for the purposes aforesaid shall forfeit and pay a sum not exceeding 20*l*., and, in addition thereto, shall forfeit and lose his licence.—§ 6.

*No Advance Note or Wages to be given or paid to any Seaman until after the Ship's Articles have been duly signed*.—The owner, part owner, master, or person in charge of any merchant ship, or ship's hus-

band, shall not pay or advance, nor give any note in writing or otherwise in the nature of and purporting to be an advance note for any part of the wages of any seamen hired, engaged, supplied, or provided to be entered on board the said ship, until six hours after the ship's articles have been duly signed by the said seaman on board the said ship, and by the master or owner of the said ship, and then only to the said seaman himself, unless such wages or advance of wages be paid in money, in which case the payment thereof may be made to the said seaman himself at any period most convenient after the signing of the said ship's articles as aforesaid; and all payments of wages contrary to the provisions of this act shall be and are hereby declared to be null and void, and the amount thereof shall be recoverable by the said seaman as if they had not been paid or advanced. — § 7.

*Penalty for receiving Remuneration for hiring Seamen, &c.* — If any person shall demand or receive from any seaman, or from any person other than the owner, part owner, master, or person in charge of a merchant ship, or the ship's husband, requiring seamen, any remuneration whatever, either directly or indirectly, for and on account of the hiring, supplying, or providing any such seaman, he shall forfeit for every such offence a sum not exceeding £4. — § 8.

*Persons not to be admitted on board Merchant Vessels before their Arrival in Dock, &c.* — It shall not be lawful for any person (other than any officer or person in H. M.'s service) to go and be on board any merchant vessel arriving or about to arrive at the place of her destination before or previous to her actual arrival in dock, or at the quay or place of her discharge, without the permission and consent of the master or person in charge of the said vessel; and if any person (other than as aforesaid) shall go and be on board any such vessel before or previous to her actual arrival in dock, or at the quay or place of her discharge, without the permission and consent of the said master or person in charge of the said vessel, he shall for every such offence forfeit and pay a sum of money not exceeding 20*s.*; and for the better securing the person of such offender the master or person in charge of the said vessel is hereby authorized and empowered to take any person so offending as aforesaid into custody, and to deliver him up forthwith to any constable or peace officer, to be by him taken before a justice or justices, to be dealt with according to the provisions of this act. — § 9.

*Penalty for soliciting Sailors to become Lodgers, &c.* — If any person shall, on board any merchant ship, within 24 hours of her arrival at any port as aforesaid, solicit any seaman to become a lodger at the house of any person not so licensed as aforesaid, and letting lodgings for hire, or shall take from and out of such ship any chest, bedding, or other effects of any seaman, except under the personal direction of such seaman, and without having the permission of the master or person in charge of such ship, he shall be liable to forfeit and pay for every such offence the sum of £4. — § 10.

*Penalty for receiving Remuneration for Board of Sailors for longer Period than is due, &c.* — If any person shall demand and receive of and from any seaman payment in respect of his board or lodging in the house of such person for a longer period than such seaman shall have actually resided and boarded therein, or shall receive or take into his possession or under his control any moneys, documents, or effects of any seaman, and shall not return the same or pay the value thereof when required so to do, by such seaman, after deducting therefrom what shall be justly due and owing in respect of the board and lodging of such seaman, he shall forfeit and pay a sum not exceeding 10*s.*, over and above the amount or value of such moneys, documents, or effects, after such deductions as aforesaid, which shall be adjudged to be forthwith paid to such seaman under the conviction by the justices before whom such offence shall be heard and determined. — § 11.

The following clauses relate to the recovery and application of penalties.

2. *Conditions under which Seamen are to be engaged.* — In 1835 an act was passed (5 & 6 W. 4. c. 19.) of much importance to seamen, and to persons connected with navigation. It was intitled "An Act for amending and consolidating the Laws relating to Merchant Seamen, and for forming and maintaining a Register of all the Men engaged in that Service." It laid down the various forms and regulations to be observed in hiring, paying, and discharging seamen; established an office for their registry; and prescribed the mode in which lists of crews were to be transmitted to the registrar. It also regulated the number of apprentices to be taken on board ship; the conditions under which seamen may, in certain cases, be left in foreign parts; with a variety of other interesting particulars. It farther went on to repeal the act 2 & 3 Ann. c. 6. for the increase of seamen, &c.; the act 2 Geo. 2. c. 36. for the better regulation, &c. of seamen in the merchant service; the act 2 G. 3. c. 31. for perpetuating the last-mentioned act, &c.; the act 31 G. 3. c. 89. for the better regulation, &c. of seamen in the coasting trade of the kingdom; the act 45 G. 3. c. 81. for amending the last-mentioned act; the act 37 G. 3. c. 73. for preventing the desertion of seamen from British merchant ships in the West Indies; the act 58 G. 3. c. 38. to extend and render more effectual the regulations for the relief of seafaring men and boys, &c., subjects of the U. K., in foreign parts; the act 4 G. 4. c. 25. for regulating the number of apprentices to be taken on board British merchant vessels, &c.; and the act 3 & 4 W. 4. c. 88. for continuing the 59 G. 3. c. 58. for facilitating the recovery of the wages of seamen in the merchant service.

This act, however, was itself repealed in 1844, except in so far as relates to the establishment, maintenance, and regulation of the office for the registry of merchant seamen, by the 7 & 8 Victoria, c. 112, which came into operation on the 1st of January, 1845; but all offences committed, and penalties and forfeitures incurred previously to the said 1st of January, 1845, were made punishable and recoverable as if the act 5 & 6 W. 4. c. 19. had not been repealed.

As any infraction of the provisions of the new act incurs in most cases heavy penalties, it should be carefully studied and attended to by masters and men. After declaring that the prosperity, strength, and safety of the U. K. greatly depend on a large, constant, and ready supply of seamen; and that it is, therefore, expedient to afford them all due encouragement and protection, it proceeds to enact

*No Seaman to be taken to Sea without a written Agreement, and without a Register Ticket being obtained from such Seaman.* — It shall not be lawful for any master of any ship, of whatever tonnage or description, belonging to any subject of H. M., proceeding to parts beyond the seas, or of any British registered ship of the burden of 80 tons or upwards employed in any of the fisheries of the U. K., or in proceeding coastwise, or otherwise, from one part of the U. K. to another, to carry to sea any seaman as one of his crew or complement (apprentices excepted), unless the master of such ship shall have first

## SCHEDULE (B.)

An Agreement made pursuant to the directions of an Act of Parliament passed in the year of the reign of between the master of the ship of the Port of and of the burden of tons, and the several persons whose names are subscribed hereto.

It is agreed by and on the part of the said persons, and they severally hereby engage to serve on board the said ship in the said several capacities against their respective names expressed, which ship is to be employed in (here the nature of the ship's employment is to be described, whether in the Fisheries, on the Coast, or in proceeding from one part of the U. K. to another, or to any of the Islands of Jersey, Guernsey, Alderney, Sark, and Man, or to any part of the Continent of Europe between the River Elbe inclusive and Brest); and the said crew further engage to conduct themselves in an orderly, faithful, honest, careful, and sober manner, and to be at all times diligent to their respective duties and stations, and to be obedient to the lawful commands of the master in everything relating to the said ship, and the materials, stores, and cargo thereof, whether on board such ship, in boats, or on shore [here may be inserted any other clauses which the parties may think proper to be introduced into the agreement, provided that the same be not contrary to or inconsistent with the provisions and spirit of this act]; in consideration of which

services, to be duly, honestly, carefully, and faithfully performed, the said master doth hereby promise to pay to the said crew by way of compensation or wages the amount against their names respectively expressed: provided always, and it is hereby declared, that no seaman shall be entitled to his discharge from the ship during any voyage in which she may be engaged, nor at any other port than a port in the U. K.: and it is hereby agreed, that any embezzlement, or wilful or negligent loss or destruction, of any part of the ship's cargo or stores, shall be made good to the owner out of the wages so far as they will extend of the seaman guilty of the same; and if any seaman shall have entered himself as qualified for a duty to which he shall prove to be not competent, he shall be subject to a reduction of the rate of wages hereof agreed for, in proportion to his incompetency. In witness whereof the said parties have hereto subscribed their names on the days against their respective signatures mentioned.

No. and Date of Ship's Register.	Place and Time of Entry.			Men's Names—Christian and Surnames as full length.	Age.	Town or County where born.	Quality.	Amount of Wages per Calendar Month, Share or Voyage.	Quantity of Provisions per Day.	Witness to Signature.	Name of Ship in which the Seaman last served.	No. of Register Ticket.
	Day.	Mo.	Year.									

I hereby declare to the truth of all the particulars set forth in this agreement [or stated copy of agreement] delivered to the collector or comptroller of the port of this day of 18 . Master. Mate.

Note.—This agreement, or an attested copy thereof, is required to be delivered to the collector or comptroller of customs of any port of the U. K., within 30 days after the 30th of June and the 31st of December in each year.

**Penalty for Default.**—If any master or owner shall carry out to sea any seamen (apprentices excepted) without having first entered into the required agreement with such seaman, or any master shall not obtain from any seaman or other person, being the subject of H. M.'s register ticket, according to the provisions of this act, he shall in either or every of such cases forfeit and pay the sum of 10*l.* for and in respect of every such seaman; and if any master or owner shall neglect to cause such agreement to be read over and explained to such seaman before the signing or execution thereof by such seaman, the said master or owner shall for each neglect forfeit and pay the sum of 5*l.* for every such seaman; and if any master or owner shall neglect or omit to deliver or cause to be delivered to such collector or comptroller any such agreement, or such copy thereof as aforesaid, or shall not deliver up any register ticket to the person entitled to it at the expiration of his service, or otherwise, as required by this act, he shall for every such neglect, omission, or offence forfeit and pay the sum of 10*l.*, or if any master or owner shall deliver or cause to be delivered a false copy of the agreement he shall for every such offence forfeit and pay the sum of 20*l.*—§ 4.

**Seamen not to be deprived of Legal Remedies.**—No seaman, by reason of any agreement, shall forfeit his lien upon the ship, nor be deprived of any remedy for the recovery of his wages to which he would be otherwise be entitled against any person or persons whatever; and no agreement contrary to or inconsistent with this act, nor any clause, contract, or engagement whereby any seaman shall consent or promise to forego or give up any right or claim to wages in the case of freight earned by a ship subsequently lost, or any right or claim to salvage or reward for salvage services, or such proportion of salvage or reward for salvage services, as shall or may be due to him by decree or award, or otherwise, shall be valid or binding on such seaman; and every copy of an agreement so certified and delivered as aforesaid shall in all cases be received and taken as evidence of the contents of the agreement for and on behalf of the seaman; and no seaman shall in any case be required to produce such agreement, or such copy as aforesaid, or to give notice for the production thereof; but in case the agreement shall not be produced and proved, he shall be at liberty to prove the contents or purport thereof, or to establish his claim by other evidence, according to the nature of the case.—§ 5.

**Seamen refusing to join, &c., may be committed to Gaol, or sent on Board.**—In case a seaman, whether before the commencement or during the progress of any voyage, shall at any time neglect or refuse to join the ship on board of which he shall have engaged to serve, or shall refuse to proceed to sea in such ship, or shall absent himself therefrom without leave, or shall desert. It shall be lawful for any justice of the peace in and for any of H. M.'s dominions, or the territories under the government of the East India Company, where or near to the place where such ship shall happen to be, or where such seaman shall be found, and such justice is hereby required, upon complaint made upon oath by the master, mate, or owner, or his agent, to issue his warrant, and cause such seaman to be apprehended, and brought before him; and in case such seaman shall not give a reason to the satisfaction of such justice for his neglect, refusal, or absence, as the case may be, or in case of desertion, it shall be lawful for any such justice, upon due proof of such neglect, refusal, absence, or desertion, to commit such seaman to prison or to the house of correction, there to be imprisoned with or without hard labour, at the discretion of such justice, for a period not exceeding 30 days; or it shall be lawful for the said justice, if he shall so think fit, at the request of the master, mate, or owner, or his agent, instead of committing such seaman, to cause him to be conveyed on board the said ship, or to be delivered to the master, mate, or owner, or his agent, for the purpose of being so conveyed and proceeding on the voyage, and also to award to the master or owner such costs incurred in the apprehension of the seaman as to such justice shall seem reasonable, not exceeding in any case the sum of 40*s.*, which shall be chargeable against and may be deducted from the wages of such seaman; and whenever any seaman shall be committed to prison or to any house of correction, the justice shall cause his register ticket to be delivered to the governor or keeper of such prison or house of correction, who shall retain the same during the period of the seaman's imprisonment, and at the expiration of such period shall return the register ticket to the seaman; and whenever a seaman shall be sentenced to death or transportation, the officer having the custody of such seaman shall transmit his register ticket to the registrar of seamen.—§ 6.

The statute does not render a verbal agreement for wages absolutely void; but it imposes a penalty on the master if a written agreement be not made. And no written

agreement contrary to the act, by which a seaman should renounce any claim to wages in the case of freight earned by a ship subsequently lost, or any claim to salvage, would be valid. When a written agreement is made conformably to the act, it becomes the only evidence of the contract between the parties; and a seaman cannot recover any thing agreed to be given in reward for his services, which is not specified in the articles.

A seaman who has engaged to serve on board a ship, is bound to exert himself to the utmost in the service of such ship; and, therefore, a promise made by the master of a ship *in distress*, to pay an extra sum to a seaman, as an inducement to extraordinary exertion on his part, is essentially void.

3. *Conduct of Seamen.* — It is essential to the business of navigation that the most prompt and ready obedience should be paid to the lawful commands of the master. To this effect it is covenanted in the articles of agreement previously quoted, that "the crew engage to conduct themselves in an orderly, faithful, honest, careful, and sober manner; and to be at all times diligent to (in) their respective duties and stations, and to be obedient to the lawful commands of the master in every thing relating to the said ship, and the materials, stores, and cargo thereof, whether on board such ship, in boats, or on shore."

In case of disobedience or disorderly conduct, on the part of the seamen, the master may correct them in a reasonable manner. Such an authority is absolutely necessary for the safety of the ship and of those on board; it, however, behoves the master to employ it with great deliberation, and not to pervert the powers with which he is intrusted for the good of the whole, to cruel or vindictive purposes. Masters abusing their authority must answer at law for the consequences; and, except under very grave and urgent circumstances, the infliction of chastisement without previous inquiry should be carefully avoided. But in cases of actual or open mutiny, or of gross misconduct by the crew or any part of them, it may be incumbent on the master to act at once with all the energy and decision of which he is capable. In such unfortunate cases his resistance becomes an act of self defence, and is to be considered in all its consequences in that point of view. The Ordinances of Oleron and Wisby declare that a mariner who strikes the master shall either pay a fine or lose his right hand; a singular as well as barbarous alternative, unknown in modern jurisprudence.

But although the master may by force restrain the commission of crimes, he has no judicial authority over or right to punish the criminal, but is bound to secure his person and bring him before a proper tribunal. And all justices of the peace are empowered to receive informations touching any murder, piracy, felony, or robbery upon the sea, and to commit the offenders for trial. — (43 Geo. 3. c. 160.)

The *desertion* or absence without leave of seamen from a ship, while on a voyage to foreign parts, being attended with many bad consequences, has been provided against in all maritime laws. It is enacted by the 7 & 8 Victoria, c. 112. —

*Forfeiture for temporary Absence from Duty.* — If any seaman during the time or period specified for his service shall wilfully and without leave absent himself from the ship, or otherwise from his duty, he shall (in all cases not of desertion, or not treated as such by the master,) forfeit out of his wages the amount of 2 days' pay, and for every 24 hours of such absence the amount of 6 days' pay, or, at the option of the master, the amount of such expenses as shall have been necessarily incurred in hiring a substitute; and in case any seaman while he shall belong to the ship shall without sufficient cause neglect or refuse to perform such his duty as shall be reasonably required of him by the master or other person in command of the ship, he shall be subject to a like forfeiture in respect of every such offence, and of every 24 hours' continuance thereof; and in case any such seaman after the ship's arrival at her port of delivery, and before her cargo shall be discharged, shall quit the ship, without a previous discharge or leave from the master, he shall forfeit 1 month's pay out of his wages: provided always, that no such forfeiture shall be incurred unless the fact of the seaman's absence, neglect, or refusal be duly entered in the ship's log book, the truth of which entry it shall be incumbent on the owner or master, in all cases of dispute, to substantiate by the evidence of the mate or some other credible witness. — § 7.

*How Amount of Forfeiture is to be ascertained when Seamen contract for the Voyage.* — In all cases where the seaman shall have contracted for wages by the voyage or by the run or by the share, and not by the month or other stated period of time, the amount of forfeitures to be incurred by seamen under this act shall be ascertained in manner following; viz. if the whole time spent in the voyage agreed upon shall exceed 1 calendar month, the forfeiture of 1 month's pay expressed in this act shall be accounted and taken to be a forfeiture of a sum of money bearing the same proportion to the whole wages or share as a calendar month shall bear to the whole time spent in the voyage; and in like manner a forfeiture of 6 days' pay, or less, shall be accounted and taken to be a forfeiture of a sum bearing the same proportion to the whole wages or share as the 6 days or other period shall bear to the whole time spent in the voyage; and if the whole time spent in the voyage shall not exceed the period for which the pay is to be forfeited, the forfeiture shall be accounted and taken to be a forfeiture of the whole wages or share; and the master or owner is hereby authorized to deduct the amount of all forfeitures out of the wages or share of any seamen incurring the same. — § 8.

*Forfeiture for Desertion.* — Any seaman or other person who shall desert the ship to which he shall belong, shall forfeit to the owner thereof all his clothes and effects which he may leave on board, and he shall also forfeit all wages and emoluments to which he might otherwise be entitled; and in case of any seaman deserting abroad he shall likewise forfeit all wages and emoluments whatever which shall be or become due or be agreed to be paid to him from or by the owner or master of any other ship in the service whereof such seaman may have engaged for the voyage back to the U. K.; and all wages and portions of wages and emoluments which shall in any case whatever become forfeited for desertion shall be applied, in the first instance, in or towards the reimbursement of the expenses occasioned by such desertion to the owner or master of the ship from which the seaman shall have deserted, and the remainder shall be paid to the Seamen's Hospital Society and the master shall, in case of desertion in the U. K.,

deliver up the register ticket of such seaman or other person to the collector or comptroller of the customs at the port: provided always, that every desertion be entered in the log book at the time, and certified by the signatures of the master and the mate, or the master and one other credible witness; and that the absence of a seaman from his ship for any time within 24 hours immediately preceding the sailing of the ship from any port, whether before the commencement or during the progress of any voyage, wilfully and knowingly, without permission, or the wilful absence of a seaman from his ship at or for any time without permission, and under circumstances showing an intention to abandon the same, and not return thereto, shall be deemed a desertion of and from the same ship; and in case any seaman shall desert in parts beyond the sea, and the master of the ship shall engage a substitute at a higher rate of wages than that stipulated in the agreement to be paid to the seaman so deserting, the owner or master of the ship shall be entitled to recover from the deserter, by summary proceeding, in the same manner as penalties are by this act made recoverable (so far as the same can be applied), any excess of wages or portion thereof which such owner or master shall pay to such substitute beyond the amount which would have been payable to the deserter in case he had duly performed his service pursuant to his agreement: provided always, that no seaman shall be imprisoned longer than 3 calendar months for non-payment of any such excess of wages. — § 9.

*Penalty for harbouring Deserters.* — If any person shall wilfully harbour or secrete any seaman or apprentice who shall have deserted from his ship, knowing or having reason to believe such seaman or apprentice to be a deserter, every person so offending shall for every such seaman or apprentice so harboured or secrete forfeit and pay the sum of 10*l*.; and no debt exceeding in amount 1*l*., incurred by any seaman after he shall have engaged to serve, shall be recoverable until his service agreed for shall have been concluded; nor shall it be lawful for any keeper of a public house, or of a lodging house for seamen, to detain any chest, tools, or other property of any seaman for any debt alleged to have been contracted by him; and in case of such detention of the chest, tools, or other property of a seaman, it shall be lawful for any justice of the peace at or near the place, upon complaint upon oath to be made by such seaman or on his behalf, to inquire into the matter upon oath in a summary way; and if it shall appear to such justice that the alleged claim is fraudulent, or that the debt was not fairly incurred to the full amount of the claim, by warrant under his hand and seal, to cause such effects to be seized and delivered over to such seaman; and the person so detaining the same shall forfeit and pay a sum not exceeding 10*l*., at the discretion of such justice. — § 10.

It is, however, to be observed, that there are circumstances, such as gross misconduct, or systematic and extreme ill-treatment on the part of the master, that will justify the seamen in resisting his authority or deserting the ship. The duties and obligations of master and men are reciprocal; the latter are bound to give due obedience and respect to all the reasonable commands of the master, and even to those that may appear to be unreasonable; but they are not bound to obey orders that would obviously compromise their own security or that of the ship. "Desertion," said Lord Kenyon, "is a forfeiture of wages; but if the captain conducts himself in such a way as puts the sailor into that situation that he cannot without damage to his personal safety continue in his service, (human nature speaks the language,) a servant is justified in providing for that safety." The necessity of securing in all ordinary cases the most prompt compliance with the orders of the master is, however, so very urgent, that no proceeding on the part of the latter, unless it be of the most unwarrantable description, will justify the seamen in deserting or resisting his commands. Disobedience to the latter is uniformly presumed to be an offence of the gravest kind: and nothing but the most overwhelming necessity will vindicate the seamen by whom it may be committed. "The court," to use the words of Lord Stowell, "will be particularly attentive to preserve that subordination and discipline on board ship which is so indispensably necessary for the preservation of the whole service, and of every person concerned in it. A peremptory or harsh tone, or an over-charged manner, in the exercise of authority, will never be held by this court to justify resistance. It will not be sufficient that there has been a want of that personal attention and civility which usually takes place on other occasions, and might be wished generally to attend the exercise of authority. The nature of the service requires that those persons that engage in it should accommodate themselves to the circumstances attending it, and those circumstances are not unfrequently urgent, and create strong sensations which naturally find their way in strong expressions and violent demeanour. The persons subject to this species of authority are not to be captious, or to take exception to a neglect of formal or ceremonious observances." — (*Dodson's Admiralty Reports*, ii. 261.)

For an account of the penalties imposed on the master for leaving seamen in foreign countries, or refusing to bring them back, see post, and art. MASTER.

Neglect of duty, disobedience of orders, habitual drunkenness, or any cause which will justify the master in discharging a seaman during the voyage, will also deprive the seaman of his wages.

If the cargo be embzzled or injured by the fraud or negligence of the seamen, so that the merchant has a right to claim satisfaction from the master and owners, they may, by the custom of merchants, deduct the value thereof from the wages of the seamen by whose misconduct the injury has taken place. And the last proviso introduced into the agreement to be signed by the seamen, (see Schedules A. and B. pp. 1091–92) is calculated to enforce this rule in the case of the embzzlement, or the loss or destruction by negligence, of any part of the cargo or of the ship's stores. This proviso, however, is to be construed individually, as affecting only the particular persons guilty of the embzzlement, and not the whole crew. Nor is any innocent person liable to contribute a portion of his wages to make good the loss occasioned by the misconduct of others.

The offences of running away with the ship, or voluntarily yielding her up to an

enemy, or making a revolt, have in all cases been visited with the severest punishment. The statute 11 & 12 Will. 3. c. 7. enacted—

“That if any commander or master of any ship, or any seaman or mariner, shall in any place, where the admiral hath jurisdiction, betray his trust and turn pirate, enemy, or rebel, and piratically and feloniously run away with his or their ship or ships, or any barge, boat, ordnance, ammunition, goods, or merchandises, or yield them up voluntarily to any pirate, or shall bring any seducing messages from any pirate, enemy, or rebel, or consult, combine, or confederate with, or attempt or endeavour to corrupt any commander, master, officer, or mariner, to yield up or run away with any ship, goods, or merchandises, or turn pirate, or go over to pirates; or if any person shall lay violent hands on his commander, whereby to hinder him from fighting in defence of his ship and goods committed to his trust, or that shall confine his master, or make or endeavour to make a revolt in the ship; shall be adjudged, deemed, and taken to be a *pirate, felon, and robber*, and being convicted thereof according to the directions of this act, shall have and suffer pain of *death*, loss of lands, goods, and chattels, as *pirates, felons, and robbers* upon the seas ought to have and suffer.”

But by the 7 W. 4. & 1 Vict. c. 88., the penalty for this offence has been changed to transportation beyond seas for life, or for not less than 15 years, or to imprisonment for any term not exceeding 3 years.

The wilful destruction or loss of the ship has, in all countries, been punished by death. But doubts having been entertained whether the destruction of a ship that had been insured came within the scope of the previously existing statutes, they were repealed by the 43 Geo. 3. c. 115., and the following provision substituted in their stead:—

“That if any person or persons shall, from and after the 16th day of July, 1803, wilfully cast away, burn, or otherwise destroy any ship or vessel, or in anywise counsel, direct, or procure the same to be done, and the same be accordingly done, with intent or design thereby wilfully and maliciously to prejudice any owner or owners of such ship or vessel, or any owner or owners of any goods laden on board the same, or any person or persons, body politic or corporate, that hath or have underwritten or shall underwrite any policy or policies of insurance upon such ship or vessel, or on the freight thereof, or upon any goods laden on board the same, the person or persons offending therein, being thereof lawfully convicted, shall be deemed and adjudged a principal felon or felons, and shall suffer death, as in cases of felony, without benefit of clergy.”

The penalty for this offence is now, however, also changed to transportation for life, or not less than 15 years, or to imprisonment for not less than 3 years.—(1 Vict. c. 89.)

4. *Payment of Seamen's Wages, &c.*—In order to stimulate the zeal and enterprise of seamen, it has been the policy of all maritime states to make the payment of their wages depend on the successful termination of the voyage; and, for this reason, the insurance of their wages has been everywhere prohibited. “The mariner,” as Lord Stowell has forcibly stated, “goes to sea upon the single security of the freight. *Freight is the mother, and the only mother of wages*; if that goes, everything goes. He has no stepfather, if I may say so, in the character of insurer to supply the loss.”—(2 *Dodson's Admiralty Reports*, 510.) When, therefore, by any disaster happening in the course of the voyage, such as the loss or capture of the ship, the owners lose their freight, the seamen also lose their wages.

If a ship on a voyage out and home has delivered her outward-bound cargo, but perishes in the homeward voyage, the freight for the outward voyage is due; so, in the same case, the seamen are entitled to receive their wages, for the time employed in the outward voyage and the unloading of the cargo, unless by the terms of their contract the outward and homeward voyages be consolidated into one. If a ship sail to several places, wages are payable to the time of the delivery of the last cargo. Upon the same principle where money has been advanced to the owners in part of the freight outwards, and the ship perished before her arrival at the port of delivery, it was held that the seamen were entitled to wages in proportion to the money advanced.

If, after seamen have been hired, the owners of a ship do not think proper to send her on the intended voyage, the seamen are to be paid for the time during which they may have been employed on board the ship; and in the event of their sustaining any special damage by breaking off the contract, it is but reasonable that they should be indemnified.

In the case of shipwreck, it is the duty of the seamen to exert themselves to the utmost to save as much as possible of the vessel and cargo. If the cargo be saved, and a proportion of the freight paid by the merchant in respect thereof, it seems, upon principle, that the seamen are also entitled to a proportion of their wages. And for their labour in saving the cargo, or the remains of the ship, they, as well as other persons, may be entitled to a recompence by way of *salvage*. The laws of Oleron rule, that if, in case of shipwreck, “the seamen preserve a part of the ship and lading, the master shall allow them a reasonable consideration to carry them home to their own country; and in case they save enough to enable the master to do this, he may lawfully pledge to some honest persons such part thereof as may be sufficient for the occasion.”

By the laws of Wisby, “the mariners are bound to save and preserve the merchandise to the utmost of their power, and, whilst they do so (*co-faisant*, according to the French translation), ought to be paid their wages, otherwise not.” By the Hanseatic Ordinance, if a ship happen to be cast away, the mariners are obliged to save as much as in them lies, and the master ought to requite them for their pains to their content, and convey them at his own charge to their dwelling places; but if the mariners refuse to assist their master, in such case they shall have neither reward nor wages paid them.”

It is not quite clear, from the language of these ancient ordinances, whether the payment directed to be made to seamen on those melancholy occasions is to be regarded as a reward for their labour in the salvage, or a recompence for their former services in the ship, for which, according to general principles, they are not entitled to payment, if no freight be earned. Cleirac, in his *Commentary on the Laws of Oleron*, says, that by an ordinance of Philip II. of Spain, made in 1563, it is ordained that seamen shall save as much as they can from shipwreck; and, in that case, the master is bound to pay them their wages, and to give them a further reward for their labour out of the goods. And the Hanseatic Ordinance of 1614 expressly directs, that if so much of the ship be saved as equals the value of the wages of the seamen, they shall be paid their whole wages. In like manner, the Ordinance of Rotterdam and the *French Ordinance* also expressly direct the payment of wages out of the relics and materials of the ship.—(*Abbott on the Law of Shipping*, part iv. c. 2.)

"I have not been able," says Lord Tenterden, "to find any decision of an English court on the point, and the legislature has made no provision relating to it. As an inducement to the mariners to exert themselves in the hour of danger, it may not be unfit to hold out to them the prospect of obtaining their wages, if they save so much of the ship as shall be sufficient to pay them; but their claim upon the ship seems not to extend to a case wherein, according to the principles of the law upon which their claim is founded, no wages are payable to them."—(Part iv. c. 2.)

The laws of Oleron, Wisby, and the Hanse Towns direct, that if a seaman die during the voyage, wages shall be paid to his heirs: but it is not clear whether the sum thus directed to be paid is to be understood as meaning a payment proportioned to the time of his service, or the whole sum that he would have earned had he lived till the conclusion of the voyage. This question has not been judicially decided in England; but the acts 4 & 5 Will. 4. c. 52. and 7 & 8 Vict. c. 112. s. 31. order that the wages due to any seaman who has died on board a merchant ship, and any effects belonging to him on board the ship, or their value, shall be paid or made over, on the arrival of such ship in Great Britain, to the receiver of the corporation for the support of maimed and decayed seamen for the use of the seaman's executor or administrator. All masters neglecting or refusing to pay the same forfeit a sum not exceeding 50*l.* exclusive of the value of wages and effects, for each offence. The master is also bound to deliver up to the said corporation the register tickets of all deceased seamen.

A seaman impressed from a merchant ship into the royal service, is entitled to receive the portion of his wages due to him at the time of impressment, provided the merchant ship arrive in safety at the port of her discharge.

Policy requires that the wages of seamen should not be paid to them in foreign countries, as well to prevent desertion, as to preserve, for the benefit of their families, what might otherwise be spent in riot and debauchery. Conformably to this principle it has been enacted—

"That no master or owner of any merchant ship or vessel shall pay or advance, or cause to be paid or advanced, to any seaman or mariner, during the time he shall be in parts beyond the seas, any money or effects upon account of wages, exceeding *one moiety* of the wages which shall be due at the time of such payment, until such ship or vessel shall return to Great Britain or Ireland, or the plantations, or to some other of H. M.'s dominions, whereto they belong, and from whence they were first fitted out; and if any such master or owner of such merchant ship or vessel shall pay or advance, or cause to be paid or advanced, any wages to any seaman or mariner above the said moiety, such master or owner shall forfeit and pay *double* the money he shall so pay or advance, to be recovered in the high court of admiralty by any person who shall first discover and inform of the same."—(8 Geo. 1. c. 24.)

The following clauses in the act 7 & 8 Vict. c. 112. refer to the payment of wages.

*The Period within which Wages are to be paid.*—The master or owner of every ship shall and is hereby required to pay to every seaman his wages within the respective periods following, viz. if the ship shall be employed in coasting, the wages shall be paid within 3 days after the termination of the agreement, or at the time when any such seaman shall be discharged, whichever shall first happen; and if the ship shall be employed otherwise than coasting, then the wages shall be paid at the latest within 3 days after the cargo shall have been delivered, or within 7 days after the seaman's discharge, whichever shall first happen; and in all cases the seaman shall, at the time of his discharge, be entitled to be paid, on account, a sum equal to 1-4th part of the balance due to him; and in case the master or owner shall neglect or refuse to make payment in manner aforesaid, he shall for every such neglect or refusal forfeit and pay to the seaman the amount of 3 days' pay (to be recovered as wages) for each day, not exceeding 10 days, during which payment shall, without sufficient cause, be delayed beyond the respective periods aforesaid: provided always, that nothing in this clause contained shall extend to the cases of ships employed in the Southern Whale Fishery, or on voyages for which seamen, by the terms of their agreement, are wholly compensated by shares in the profits of the adventure.—§ 11.

*Payment of Wages or Salvage to be deemed valid, notwithstanding Bill of Sale, &c.*—Every such payment of wages to a seaman shall be valid and effectual in law, notwithstanding any bill of sale or assignment which may have been made of such wages, or of any attachment or incumbrance thereon, and no assignment or sale of wages or salvage made prior to the accruing thereof, nor any power of attorney expressed to be irrevocable for the receipt of any such wages or salvage, shall be valid or binding upon the party making the same, and any attachment to be issued from any court whatever shall not prevent the payment of wages to any seaman; and if during the voyage the allowance of provisions which a seaman agreed to receive shall be reduced 1-3rd of the quantity or less, he shall receive 4*d.* per day, and if the reduction be more than 1-3rd he shall receive 6*d.* per day, during the period such respective deductions may be made, and such pecuniary allowance shall be paid to him in addition to and be recoverable as wages.—§ 12.

*Masters to give Seamen their Certificates on their Discharge.*—Upon the discharge of a seaman from any ship, or upon payment of the wages to him, he shall receive from the master, and the master is hereby required to give to him, not only his register ticket, but also a certificate of such seaman's service and discharge, in the form set forth in the subjoined schedule (E.), specifying the period of his service, and the time and place of his discharge, which certificate shall be signed by the master, and if the master shall not give such certificate to such seaman he shall forfeit and pay to him the sum of £l.—§ 13.

#### SCHEDULE (E.)

This is to certify, that \_\_\_\_\_ whose register ticket is \_\_\_\_\_ day of \_\_\_\_\_ to the \_\_\_\_\_ day of \_\_\_\_\_ and that he was \_\_\_\_\_  
numbered \_\_\_\_\_ served as \_\_\_\_\_ on board the \_\_\_\_\_ discharged from the said ship on \_\_\_\_\_ at \_\_\_\_\_  
port of \_\_\_\_\_ of the burden of \_\_\_\_\_ tons, from the \_\_\_\_\_ day of \_\_\_\_\_ 184 . \_\_\_\_\_ Master.

*For obtaining immediate Payment of Wages in certain Cases.*—If 3 days after the termination of the stipulated service, or if 3 days after a seaman shall have been discharged, he shall be desirous of proceeding on another voyage, and in order thereto, or for any other sufficient reason, shall require immediate payment of any amount of wages, not exceeding 20*l.*, due to him, it shall be lawful for any justice of the peace, in and for any part of H. M.'s dominions or the territories under the government of the East India Company, where or near to the port or place where such service shall have terminated, or such seaman shall have been discharged, or the party or parties liable shall be or reside, on application from such seaman, and on satisfactory proof that he would be prevented from employment or incur serious loss or inconvenience by delay, to summon such party or parties before him, and if it shall appear to the satisfaction of such justice that there is no reasonable cause for delay, to order payment to be made forthwith, and in default of immediate compliance with such order such party or parties shall forfeit and pay to such seaman, in addition to his wages, the sum of 5*l.*—§ 14.

*Summary Mode of recovering Wages.*—In all cases of wages, not exceeding 20*l.*, which shall be due and payable to any seaman, it shall be lawful for any justice of the peace in and for any part of H. M.'s dominions or the territories under the government of the East India Company, where or near to the place where the ship shall have ended her voyage, cleared at the custom-house, or discharged her cargo, or where or near to the place where the party or either of the parties upon whom the claim is made shall be or reside, upon complaint on oath made to such justice by such seaman, or on his behalf, to summon such party or parties to appear before him to answer such complaint; and upon the appearance of such party or parties, or, in default thereof, on due proof of him or them having been so summoned, such justice is hereby empowered to examine the parties and their respective witnesses (if there be any) upon oath, touching the complaint, and the amount of wages due, and to inspect any agreement or copy thereof, if produced, and make such order for payment of the said wages, not exceeding 20*l.*, with the costs incurred by the seaman in prosecuting such claim, as shall to such justice appear reasonable and just; and in case such order shall not be obeyed within 2 days next after the making thereof, it shall be lawful for such justice to issue his warrant to levy the amount of the wages awarded to be due, by distress and sale of the goods and chattels of the party on whom such order for payment shall be made, rendering to such party the overplus (if any shall remain of the produce of the sale), after deducting thereout all the costs, charges, and expenses incurred by the seaman in the making and prosecuting of the complaint, as well as the costs and charges of the distress and levy; or to cause the amount of the said wages, costs, charges, and expenses to be levied on the ship in respect of the service on board which the wages are claimed, or on the tackle and apparel thereof; and if such ship shall not be within the jurisdiction of such justice, or such levy cannot be made, or shall prove insufficient, then he is hereby empowered to cause the party upon whom the order shall be made to be apprehended, and committed to the common gaol of the district or county, there to remain without bail until payment shall be made of the amount of the wages so awarded, and of all costs and expenses attending the recovery thereof; and the award and decision of such justice as aforesaid shall be final and conclusive.—§ 15.

*Masters to have same Remedies for Wages as a Seaman.*—All the rights, liens, privileges, and remedies (save such remedies as are against a master himself) which by this act, or by any law, statute, custom, or usage, belong to any seaman or mariner, not being a master mariner, in respect to the recovery of his wages, shall, in the case of the bankruptcy or insolvency of the owner of the ship, also belong and be extended to masters of ships or master mariners, in respect to the recovery of wages due to them from the owner of any ship belonging to any of H. M.'s subjects; and no suit or proceeding for the recovery of wages shall, unless they exceed 20*l.*, be instituted against the ship, or the master or owner thereof, either in any court of admiralty or vice-admiralty court, or any court of record in H. M.'s dominions, or the territories under the government of the East India Company, unless the owner of the ship shall be bankrupt or insolvent, or the ship shall be under arrest or sold by the authority of any admiralty or vice-admiralty court, or unless any magistrate acting under the authority of this act shall refer the case to be adjudged by any such court or courts, or unless neither the owner nor master shall be or reside at or near the port or place where the service shall have terminated, or where any seaman shall have been discharged or put on shore.—§ 16.

*When Ship is sold at foreign Port the Crew to be sent Home at the Expense of the Master or Owner.*—Whenever any ship whatever, belonging to any subject of H. M., shall be sold, transferred, or disposed of at any port out of H. M.'s dominions, in all such cases (unless the crew in the presence of the British consul or vice-consul, or in case of there not being any such consul or vice-consul, then in the presence of one or more British resident merchants, not interested in the said ship, shall signify their consent in writing to complete the voyage if continued), or whenever the service of any seaman shall terminate at any place out of H. M.'s dominions, the master shall and he is hereby required to give to each of the crew and to each of the seamen whose service shall terminate as last aforesaid, a certificate of discharge in the said form set forth in schedule E. (see above), and also his register-ticket, and, besides paying the wages to which they shall respectively be entitled, either to provide them with adequate employment on board some other British vessel homeward bound, or to furnish the means of sending them back to the port in H. M.'s dominions at which they were originally shipped, or to such other port in the U. K. as shall be agreed upon between him and them respectively, or to provide them with a passage home, or to deposit with the consul or vice-consul, merchant or merchants as aforesaid, such a sum of money as shall be by them deemed sufficient to defray the expenses of the subsistence and passage of such seamen; and if the master shall refuse or neglect so to do, such expenses, when defrayed by such consul or vice-consul, or any other person on behalf of the seamen, shall be a charge upon the owner of such ship, except in cases of battery, and may be recovered against such owner as so much money paid to his use, together with full costs, at the suit of the consul or other person defraying such expenses, or as a debt due to H. M., in case the same shall have been allowed to the consul out of the public moneys, and if defrayed by the seaman shall be recoverable as wages due to him; and in all cases of wreck or loss of the ship every surviving seaman shall be entitled to his wages up to the period of the wreck or loss of the ship, whether such ship shall or shall not have previously earned freight; provided the seaman shall produce a certificate from the master or chief surviving officer of the ship, to the effect that he had exerted himself to the utmost to save the ship, cargo, and stores.—§ 17.

*5. Establishment of an Office in London for the Registry of Seamen.*—This is provided for by clauses 19 & 20 of the act 5 & 6 Will. 4. c. 19, which establishes an office at the

Custom-house for the registry of merchant seamen, consisting of a registrar, &c. under the direction of the Lords of the Admiralty. In regard to this registration, the 7 & 8 Vict. c. 112. enacts as follows:—

**Register Tickets to be procured.**—Every person, being a subject of H. M., intending to serve on board any ship subject to the provisions of this act (except as master or physician, surgeon or apothecary), shall and he is hereby required to provide himself with a register ticket, and for that purpose to apply personally at the general register and record office of seamen in London, or at the custom-house of the several outports of the U. K.; and every applicant is hereby required to answer truly to the best of his ability, all the questions set forth in the subjoined schedule (F.) before he shall be entitled to receive his register ticket; and no person shall serve in any capacity on board any ship subject to any of the provisions of this act (except the master, physician, surgeon, or apothecary) who is not possessed of such register ticket; and the masters of all apprentices who shall be bound after the commencement of this act, or whose apprenticeship shall be in force when this act takes effect, shall, before commencing a voyage, bring all indentures and assignments of apprenticeships, together with the apprentices themselves, to the registrar of seamen in London, or to the custom-house of the nearest port, in order that each of such apprentices may be furnished with a register ticket, which ticket shall be annexed and be kept annexed to the original indenture retained by the master, and shall be delivered up to the apprentice by the master at the expiration of the apprenticeship; and the registrar of seamen and the collectors and comptrollers of customs respectively are hereby required to grant such tickets to all seamen and other persons requiring the same, and duly complying with the provisions aforesaid.—§ 20.

**Altering, &c. a Register Ticket, Misdemeanor.**—If any person shall alter or destroy a register ticket, or counterfeit, transfer, or traffic in, for gain or otherwise, or attempt to counterfeit, transfer, or traffic in, for gain or otherwise, any register ticket issued or purporting to be issued pursuant to the provisions of this act, he shall for every such offence be guilty of a misdemeanor; and any person becoming possessed of a register ticket, other than that legally issued to him, shall forthwith transmit the same to the registrar of seamen, and in case of default he shall for every such offence forfeit and pay a sum of 20*l.*—§ 21.

**When Register Ticket is lost.**—If any seaman shall lose his register ticket he shall forthwith appear in person, and represent his case to the registrar of seamen in London, or the collector or comptroller of customs at any of the outports; and he shall truly answer all reasonable questions put to him by the said registrar or officer of customs; and if it appear that no fraud has been committed, and the loss was unavoidable, he shall be furnished with another register ticket; but if it appear that the seaman did not take due and reasonable care of his former ticket, or if he shall not give a satisfactory account of the same, he shall be liable to a penalty of not exceeding 10*l.* and not less than 2*l.*, and shall not be entitled to any other ticket until such penalty shall be paid; and every person who shall apply for any ticket, and shall give a false answer to any reasonable question which may be put to him by the registrar of seamen or his assistant, or by the collector or comptroller of customs, with reference to the granting such ticket, shall be guilty of a misdemeanor.—§ 22.

**Register Tickets of Parties dead.**—All district registrars of births, deaths, and marriages shall, and they are hereby required to demand from the person registering the death of any seaman the registrar ticket of such seaman, and if delivered to any such registrar, he shall forthwith forward the same to the registrar of seamen; and no person, other than the said registrar of seamen, shall retain the ticket of a deceased seaman; and if any person shall retain any such ticket for more than 20 days after the death of any such seaman, or 10 days after the arrival of the ship in the U. K. should the seaman die abroad, he shall be liable to a penalty of not exceeding 5*l.* in respect of every such register ticket so detained.—§ 23.

**List of cancelled Tickets to be prepared by Registrar, and published half-yearly, &c.**—A list shall be prepared from time to time by the registrar of seamen, setting forth the numbers of all the register tickets that have been cancelled by reason of the death of seamen or otherwise within the preceding 6 calendar months; and such lists shall be published half-yearly in the London Gazette, and shall also be transmitted by the said registrar from time to time to the collectors and comptrollers of customs, to be by them conspicuously exhibited in the custom-houses and other stations of their respective ports, and copies of such lists shall be delivered to any master or owner on application; and every master or owner entering into an agreement with any seaman producing such cancelled ticket shall be liable to and incur a penalty of not exceeding 5*l.*; and every seaman tendering or delivering to a master a cancelled ticket, or any other ticket not legally issued to him, or falsely representing himself to be a foreigner, shall forfeit to the owner all wages which shall become due to him during the service, for which he shall agree or shall have agreed.—§ 24.

**Papers and Documents to be recorded.**—Duplicates of all register tickets, and all papers and documents delivered or transmitted to and retained by the said registrar, shall be by him recorded, preserved, and kept; and every copy of such duplicate tickets, papers, and documents, or any of them, certified by the said registrar or his assistant to be a true copy, shall be admitted in evidence as fully as the original thereof; and every copy of a document and endorsement thereon, which may be delivered by any owner or master under the provisions of this act, shall and may be admitted in evidence against such owner and master, and each of them, as fully as the original of such document and endorsement.—§ 25.

**Masters of Ships trading abroad to deliver Lists of their Crews on their Departure and Return.**—The master of every ship belonging to any subject of H. M., and bound to parts beyond the seas, except in the cases hereinafter mentioned, shall, before he leaves his first port of departure from the U. K., transmit or deliver, or cause to be transmitted or delivered, to the collector and comptroller of customs at such port, a list, signed by himself, of the names of his crew (including apprentices), with the numbers of their register tickets, and the capacity in which they are serving on board, in the form set forth in the subjoined schedule (G.); and if any subsequent change in his crew take place before finally leaving the U. K., the owner or master shall, upon such change taking place, apprise the collector and comptroller of the customs at the port where it occurs, by transmitting an amended list in the same form; and the master or owner of every such ship shall, within 48 hours after the arrival of such ship at her final port of destination in the U. K., transmit or deliver, or cause to be transmitted or delivered, to the collector or comptroller of the customs at such port, an account or list, signed by himself, of all the seamen and others (including apprentices) who shall have belonged to the ship at any time during her absence from the U. K., which account or list shall contain a full, true, and correct return, under their respective heads, of the several particulars expressed in the form set forth in the subjoined schedule (C.), with Christian names and surnames of the master and all the crew at full length, and with the dates of the

registry of the indentures of the apprentices, and the assignments respectively, and the port at which and the time when they were respectively registered, and also the numbers of the register tickets of every apprentice and seaman; and no vessel shall be cleared inwards by the tide-surveyor or other officer until the master or owner shall produce a certificate from the collector or comptroller (which he is hereby required to give) to the effect that he has rendered such accounts or lists as aforesaid; and the tide-waiters or other officers left on board shall be maintained at the expence of the master or owner until such accounts or lists shall be duly delivered as aforesaid. — § 26.

## SCHEDULE (G.)

Names, and distinguishing numbers of the register tickets, of the crew (including apprentices) now serving on board the of the port of of the burden of tons, on taking departure from the port of in the U. K., bound on a voyage to

Dated this day of 18 . Master.

Particulars to be clearly and legibly set forth.

No. and Date of Ship's Register.	Name.	Capacity.	Number of Register Tickets.

## SCHEDULE (C.)

Ship of the Port of of the burden of tons, whereof was Master.

A List of the Crew (including the Master and Apprentices) at the period of quitting the Port of in the United Kingdom, from which she took her first departure on her voyage to on the day of and of the Men who joined the Ship subsequent to such departure, and until her return to the Port of being her first final port of destination in the United Kingdom on the day of 18 .

No. and Date of Ship's Register.	Name. Christian and Surname at full Length.	Age.	Town or County where born.	Quality.	Ship in which he last served.	Date of Joining the Ship.	Place where.	Time of Death or leaving the Ship.	Place where.	How disposed of.	Date of Apprentices' Indentures and Assignments.	When and where registered.	Numbers of Register Tickets.

Note. — If any one of the crew has entered H. M.'s service, the name of the queen's ship in which he entered must be stated in the account, under the head of "How disposed of."

Note. — This list to be filled up and signed by the master of

every vessel, of whatever tonnage, and to be delivered by him to the collector or comptroller of the customs within 14 hours after the ship's arrival at her final port of destination in the U. K.

*Masters of Ships in the Home and Fishing Trade to return Lists half-yearly.* — Within 31 days after the 30th day of June and the 31st day of December in each year, the master or owner of every ship belonging to a subject of H. M., of whatever tonnage, employed in fishing on the coasts of the U. K. or elsewhere, other than in the South Sea, Greenland, and Newfoundland fisheries, or in proceeding from one part of the U. K. to another, and every ship proceeding or making voyages to any of the Islands of Jersey, Guernsey, Alderney, Sark, and Man, or to any port on the continent of Europe, between the river Elbe inclusive and Brest, shall deliver or transmit, or cause to be delivered or transmitted, to the collector or comptroller of the customs of any port of the U. K. an account, signed by such master or owner, of any voyage or voyages in which such ship shall have been engaged during the preceding half-year, ending on the respective days above-mentioned, and setting forth legibly and at full length the christian and surnames of the several persons (including the master and apprentices) who shall have belonged to the ship at any time during such periods respectively; which account shall be in the form and shall contain a true and correct return under their respective heads of the several particulars expressed in the sub-joined schedule (D.), with the dates of the registry of the indentures of apprenticeship and assignments respectively, and the ports at which and the time when they were respectively registered, and the numbers of the register tickets of every seaman and apprentice; and no master or owner shall be entitled to or receive a transire or other customs document necessary to enable him to conduct the business of his ship, after the expiration of the said 31 days, until he shall produce and show a certificate from such collector or comptroller (which he is hereby required to give), to the effect that he has delivered such an account; and in the case of ships of all descriptions which may be unemployed for 6 months, or which may be employed and not require a transire or other customs document, the master or owner shall notify the same to such collector or comptroller within such 31 days, and in case of every default the master or owner shall be liable to a penalty of 10*l*.; and all collectors and comptrollers of customs of the ports to which the vessels belong shall transmit a list of all such ships, and of all ships of every description registered or licensed, or whose registers or licences have been transferred or cancelled in their respective ports within each half-year ending as aforesaid, to the said registrar at the said office, on or before the 1st day of February and the 1st day of August in each year respectively. — § 27.

## SCHEDULE (D.)

An Account of the voyages in which the ship of of the burden of tons has been engaged, in the half year commencing on the day of 18 , and ending on the day of 18 , and of all the persons (master and apprentices included) who have belonged to such ship during that period.

## ACCOUNT OF THE VOYAGES.

[Here the several voyages, and the periods of such voyages, are to be described.]

## ACCOUNT OF THE CREW.

No. and Date of Ship's Register.	Name. Christian and Surname at full length.	Age.	Town or County where born.	Quality.	Ship in which he last served.	Date of Joining the Ship.	Place where.	Time of Death or leaving the Ship.	Place where.	How disposed of.	Date of Apprentices' Indentures and Assignments.	When and where registered.	Numbers of Register Tickets.

*Note.*—If any one of the crew shall have entered H. M.'s service, the name of the queen's ship, to which he entered, must be stated in this account, under the head of, "How disposed of."

*Note.*—This account, when filled up, is to be signed by the

owner or master of every ship, of whatever tonnage, and deposited with the collector or comptroller of the customs of any port of the U. K. within 21 days after the 30th of June and the 31st of December in every year.

*Return to be made in case of Ship lost or sold Abroad.*—In case any ship belonging to any subject of H. M. shall be lost, sold, or transferred, an account, containing a similar return as required in the several and respective cases before mentioned, made out up to the period of such loss, sale, or transfer, shall, if practicable, be delivered or transmitted by the master or owner at the time of the loss, sale, or transfer to the collector or comptroller of the port to which the ship belongs with all convenient speed; and in case such loss, sale, or transfer shall take place out of the U. K. within 12 calendar months at furthest after the loss, sale, or transfer of the ship.—§ 28.

*Lists, &c., to be transmitted to the Registrar.*—All indentures, counterparts, assignments, lists, accounts, returns, papers, register tickets, and documents, by this act required to be delivered to the collectors or comptrollers as aforesaid shall be by them transmitted to the said registrar for the purposes of this act at the end of every week, unless otherwise specified in this act; and every owner or master who shall refuse or neglect to transmit, deliver, or cause to be delivered, any list, account, register ticket, or other document, as required by this act, shall for every such refusal or neglect forfeit and pay the sum of 10*l.*—§ 29.

*Lists, &c., in the case of Pleasure Yachts to be transmitted to the Registrar.*—All agreements, or copies thereof, lists, returns, register tickets, and other documents, which under the provisions of this act are required to be transmitted or delivered to the collectors or comptrollers of customs of the several ports in the U. K., shall, in the case of pleasure yachts, be transmitted or delivered by the masters or owners of such yachts direct to the registrar of seamen, and the owners or masters thereof shall be liable to the same penalties for default as herein provided in the cases of the masters or owners of other ships failing to transmit or deliver such documents to such collectors and comptrollers.—§ 30.

*As to the Disposal of the Effects of any Seaman dying abroad.*—Whenever any seaman, being abroad, shall die elsewhere than on board a ship belonging to any subject of H. M., leaving any money or effects not on board his ship, it shall be lawful for H. M.'s consul or vice consul at or nearest to the place, and he is hereby required to claim and take charge of all such money and effects, and to dispose of the said effects, if he shall so think fit, and after deducting all necessary and proper charges and expenses incurred in the collecting thereof, or by or on account of such seaman, to remit the balance, with a full account of such money or effects, to the president and governors of the corporation "for the relief and support of sick, maimed, and disabled seamen, and of the widows and children of such as shall be killed, slain, or drowned in the merchant service," to be by such president and governors paid over and disposed of, in the same manner and under the same regulations as are provided by the act 4 & 5 W. 4. c. 52. (see sect. 30. & 31. of that act, p. 1102.); and in case any seaman dying abroad shall leave on board his ship any money, clothes, or other effects, or be entitled to any wages, the master of the said ship shall and he is hereby required to deposit the same, or the proceeds arising therefrom, with, and to pay such wages to, the president and governors aforesaid, to be by them disposed of in the same manner as is provided by the said act with respect to the wages of seamen dying on board ship, and to transmit to the said president and governors at the same time a full account of such effects and wages; and on failure the master shall forfeit a sum not exceeding 50*l.* in addition to being accountable for such money, clothes, effects, and wages; and in all cases of a seaman dying abroad the master shall, on his ship's return to the U. K., deliver up to the said president and governors the register ticket of such deceased seaman, and the said president and governors, on the receipt thereof, shall transmit the same to the registrar of seamen.—§ 31.

**6. Regulations in regard to taking Apprentices on board Ship.**—We have already noticed these under the art. APPRENTICE; but as the subject is of great interest, we subjoin a full abstract of the clauses in the act 7 & 8 Vict. c. 112. having reference to apprentices.

*Parish Boys may be put out Apprentices to the Sea Service.*—It shall be lawful for the overseers of the poor, or other persons having the authority of overseers of the poor, in and for any district, union, parish, township, or place in the U. K., and they are hereby empowered to bind by indenture, according to the form set forth in the subjoined schedule (H.), and put out as an apprentice in the sea service to any of H. M.'s subjects, being the owner of any ship registered or licensed in any port of the U. K., any boy having attained the age of 12 years, and of sufficient health and strength, who or whose parent or parents is or are chargeable to or maintained by any such district, union, parish, township, or place, or who shall beg for alms therein, with his consent, but not otherwise; and until such boy shall attain the age of 21 years, or shall have served as apprentice 7 years, or whichever shall first happen, such binding shall be effectual to all intents and purposes: provided always, that where any such parish, township, or place separately maintaining its own poor shall be included in any union, or shall be under the management of a board of guardians, no such binding shall be valid unless the guardians of such union, parish, or other place respectively shall previously have given their consent thereto, by causing their official seal to be affixed to the indenture, and the same to be signed by the presiding chairman of the board at any meeting, and the clerk or person acting as such at such meeting; and provided also, that every such binding shall be made in the presence of any such boy, and of 2 justices of the peace, who shall execute the indenture in testimony of their being satisfied that such boy hath consented so to be bound, and attained the age, and is of sufficient health and strength as required by this act; and the age of every such boy shall be truly inserted in his indenture, and the age of every such boy so inserted therein shall (in relation to the continuance of his service) be taken to be his true age, without any further proof thereof; and any certificate of baptism of such boy which may be required shall be given and attested by the officiating minister without fee or reward: provided always, that no apprenticeship to the sea service, whether parish or otherwise, shall be binding after the apprentice shall have attained the age of 21 years; and that every indenture, together with his register ticket annexed thereto shall be given up to such apprentice on his attaining such age, or at the expiration of his apprenticeship, whichever shall first happen, by the person to whom he shall be bound at the time, under a penalty of 20*l.*, to be paid by such person on default; but should any apprenticeship, parish or otherwise, expire during a voyage, and before the ship's arrival at her final port of destination in the U. K., such apprenticeship shall, notwithstanding, continue until the return of the ship to her final port of destination in the U. K.; but after 1 calendar month from the expiration of such apprenticeship, the apprentice shall be paid the same wages as an able-bodied seaman or ordinary seaman of the said ship, according to his qualification.—§ 32.

#### SCHEDULE (H).

##### Form of Parish Apprentice's Indenture.

This Indenture, made the \_\_\_\_\_ day of \_\_\_\_\_ year of our Lord one thousand eight hundred and \_\_\_\_\_, this

in the \_\_\_\_\_ of (°) \_\_\_\_\_ in the \_\_\_\_\_ division of \_\_\_\_\_ in the

overseers of the poor of the [parish]

(\*) Or it may be made by other persons having the authority of overseers or guardians, or in whom, the duty of overseers or guardians of the poor shall be vested.

county of \_\_\_\_\_ In the presence of \_\_\_\_\_ and \_\_\_\_\_  
 2 of H. M.'s justices of the peace in and for the said county of \_\_\_\_\_  
 acting in and for the said division in which the said [parish or union] is situate, do by this indenture, duly executed by the said justices in testimony of their having been satisfied that the boy hereby and hereafter bound and named hath attained the age hereinafter mentioned, and is of sufficient health and strength as required by the statute in such case made and provided, bind, put out, and place, with his own free will and consent, and not otherwise, \_\_\_\_\_ a poor boy of the said [parish or union], aged \_\_\_\_\_ years, as appears by the copy of the entry of his baptism in the register-book of the parish of \_\_\_\_\_ in the county of \_\_\_\_\_ hereto annexed (\*) who is now (and whose parents \_\_\_\_\_ are now) chargeable to and maintained by the said [parish or union] in the sea service to \_\_\_\_\_ one of H. M.'s subjects of the [parish or union] \_\_\_\_\_ in the county of \_\_\_\_\_ being the master (1) \_\_\_\_\_ of the ship called \_\_\_\_\_ registered in the port of \_\_\_\_\_ being a port of the U. K. of Great Britain and Ireland, with him the said \_\_\_\_\_ his executors and administrators, and the assign or assigns of the widow or of the executors and administrators of the said \_\_\_\_\_ to dwell, remain and serve from the day of the date of these presents for so long time and until the said apprentice shall attain the age of 21 years; during all which term the said apprentice, his said master, his executors and administrators, or the assign or assigns of the widow or of the executors and administrators of the said \_\_\_\_\_ shall well and faithfully serve; his and their secrets keep; his and their lawful commands everywhere gladly do and execute; hurt or damage to his said master, his executors or administrators, or the said assign or assigns, he shall not do, consent or see to be done by others, but to the utmost of his power shall hinder the same, and forthwith his said master, his executors or administrators, or the said assign or assigns, thereof, but as a true and faithful apprentice due to all lawful businesses, according to his power, wit, and ability, and honestly, orderly, and obediently in all things, shall demean and behave himself toward his said master, his executors or

administrators, or the said assign or assigns, during the said term; and true and just accounts of his or their goods, chattels, and money committed to his charge, which shall come to his hands, faithfully he shall give at all times, when thereunto required by him or them; and shall also render an account of, and well and truly pay or cause to be paid to him or them, all such wages, prize-money, and other sum or sums of money as shall become due and payable unto him the said apprentice from H. M., her heirs, successors, or any other person, in case he shall enter or go into H. M.'s service during the said term. In consideration whereof, and of the sum of \_\_\_\_\_ of lawful money of the U. K. of Great Britain and Ireland to him in hand well and truly paid at the execution of these presents (the receipt whereof the said \_\_\_\_\_ doth hereby acknowledge), he the said \_\_\_\_\_ for himself, his executors or administrators, doth hereby covenant, promise, and agree to and with the said overseers of the poor, and their successors, that he the said \_\_\_\_\_ his executors or administrators, and the assign or assigns of his widow or of the executors and administrators, the said apprentice in the art, trade, or business of a mariner or seaman, with the circumstances thereto belonging, shall and will, until he shall attain the age of 21 years, teach, learn, and instruct, or cause to be taught, learned, and instructed, in the best way and manner that he or they can; and shall and will find, provide, and allow unto the said apprentice competent and sufficient meat and drink, apparel, \_\_\_\_\_ and medical and surgical aid and advice, and all other things necessary and fit for an apprentice.

And also shall and will so provide for the said apprentice that he be not any way a charge to the said [parish or union] or parishioners thereof, but of and from all charge shall and will save the [parish or union] of \_\_\_\_\_ and parishioners thereof harmless and indemnified during the said term. In witness whereof the said \_\_\_\_\_ and parties above-said, to the present indenture, interchangeably have set their hands and seals, the day and year first above written.

Signed, sealed, and delivered \_\_\_\_\_  
 in the presence of \_\_\_\_\_  
 We, the guardians of the poor of the [parish or union] \_\_\_\_\_  
 within which the said parish is included, do hereby testify our consent to the binding of the said \_\_\_\_\_ to the said \_\_\_\_\_ and have hereunto signed our official seal to be affixed at a meeting of the board this \_\_\_\_\_ day of \_\_\_\_\_ (Signed)

Seal of the Board of Guardians.

Presiding Chairman.

Clerk to the said guardians.

\* If the parish be not in union, omit the words within brackets.

(\*) The copy must be given and attested by the officiating minister, without fee or reward. If it cannot be found, erase the words from "by the" to "annexed," and insert "from such information of such boy's age as the said justices have been able to obtain, as the entry of his baptism cannot be found." The apprentice must be above 12 and under 17 years of age, and bound for 4 years at the least.  
 (1) Or owner.

**Parish Apprentice may be turned over to the Sea Service.**—It shall be lawful for any master or person to whom any parish apprentice shall have been or shall be hereafter bound to a service on shore, according to the statutes for the time being relating to such apprentices, or for the executors or administrators, or, there being none such, for the widow of any deceased master, with the concurrence of 2 or more justices of the peace in and for the county, district, or place where such boy shall have been bound apprentice, to assign such boy, with his consent, to be given in the presence of such justices, but not otherwise, as apprentice to any such owner as aforesaid, to be employed in the sea service during the period then remaining unexpired of his apprenticeship; and every such assignment shall be attested as next hereinafter mentioned.—§ 33.

**Indentures may be assigned on the Death of the Master.**—In the event of the bankruptcy, insolvency, or death of the master of any such parish apprentice to the sea service, it shall be lawful for such master, or the executors or administrators of such master, or, there being none such, for the widow of such deceased master, to assign the indenture of any such apprentice for the residue of the term then unexpired therein to any other owner of any such ship: provided always, that such assignment, if executed within the limit of the port of London, shall be attested by the said registrar, his assistant, or one of his clerks, and if executed at any other port, by the collector or comptroller of the customs of such port.—§ 34.

**Parish Officers to prepare Indentures.**—Such overseers, guardians, or other persons as aforesaid, shall cause the indenture of apprenticeship to be prepared and transmitted in triplicate; (that is to say,) 2 counterparts, besides the indenture, to the said registrar, if the owner of the ship to whom such apprentice is to be bound shall be or reside within the limits of the port of London, and if at any other port, to the collector or comptroller of the customs at such port; and shall cause each such poor boy to be conducted and conveyed to such port or place by a constable or other trustworthy person, at the expense of the district, union, parish, township, or place; and when any such boy shall be so bound, he shall be provided by the guardians of the said union or parish as aforesaid, or, in case the said parish or place shall not be included in any union or governed by a board of guardians, by the overseers, with a sufficient outfit of sea clothing, bedding, and similar necessities, to the value of £1, which said amount, together with the expenses to be incurred in the binding and conveyance of the said boy, shall be charged by such guardians or overseers respectively to the account of the parish or other place by whose overseers the said boy shall be bound, and be allowed to them in their account; and the said indenture so entered into by or on behalf of any parish or other place as aforesaid may be sued upon in the name of the overseers of the poor of the said parish or other place for the time being, by their name of office; and no action commenced for the breach of any covenant therein contained, with the consent of the vestry of such parish or place, shall abate by reason of death or any change of overseers of such parish or place pending the same, but shall be proceeded in by the overseers for the time being, who shall be entitled to charge the whole amount of the costs incurred in such action, and not recovered from the defendant therein, upon the poor rates collected by them, though part of such costs shall have been incurred by their predecessors.—§ 35.

**How Indentures to be attested.**—Such Indentures shall be executed in the presence of and attested by the constable or other person who shall conduct or convey such apprentice; and such indentures shall bear date respectively on the days on which they are executed; and such constable or other person shall transmit 1 of the said counterparts, duly executed, to the overseers, guardians, or other persons aforesaid, 1 to the master, and another to the said registrar.—§ 36.

**Every Ship, except Pleasure Yachts, to have Apprentices according to her Tonnage.**—The master or owner of every ship belonging to any subject of H. M., and of the burden of 50 tons or upwards (except pleasure yachts), shall have on board at the time of her proceeding from any port of the U. K., and at all times when absent from the U. K., or navigating the seas, 1 apprentice, or more, in the following proportion to the number of tons of his ship's admeasurement, according to the certificate of

registry; (viz.) for every ship of 80 tons and under 200 tons, 1 apprentice at the least; for every ship of 200 tons and under 400 tons, 2 apprentices at the least; for every ship of 400 tons and under 800 tons, 3 apprentices at the least; for every ship of 800 tons and under 700 tons, 4 apprentices at the least; and every ship of 700 tons and upwards, 5 apprentices at the least; all of whom, at the period of their being bound respectively, shall be subjects of H. M., and above 12 and under 17 years of age, and be duly bound for the term of 4 years at the least; and if any such master or owner shall neglect to have on board his ship the number of apprentices as hereby required, together with their respective registered indentures, assignments, and register tickets, he shall for every such offence forfeit and pay the sum of 10*l*. In respect of each apprentice, indenture, assignment, or register ticket so wanting or deficient.—§ 37.

*The cancelling of Indentures, and Death or Desertion of Apprentices, to be notified.*—In case any indentures of apprenticeship of any description shall be cancelled, or any apprentice, parish or otherwise, shall die on shore or desert, or by reason of the vessel of the master not having made a voyage for 6 months, shall not be reported in either of the said lists, such cancellation, death, desertion, or non-employment shall forthwith be notified in writing by the master of the apprentice to the said registrar, if the ship on board which the apprentice was bound to serve shall belong to the port of London, or otherwise to the collector or comptroller of the port to which the said ship shall belong; and for every default the said master shall be liable to a penalty of 10*l*.; and the collector or comptroller, if the notification be made to him, shall transmit the same to the said registrar within 1 week from the receipt thereof; and no cancelling of any indenture of apprenticeship of any description shall be valid or effectual without the mutual consent of the parties, or without the consent or in the absence of the registrar of seamen in London, or of the collector or comptroller of customs of the port in which such cancellation shall take place, or, in case of bindings by the overseers, without the additional consent of the guardians of the board or parish whose clerk to the said guardians.—§ 38.

*Indentures and Assignments of Parish Apprentices to be registered.*—The said registrar in London, and the collector and comptroller of the customs at each other port, shall, in a book to be kept for that purpose, cause to be entered from time to time all such indentures and assignments of parish apprentices as aforesaid, specifying therein the dates thereof, the names and ages of the apprentices, the parishes or places from whence they are sent, the names and residences of their masters to whom they are bound or assigned, and the names, ports, and burden of the respective ships to which such masters belong, and shall make and subscribe on each indenture and assignment an endorsement, purporting that the same hath been duly registered pursuant to this act; and such registrar, collectors, and comptrollers respectively shall require the personal attendance of every such apprentice at the time of registering his indenture or assignment thereof; and every such collector and comptroller shall also, at the end of each week, transmit a list of the indentures and assignments and cancellations so registered by him within the week, containing all the particulars aforesaid, to the said registrar.—§ 39.

*Indentures and Assignments of other Apprentices to be registered.*—In every case of a person (other than such parish apprentice as aforesaid) binding himself apprentice to the sea service, the indentures to be executed on such occasion shall be in duplicate, in the form set forth in the subjoined Schedule (I.), and a counterpart shall be delivered to the said registrar, if the master shall be or reside within the port of London, or if any other port, to the collector or comptroller of such port; and the indentures shall be registered in a book to be kept for that purpose by the said registrar, collectors, and comptrollers respectively, in which book shall be expressed the dates of the several indentures, the names and ages of the apprentices, the names and residences of their masters, and (if known) the names, port, and burden of the several ships on board which they are respectively to serve; and such registrar, collectors, and comptrollers respectively shall require the personal appearance of every such apprentice at the time of registering his indenture or the assignment thereof, and shall endorse and subscribe upon each indenture a certificate purporting that the same hath been duly registered pursuant to this act; and the said collectors and comptrollers shall also at the end of each week transmit a list of the indentures and assignments registered by them within the week, containing all the particulars aforesaid, together with the said counterparts, to the said registrar, for the purposes of this act; and it shall be lawful for the master of such apprentice, or in case of his death his executor or administrator, with the consent of the apprentice if of the age of 17 years or upwards, and if under that age with the consent of his parent or guardian, to assign or transfer the indenture of any such apprentice to any other master or owner of any registered ship; and all such apprentices may during the term for which they shall be bound be employed in any ship of which the master for the time being of any such apprentice may be the master or owner: provided always, that every such assignment shall be registered and endorsed by the said registrar, or by the collector or comptroller of the customs of the port where the master shall be, or to which his ship shall belong; and the said collector or comptroller shall notify the same to the said registrar, and transmit an exact copy of the said endorsement to the said registrar.—§ 40.

#### SCHEDULE (I.)

##### *Form of Apprentice's Indenture.*

This indenture, made the \_\_\_\_\_ day of \_\_\_\_\_ in the \_\_\_\_\_ year of the reign of Her Majesty Queen Victoria, by the grace of God of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, and in the year of our Lord one thousand eight hundred and \_\_\_\_\_ between \_\_\_\_\_ of \_\_\_\_\_ years, a native of \_\_\_\_\_ in the county of \_\_\_\_\_ of the one part, and \_\_\_\_\_ of \_\_\_\_\_ in the county of \_\_\_\_\_ of the other part, witnesseth, That the said apprentice unto the \_\_\_\_\_ put and bound himself with him, his executors, administrators, and assigns, after the manner of an apprentice to dwell, remain, and serve from the day of the date hereof for and during until the full end and term of \_\_\_\_\_ years from thence next ensuing, fully to be comely and obedient during all which term the said apprentice his said master shall well and faithfully serve; he secrets keep; his lawful commands everywhere do and execute; hurt or damage to his said master he shall not do, consent any time to be done by others, but to the utmost of his power shall hinder the same, and forthwith his said master thereof warn; taverns or ale-houses he shall not frequent (unless about his said master's business); at dice, cards, tables, bowls, or any other unlawful games he shall not play; the goods of his said master he shall not embezzle or waste, or lend or give to any person or persons without his said master's licence; nor from the service of his said master, without his consent, at any time absent himself; but as a true and faithful apprentice shall demean and behave himself towards his said master, his executors, administrators, and assigns, during the said term; and true and just accounts of his said master's goods, chattels, and money committed to his charge, or which shall come to his hands, faithfully he shall give at all times, when thereunto required by his said master, his executors, administrators, or assigns; and shall also render an account of, and well and truly pay or cause to be paid unto his said master, his executors, administrators, or assigns, all such wages, prize money, and other sum or sums of money as shall become due and payable unto him from

her Majesty, her heirs, successors, or any other person, in case he shall be impressed, enter or go into her Majesty's service during the said term. In consideration whereof the said

doth hereby covenant and agree to and with the said apprentice, that he the said \_\_\_\_\_ his executors, administrators, or assigns, during the said term of \_\_\_\_\_ years, shall and will teach, learn, and inform the said apprentice, or cause him to be taught, learned, and informed, in the art, trade, or business of a mariner or seaman, with the circumstances thereto then belonging; and shall and will find and provide for the said apprentice sufficient meat, drink, washing, lodging, medicine, and medical and surgical aid and advice \_\_\_\_\_ pounds of lawful money of Great Britain, in the manner following: (that is to say). The said \_\_\_\_\_ finding and providing to and for himself all manner of sea bedding, wearing apparel, and other necessities (except meat, drink, lodging, washing, medical and medical and surgical aid and advice); and it is hereby agreed between the said parties, that the said \_\_\_\_\_ shall and may from time to time during the said term deduct and retain in his hands, out of the several yearly payments above mentioned, all such sum or sums of money as he shall at any time during the said term disburse or lay out in the buying of any apparel or sea bedding for the said apprentice, as need shall require; and for the true performance of all and singular the covenants and agreements aforesaid, each of them the said \_\_\_\_\_ and \_\_\_\_\_ doth hereby bind and oblige himself, his heirs, executors, and administrators, unto the other of them, his executors and administrators, firmly by these presents, in the penal sum of \_\_\_\_\_ pounds of lawful money of Great Britain.

In witness whereof the said parties to these presents have hereunto set their hands and seals the day and year above written.

Signed, sealed, and delivered  
In the presence of \_\_\_\_\_

**Apprentices exempted from Contributions.**—No apprentice bound or assigned pursuant to this act, nor any master or owner in respect of such apprentice, shall be liable to any payment or contribution to or towards any hospital or institution; and all agreements, attested copies, indentures, assignments, counterparts, and tickets, made, signed, or executed in compliance with or under the provisions of this act, shall be wholly exempt from stamp duty. — § 41.

**Penalty on Masters neglecting to register, &c., Indentures.**—If any master or owner to whom any apprentice to the sea service shall be bound or assigned shall neglect to deliver a counterpart, and cause the indenture or the assignment (as the case may be) to be registered as required by this act, so far as depends on such master or owner, within 10 days after the binding or assignment, every such master or owner shall for every such neglect, forfeit and pay the sum of 10*l.*; and if any such master, or the master of any ship, shall, after the ship shall have proceeded on the voyage upon which such ship may be bound permit any apprentice to quit his service, or the service of the ship, except for the purpose of entering into H. M.'s naval service, every such master shall for every such offence forfeit and pay the sum of 20*l.*. — § 42.

**Justices to determine Complaints.**—Any Justice of the peace residing at or near to any port to which any ship as aforesaid, having on board thereof any apprentice, shall at any time arrive, shall have full power and authority to inquire into and examine, hear and determine, all claims of apprentices upon their masters under their indentures, and all complaints of hard or ill usage exercised by their respective masters towards any such apprentices, or of misbehaviour on the part of any such apprentices, and to proceed thereupon as one or more Justice or Justices of the peace is or are empowered by law to do in other cases between masters and apprentices; and if the master of any ship shall not send on shore, in the charge of the mate or other trustworthy person, any apprentice desirous of complaining to a Justice of the peace, so soon as the service of the ship will permit, he shall for every such default forfeit and pay the sum of 10*l.*. — § 43.

**Masters entitled to receive the Wages, &c. of Apprentices entering into the Navy.**—No apprentice to the sea service shall be at liberty to enter into the naval service of H. M., during the period of his apprenticeship, without the consent of his master; but if, nevertheless, he shall voluntarily enter into such naval service of H. M., and shall be allowed by his master to continue therein, such master, in case he shall give notice to the secretary of the admiralty of his consent to his apprentice remaining in H. M.'s said service during the residue of the term of his apprenticeship, shall, upon the production of the indenture and assignment (if any), if duly registered, and having the register ticket attached, be entitled to receive to his own use any balance of wages and prize money that may become due and payable to any such apprentice until the expiration of his apprenticeship. — § 45.

**7. Regulations in regard to Medicines.**—In order to provide against the fatal consequences that have frequently arisen from ships going to sea without having any medicines on board, or with but an insufficient or unsuitable supply, the act 7 & 8 Vict. c. 112. orders—

**A Supply of Medicines, Lime Juice, Sugar, and Vinegar, &c. to be kept on board, and Seamen hurt in the Service of the Ship to be provided with Advice, &c. gratis.**—Every ship navigating between the U. K. and any place out of the same shall have and keep constantly on board a sufficient supply of medicines and medicaments suitable to accidents and diseases arising on sea voyages, in accordance with the scale which shall from time to time or at any time be issued by the commissioners for executing the office of lord high admiral, and published in the London Gazette; and every ship (except those bound to European ports or to ports in the Mediterranean Sea) shall also have on board a sufficient quantity of lime or lemon juice, sugar, and vinegar, the lime or lemon juice, sugar, and vinegar to be served out to the crew whenever they shall have been consuming salt provisions for 10 days; the lime or lemon juice and sugar daily, after the rate of half an ounce each per day, and the vinegar weekly, at the rate of half a pint per week to each person, so long as the consumption of salt provisions be continued; and in case any default shall be made in providing and keeping such medicines, medicaments, and lime or lemon juice, sugar, and vinegar, the owner of the ship shall incur a penalty of 20*l.* for each and every default; and in case of default of serving out such lime or lemon juice, sugar, or vinegar as aforesaid, the master shall incur a penalty of 5*l.* for each and every default; and in case the master or any seaman shall receive any hurt or injury in the service of the ship, the expence of providing the necessary surgical and medical advice, with attendance and medicines, and for his subsistence until he shall have been cured, or shall have been brought back to some port of the U. K., shall, together with the costs of his conveyance to the U. K., be defrayed by the said owner of the ship, without any deduction whatever on that account from the wages of such master or seaman, and if paid by any officer or other person on behalf of H. M., the amount, with full costs of suit, shall be recovered as a debt due to H. M.; and every ship having 100 persons or upwards on board, and every ship the voyage of which shall be deemed under the provisions of the act passed in the 6th year of the reign of her present Majesty, intituled "An Act for regulating the Carriage of Passengers in Merchant Vessels," to exceed 12 weeks, having 50 persons or upwards on board, shall have on board, as one of her complement, some person duly authorized by law to practise in this kingdom as a physician, surgeon, or apothecary; and in case of every default the owner shall incur a penalty not exceeding 100*l.*. — § 18.

The Lords of the Admiralty have, pursuant to the above clause, ordered the following supply of medicines to be provided for every ten men in ships on foreign voyages, and so proportionally for a greater or smaller number.

No.	Medicines.	Quantities for 10 Men.	No.	Medicines.	Quantities for 10 Men.	No.	Quantities of Medicines, &c. for 10 Men.	No.	Quantities of Medicines, &c. for 10 Men.
1	Castor oil	lb. ss. dr.	23	Dover's powder	lb. ss. dr.	31	PILLS.		and 5 grs. of Dover's powder.

20	Quinine	0 4 0							
21	Calomel	0 4 0							

The pills and powders are to be carefully put up in tin or leaden boxes, and properly labelled.

8. *General Regulations.*—The following clauses of the act 7 & 8 Vict. c. 112. refer to various matters of importance to the master and the crew.

*Common Assaults may be summarily punished by Two Justices.*—In the case of any assault or battery committed on board any ship belonging to any subject of H. M., in any part of the world, it shall be lawful for any 2 justices of the peace in any part of H. M.'s dominions, or the territories under the East India Company, residing at or near any port or place at which the said ship may arrive or touch, upon complaint of the party aggrieved, to hear and determine any such complaint, and to proceed and make such adjudication thereon as by the said act any 2 justices are empowered to do in the cases of assaults and batteries in England; and the fine or forfeiture to be imposed in any such case shall be payable to the Seamen's Hospital Society: provided always, that such complaint shall be made and prosecuted within 3 months after such alleged assault or battery, or within 3 months after the arrival of the ship at her final port of destination in the U. K., or within 3 months after the respective parties shall be within the jurisdiction of such justices as aforesaid.—§ 44.

*No Seaman to be discharged abroad, nor to be abandoned, or left behind, without Sanction of Consul, &c.*—If any master of a ship belonging to any subject of H. M., shall discharge any person belonging to his ship or crew at any of H. M.'s colonies or plantations, without the previous sanction in writing (to be endorsed on the agreement) of the governor or other officer holding the chief authority there, or of the secretary or other officer duly appointed by the government there in that behalf, or in the absence of such functionaries then of the chief officer of customs resident at or near such port or place, or shall discharge any such person at any other place abroad without the like previous sanction, to be so endorsed on the agreement by H. M.'s minister, consul, or vice-consul there, or in the absence of any such functionary then of 2 respectable merchants resident there, such master shall be guilty of a misdemeanor; or if any master of any such ship shall abandon or leave behind at any such colony or plantation any person belonging to his ship or crew, on the plea or pretence of unfitness or inability to proceed on the voyage, or of desertion or disappearance from the ship, without a previous certificate in writing (to be endorsed on the agreement) of the governor, secretary, or other officer as aforesaid, or in the absence of such functionary then of the chief officer of customs resident at or near such port or place, certifying such unfitness, inability, desertion, or disappearance, or shall abandon or leave behind any person belonging to his ship or crew at any other place abroad, on shore or at sea, upon such plea or pretence, without the like previous certificate of H. M.'s minister, consul, or vice-consul there, or in the absence of any such functionary then of 2 respectable merchants, if there be any such at or within a reasonable distance from the place where the ship shall then be, such master shall be guilty of a misdemeanor; or if any master of any such ship, in case any person belonging to his ship or crew shall desert from the said ship at any place abroad, shall neglect to notify the same in writing to 1 of such functionaries as aforesaid, if there be any such resident at or near the place, and in their absence, if it be out of H. M.'s dominions, then to 3 respectable merchants, if there be such at or near the place, within 24 hours of such desertion, such master shall be guilty of a misdemeanor; and the said functionaries are hereby authorized and required, and the said merchants are authorized, to examine into the grounds of such proposed discharge, or into the plea or pretence of such unfitness, inability, desertion, or disappearance as aforesaid, in a summary way, upon oath (which oath they are hereby respectively authorized to administer), and to grant or refuse such sanction or certificate according to the circumstances, and as it shall appear to them to be just.—§ 46.

*Forcing Seamen on Shore, &c., a Misdemeanor.*—If the master of any ship belonging to any of H. M.'s subjects, or the mate or other officer of such ship, shall wrongfully force on shore and leave behind, or shall otherwise wilfully and wrongfully leave behind, on shore or at sea, in or out of H. M.'s dominions, any person belonging to his ship or crew, before the completion of the voyage for which such person was engaged, or the return of the ship to the U. K., such master, mate or other officer shall be guilty of a misdemeanor; and every misdemeanor mentioned or created by this act shall and may be prosecuted by information at the suit of H. M.'s attorney general, or by indictment or other legal proceeding in any court having criminal jurisdiction in H. M.'s dominions at home or abroad; and the offence may be laid and charged in the said information, indictment, or other legal proceeding to have been committed in the county or place where the offender shall happen to be, who, being convicted thereof, shall be liable to fine or imprisonment, or both, as to the court before whom he is tried shall seem meet; and every court is hereby authorized to issue a commission or commissions for the examination of any witness or witnesses who may be absent or out of the jurisdiction of the court; and at the trial the depositions taken under such commission or commissions, if such witness or witnesses shall be then absent, shall be received in evidence.—§ 47.

*If any of the Crew are left behind, the Proof of Sanction or Authority to be upon the Master.*—If any master shall, contrary to the provisions of this act, discharge, abandon, or leave behind any seaman or other person belonging to the ship or crew, with or without his consent, it shall be incumbent on such master, in any information, indictment, or other proceeding against him, to produce or prove such sanction or respective certificate as aforesaid, or prove the impracticability of obtaining such certificate.—§ 48.

*Seamen when allowed to be left behind, to be paid their Wages.*—Every such master who shall leave any seaman or other person as aforesaid on shore at any such colony, or plantation, or place abroad, under a certificate of his not being in a condition to proceed on the voyage, shall deliver to 1 of the said functionaries, or if there be none such to any 2 respectable merchants there, or if there be but 1 then to such 1 merchant, a just and true account of the wages due to such person, and pay the same either in money or by a bill drawn upon the owner; and if by bill, then such functionaries or merchants are respectively authorized and required, by endorsement on such bill, to certify that the same is drawn for money due on account of seamen's wages, or to that effect; and any master who shall refuse or neglect to deliver a just and true account of such wages, or to pay the amount thereof in money or by bill as aforesaid, shall for every such offence or default forfeit and pay the sum of 10*l.*, and every master who shall deliver a false account of such wages shall for every such offence forfeit and pay the sum of 30*l.*—§ 49.

*Act not to extend to prevent Seamen from entering into the Navy.*—Nothing in this act or in any agreement contained shall prevent any seaman or person belonging to any ship or vessel whatever from entering or being received into the service of H. M., nor shall any such entry be deemed a desertion from the ship or vessel, nor shall such seaman or other person thereby incur any penalty or forfeiture whatever, either of wages, clothes, or effects, or other matter or thing; and no master or owner shall insert or introduce, or permit to be inserted or introduced, into any articles or agreement, any clause, engagement, or stipulation whereby any seaman or other person shall or may incur any forfeiture, or be exposed to loss, in case he shall enter into H. M.'s naval service; and if inserted, the clause, engagement, or stipulation shall be void, and the offender shall thereby incur a penalty of 20*l.*—§ 50.

*Upon entry of Seamen into the Navy from any Ships, they shall be entitled to the immediate delivery up of their clothes, &c.*—When any seaman shall quit any such ship or vessel as aforesaid, in order to enter into H. M.'s naval service, and shall thereupon be actually received into such service, not having previously committed any act amounting to and treated by the master as desertion, he shall be entitled immediately upon such entry to have his register ticket and all his clothes and effects on board such ship or vessel delivered to him, and to receive from the master the proportionate amount of his wages up to the period of such entry, to be paid either in money or by a bill on the owner; all which register ticket, clothes, effects, money, or bill, such master is hereby required to deliver and pay to him accordingly,

under a penalty of 20*l.* for any refusal or neglect, to be recovered with full costs of suit by such seaman ; but in case the master shall have no means of ascertaining the balance, he shall make out and deliver to such seaman a certificate of the period of his service, and the rate of wages he is entitled to, producing at the same time to the commanding or other officer of H. M.'s vessel the agreement with the seaman ; and every such master, upon the delivery of such register ticket, clothes, and effects, and the settlement of such wages in manner herein mentioned, shall receive from the officer in command of the vessel into which the seaman shall have entered a certificate of such entry, endorsed on the agreement, and signed by the said officer, which such officer is hereby required to give. — § 51.

*Power for H. M. to sue for the Amount advanced for the Relief of Seamen left abroad.* — If any person shall be discharged, or wilfully or wrongfully left behind or abandoned, at any place beyond seas, in or out of H. M.'s dominions, by any master, mate, or other officer, contrary to the provisions of this act, and shall become distressed, and be relieved under the provisions of an act passed in the eleventh year of the reign of his late Majesty, King George IV., for amending and consolidating the laws relating to the pay of the royal navy, or any act hereafter to be passed for that purpose, or if any person shall, as principal or agent, engage any subject of H. M. to serve in any vessel belonging to any foreign power, or to the subject of any foreign state, and such last-mentioned person shall become distressed and be relieved as aforesaid, then, in addition to the wages due from such master or owner or person making such engagement, and the penalties to which such master may be liable, H. M. shall be entitled to sue such master or the owner of the ship, or any person who shall have made such engagement as aforesaid, at the discretion of the commissioners for executing the office of Lord High Admiral of the U. K., for all the charges and expenses which shall have been incurred in or for the subsistence, necessary clothing, and conveyance home or burial (should he die abroad or before reaching home) of any such seaman or person relieved as aforesaid, as money paid to the use of such master or owner or other person, who shall have made such engagement as aforesaid, and recover the same, together with full costs of the suit, in the same manner as other debts due to H. M. are recoverable ; and in any proceeding for that purpose proof of the account furnished to the said commissioners by any such functionaries, or by such 2 merchants, or 1 merchant, according to the case, as provided by the said act of the eleventh year of King George IV., shall, together with the proof of payment by the said commissioners, or by the paymaster-general, of the charges incurred on account of any such person, be sufficient evidence that such person was relieved and conveyed home or buried at H. M.'s expense ; and the court in which any proceeding for the recovery of the said money shall be instituted is hereby authorized to issue a commission or commissions for the examination of witnesses, and the depositions taken under such commission or commissions shall be used as evidence. — § 52.

*Ship's Agreement, Indentures, and Assignments of Apprenticeship and Register Tickets, on arrival at a Foreign Port, to be deposited with the Consul, &c.* — If any ship belonging to a subject of H. M. (except packets for passengers in the course of their voyage) shall arrive at any foreign port where there shall be a British consul or vice-consul, or at any port in a British colony, and remain thereat for 48 hours, the master shall, within 48 hours of the ship's arrival, deliver, or cause to be delivered to such consul or vice-consul at such foreign port, or to the collector or comptroller of the customs at such port of a British colony, the agreement or agreements before mentioned, together with an account at the foot of such agreement of all apprentices on board, setting forth their Christian names and surnames at full length, the dates of the registry of their indentures and assignments respectively, and the ports at which and the time when they were registered, and also all indentures and assignments of apprenticeships, and the register tickets of all the crew who shall be subjects of H. M., the whole to be kept by such consul or vice-consul, collector or comptroller, as the case may be, during the ship's stay in such port, and (excepting the register tickets of deserters, which are to be transmitted by such functionaries to the registrar of seamen) to be returned to the master a reasonable time before his departure, with a certificate endorsed on such agreements respectively, stating when the same were respectively delivered and returned, without any fee or charge being made for the same ; and in case it shall appear that the required number of apprentices are not on board, or that the required forms or existing laws have been in any respect neglected or transgressed, such consul or vice-consul, collector, or comptroller, shall make an indorsement to that effect on such agreement, and forthwith transmit a copy of such indorsement, with the fullest information he can collect regarding such neglect or transgression, to the said registrar ; and if any master shall neglect to deliver any agreement, indenture, assignment, or register ticket, or such account as aforesaid, he shall for every such neglect or default forfeit and pay the sum of 50*l.* ; or if any master shall deliver any false or incorrect account, he shall for every such offence forfeit and pay the sum of 20*l.* — § 53.

*No Seaman to be shipped at a Foreign Port without the Sanction of the Consul.* — No seaman shall be shipped at any such foreign port by any such master, except with the sanction of such consul or vice-consul, to be indorsed or certified on the agreement, under a penalty of 20*l.*, to be forfeited by the master for every seaman so shipped. — § 54.

*Masters to produce Agreement, &c. to the Officers of Queen's Ships.* — The master of every ship belonging to any subject of H. M. shall and he is hereby required to produce and show the log book, muster roll of the ship, and the agreement or agreements with his crew, their register tickets, and the indentures of his apprentices, and the assignments thereof, and a list of all the passengers and persons on board, to the captain, commander, or other commissioned officer of any of H. M.'s ships or vessels requiring the production and sight thereof ; and it shall be lawful for any such officer of H. M.'s ships or vessels to muster the crew (including apprentices) of any ship belonging to any such subject. In order to be satisfied that the provisions of this act, and every other act by which the crews of such ships as aforesaid are regulated, and the laws relating to navigation, have been duly kept and complied with ; and if any master shall, upon being required so to do by any such officer, neglect or refuse to produce such log book, muster roll, or agreement, register tickets, indentures, and assignments, and lists of passengers and persons, or any of them, or shall obstruct any officer in the execution of his duty in mustering the said crew, or shall produce any false log-book, muster-roll, or list, he shall for every such offence forfeit and pay the sum of 20*l.* — § 55.

*Consuls, Registrars, and Officers of Customs empowered to require Production of the Agreement, Muster-roll, &c.* — For the better carrying into effect the purposes of this act, it shall be lawful for H. M.'s consuls and vice consuls in foreign ports, and for the said registrar and his assistant, and also for the respective chief officers of the customs at the several ports of the U. K. and of the British possessions abroad, to demand from the master of every ship belonging to a subject of H. M. the production of the log-book, muster-roll of the ship, and such agreements, register tickets, indentures, and assignments as aforesaid, and a list of passengers and persons on board, and to muster the crew (including apprentices) of such ship, and to summon the master to appear before them, and give any explanation they may respectively require regarding the said crew, ship, or documents, for the purpose of ascertaining whether the provisions of this act, and every other act by which the crews of such ships as aforesaid are regulated, and the laws relating to navigation, have been kept and complied with, and to take copies of all or any of such documents ; and if any such master, on such demand being made, shall refuse to produce such log-book, muster-roll, agreements, register-tickets, indentures and assignments, and lists of passengers and persons, or refuse to allow copies to be taken, or shall refuse to permit his crew to be so mustered, or shall refuse to appear and give such explanation as aforesaid, or shall wilfully deceive or mislead the person before whom he shall so appear, he shall for every such neglect, refusal, or offence, forfeit and pay the sum of 20*l.* — § 56.

*Survey of Provisions, &c.* — It shall and may be lawful for any consul or vice-consul of H. M. and for

any collector or comptroller of the customs, upon complaint made by any 3 or more of the crew, to survey and examine, or cause to be surveyed and examined, the provisions, water, and medicines put or supplied on board any ship for the use and consumption of the crew; and if on such survey and examination it shall be found that such provisions, water, or medicines are of a bad quality, or unfit for use, or not appropriate, or there shall not appear to be a sufficient quantity thereof, the surveying officer shall signify the same in writing to the master of the ship; and if such master shall not thereupon provide other fit and proper provisions, water, or medicines in lieu of any which may be signified by the said surveying officer to be of a bad quality, or unfit for use, or not appropriate, or if any such master shall not thereupon procure the requisite quantity of provisions, water, and medicines, or shall use any provisions, water, or medicines which shall have been signified by the surveying officer to be of a bad quality or unfit for use, or not appropriate, he shall in each and every of such cases be guilty of a misdemeanor.—§ 57.

*As to Offences committed at Foreign Ports.*—All offences against the property or person of any subject of H. M., or of any foreigner, which shall be committed in or at any port or place, either ashore or afloat, out of the dominions of H. M. by the master and crew (including apprentices), or any or either of them, belonging to any ship subject to any of the provisions of this act, or who within 3 months before the commission of the offence shall have been the master thereof, or shall have formed part of any such crew, shall be and they are hereby declared to be offences of the same nature respectively, and to be liable to the same punishment respectively, as if they had been committed on the high seas and other places within the jurisdiction of the Admiralty of England, and shall be inquired of, heard, tried, and determined and adjudged in the same manner as if such offences had been committed within such jurisdiction; and when any trial for such offences, or for any misdemeanor against the provisions of this act, shall take place before any justices or judges of oyer and terminer and gaol delivery, it shall be lawful for the court to order and direct the payment of the costs and expences of the prosecution, as in the case of costs and expences of prosecutions for offences committed within the jurisdiction of the Admiralty of England.—§ 58.

*For the safe Custody and Conveyance of Offenders to England.*—Whenever any complaint shall be made to any of H. M.'s consul, or vice-consul, of any such offence or of any offence having been committed at sea by the master and crew (including apprentices, or any or either of them), belonging to any ship subject to any of the provisions of this act, it shall be lawful for any such consul or vice-consul to inquire into the case, upon oath, and at his discretion to cause any offender to be placed under all necessary restraint, so far as it may be in his power, so that he may be sent and conveyed in safe custody to England as soon as practicable, in any vessel of H. M., or of any of her subjects, to be there proceeded against according to law; and the costs and charges of imprisoning any such offender, and of conveying him and the witnesses to England, if not conveyed in the ship to which they respectively belong, shall be considered and deemed as part of the costs of the prosecution, or be paid as costs incurred on account of seafaring subjects of the U. K. left in distress in foreign parts; and all depositions taken before any consul or vice-consul abroad, and certified under his official seal to be the depositions, and that they were taken in the presence of the party accused, shall be admitted in evidence in all courts having criminal jurisdiction, and otherwise, in like manner as depositions taken before any justice of the peace in England now are or may be; and the register ticket of every offender shall be delivered up to H. M.'s consul or vice-consul, as the case may be, and be transmitted by him to the registrar of seamen.—§ 59.

*As to the Conveyance of Offenders and Witnesses to England.*—It shall be lawful for any consul or vice-consul to order a passage to England for any such offender or offenders under necessary restraint, and also for the witnesses; and the master or other person having the charge of any ship or vessel belonging to any subject of H. M. bound for England shall and he is hereby required to receive and afford a passage and subsistence during the voyage to any such offender or offenders and witnesses not exceeding the rate of 1 offender or 2 witnesses for every 100 tons of his ship's burden, and on his ship's arrival in England the master of any vessel belonging to a subject of H. M. shall take or cause to be taken the offender or offenders before a justice of the peace, who shall deal with the matter as in cases of offences committed upon the high seas; and in case the master or other person having the charge of any ship or vessel belonging to any subject of H. M., when required by the consul or vice-consul to receive and afford a passage to any offender or witness, shall not receive and afford such passage, or shall not take or cause to be taken the offender or offenders before a justice of the peace as aforesaid, every such master shall be liable to a penalty of 50*l.*; and the seaman, if acquitted, shall receive his register ticket again upon due application to the registrar of seamen.—§ 60.

*As to Ships belonging to British Colonies.*—This act shall not extend or apply to any ship registered in or belonging to any British colony having a legislative assembly, or to the crew of any such ship, while such ship shall be within the precincts of such colony; but every ship belonging to any colony or possession of H. M., when proceeding from one part of the U. K. to another, or from the U. K. to the islands of Jersey, Guernsey, Alderney, Sark, or Man, or from any port in the U. K. to any port or possession of any foreign power or country, or to any colony to which the ship shall not belong, shall be held to come within the provisions of this act; and this act is hereby extended to the same; and the owner, master, and crew, including apprentices, of such ship so trading as aforesaid, shall be and are hereby declared liable to the provisions of this act as fully as the owner, master, and crew of any British registered ship; and this act and the provisions thereof (except so far as the same relate to agreements, register tickets, and having apprentices,) shall also extend and apply to ships belonging to all of H. M.'s colonies and possessions abroad, wherever otherwise proceeding or trading, and to the owners, masters, and crews of such ships, when any such ship shall be beyond the precincts of the colony or possession to which the ship shall belong; and all certificates and sanctions required by this act to be indorsed on agreements shall, in the case of ships last referred to, be otherwise given in writing where no written agreement exists.—§ 61.

*Recovery of Penalties.*—All penalties and forfeitures imposed by this act, and for the recovery whereof no specific mode is hereinbefore provided, shall and may be recovered, with costs, either in any of H. M.'s courts of record at Westminster, Edinburgh, or Dublin, or in the colonies or territories under the government of the East India Company, at the suit of H. M.'s law officers respectively, or at the suit of any person, by information and summary proceeding before any justice or justices of the peace in and for any part of H. M.'s dominions, or the territories under the government of the East India Company, where or near to the place where the offence shall be committed or the offender shall be; and if proceedings for the recovery of any forfeiture or penalty imposed by this act, or for the recovery of any debt due to H. M., be commenced in any of H. M.'s courts, the court in which such proceedings shall be instituted is hereby authorised to issue a commission or commissions in or out of H. M.'s dominions for the examination of witnesses, and the depositions taken thereunder shall be used and admitted in evidence; and in case of a summary conviction under this act, and the sum imposed as a penalty by the justice or justices shall not be paid, either immediately after the conviction or within such period as the justice or justices shall at the time of the conviction appoint, it shall be lawful for the convicting justice or justices to commit the offender to the common gaol or house of correction, there to be imprisoned only, or to be imprisoned and kept to hard labour, according to the discretion of the justice or justices, for any term not exceeding 6 calendar months, the commitment to be determinable upon payment of the amount and costs; and all penalties and forfeitures mentioned in this act, for which no specific application is hereinbefore provided, shall, when recovered, be paid and applied in manner following: (that is to say,) so much thereof as the court or the convicting justice or justices shall determine, but not exceeding one moiety, shall be paid to the informer or person upon whose discovery or information the same shall be

recovered, and the residue shall be paid to the Seamen's Hospital Society: provided always, that it shall be lawful for the court, before which, or the justice or justices before whom any proceedings shall be instituted for the recovery of any pecuniary penalty imposed by this act, to mitigate or reduce such penalty as to such court or justices respectively shall appear just and reasonable; but no such penalty shall be reduced to less than one-third of its original amount; and it shall be lawful, in the discretion of the said court, or of the said justice or justices hearing the complaint, to order such costs against the informing or complaining party failing to prove the charge as the said court or justice or justices may deem fit, and such costs shall be recoverable in the same manner as penalties under this act, and be paid as such court or justice or justices shall direct: provided also, that all proceedings so to be instituted shall be commenced within 3 years next after the commission of the offence, if the same shall have been committed at or beyond the Cape of Good Hope or Cape Horn, or within 1 year if committed elsewhere, or within 3 calendar months after the return of the offender and the complaining party to the U. K. — § 62.

*Definition of the Terms "Master," "Seaman," "Ship," and "Owner."* — To avoid doubts in the construction of this act, be it enacted, that every person having the charge or command of any ship belonging to any subject of H. M. shall, within the meaning and for the purposes of this act, be deemed and taken to be the master of such ship; and that every person (apprentices excepted) who shall be employed or engaged to serve in any capacity on board the same shall be deemed and taken to be a seaman, within the meaning and for the purposes of this act; and that the term "ship" shall be taken and understood to comprehend every description of vessel navigating on any sea or channel, or waters outside the mouths of rivers, and also every vessel passing beyond the precincts of a port; and that the term "owner" shall be taken and understood to comprehend all the several persons, if more than one, to whom the ship shall belong. — § 63.

*As to Relief to Persons from Asia and Africa becoming distressed in the United Kingdom.* — If any person, being a Malay, Lascar, or native of the territories under the government of the East India Company, or if any Asiatic or African seaman, having been brought to the U. K. on board any ship, shall be found or be in the U. K. in distress for want of food, clothing, or other necessities, it shall and may be lawful for the commissioners for executing the office of Lord High Admiral of the U. K., at their discretion, to supply necessary and reasonable relief to every such person and seaman, and to maintain him until he shall be sent on board some ship for the purpose of being conveyed to or near to the port from which he was shipped, and also to pay, defray, and advance the money necessary to procure every such person and seaman a proper and sufficient passage to such port; and all such sum or sums of money as shall be paid and advanced by or by order of the said commissioners for or on account of such relief, maintenance, and passage, shall be and become a debt due to H. M., and be recoverable as such, with full costs of suit, in the courts of law either in H. M.'s dominions or in the territories under the government of the East India Company, from the owner and master, or either of them, of the ship on board whereof such person or seaman shall have been brought from Asia or Africa; but nothing herein contained shall repeal or annul any other act or acts now in force for the relief and conveyance home of any Asiatic or African person or seaman. — § 64.

**SEAMEN (CORPORATION FOR RELIEF OF).** During the reign of George II. an establishment attached to Greenwich Hospital was erected by the 20 Geo. 2. c. 38. "*for the relief and support of disabled seamen, and the widows and children of such as shall be killed, slain, or drowned in the merchant service.*" To provide a fund for this charitable institution, every person serving in any merchant ship, or other private ship or vessel, belonging to any of his Majesty's subjects in England, (except apprentices under the age of 18, persons employed in boats upon the coasts in taking fish which are brought fresh on shore, or in boats within rivers, or upon boats on the coasts, and pilots (except persons employed in the service of the East India Company, and who were not entitled to the benefit of this institution, being provided for by a fund established by the Company),) paid sixpence per month, which was deducted out of his wages by the master, and paid over to the persons appointed under the authority of the act at the port to which the ship belonged, before she was allowed to clear inwards. For the management and distribution of this fund, a corporation was created, composed chiefly of eminent merchants, with power to purchase lands and erect an hospital, and to provide for seamen rendered incapable of service by sickness, wounds, or other accidental misfortunes, and decrepit and worn out by age, either by receiving them into the hospital, or by pensions: and also to relieve the widows and children of seamen killed or drowned in the merchant service, provided the children are not of the age of 14 years; or if of that age and upwards are incapable of getting a livelihood by reason of lameness, blindness, or other infirmity, and are proper objects of charity; and to make reasonable allowances to those who shall lose an eye or a limb, or be otherwise hurt or maimed, in fighting, defending or working their ships, or doing any other duty in their service, in proportion to their hurt; so far forth as the income and revenues of the charity will extend for these purposes. But no person is to be provided for as a worn-out seaman, who has not been employed in the merchant service five years and paid the contribution. And in providing for this class, a preference is given to such as have served longest and contributed most.

In order to ascertain the times of service and payment of the contribution, the master was obliged to keep a muster-roll of the persons employed in the ship, and had before her departure to deliver a duplicate to the collector or receiver of duties for the seamen's hospital at the port; and, during the voyage, to enter the time and place of discharge, quitting, and desertion, and of receiving other persons on board, and of any hurt, damage, death, or drowning, of which he had also to deliver a duplicate at his return, under the penalty of 20*l.*, to the truth whereof he might be examined upon oath by the collector. And in case any person employed on board any ship or vessel should, in doing his duty on shore or on board, break an arm or a leg, or be otherwise hurt or maimed, he was to be properly relieved until sufficiently recovered to be sent to the place to which the ship belonged.

But, notwithstanding the praiseworthy principle on which this establishment was founded, it was not found to be productive of the benefits, in a practical point of view, that had been anticipated. Perhaps this is to be in part explained by the circumstance of its being attached to Greenwich Hospital, which is peculiarly intended as a retreat for the worn-out and disabled seamen belonging to the Royal Navy. But, however this may be, it appears from accounts laid before parliament, that in 1899, when the merchant seamen paid an annual contribution of 26,137*l.* to the hospital, there was not one of them within its walls, except such as had also served on board line-of-battle ships ! The system was, in consequence, much complained of by the seamen and others interested in the merchant service ; and it is obvious that these complaints were not unfounded, and that the seamen reaped no advantage from the institution at all equivalent to the sacrifice they made for its support.

To obviate this state of things, a new system was introduced in 1835, when it was ordered, by the act 4 & 5 Will. 4. c. 34., that the contribution of 6*d.* per month by seamen in the merchant service to Greenwich Hospital should cease from the 1st of January, 1835 ; and that 20,000*l.* a year should be advanced from the consolidated fund to the Hospital to make good the deficiency caused by the cessation of such contribution.

*New Establishment for Support of Merchant Seamen, &c.* — And to provide still more effectually for the relief and support of maimed and disabled merchant seamen, and of the widows, &c. of those killed or drowned in the merchant service, the act 4 & 5 Will. 4. c. 52. was passed. This act repeals the 20 Geo. 2. c. 38., except in so far as it relates to the establishment of the corporation of the president and governors for the relief of maimed, &c. merchant seamen, and of the widows and children of seamen killed or drowned in the merchant service ; and it also repeals as much of the act 37 Geo. 3. c. 73. as relates to the wages of seamen dying while employed in ships trading to the West Indies. Having thus cleared the way for a new system, it goes on to enact as follows : —

*President and Governors empowered to relieve disabled Seamen, &c.* — The said president and governors and their successors are authorised to provide, in their hospital, for such seamen as are rendered incapable of service by sickness, wounds, or other accidental misfortunes, and those who shall become decrepit or worn out by age, or to allow them certain pensions, or otherwise, as the president and governors deem meet and most for the advantage of the said charity ; and also to relieve the widows and children of such seamen as shall be killed, slain, or drowned in the said service ; and also to relieve the widows and children of seamen dying after having contributed during a term of 21 years to the funds of this corporation, provided such children are not of the age of 14 years, or if of that age or upwards, not capable of getting a livelihood by reason of lameness, blindness, or other infirmities, and are proper objects of charity ; and also to relieve the widows and children (such children being proper objects of charity) of such seamen as at the time of their death shall have been receiving or been entitled to pensions, under and by virtue of this act, from the fund hereby to be created, as decrepit or worn-out seamen : provided that no widow shall be entitled to any benefit under this act, who shall not have been the wife of such seaman or pensioner before he became entitled to relief under its provisions : provided nevertheless, that no seaman shall be entitled to any provision or benefit of this act, on account of any hurt or damage received on board any ship or vessel, unless he produce, or cause to be produced, a certificate of the said hurt or damage from the master, mate, boatswain, and surgeon, or so many of them as were in the vessel to which he belonged at the time of his receiving such hurt or damage, or of the master and 2 of the seamen, if there be no other officer, or in case the master shall die, or be killed or drowned, then of the person who shall take upon him the care of the ship or vessel, and 2 of the seamen on board the same, under their hands and seals, thereby signifying how and in what manner such seaman received such hurt or damage, whether in fighting, defending, working, loading, or unloading the said ship or vessel, where and when he entered, and how long he had served on board the same ; and the parties so signing and sealing such certificate are hereby required to make oath to the truth thereof before some justice of the peace, if given in Great Britain or Ireland, or the chief officer of the customs of the port or place where there is no justice of the peace, or before the British consul or resident in any foreign country where such certificate is executed (who are respectively authorised and required to administer the same without fee or reward) ; and in case of sickness, whereby such seaman shall be rendered incapable of service, a certificate, signed, sealed, and authenticated in like manner, signifying that he was healthy when he entered on board such ship or vessel, and that such sickness was contracted on board the same, or on shore in doing his duty in the service of the ship, and not otherwise, and expressing the time and place he entered on board such ship or vessel, and how long he had served therein ; and that no widow, child, or children of any seaman killed, slain, or drowned in the said service, shall be relieved or entitled to any allowance by virtue of this act unless she or they or some person on her or their behalf, shall produce a certificate, signed, sealed, and authenticated in like manner, signifying how and in what manner such seaman lost his life in the service of the said ship or vessel, the time and place he entered on board, and how long he had served therein ; and that no widow, child, or children of any seaman in the said service shall be entitled to any relief by virtue of this act, unless she or they shall produce, or cause to be produced, a certificate under the hands and seals of the minister and churchwardens and overseers of the poor of the parish, township, or place, or any 2 of them, or under the hands and seals of the minister and overseers of the poor of the parish, township, or place, or any 2 of them, where there are no churchwardens, or if in Scotland, by the minister and elders, or if in Ireland, by a justice of the peace for the parish, township, or place where such widow, &c. shall at the time reside ; and if such widow, &c. are some of the people called Quakers, then by any 3 reputable persons of that persuasion of the parish, township, or place where such widow, &c. have a legal settlement, or do inhabit and reside, to be attested by 2 or more credible witnesses, that such widow was the lawful wife and real widow, and that such child or children was or were the lawful child or children of such deceased seaman as aforesaid, and that such child or children is or are under the age of 14 years, or if of that age or upwards, not capable of getting a livelihood by reason of lameness, blindness, or other infirmities, and is or are proper objects of charity ; and that no seaman shall be provided for by a pension or otherwise, as decrepit or worn out, unless he have served in the merchant service for the space of 5 years, and have during that time paid the monthly duty out of his wages, imposed by the act 30 Geo. 2. c. 38., or by this act required to be henceforward paid and deducted, as the case may happen, for the uses and purposes herein provided. — § 2.

**Forgery of Certificate.**—Forged certificates to be null and void; and those knowingly using them to be liable to the punishment of an incorrigible rogue.—§ 3.

*Courts.*—The president and 5 assistants to make a court, who are to meet weekly. The court may apply the monies of the corporation, and appoint the officers and their salaries, and do all other matters and things necessary.—§ 4.

**All Masters and Owners of Merchant Ships or Vessels, &c. to pay 2s. per Month.** — For effecting the uses and purposes aforesaid, every master or owner of any merchant ship or vessel belonging to any British subject, and every person being a British subject, navigating or working in his own ship or vessel, whether the said ship or vessel be employed on the high sea, or coast of Great Britain or Ireland, or in any port, bay, or creek of the same, shall, from and after the 31st of December, 1834, pay 2s. per month, and proportionably for a lesser time, during the time he or they shall be employed in such merchant ship or vessel, for the uses and purposes aforesaid: provided always, that such masters or owners, or their widows, and children under 14 years of age, or being objects of charity as aforesaid, shall be entitled to a proportionate increase of the pension or allowance by this act provided, according to the difference between the amount of the monthly duty paid by other seamen, mariners, and pilots, in case such master or owner shall have paid the 2s. per month for a period of 5 years or 60 months before any application to the said president and governors for relief under this act; but in case any such master or owner be killed or drowned, or become decrepit, maimed, or disabled, before he or they shall have paid such increased rate of 2s. per month for the full period of 5 years or 60 months as aforesaid, then such masters or owners, or their widows and children, shall be entitled to such smaller pension or allowance as the said president and governors, or the trustees to be appointed, shall think fit. — § 5.

And Seamen, or of the Barges to be appointed, and the other small Ships or Vessels, &c., to pay 1s. per Month.—Every Fish Boat, or other Person carrying on board any such Ship or Vessel, any Merchant ship, other private seaman or other person, shall be liable to hire or be employed in any Merchant ship, or other private ship or vessel, belonging to any British subject, whether employed on the high seas, or the coasts of Great Britain or Ireland, or in any port, bay, or creek of the same, and every pilot employed on board any such ship or vessel, shall, from and after the 31st day of December, 1834, pay 1s. per month, and proportionably for a lesser time, during the time he or they shall be employed in or belong to the said ship or vessel, for the uses and purposes aforesaid: provided that this act shall not be construed to extend to any person employed in taking fish in any boat upon any of the coasts of Great Britain or Ireland, or the islands of Guernsey, Jersey, Alderney, Sark, and Man, nor to any person employed in boats or vessels that trade only from place to place within any river of Great Britain or Ireland.—I &c.

*Masters of Ships to keep in their Hands 1s. per Month out of Seamen's Pay.* — The master, owner, or commander of every such merchant or private ship or vessel is hereby required to deduct out of the wages, shares, or other proutis payable to seamen or other persons employed on board such ship or vessel (other than those hereby excepted), the said monthly duty, and shall pay the same, together with the amount of the duty owing from himself, to such officer or officers as shall be lawfully appointed at any of the out-ports for collecting the said duty of 1s. per month, if such seamen or other persons be entitled to any such wages, shares, or profits. — § 7.

**Appointments of Receivers.**— President and governors, with the concurrence of commissioners of customs, to appoint such persons to receive the monthly duties at the out-ports as they may think fit, making them a reasonable allowance for their trouble, which is not, however, in any case, to exceed 5 per cent. on the gross sum collected.— § 8.

**Muster Roll.**—Every master is to keep a true and faithful muster roll of the crew of his ship, specifying in writing the name of every one of the crew, including apprentices, with the various particulars as to the place of each person's birth, the place and time of his entry to the ship, the place and time of his discharge from or leaving the same, and if he be discharged or left, with the other particulars specified in the subjoined formula, in the event of his being hurt, killed, &c. :—

A List and Account of the Crew (including the Master and Apprentices) of the Ship \_\_\_\_\_ of the Port of \_\_\_\_\_, whereof \_\_\_\_\_ is the Master, at the Period of her Departure from the Port of \_\_\_\_\_ in the United Kingdom, and on her Return to the Port of \_\_\_\_\_ in the United Kingdom, and also of those who have joined the Ship at any Time during the Voyage.

[illegible]

Duplicates of this account are to be delivered to the collectors of the duties at the port where the vessel discharges; and any master or commander neglecting to keep such muster roll, and neglecting or refusing to deliver it to the collectors of the duties, shall forfeit for every such offence the sum of \$100. The collectors are to transmit to the president and governors the duplicates received from such vessels as do not belong to the port of discharge; and the latter are to transmit them to the same. Collectors neglecting to transmit such duplicates incur a penalty of \$5.—§9.

respecting to transship such cargoes and incur any penalty. The master of every ship coming within the provisions of this act shall deduct out of the wages of the seamen thereof the amount of all forfeitures incurred by any such seamen, and every master is hereby required truly to enter the same in a book to be kept by him for that purpose, which shall be signed by the master and the person next in command, both of these certifying that it contains all the forfeitures which have been incurred by the seamen of the ship during the voyage, to the truth whereof the master shall make oath when required before the officer of the president and governors in London, or before their collectors at the out-ports; and the said book, or a true copy thereof, signed and sealed as aforesaid, shall be presented to the collector of the customs at the first port to which the ship shall be delivered to the said officer by the master, together with extracts from the log-book of the entries therein of the causes of the several forfeitures; and every master who shall refuse or neglect to deliver such account shall forfeit and pay the sum of 50*l.* — § 10.

*Examination of Masters, &c.* — Collectors may summon masters of vessels, and examine them upon oath as to the truth of the muster rolls; masters refusing to appear or to answer, to forfeit 10*l.* — § 11.

**Regulations as to Government Ships.**— Secretaries, &c. of public government officers to give in a list of ships and vessels employed in their service, and of the seamen or other persons employed in such ships or vessels; and the treasurer, &c. of such offices are to pay no wages or freight to any master, &c. until he produce an acquittance signed by receiver of duties. — 12.

**Payment of Duties.**—The said duties are to be paid at the port where the ship or vessel is discharged, unless otherwise clearly ascertained; and all officers are interdicted from granting any cockets, transits, &c., or permitting any vessel to go out of any port, unless it appear by the acquaintance of the collectors of the said duties that they are not more than 3 months in arrear of the same : every officer acting contrary to this regulation to forfeit 10*l*. But masters or owners may agree with the trustees and collectors for half-yearly payments. — § 13.

*Prevention of Delay.*—To prevent unnecessary delay, it is enacted, that if masters fail to produce proper acquittance or certificate of agreement, tidewaiters to be continued on board at their expense. — § 14.

*Penalties by this act recoverable before a magistrate.*—§ 15.

*Appointment of Trustees, &c.*—From and after the 1st day of October, 1834, it shall be lawful for the owners, masters, and commanders employed on board ships and vessels belonging to any of the out-ports to assemble and meet at any time and place within the same that shall be appointed by any 5 or more of them, by giving 10 days' previous notice, to be fixed at the custom-house, wharf, quay, or other public place; and such persons, or the greater part of them, being so assembled, are authorised from time to time to nominate and appoint, by an instrument in writing under their hands and seals, 15 persons to be trustees for such out-port, for receiving, collecting, and applying the said duties, which trustees shall continue to act until the 25th day of December, 1835, and until new trustees are nominated and confirmed; and that within 10 days after the 25th day of December in each succeeding year, the owners, masters, &c. at such out-ports shall have power to meet and choose 15 persons to be trustees for the year ensuing, by an instrument in writing under their hands and seals, or the majority of them so assembled, having given previous notice in the manner before directed; which said respective trustees shall continue from time to time until new trustees are nominated, &c. as aforesaid; and the said instrument shall be sent, free of expense, to the president and assistants or committees of the said corporation, who are required to confirm the same under the common seal of the corporation, without fee or reward, within 15 days after the receipt thereof; which trustees when so confirmed (and whereof *five* shall be a quorum) shall have the same powers and authorities to make by-laws, and to revoke or alter the same, and to receive and apply any sums of money which shall be contributed, devised, or bequeathed by any well-disposed persons for the purpose aforesaid, and to appoint receivers and other officers, and to collect, receive, pay, and apply the said duties of 2s. per month and 1s. per month so to be allowed and paid by the seamen or other persons serving on board any ship or vessel belonging to such persons, at such out-ports, according to such rules, orders, and regulations as are or shall be established by virtue and in pursuance of this act, or have been established and continued under the provisions of the act 20 Geo. 2. c. 35, so far as the same are not inconsistent with or repealed or varied by the provisions of this act; and the said receivers and other officers shall have the same powers and authorities as the other receivers and officers appointed in pursuance of this act, and shall be liable to the same penalties and forfeitures: provided always, that if the instrument of trust be not sent to the president and assistant or committees within 60 days after every appointment of trustees, the trust thereby created shall be considered void, and the trustees appointed under it as discharged from the same; and that the president and governors shall have power to appoint a receiver or receivers for the port or place from which such instrument of trust has not been sent, for collecting the forementioned duties and allowances payable at such port or place aforesaid; and the said president and governors shall have power to demand from the outgoing trustees of such port or place an account in writing of the former management of such void trust, and also to demand payment from such trustees of any balance which may at the time of such default be in their hands, who are hereby required to pay the same to such receiver appointed as aforesaid, together with the books of account and other books belonging to such trustees relative to such trust. — § 16.

*Appointments on Default.*—These are not to be revocable within 5 years. — § 17.

*Former Trustees.*—Trustees previously appointed at the several out-ports to be subject to the provisions of this act. — § 18.

*Trustees in Bristol.*—The corporation of the Merchants Venturers of Bristol are appointed trustees for the duties, &c. received there, empowered to hold lands, &c. for the purpose of this act. — § 19.

*Hull Trustees.*—The guild of the Trinity-house of Kingston-upon-Hull are appointed trustees for the duties, &c. received there. — § 20.

*Greenock and Glasgow, &c.*—The ports of Glasgow, Greenock, and Port Glasgow, &c. to be deemed one united port, and masters of ships belonging thereto to elect trustees for collecting duties, &c. — § 21.

*Transmission of Accounts.*—Trustees of out-ports to transmit accounts of the yearly receipts and expenditure to president and governors. — § 22.

*Transmission of Muster Rolls.*—Collectors appointed by trustees or corporations aforesaid are exempted from sending duplicate of muster rolls to the president and assistants. — § 23.

Sections 24. and 25. enact that no seaman shall be entitled to the benefit of this act unless he pays the duty; and that those seamen who have served longest shall be first provided for.

*Maimed Seamen* to be provided for at the port where the accident happens. — § 26.

*Disabled Seamen* having served and paid 5 years, to be provided for where they have contributed most. — § 27.

*Seamen shipwrecked, or made Prisoners by the Enemy,* may be relieved. — § 28.

*Where regular Certificates cannot be obtained, others may be admitted.*—In all cases where the certificates directed to be produced by this act for the purpose of entitling parties to relief and support cannot be obtained, such other certificates as shall be satisfactory to the president and governors or trustees respectively shall be received and allowed, so as to entitle the party producing the same to the pensions or other relief provided by this act. — § 29.

*Wages of deceased Seamen to be paid to the Trustees.*—All sums of money due for wages to any seaman, mariner, or other person engaged on board any British merchant ship in any port or ports in Great Britain and Ireland, who shall have died on board during the voyage, shall, within 3 months after the arrival of such ship in any port of Great Britain and Ireland, be paid to the trustees of the said port appointed in pursuance of this act, or to the receiver or collector or other authorised agent of the said president and governors, where there are no such trustees, and for the use of the executors or administrators of the seaman or other person so dying; and in case no claim shall be made on the said trustees by such executors or administrators on account of such wages, within 1 year after the same have been paid over, then the said trustees shall remit the same to the collector or receiver or other their authorised agent of the president and governors at the port of London, in such manner and times as the said president, &c. shall direct, to and for the use of the executors or administrators of the seaman or other person so dying; and in case no claim shall be made on the said president, &c. by the executors, &c. of such seaman on account of such wages within 1 year after the same shall have been first paid over to their collector, then it shall be lawful for them to direct such wages to be paid over (but without interest for the same) to the widow, or if there be no widow claiming, then to the lawful issue respectively, or such persons as by virtue of the statutes of distribution of intestates' effects shall be entitled to the same; and if any master or commander of any merchant ship neglect or refuse to pay over to the said trustees, or the receiver or collector at the port aforesaid, all such sums of money within the time before limited, he shall forfeit for every such offence double the amount of the sums of money due to any seaman or other person for wages. — § 30.

*Wages, if not demanded in 3 Years* by representatives, to go to the use of the president and governors, or the trustees of the respective ports. — § 31.

*Payment to Seamen's Hospital in London.*—President and governors to pay 5 per cent. out of duties received by them from seamen in the port of London to the Seamen's Hospital Society in that port. — § 32.

*Deductions from Gross Amount.*—It shall be lawful for the receiver or collector or other authorised agent of the president and governors at the port of London, and he is hereby authorised, to deduct and receive from the gross amount of such sums of money as shall be derived from the unclaimed wages of deceased seamen, received by him in respect of such wages, 5 per cent. in satisfaction of all expenses and trouble he may be put to in the receipt, collection, or transmission thereof.

The contributions collected under this act amounted, in 1842, in London and the ports immediately under the management of the president and governors of the society, to 16,936*l.* (of which, however, 2,013*l.* were interest of capital); and a large additional sum was also collected at the out-ports, under the management of the trustees appointed by the above act. It may, therefore, be concluded, that, provided these sums be economically and discreetly managed, they will afford the means of suitably providing for the wants of a large number of disabled merchant seamen, as well as for the wives and children of those who have lost their lives in the service, and will consequently render it less hazardous and more respectable. But in this country, and, we presume, in most others, charitable institutions are usually quite as advantageous to others, as to those for whose behoof they are said to be established; and the institution for the relief of merchant seamen does not certainly appear to form an exception to the ordinary rule. Speaking generally, the seamen are very much dissatisfied with the conduct of this establishment; and really this is not much to be wondered at. The expenses of collection seem to be quite enormous, amounting to from 8 to 10, and sometimes even 15 per cent. and upwards, of the sums received! Probably, however, the reader may be disposed to think that there is no very good reason why this heavy expense, amounting to several thousand pounds a year, should be incurred; and why the collectors and other customs officers should not be made to collect and remit the seamen's contributions in the same way that they collect and remit any portion of the public revenue. But if it be necessary to make an allowance to the officers in question for such duty, it would surely be better that it should be made by adding to the salaries paid them by government, than that they should be allowed to eke them out by encroaching deeply on a pittance saved from the hard-earned wages of sailors as a resource against old age and infirmity. — (For details as to the revenue and expenditure of the corporation for the relief of seamen &c., see the *Parl. Paper* No. 241. Sess. 1843.)

SEAWORTHY, a term applied to a ship, indicating that she is in every respect fit for her voyage.

It is provided in all charterparties, that the vessel chartered shall be "tight, staunch, and strong, well apparelled, furnished with an adequate number of men and mariners, tackle, provisions, &c." If the ship be insufficient in any of these particulars, the owners, though ignorant of the circumstance, will be liable for whatever damage may, in consequence, be done to the goods of the merchant; and if an insurance have been effected upon her, it will be void.

But whether the condition of seaworthiness be expressed in the charterparty or not, it is always implied. "In every contract," said Lord Ellenborough, "between a person holding himself forth as the owner of a lighter or vessel ready to carry goods for hire, and the person putting goods on board, or employing his vessel or lighter for that purpose, it is a term of the contract on the part of the lighterman or carrier *implied by law*, that his vessel is tight, and fit for the purpose for which he offers and holds it forth to the public; it is the immediate foundation and substratum of the contract that it is so: *the law presumes a promise to that effect on the part of the carrier, without any actual proof*; and every reason of sound policy and public convenience requires that it should be so."

Not only must the ship and furniture be sufficient for the voyage, but she must also be furnished with a sufficient number of persons of competent skill and ability to navigate her. And for sailing down rivers, out of harbours, or through roads, &c., where either by usage or the laws of the country a pilot is required, a pilot must be taken on board. But no owner or master of a ship shall be answerable for any loss or damage by reason of no pilot being on board, unless it shall be proved that the want of a pilot shall have arisen from any refusal to take a pilot on board; or from the negligence of the master in not heaving to, for the purpose of taking on board any pilot who shall be ready and offer to take charge of the ship. — (48 *Geo. 3. c. 164.*)

A ship is not seaworthy unless she be provided with all the documents or papers necessary for the manifestation of the ship and cargo. Neither is she seaworthy, if, during war, she be not supplied with the sails required to facilitate her escape from an enemy.

"It is not sufficient to defeat the liability of the owner, that he did not know that the ship was *not* seaworthy, for he ought to have known that she was so at the time he chartered her. The sufficiency of the ship is the foundation of the contract between the parties, and a ship not capable of conveying the goods in a proper state is a failure of the condition precedent to the whole contract. The seaworthiness of the ship is not a question of fraud or good intention, but it is a positive stipulation that the ship shall be so; and therefore, although the owner may himself have been deceived by the ship-builder, repairer, &c., if the vessel be, in fact, un-seaworthy, have an insufficient bottom or unsound timbers, it is a breach of a preliminary condition, and is fatal, as such, to the contract." — (*Holt's Law of Shipping*, 2nd ed. p. 383.)

It is only necessary, to guarantee the owners from loss, that the ship should be sea

worthy at the time of her departure. She may cease to be so in a few hours, and yet they may not be liable. The question to be decided in such cases always is, whether the ship's disability arose from any defect existing in her *before* her departure, or from a cause which occasioned it *afterwards*. But if a ship, within a day or two of her departure, become leaky or foundered at sea, or be obliged to put back, without any visible or adequate cause to produce such an effect — such as the starting of a plank or other accident to which the best ships are liable, and which no human prudence can prevent — the fair presumption is that she was not seaworthy when she sailed; and it will be incumbent on the owners to show that she was seaworthy at that time. They are liable for damage occasioned by every injury arising from any *original defect* in the ship, or from bad stowage; but they are not liable for any injury arising from the act of God, the king's enemies, or the perils of the sea.

It is further to be observed, that how perfect soever a ship may be, yet if, from the nature of her construction, or any other cause, she be incapable of performing the proposed voyage, with the proposed cargo on board, she is not seaworthy. *She must be, in all respects, fit for the trade in which she is meant to be employed.* And it is a wholesome rule, that the owners should be held to a pretty strict proof of this.

It has been already observed, that any defect in point of seaworthiness invalidates an insurance upon a ship. There is not only an express but an implied warranty in every policy, that the ship shall be "tight, staunch, and strong, &c.;" and the reason of this is plain. The insurer undertakes to indemnify the insured against the *extraordinary and unforeseen perils of the sea*; and it would be absurd to suppose that any man would insure against those perils, but in confidence that the ship is in a condition to encounter the *ordinary perils* to which every ship must be exposed in the usual course of the proposed voyage.

By the old law of France it was directed that every merchant ship, before her departure from the place of her outfit, should be surveyed by certain sea officers appointed for that purpose, and reported to be seaworthy, "*en bon état de navigation*;" and that previous to her return, before she took her homeward cargo on board, she should be again surveyed. Valin has shown — (Tit. *Fret*, art. 12.), that very little confidence could be placed in these surveys, which, he tells us, were only made upon the external parts, for the ship was not unsheathed; and, therefore, her internal and hidden defects could not be disclosed. This practice seems now to be abandoned by the French; at least, there is no allusion to it in the *Code de Commerce*. It is, one should think, much better to leave the question as to the seaworthiness of the ship to be ascertained, as in England, after a loss has happened, by an investigation of the true cause of such loss, than to permit so important a question to be decided upon the report of officers without any motive to inquire carefully into her actual condition. A ship may, to all appearance, be perfectly capable of performing a voyage; and it is only after a loss has happened, that her latent defects can be discovered, and her true state at the time of her departure rendered manifest. Indeed, the survey made by the French was not deemed a conclusive proof that the ship was, at her departure, really seaworthy: it merely raised a *presumption* that such was the case; but it was still open to the freighter or the insurer to show the contrary.

For further information upon this point, the reader is referred to the able and excellent works of Chief Justice Abbot (Lord Tenterden) on the *Law of Shipping*, part iii. c. 3.; *Holt on Shipping*, part iii. c. 3.; and of Mr. Serjeant Marshall on *Insurance*, book i. c. 5. § 1.

SEEDS, in commerce, the grains of several species of gramina. Those of most importance are clover seed, flax or linseed, hemp seed, mustard seed, rape seed, tares, &c.; for which, see the respective articles.

SEAGARS, or CIGARS. See TOBACCO.

SENNA (Fr. *Séné*: Ger. *Sennablüter*; It. *Senna*; Sp. *Sen*; Lat. *Cassia Senna*; Arab. *Suna*). The plant (*Cassia Senna*) which yields the leaves known in commerce and the *materia medica* by the name of senna, is an annual, a native of Upper Egypt, and Bernou in Central Africa. The senna, after being collected in Upper Egypt, is packed up in bales, and sent to Boullac, where it is mixed with other leaves, some of which are nearly equally good, while others are very inferior. After being mixed, it is repacked in bales at Alexandria, and sent to Europe. A great deal of senna is imported from Calcutta and Bombay, under the name of East India senna; but it is originally brought to them from Arabia. — (*Thomson's Dispensatory*.) Senna is very extensively used in medicine. The duty of 6d. per lb., with which it was then charged, produced, in 1840, 5,385*l.*, showing that 211,400 lbs. had been entered for consumption. Of the imports in the same year, amounting to 225,779 lbs., none was brought direct from Egypt, but 152,894 lbs., were brought indirectly from her through the Italian ports, and 63,608 lbs. from the East Indies. The duty was reduced, in 1832, from 1*s.* 3d. to 6d. per lb., and in 1842 to 1d. per lb.

**SHAGREEN** (Ger. *Schagrin*; It. *Chagrin*; Rus. *Schagrim Schagren*), a kind of grained leather, used for various purposes in the arts. It is extensively manufactured at Astrakhan in Russia. — (See *Booke's Russia*, vol. iii. p. 403.)

**SHAMMY or CHAMOIS LEATHER** (Ger. *Sämischleder*; Fr. *Chamois*; It. *Camoscio*; Rus. *Smachanii, Koski*), a kind of leather dressed in oil, or tanned, and much esteemed for its softness, pliancy, and capability of bearing soap without hurt. The real shammy is prepared of the skin of the chamois goat. But leather prepared from the skins of the common goat, kid, and sheep, is frequently substituted in its stead.

**SHARKS' FINS**, form a regular article of trade to China; and are collected for this purpose in every country from the eastern shore of Africa to New Guinea. In the Canton Price Currents they are as regularly quoted as tea or opium; and the price of late years has been, according to quality, from 15 to 18 dollars per picul, equal to from 50s. to 60s. per cwt.

**SHAWLS** (Ger. *Schalen*; Fr. *Chals, Chales*; It. *Shavali*; Sp. *Schavalos*), articles of fine wool, silk, or wool and silk, manufactured after the fashion of a large handkerchief, used in female dress. The finest shawls are imported from India, where they are highly esteemed, and cost from 50 to 300 guineas. But the British shawls manufactured at Norwich, Paisley, and particularly Edinburgh, have recently been very much improved; and though still inferior in point of quality to the finest specimens brought from the East, they look well, and are much cheaper. The native shawl manufacture is of very considerable value and importance.

*Cashmere Shawls.*— The shawl manufacture is believed to have originated in the valley of Cashmere, the ancient Caspira, in the north-west of India, between the 34th and 35th degrees of N. latitude, and the 73d and 76th degrees of E. longitude. Though not so flourishing as it once was, the manufacture is still prosecuted in this province to a very considerable extent. The shawls are the very best that are made, possessing unequalled fineness, delicacy, and warmth. They are formed of the inner hair of a variety of the common goat (*capra Arvens*), reared on the cold dry table land of Thibet, elevated from 14,000 to 16,000 feet above the level of the sea. The goat thrives sufficiently well in many other countries; but in the sultry plains of Hindostan it has hardly more hair than a greyhound; and though in higher latitudes the hair is more abundant, it is for the most part shaggy and coarse. It is only in the intensely cold and dry climate of Thibet that it yields the peculiarly soft woolly hair that constitutes the material of the Indian shawl. We do not, therefore, suppose that the efforts to naturalise the shawl-goat in France will turn out well. On the contrary, we believe the chances of success would be about equal were an attempt made to breed beavers in a hot country, without water, or camels in a moist country, free from heat and drought.

The inner or fine wool is covered over and protected by a quantity of long shaggy hair, which is, of course, carefully separated from it before it is manufactured.

The genuine shawl wool has been imported into this country; and the finest Edinburgh and Paisley shawls have been produced from it. But it must be admitted that shawls have nowhere been made that can come, as respects quality, into successful competition with those of Cashmere. The manufacture has been established at Delhi and Lahore for some years; but notwithstanding it is carried on by native Cashmerians, and though the material employed be quite the same, the fabrics are said to want the fineness of those made in Cashmere, and to have a degenerated, coarse appearance. It is difficult to account for this superiority. It has been ascribed to some peculiar quality of the water in the valley of Cashmere; but it is most probably owing to a variety of circumstances, which, though each may appear of little importance, collectively give a character to the manufacture.

The following details as to the manufacture of Cashmere shawls have been extracted from an English paper published at Delhi:—

"The great mart for the wool of which shawls are made, is at Kilghet, which is said to be a dependency of Ladak, and situated 80 days' journey from the northern boundaries of Cashmere. There are 2 kinds of it: that which can be readily dyed is white; the other sort is of an ashy colour, which being with difficulty changed, or, at least, improved by art, is generally woven of its natural hue. About 3 lbs. of either are obtained from a single goat once a year. After the down has been carefully separated from the hairs, it is repeatedly washed with rice starch. This process is reckoned important; and it is to the quality of the water of their valley that the Cashmerians attribute the peculiar and inimitable fineness of the fabrics produced there. At Kilghet the best raw wool is sold for about 1 rupee a pound. By the preparation and washing referred to, it loses  $\frac{1}{4}$ , and the remainder being spun, 3 rupees' weight of the thread is considered worth 1 rupee.

"Shawls are made of various forms, size, and borders, which are wrought separately, with the view of adapting them to the different markets. Those sent to Turkey used to be of the softest and most delicate texture. Carpets and counterpanes are fabricated of the hair or coarser part of the wool. From a variety of causes, among others the destruction of the Janisaries, who dressed much in shawls, the loss of royalty in Cabul, and the ruined finances of Lucknow, it is certain that the demand for this elegant commodity has greatly declined of late years. Under the Mogul emperors, Cashmere found work for 30,000 shawl looms. In the time of the Afghan kings, the number decreased to 18,000. There are now not more than 6,000 employed. I should attribute little of this diminution to the sale of English imitations among the Asiatic nations. When these counterfeits first appeared, the pretty patterns and brilliancy of the colours took the fancy of some, but their great inferiority in the softness and warmth which marks the genuine shawl, soon caused the new article to be neglected.

"The average value of shawls exported from Cashmere amounts annually to 1,800,000 rupees. Runjeet Singh took  $\frac{1}{4}$  in kind as part of the gross revenue of the province, which was about 26 lacs a year. He is said to have sold  $\frac{1}{4}$  of what he thus received, and to have kept the remainder for his own court. Of those disposed of by him and left for sale in the valley, 7 lacs' worth went to Bombay and Western India; 3 to Hindostan, chiefly Oude;  $\frac{1}{4}$  a lac each to Calcutta, Cabul, Herat, and Balk, whence some were carried to neighbouring countries.

"A curious calculation of the successive exactions, from Cashmere to Bombay inclusive, which magnify the price of shawls, is herewith subjoined.

"Actual cost for materials and labour in making a pair of reel shawls:—

	<i>Rs. rs.</i>	<i>Duties on the same.—On sale and importation to</i>	<i>Rs. rs.</i>
Four Furrakabad sorts of wool	12 8	Cashmere	3 14
Cleaning, washing, and spinning	50 0	On the thread	8 4
Dyeing	11 0	While the fabric is in the loom	125 0
Wages to weavers	254 6	Fees to chowdries, brokers, moneys, &c.	35 0
Total	337 14	Total amount of duties in Cashmere	171 18

Duties from Cashmere to Amritsar	-	-	<i>Pd. rs.</i>
From Amritsar to Bombay	-	-	12 6
At Bombay	-	-	3 69
	-	-	70 0
Total from Amritsar to Bombay	-	-	85 12½
Total from Klighet to Bombay, 171 18 and 85 12½	-	-	= 256 30½
Prime cost	-	-	337 14
Proportion of carriage	-	-	0 18
Insurance	-	-	21 0
Total cost	-	-	610 56½

"A pair of such shawls might sell for 500 rupees at Amritsar, and in Bombay for 400. The amount of the imports, and the sums levied by each government, will appear more in relief if stated as they affect a camel-load in its progress. It consists of 14½ cutcha maunds, and contains, at an average, 2,000 shawls of different kinds, valued, on reaching Bombay, at 29,500 Purrubad rupees.

"The government of Lahore exacts *Pd. rs.* 1,564 6; Patalah, 61 0; Bikaner, 43 0; Joudpore, 121 4; Bhownagur, 20 0; — total levied by native princes, 1,909 0; Bombay, 10 per cent. *ad valorem* 2,550 0."

**SHEEP** (Ger. *Schafe*; Fr. *Brebis*, *Bêtes à laine*, *Moutons*; It. *Pecore*; Sp. *Pecora*, *Ovejas*; Rus. *Ovzii*; Lat. *Oves*). Of the domestic animals belonging to Great Britain, sheep, with the exception of horses, and, perhaps, cattle, are by far the most important. They can be reared in situations and upon soils where other animals would not live. They afford a large supply of food, and one of the principal materials of clothing. Wool has long been a staple commodity of this country, and its manufacture employs an immense number of people. "The dressed skin," says Mr. Pennant, "forms different parts of our apparel; and is used for covers of books. The entrails, properly prepared and twisted, serve for strings for various musical instruments. The bones, calcined (like other bones in general), form materials for tests for the refiner. The milk is thicker than that of cows, and consequently yields a greater quantity of butter and cheese; and in some places is so rich, that it will not produce the cheese without a mixture of water to make it part from the whey. The dung is a remarkably rich manure; insomuch that the folding of sheep is become too useful a branch of husbandry for the farmer to neglect. To conclude; whether we consider the advantages that result from this animal to individuals in particular, or to these kingdoms in general, we may, with Columella, consider this, in one sense, as the first of the domestic quadrupeds." \* — (*Pennant's British Zoology*.) The importation of sheep from a foreign country was prohibited until 1842, but they may now be imported on paying a duty on sheep of 3s., and on lambs of 2s. a head. — (See **CATTLE** and **WOOL**.)

The following Table exhibits a compendious view of the more prominent characteristics of the principal breeds of sheep in Great Britain.

Names of Breeds.	Head.	Colour of Face and Legs.	Wool.	Wgt. of Wethrs. Fleeces per Qr.		Age killed.
				Lbs.	Lbs.	Years.
1. Teeswater	-	No horns	Long wool	-	25	2
2. Lincoln	-	No horns	Long wool	-	10	2
3. Dishley, or New Leicester	-	No horns	Long wool (fine)	-	8	2
4. Cotswold	-	No horns	Long wool (fine)	-	9	2
5. Romney Marsh	-	No horns	Long wool (fine)	-	8	2

13. Berks	No horns	Black and white	Long wool	-	7	18
14. South Down	No horns	Speckled and white	Short wool	-	23	18
15. Norfolk	Horned	Black and white	Short wool	-	2	18
16. Herdwick	Horned	Speckled and white	Short wool	-	3	10
17. Cheviot	No horns	White face and legs	Short wool	-	3	16
18. Dun-faced	No horns	Dun face and legs	Short wool	-	14	7
19. Shetland	No horns	Various coloured ditto	Fine cottony	-	14	8
20. Spanish	No horns	White	Short wool (super.)	-	24	14
21. Ditto, cross	No horns	White	Short wool (fine)	-	24	16

For details as to the number of sheep, the quantity and quality of wool, &c., see **WOOL**.

**SHERRY.** See **WINE**.

**SHIPS.** Nautical men apply the term ship to distinguish a vessel having 3 masts, each consisting of a lower mast, a topmast, and top-gallant mast, with their appropriate rigging. In familiar language, it is usually employed to distinguish any large vessel, however rigged: but it is also frequently used as a general designation for all vessels navigated with sails; and it is in this sense that we now employ it.

*Merchant Ships.* — It is hardly possible to divide merchant ships into classes, at least with any degree of precision. Their size, shape, the mode of their rigging, &c. depend not merely on the particular trade for which they are destined, but on the varying tastes and fancies of their owners. The ships employed in the China and India trade are the largest and finest merchantmen belonging to this country; those in the West India trade rank next; then follow the whale ships, those engaged in the trade to the Baltic and Canada, the Mediterranean, the coasting trade, &c.

The reader will find, in the articles **NAVIGATION LAWS**, and **REGISTRY**, an account of the peculiar privileges enjoyed by British ships, the conditions and formalities

\* Post majores quadrupedes ovilli pecoris secunda ratio est; quæ prima sit si ad magnitudinem utilitatis referas. Nam id præcipue contra frigoris violentiam protegit, corporibus nostris liberaliora præbet velamina; et etiam elegantiam mensas jucundis et numerosis dapibus exornat. — (*De Re Rustica*, lib. vii. cap. 2.)

necessary to be observed in order to acquire and preserve those privileges, the mode of transferring property in ships, &c. And in the articles CHARTERPARTY, FREIGHT, MASTER, OWNERS, SEAMEN, SEAWORTHY, &c. the law with respect to ships and ship owners, in their capacity of carriers or public servants, and the reciprocal duties and obligations of the masters and crews, is pretty fully expounded. In this place, therefore, we shall content ourselves with laying before the reader some official statements exhibiting the progress and present magnitude of the mercantile navy of Great Britain.

*Increase of Shipping in England.* — It would be to no purpose, even if our limits permitted to enter into any details with respect to the shipping of England, previously to the Revolution. Those who wish to examine the subject, will find most of the scattered notices of contemporary writers collected by Anderson, in his "Chronological History of Commerce." The mercantile navy of England first became considerable in the reign of Elizabeth; and gradually increased under her successors, James I. and Charles I. At the Restoration, the British shipping cleared outwards amounted to 95,366 tons; but such was the increase of navigation during the reigns of Charles II. and James II., that, at the Revolution, the British ships cleared outwards amounted to 190,533 tons. The war terminated by the treaty of Ryswick, in 1697, checked this progress. But commerce and navigation have steadily advanced, with the exception of 2 short periods during the war of 1739, and the American war, from the beginning of last century down to the present day.

The first really authentic account of the magnitude of the commercial navy of England was obtained in 1701-2, from returns to circular letters of the commissioners of customs, issued in January of that year. From these it appears that there belonged, at the period in question, to all the ports of England and Wales, 3,281 vessels, measuring (or rather estimated to measure) 261,222 tons, and carrying 27,196 men and 5,660 guns. Of these there belonged to

	Vessels.	Tons.	Men.		Vessels.	Tons.	Men.
London	560	84,882	10,065	Hull	115	7,564	187
Bristol	165	17,338	2,356	Whitby	110	8,292	571
Yarmouth	143	9,914	668	Liverpool	102	8,619	1,101
Exeter	121	7,107	978	Scarborough	100	6,860	606

None of the other ports had 100 vessels; and there is some mistake in the returns as to the tonnage assigned to Newcastle and Ipswich. Of the Hull vessels, 80 were at the time laid up, which accounts for the small number of men in that port. — (*Macpherson's Annals of Commerce*, anno 1701.)

The Table No. V. (see p. 1110.) of the British and foreign shipping cleared outwards from 1663 to 1811, both inclusive, is taken from the last edition of *Chalmers's Comparative Estimate*. It gives a very complete view of the progress of the navigation of the country; and from the attention paid by the author to such subjects, and the facilities which his situation in the Board of Trade gave for acquiring authentic information, its accuracy may be depended on.

I. COLONIAL SHIPPING. — A Return of the Number and Tonnage of Sailing and Steam Vessels registered on the 31st of December, 1842, at each of the Ports of the Colonies of the U. Kingdom; distinguishing between those under and those above Fifty Tons Register, and between Sailing and Steam Vessels.

N.B. — The falling off in the number of ships in 1827 is apparent only. The numbers returned in the previous years were those that appeared on the registers. But a ship, when once placed on them, remained till death was produced or heaving been sold to foreign service, or otherwise destroyed: so lost, or otherwise destroyed, a good many ships were at all times on the register, which, as it did not exist. The Registry Act passed in 1826 obliged all owners of ships to register them of new; when, of course, the names of those that had ceased to exist disappeared from the books.

**Ship-building.** — The cost, including the outfit, of the ships built in the U. Kingdom in 1842, may, we believe, be taken, at a rough average, at from 10*l*. to 12*l*. per ton, or 11*l*. at a medium, making their total value 1,058,100*l*. London, Sunderland, Newcastle, Liverpool, Hull, Yarmouth, &c. are the principal building ports. The business has increased with extraordinary rapidity at Sunderland: so much so that while only 60 ships, of the burden of 7,560 tons, were built in that port in 1820, no fewer than 302 ships, of the burden of 87,023 tons, were built in it in 1840. Ships built at London, Liverpool, Bristol, and other western ports, are, however, in higher estimation than those built in the Tyne and the Wear, at least for those branches of trade where the best ships are required. Within the last few years, a great many steam boats have been built in the Clyde.

**State of the Shipping Interest.** — The complaints that were so frequent about 10 years since respecting the distressed state of the shipping interest have recently all but ceased; indeed we incline to think they never had any very good foundation. No doubt their profits are a good deal lower now than they were during the war; but this, if it be really an evil, is one that is not peculiar to them, but equally affects agriculturists, manufacturers, and merchants; and is not even confined to this country, but extends to others. We have already shown the groundlessness of the clamour raised against the reciprocity treaties (and, p. 853.); which, far from being injurious, have been signally beneficial to our commercial and shipping interests. It is believed that owing to the peculiar facilities afforded by means of docks and other devices for the loading and unloading of ships, the employment of steam tugs to bring them quickly to their moorings and to take them to sea, and the greater economy and despatch that now pervade every department of the business, 3 ships are able to perform, and do, in fact, perform, as much work as was done by 4 at the end of the war! There has, in this way, been a virtual addition of 400,000 or 500,000 tons to our mercantile navy. And this surely is enough, without looking at any thing else, to account for the decline in the rate of freight since 1815. The great number of new ships that have been built every year shows that the shipping business is quite as profitable as other departments.

The fall in the value of ships has been a consequence of the still greater fall in the value of the timber, iron, hemp, &c. of which they are constructed; and, however injurious to those who happened to have bought or built ships during the high prices, it is in no ordinary degree advantageous to the public, and to the ship owners that are now engaging in the trade. The discriminating duties on Baltic timber are, in fact, the only real grievance under which our shipping interest labours. Were it not for these, ships might be built cheaper in England than in any other country. Such, however, is the vast importance to a maritime nation like this of being able to build ships at the lowest possible rate, that we think they ought to be allowed to be built in bond, or, if that would be inconvenient, that a drawback should be allowed of the duty on every article used in their construction. A measure of this sort would give to

the shipping of England the same superiority, in point of cheapness, that is now enjoyed by our cottons; and would do more than any thing else to consolidate and strengthen the foundations of our maritime ascendancy. It is entirely owing to the operation of the duties that so many ships are now built in the colonies. They are very inferior to those built in England; and were the latter built in bond, or were the duties on the articles used in their construction drawn back, they would also be the cheapest of the two.

It may be worth mentioning, as illustrative of the singular anomalies that have been allowed to insinuate themselves into our commercial system, that timber may be imported into the Isle of Man, or into any other British possession, without regard to its origin, on payment of an *ad valorem* duty of 10 per cent. It is remarkable that advantage was not earlier taken of this anomaly, to build ships in the Isle of Man. Lastly, however, several vessels have been built in it; and were it in other respects as well situated for ship-building as the other parts of the empire, it would become a principal seat of the business. There can, however, be no good reason why one part of the empire should be permitted to enjoy a peculiar privilege of this sort. An equalisation of the duties should take place, either by extending the British duties to the Isle of Man, or the Manx duties to Britain; — the latter would be the most beneficial way of obviating the anomaly.

**SHIPS (CLASSIFICATION OF, FOR THE PURPOSE OF INSURANCE).** — To insure a ship on right principles, or in such a way that the premium shall be the fair equivalent of the risk, is no easy matter. The risk depends partly on the condition of the ship and the capacity of the master and crew; partly on the nature of the cargo she is to take on board; and partly on the voyage she has to perform. The last two circumstances disclose themselves, and their influence may be appreciated, at least with sufficient accuracy for practical purposes, without any difficulty; but it is far otherwise with the condition of the ship, and the capacity of the master and crew. It is essential to the adjusting of an insurance on fair terms, that these should be known; and it is, at the same time, exceedingly difficult to acquire any accurate information with respect to them.

It is plain that there is but one mode in which any thing satisfactory can be learned with respect to the condition of ships, and that is, by their inspection and examination by persons of competent information as to such matters. To acquire a just character at first, a ship should be repeatedly surveyed while she is being built; and to learn her condition at any subsequent period, some of the planks should be taken off, and her hull and rigging subjected to a thorough examination. This is the only method to be followed if we wish to arrive at results that may be safely depended on. The *age* of a ship should not be altogether overlooked in estimating her condition; but it is not a criterion that, taken by itself, is worth almost any thing. There is the greatest possible difference in the materials of which different ships are built, in the way in which they are built, and in the wear and tear to which they are exposed. Some are so very bad, that they actually go to pieces on their first voyage; others, with difficulty, last for 3, 4, or 7 years; and others, again, run for 10, 15, and even 20 years, and upwards, with but little repair. It may be presumed that the condition of ships built of similar materials, on the same plan, and employed in the same departments of trade, will depend materially on their ages: but a thousand circumstances conspire to defeat this presumption; and it would be ludicrous to suppose that it should apply at all in the case of ships constructed of different materials, and engaged in different lines.

But, notwithstanding the criterion of age is thus really worth less than nothing as a rule by which to judge of a ship's condition, it is almost the only one that was referred to in this country down to a late period. From about the year 1760, or perhaps earlier, down to 1834, ships were arranged, by the underwriters at Lloyd's, in classes marked by the letters A, E, I, and O, and the figures 1, 2, and 3; the former referring to the hull of the ship and the latter to the rigging. A ship marked A 1. was in the highest class; that is, her hull and rigging were both declared to be in the best condition; ships marked E 1. were in the next class; those marked I 1. were in the lowest available class, or that formed of such as were fit only for carrying coals, or other goods not liable to sea damage along the coast; ships marked O were unseaworthy. But to get into the highest class, no examination of the ship, or none worthy of the name, was required. Unless some very flagrant defect were obvious in their construction, all ships were entitled, when new, to be marked in the highest class; and they were entitled, whatever might be their real condition, to stand in it for a certain number of years, varying from 6 to 12, according to the *port* in which they happened to be built! It is not easy to imagine any thing more absurd than such a classification; but the whole extent of the injury arising from it is not immediately obvious. The great majority of merchants and underwriters have not, and could not be expected to have, any personal knowledge of different ships, and have nothing to trust to but the classified accounts. Suppose, now, that two ships were built at the same time in London or any other port; that one was constructed of the best materials, and in the best way, while the other was constructed of the worst materials, and in the most defective manner: these two ships were placed side by side in the class A 1.; the underwriters, seeing them there, were ready, without further inquiry, to insure them at the *same premium*, and the merchants were, for the same reason, quite as willing to

employ the one as the other ! A bounty was thus given on the construction of what have been called *slap-built* ships, or ships of an inferior class. For a half, or, at most, two thirds, of what would be required to construct a good and really sufficient ship, a ship owner got an inferior vessel of an equal burden sent to sea ; and, owing to the matchless absurdity of the system of classification, the inferior was placed in the same rank with the superior ship ; enjoyed all the advantages such distinction could give ; and was, in the public estimation, deemed quite as good and as deserving of employment as the other. This has been a more copious source of shipwreck than all the currents, rocks, and fogs that infest our seas ; but it was not the only one. At the end of a certain number of years, depending (as already stated) on the port where the ship was built, both the vessels referred to above were degraded to the class E ; and yet it might happen, that the superior ship was, when so degraded, better entitled to continue in the class A than the inferior ship was ever to be in it. But even this does not exhaust the whole absurdity of this preposterous scheme ; for, supposing that the superior ship had been so thoroughly repaired as to be as good as the day she came off the stocks, and that the inferior ship had got no repair at all, still they were both placed, side by side, in the class E ! All the annals of all the maritime nations of the world, from the Phœnicians downwards, furnish no example of a more perverse, contradictory, and absurd regulation. That it should have existed amongst us for the greater part of a century, strikingly exemplifies the power of habit to procure toleration for the most destructive practices and errors.

It may be said, perhaps, that, whatever system of classification is adopted, there must be great numbers of inferior vessels ; for, though we did not, foreigners would build them ; and, being consequently able to sail them cheaper, would drive us totally out of all trades in which they could come fairly into competition with us. This is true ; but, provided they be not engaged in the conveyance of passengers, who ever thought of proscribing inferior ships, or of dictating to the ship owner what sort of ships he should build, or to the merchant what sort he should employ ? We do not object to inferior ships, but we do object to the *same character* being given to them that is given to superior ships. This is practising a gross fraud upon the public ; and gives an unfair and unjust advantage to the owners of inferior vessels. The interests of navigation and of humanity imperatively require that ships should be correctly classified ; that those that are not seaworthy should not be classed with those that are, but that the *real state* of each should be distinctly set forth in the register, and be made known to every one. If this be done, the merchant and the underwriter may be safely left to deal with them as they think fit.

In consequence of the laudable exertions of Mr. Marshall and other gentlemen, the attention of the principal merchants, ship owners, underwriters, &c. of the metropolis was some years ago directed to this subject ; and in 1824 a committee, consisting of representatives from these different bodies, was appointed to inquire into and report on it. The committee collected a great deal of valuable evidence ; and laid an able report before a general meeting of merchants, ship owners, &c., on the 1st of June, 1826. We subjoin an extract from this report, which more than bears out all that we have stated : —

" From the absence of all control on the original construction of ships while building, and the impossibility of ascertaining by any inspection, after completion, their real quality, it appears to be indisputably proved, by an almost uniform concurrence of testimony, that the first character, or A 1., is indiscriminately extended to ships differing widely in strength, durability of materials, and all those qualities on which character ought to be dependent ; that many ships to which the first class is assigned are decidedly inferior to others which are placed, from lapse of time alone, in a lower class ; that many become totally unfit for the conveyance of dry cargoes, long before the expiration of the period during which they are entitled, according to the present system, to remain on the first letter, in which they are notwithstanding continued ; that instances are on record of first class ships which have been unfit from their origin for the conveyance of dry cargoes ; and some are declared to have been hardly fit, when new, to proceed to sea with safety. One case is even adduced, in which, from ill construction and insufficiency of fastening in a new ship, her insecurity was predicted, and she actually foundered on her first voyage ; and yet this identical vessel was ranked, according to the indiscriminate system pursued, in the first class.

" Such, as respects new ships, appears by the evidence to be the practical results of a system which, assuming to designate by marks their intrinsic quality, provides no means of actually ascertaining that quality ; but offers, in effect, a *premium for the building of inferior and inefficient ships*, by the inducement it holds forth to fraudulent construction, and by the equality of character it indiscriminately extends to the best and the worst ships built at the same port.

" Nor, your committee regret to have to report, is the evidence of the errors, inconsistencies, and evils arising from the existing system, as applied to old ships, by any means less conclusive. By the *refusal to restore character, in consequence of repairs, however extensive*, the inducement to maintain ships in an efficient state is removed ; whilst, from the absence of all regular provision for stated or periodical examination, their efficiency or inefficiency is rendered dependent upon the varying views, the caprices, or the interests of the proprietors. Hence, though the second character, or E, is declared by the rules of the system to be the designation of ships which, having lost the first character from age, are kept in perfect repair, and appear, on survey, to have no defects, and to be completely calculated to carry dry cargoes with safety, the whole body of evidence distinctly proves that character to be, in very numerous instances, assigned to ships which, from original defect or want of regulate repairs, are *utterly unfit and unsafe for dry cargoes* ; while others, which, from sound constitution or efficient reparation, are pronounced in the evidence to be superior to many new ships, are indiscriminately classed with the actually worthless and

unseaworthy. Hence, too, the employment of ships, after they have passed the period prescribed by a fallacious standard of classification, becomes uncertain, precarious, and difficult; the ship owner is injured; the shipper and underwriter misled; the building of superior ships, capable of long service, is discouraged, and direct inducement is held out to the construction of those of an inferior description; the general character of our mercantile marine is degraded; and it is to be feared that, could the system be traced to its ultimate results, it would be found to be productive of a lamentable loss of property and life."

It may have seemed surprising that, despite the continued complaints of the lowness of freights, and the want of employment for shipping, so many new ships should be annually built. But this was, to a considerable extent at least, occasioned by the system of classification now described. Instead of building a really good and durable ship, the principal object used to be to construct one that should, at farthest, be, as the phrase is, *run off her legs* in about 10 years or thereby; inasmuch as, whatever might be a ship's condition, she was then degraded from the class A 1., and that it was hardly possible, in most departments of trade, to find a merchant to employ, on any thing like reasonable terms, a ship to which these symbols of imaginary excellence were not attached. Hence the ship owner, instead of repairing his 10-years old ship, sold her for what she would fetch, and built a new one. But the person who purchased the ship degraded to E 1. forced her, though at an enormous reduction, into business; so that there were two bad or inferior ships in the field; whereas, under a reasonable system of classification, there would most likely have been only one good ship. The injury that this practice did to the shipping interest is too obvious to require to be pointed out. It has been infinitely more hostile to it than all those reciprocity treaties, and that foreign competition, about which there has been so much unfounded clamour. "If the system of classification were founded on the principle of *intrinsic merit*, if the real efficiency of the ship formed the basis on which character was given, the consequence, in numerous instances, would be, that, instead of supplying the place of those ships that at present lapse from age only into the second class with new ones, the owners would effectually repair the existing ships; so that there would speedily be not only a material improvement in the construction of ships, but a material increase in the amount of tonnage, and a corresponding increase in the rate of freight." — (*Marshall's Statements*, p. 19.)

The conclusive report and exposition referred to above did not produce the consequences that might have been anticipated. Government, for reasons known only to itself, seems to have concluded that this was not a subject with which it should interfere; and it was laid aside for some years more. But the still-increasing amount of shipwreck, and the loss of life and property consequent thereon, again roused the public attention to the subject; and at length the principal merchants, ship owners, and underwriters succeeded in setting on foot machinery by which a classified account of shipping has been obtained, founded on incomparably more correct principles. The public owe much to the able and intelligent individuals who imposed on themselves this difficult and important task. Notwithstanding the obstacles with which they had to contend, they have done much to improve the character of our mercantile marine, and to lessen the disasters incident to a seafaring life.

2. *New System of Classification.* — This new classification is conducted under the direction and superintendence of a committee of merchants, ship owners, and underwriters, established in 1834. The committee establish rules for classifying ships, and appoint, control, and dismiss the surveyors by whom they are inspected and examined. A classified register is annually published, which is gradually made more and more complete; and the expenses attending the institution are defrayed, partly by the fees charged on making an entry in the register, partly by the profits on the sale of the register or book, and partly from voluntary sources. But, as the subject is of the utmost importance to every one interested in commerce and navigation, we think we shall do an acceptable service to our readers, by laying before them the latest statement prefixed by the society to their register. It fully explains their objects, the principles on which they are proceeding, and the means they have adopted for carrying their views into effect.

#### CLASSIFICATION OF SHIPS.

After announcing the formation of the committee, the official statement goes on to say, that —

This society was established in 1834, for the important purpose of obtaining a faithful and accurate classification of the mercantile marine of the U. Kingdom, and of the foreign vessels trading thereto, and for the government of which the following rules and regulations have been from time to time adopted: —

The superintendence of the affairs of this Society to be under the direction of a committee in London, of 24 members, consisting of an equal proportion of merchants, ship owners, and underwriters; and, in addition, the chairman for managing the affairs of Lloyd's, and the chairman of the General Ship Owners' Society for the time being, to be, *ex officio*, members of the committee.

The committee to appoint from their own body, annually, a chairman and deputy chairman, and also a chairman for a sub-committee of classification.

The committee to appoint a sub-committee of classification, to be so regulated that each member of the general committee may, in rotation, take his turn of duty therein throughout the year.

No member of the committee to be permitted to be present on the decision of the classification of any ship of which he is the owner, or wherein he is directly or indirectly interested.

The committee to be empowered to make such by-laws for their own government and proceedings as they may deem requisite, not being inconsistent with the original rules and regulations under which the Society was established; but no new rule or by-law to be introduced, nor any rule or by-law altered, without special notice being given for that purpose at the meeting of the committee next preceding that at which such motion is intended to be made; such notice to be inserted in the summons convening the meeting.

No new rule, or alteration in any existing rule, materially affecting the classification of ships, to take effect until the expiration of six months from the time it shall have been determined upon.

All reports of survey to be made in writing by the surveyors according to the forms prescribed, and submitted for the consideration of the general committee, or of the sub-committee of classification; but the classing assigned by the latter to be subject to confirmation by the general committee.

The reports of the surveyors, and all documents and proceedings relating to the classification of ships, to be carefully preserved, and parties proving themselves to be interested therein to have access thereto under the directions of the chairman or deputy chairman.

Foreign ships, and ships built in the British possessions abroad, to be surveyed on their arrival at a port in the U. Kingdom; but a due regard is to be had to the circumstance of their having been exempted from the supervision, while building, to which all British ships are subjected, and the class to be assigned to them is to be regulated according to their intrinsic quality, and from the best information the committee can obtain.

In every case in which the class assigned to a ship may be proposed to be reduced, notice is to be given in writing to the owner, master, or agent, with an intimation that if the reduction be objected to, the committee will be ready to direct a special survey, on the owner, master, or agent agreeing to pay the expenses attending the same, provided on the said survey there shall appear sufficient ground for the proposed reduction.

When the surveyors consider repairs to be requisite, they are respectfully to communicate the same in writing to the owner, master, or agent, and if such repairs be not entered upon within a reasonable time, a corresponding report is to be made to the committee for their decision thereon.

Parties considering the repairs suggested by the surveyor to be unnecessary or unreasonable, may appeal to the committee, who will direct a special survey to be held; but should the opinion of the surveyor be confirmed by the committee, then the expense of such special survey is to be paid by the party appealing.

The surveyor to the Society not to be permitted (without the special sanction of the committee) to receive any fee, gratuity, or reward whatsoever, for their own use or benefit, for any service performed by them in their capacity of surveyors to this Society, on pain of immediate dismission.

The surveyors will be directed to attend on special surveys of ships under damage, or repairs for restoration, when required by merchants, ship owners, or underwriters; the charge for which is to be regulated according to the nature and extent of the service performed. In all cases, the application for the assistance of the surveyors must be made in writing addressed to the secretary.

*Funds.*—The funds to be under the authority and control of the committee, and a statement of the receipts and expenditure to be annually printed for the information of the subscribers.

The following fees to be charged to the owners of ships prior to their vessels being classed and registered in the book:—

For entering and classing ships, and for entering and classing ships surveyed for continuation, or repaired for restoration.

For each ship	Tons.	£	s.	d.
-	under 100	1	0	0
-	of 100 tons and under 200	2	0	0
-	200	3	0	0
-	300	4	0	0
-	400 and upwards	5	0	0

For registering repairs, or change of owner.

For each ship	Tons.	£	s.	d.
-	under 150	0	10	0
-	of 150 tons and under 200	1	0	0
-	200	2	0	0
-	500 and upwards	3	0	0

For re-classing ships (except when repaired), the charges of which have been ascertained.

For each ship	Tons.	£	s.	d.
-	under 100	0	10	0
-	200 and above	1	0	0

*Special Surveys.*—For special surveys, and where the surveyors to the Society are required by the owners to superintend the building of ships, or repairs for restoration, or otherwise, a charge will be made according to the nature and extent of the service performed.

Certificates of classification of the form No. 6, signed by the chairman of the general committee, or by the chairman of the sub-committee of classification, and countersigned by the secretary, will be granted on application; the charge for which is to be as follows:—

For ships under 200 tons	-	-	5s. each.
Ditto of 200 tons and above	-	-	10s. each.
Rules, each copy	-	-	5s.

#### RULES FOR CLASSIFICATION.

1. The rules and regulations for the classification of ships, which were originally framed after much labour and deliberation, aided by the valuable practical knowledge of the committee of the General Ship Owners' Society, having been revised and considerably modified, the following have been determined upon as well calculated to meet the fair claims of all parties interested in the application, and from the adoption of which it is hoped that considerable benefit and convenience will result.

2. The characters to be assigned to ships to be, as nearly as possible, a correct indication of their real and intrinsic qualities; and to be in all cases fixed (not by the surveyors, but) by the committee, after the consideration of the reports of the surveyors and such other documents as may be submitted to them.

#### FIRST CLASS SHIPS.—First Description of the First Class.

3. Will comprise all ships which have not passed a prescribed age, provided they are kept in a state of complete repair and efficiency; and they will be designated by the letter A.

4. The period to be assigned for their continuing on this class to be determined with reference to the original construction and quality of the vessel, the materials employed, and the mode of building; and their continuance for the time so assigned to depend upon its being shown by occasional surveys (annually if practicable) that their efficiency is duly maintained. It being also desirable, on grounds of national policy and of individual justice, that, after the expiration of the prescribed period, ships should be permitted to remain on the First Description of the First Class, or to be restored thereto for a further limited period, such extension of the period may be granted on the conditions hereinafter shown. (See also Section 34.)

5. New ships are to be surveyed while building by the surveyors to this Society, in the following three stages of their progress:—

*First*, — when the frame be completed.

*Second*, — when the beams are put in, but before the decks are laid, and with at least two strakes of the plank of the ceiling, between the lower deck and the bilge, unwrought, to admit of an examination of the inner surface of the plank at the bottom.

*Third*, — when completed, and, if possible, before the plank be painted or payed.

6. A full statement, agreeably to a form prepared by the society, of the dimensions, scantlings, &c. of all new ships, verified by the builder, is to be transmitted by the surveyor, and to be kept as a record in the office of the society.

#### RULES TO BE OBSERVED IN BUILDING SHIPS.

7. *Timbering*. — The whole of the timber to be of good quality, of the descriptions specified by the Society, as applicable to the several terms of years for which ships so constructed may respectively be appointed to remain on the List of the First Description of the First Class; the stem, stern-post, beams, transoms, aprons, knight heads, hawse timbers, and kelson of ships claiming to stand *twelve years*, to be entirely free from all defects; the frame to be well squared from the first foot-hook heads upwards, and free from sap, and likewise below, unless the timber be proportionably larger than the scantling thereafter described; every alternate set of timbers to be framed and bolted together to the gunwale. The butts of the timbers to be close, and not to be less in thickness than one third of the entire moulding at that place, and to be well chocked, with a butt at each end of the chock.

The Scantlings to be as follows: —

For ships	Tons.	Tons.	Second foothooks, sided, if square at the heads	Inches.	Inches.
	- 150	500	Third foothooks sided and top timbers, if square	6½	10
Room and space to be	Inches.	Inches.	The frame to be moulded at kelson	8	9
Floors sided, if square, and free from sap, to be	- 20	30	The frame to be moulded at floor heads	8	13
not less at the kelson than	- 8	13	Top timbers to be moulded at their heads at the sheersake	7	11
First foothooks, sided, if square, at floor heads	- 7	11		4	5

8. The intermediate dimensions for the scantling of timbers between the floor heads and the gunwale to be regulated in proportion to the distance from the two points. Should the room and space be increased, the siding of the timbers to be increased in proportion.

Deck Beams: —	Tons.	Tons.	To be moulded at the ends (not less than)	Inches.	Inches.
For ships	- 150	500	And to be sided	5	6½
To be moulded in the middle (not less than)	- 7	9		7	10

9. Those at the after end of the ship to be reduced in proportion to their length.

Hold Beams: —	Tons.	Tons.	To be moulded at the ends (not less than)	Inches.	Inches.
For ships	- 150	500	And to be sided	5	13
To be moulded in the middle (not less than)	- 9	15		9	13

10. Those at the after end of the ship to be reduced in proportion to their length.

11. The deck and hold beams to be sufficient in number, and securely fastened to the sides either with lodging knees of iron or wood, or with shelf places; or with a shelf place and knees; or with some other security equal thereto, so as sufficiently to connect the ends of the beams to the sides of the ship; and, in addition, all vessels of 200 tons shall have at least six *vertical* knees on each side of the ship; beams; and for every additional 50 tons measurement above 200 tons, they shall have one more hanging knee on each side. And ships of 400 tons shall likewise have to their hold beams at least eight vertical knees, either as standards or hanging knees (the latter being preferred), and for every additional 100 tons burden, they shall have one more to each side. Every ship exceeding 150 tons to have at least one crutch for the security of the heels of the after timbers of the frame; one pair of pointers in addition to a knee at each end of the wing transom to connect the stern frame with the after body of the ship; and a transom over the heels of the stern timbers properly kneed.

Kel and Kelsons: —	Tons.	Tons.	Main kelson to be sided	Inches.	Inches.
For ships	- 150	500	Main kelson to be moulded	10	14
Keel, sided	- 9	13	The scraps of kelson, where only one kelson, to be 5 ft. 7 in.	10	14
Keel, moulded below the rabbet not less than	- 7	10	But where rider kelsons are added, then they may be 4½ ft. 6 in.		

12. Shifts of timber in ships of 200 tons and upwards, to be not less than 1-7th of the main breadth; and in ships under 200 tons, to be not less than 1-6th of the main breadth.

13. *Plank*. — The outside planking shall be of good quality, of the description prescribed in the Society's Form, No. 2., and shall be clear of all defects.

14. The inside planking to be of the description shown in the Society's Form, No. 3., and free from all fox, druxy, or decayed planks. The whole to be properly shifted and fastened.

15. No butts to be nearer than 5 feet to each other, unless there be a strake wrought between them, and then a distance of 4 feet will be allowed; and no butts to be on the same timber, unless there be 3 strakes between; but vessels under 200 tons will be exempted from the full operation of this rule; and in ships of larger tonnage a literal compliance with it will be dispensed with in cases wherein it may be satisfactorily proved that the departure from the rule is only partial, being confined to the ends of the ship, or the thin planking of the topside, and does not injuriously affect the ship's general strength; but such relaxation will not be sanctioned unless an accurate description of the shifting of the plank be transmitted by the surveyors, to enable the committee to form a proper judgment on the case.

Thickness of plank to be as under: —

For ships	Outside.	Tons.	Tons.	Inside.	Inches.	Inches.
		- 150	500			
Bilge to wales not less than	- 2½	4		Celling below the hold beams	- 2	3
Short heads	- 2½	3		Clamps and bilge planks	- 2½	4
Bilge planks	- 3	4		Upper deck clamps and spiritings	- 2½	3
Bilge to keel	- 2½	3		Twist deck ceiling	- 2	2½
Wales (average)	- 4	5				
Top sides	- 3	3		Deck.		
Shear strake	- 3	3		Upper deck	- 2½	3
Plank sheer	- 2½	4		Wales, if of hard wood	- 4	5
				Do. if of Baltic fir, pitch pine, or red pine	- 5	8

16. *Fastenings*. — The treenails to be of good English or African oak, locust, or other hard wood, but

\* As regards the spacing of beams, it appears to the committee that the following scale would in general meet the convenience of stowage in all trades, as well as secure the requisite transverse strength, so essential to be attended to according to the tonnage of the vessel.

The spaces between the beams (hatchways excepted) not to exceed the following distances: —

Vessels under 200 tons	Hold Beams.	Deck Beams.
Vessels 200 and under 400 tons	- 8 feet	- 4 feet.
Vessels 400 tons and above	- 8 feet and 4 feet alternately, or in that proportion	- 4 feet.
† Whenever copper bolts are substituted for treenails, their sizes should be as follows: —		
For vessels of 150 tons and under 200 tons	- 1 in.	One over every hold beam, and one in all double spaces.
200 ditto	- 1 in.	
500 and above	- 1 in.	

in no case is Baltic or American oak or elm to be used; and all planks above nine inches in width are to be treenailed double and single, except bolts intervene; and if less than that width, then to be treenailed single, and at least one-half of the treenails must go through the ceiling. All ships to be fastened with at least one bolt in every butt, and from the wales to the lower part of the bilges the bolt to be through and clenched. The bilges to have at least one bolt through and clenched in each footbook. The sizes of the bolts required in the several parts hereinafter described, to be not less than as against the same expressed, viz.:—

For ships	Inches.	Tons.		Inches.	Inches.
		150	500		
Heel-knee, and dead wood shaft	1			Bolt-bolts	0 5-8ths 0 3-4ths
Scarp of the keel	{ in No. 6, 1 bolts of }	{ in No. 8, 1 bolts of }		Hold beam bolts	0 7-8ths 1 1-8th
Kelson bolts, one through each floor	0 7-8ths			Deck beam bolts	0 3-4ths 0 7-8ths
Bolts through the bilge and foot waling	0 5-8ths	0 7-8ths		Hooks forward at throat	0 7-8ths 1 1-8th
				Hooks forward at arms	0 3-4ths 1
				Transoms	0 7-8ths 1 1-8th
				The lower pinle of the rudder	2 4 3

17. In every case where the butt and bilge bolts are not through and clenched, one year will be deducted from the period which would otherwise be assigned in the classification of the vessel; but this rule will not be applied to ships built previously to the 1st of January, 1835.

18. The scantlings and dimensions of all intermediate-sized vessels to be proportionately regulated agreeably to a scale adopted by the society, a copy of which is in the hands of each of the surveyors.

19. Ships surveyed while building, in which all the materials required for a 12 years' ship shall have been used, and most of the other requisites for that class fulfilled, but which, from partial deficiencies may not appear to be in all respects entitled to the highest class, although superior to the description of a 10 years' ship, may be marked in the book thus, 11 A; thereby denoting that they are to remain in the first description of the first class 11 years, provided they be kept in a state of efficient repair.

20. Ships surveyed while building, in which the scantling and shifts of the timbers, the thickness and shifts of the planks, and size of fastenings may be the same as are required by the preceding rules, and in which the description of materials prescribed in the annexed tables shall also have been used, but in which the alternate sets of timbers shall not have been framed, nor the chocks wrought with a butt at each end, nor the frame so well squared as is required for 12 years' ships, but which shall be in other respects equal thereto, shall be marked "10 A"; thereby denoting that they are to remain on the list of ships of the first description of the first class 10 years, provided they be kept in a state of efficient repair.

21. In all other cases, ships surveyed while building, and constructed of the materials of good quality, shown in the society's tables, No. 1, 2, and 3, will be classed for the several terms of years respectively appointed for their remaining on the list of ships of the first description of the first class; and in all ships, not built under survey, for which a class exceeding 4 years may be claimed, the timbers shall be required to be completely exposed for examination, by a listing or plank being taken out (if not originally left open) all fore and aft at the footbook heads, and another between decks; and the material of the frame being thus ascertained, shall be reported to the committee, and a class assigned accordingly.

22. Ships built in the U. Kingdom under a roof, and which shall have occupied a period of not less than 12 months in their construction, will have 1 year added to the period prescribed for their continuing on the list of ships of the first description of the first class.

23. Ships built in the U. Kingdom since the year 1834, and not surveyed while building by the surveyors to this society, or where the owners or builders may have refused to permit them to survey and examine the same at the several periods prescribed by the rules, will be subjected to the minutest possible examination previously to assigning the class in which they may be placed according to the regulations; but in all such cases one year will be deducted from the period which would otherwise be allowed, in consequence of their not having been submitted to such survey during their construction. In no case, however, will a higher grade than 10 A be assigned to ships built in the U. Kingdom, which shall not have been surveyed while building.

#### *Continuation of Ships in the First Description of the First Class.*

24. If, on the termination of the period of original designation, or if at any subsequent period within the limitation hereafter mentioned, a ship owner should wish to have his ship remain or be re-placed on the letter A, he is to send a written notice thereof to the committee, who shall then direct a special survey to be held, consisting of not less than 2 competent persons, to be appointed by the committee (one of whom to be surveyor, the exclusive servant of the society); that at such survey the attention of the surveyors shall be particularly directed to the state of the following parts of the ship, viz.—The upper and lower deck bolts, and the outside planks through which they pass; the waterways and beams, so far as they can be examined; the hawse timbers, knight-heads, breast-hooks, and transoms; the floors and kelsons; planking outside, from the light water-mark upwards; the ceiling inside, the frame and inner surface of the outside planking where it may be seen; the decks and comings; and the shear and general form of the ship:—that on these points they shall transmit a detailed report, accompanied by such observations as may occur to them, either from inspection of the ship, or from information of the repairs she may have received. And if from the report of such special survey, the ship shall appear to be in all respects in a sound and efficient state, and to have preserved her original form unaltered, the committee shall continue such ship on the letter A for such further period as they may think fit, not exceeding, however, one-third of the number of years which had been originally assigned. Ships so continued shall be distinguished in the register book by the number of years for which the classing is extended being inserted separately under the number assigned on the original classing, thereby denoting that the ship has been found on survey in such good and efficient order as to entitle her to continue years longer on the list of ships of the first description of the first class. In all cases in which ships are intended to be surveyed under this rule, they must either be docked or laid on the ways. The period assigned for continuation will, upon all occasions, commence from the time the ship may have gone off the letter A, without regard to the date when the survey for this purpose may have been held.

#### *Restoration of Ships to the First Description of the First Class.*

25. *First Rule.*—If, at any time before the expiration of two-thirds of the number of years beyond the period for which ships may have been originally assigned to remain in the first description of the first class, an owner be desirous to have his ship restored to the list of ships of that description, such restoration (on his consenting to the special survey hereinafter described, to be held by two surveyors, and performing the repairs found requisite) will be granted for a period not exceeding two-thirds of the time originally assigned for her remaining as a ship of the first description of the first class, the same to be calculated from the date of such repairs.

26. *Requisites for Restoration.*—All the bolts in the range of each deck to be driven out, and the planks taken out: the upper deck water-ways, and plank shears, and spirketting, and the strake next the water-ways on the lower deck in the midships, to be taken out; the sheathing to be entirely stripped off the bottom; a strake in the upper course of the bottom between the wales and the light-water mark, fore and aft, and a plank in the ceiling at the floor heads on each side, to be taken out; the timbers to be clear, and the hooks forward to be exposed; and in that state the ship to be submitted to a special survey and examination, at which the attention of the surveyors appointed by this society is to be particularly directed to the state of the decks, the remaining plank of the topides, the wales, upper courses, and treenails, and other fastenings; also to the state of the frame, hawse timbers, and knight heads, kelson,

floors, footboards, ceiling, and breast hooks, the rudder in all its parts and hangings; and if, after such examination, the owner should consent to take out all planks, timbers, beams, knees, water-ways, fastenings, and other parts that may be found defective, or objected to, and replace them with materials of the same species, or of equal quality, with those of which the ship was originally constructed, such ships to be entitled to restoration to the first description of the first class for a period proportionate to their real condition and the extent of the repairs performed; or if timber of an inferior description, or second-hand English or African oak or teak be used, then for a period not exceeding that for which such materials would have entitled a new ship to stand A 1. according to the tables, subject in either case to the ship being at all times thereafter kept in a state of efficient repair.

27. *Second Rule.*—If at any age of a vessel, an owner be desirous to have his ship restored to the first description of the first class, such restoration (on his consenting to the special survey hereinafter described, to be held by two surveyors, and performing the repairs thereby found requisite) will be granted for so long a period as may be deemed expedient by the committee, not exceeding, in any case, the term of six years.

28. *Requisites for Restoration.*—The whole of the outside plank of the vessel to be taken off as low as the second footboard heads, and the remainder of the planking, either outside or inside, together with all the decks, to be removed, so as to expose the timbers of the frame entirely to view, and in that state the ship to be submitted to a special survey and examination by the surveyors appointed by this society; and if, after such examination, all timbers, beams, knees, keelsons, transoms, breasthooks, remaining planks, inside or outside, or other parts found to be defective, be replaced with materials of the same species, or of equal quality with those of which the ship was originally constructed, and all the treenails driven out and renewed, such ship may be restored to the first description of the first class. But if timber of an inferior description, or second-hand English or African oak or teak, be used, then for a period not exceeding that for which such materials would have entitled a new ship to stand A 1. according to the tables, subject, in either case, to the ship being at all times thereafter kept in a state of efficient repair.

29. On the same principle of giving to ships which shall be actually proved to be superior of their class and in excellent condition, every advantage that can be extended to them consistently with the maintenance of the general principles on which the society was established, ships which have been restored to the class A, shall be entitled to an extension of the time, subject to the same conditions of survey and examination as are prescribed for ships proposed to be continued in the first description of the first class, at the expiration of the period first assigned to them; but, in like manner, the term of such extended continuance shall be limited to a period not exceeding one third of the number of years for which the ships may respectively have been restored, without any reference whatever to the period originally assigned to them.

#### FIRST CLASS SHIPS.—*Second Description.*

30. Will comprise all ships which having passed the prescribed age, but have not undergone the repairs which would entitle them to be continued in or restored to the first description, or having been continued or restored, and the additional period thus assigned having expired, shall appear on survey to be still in a condition for the safe conveyance of dry and perishable cargoes; and they will be designated by the diphthong *E*: but such of the ships of this class as shall be found on survey to be of superior description, being fit for the safe conveyance of dry and perishable goods to and from all parts of the world, shall be distinguished by inserting their character in red with an asterisk thus prefixed, \**E*. Those ships, however, the original construction of which may not have entitled them to be classed in the first class A for a longer period than five years, will not be allowed the distinction of the asterisk.

31. For the purpose of continuing a ship on the list of ships of the second description of the first class, a careful survey will be required to be made annually, or on the return of the ship from every foreign voyage, by one of the surveyors to this society, who is to state distinctly and separately the actual condition of the upper deck fastenings, water-ways, spiketting, plank-ears, topsides, upper deck with its appendages, lower deck fastenings, wales, counter, plank, and treenails outside to the water's edge, rudder, windlass, and capstan, beams, breast-hooks, and timbers; but if not surveyed within twelve months after entering the second description of the first class, such ship having been during that time in some port in the United Kingdom, the character *E* will be omitted until such survey be held; or as the case may be, she will be allowed to pass into the class *E*. Whenever it shall appear to the surveyors that a vessel classed *E* with the asterisk shall no longer be in a condition to deserve that distinction, notice of the proposal to reduce her shall be given in writing to the owner, master, or agent.

#### *British North American Built Ships, and Fir Ships.*

32. Ships built in the British North American colonies, and all ships, wherever built, the frames of which are composed of fir, of 300 tons and above, shall, in order to entitle them to be classed in the register book of the society, be secured in their bilges by the application of iron riders to cover the joints of the floor and footboard heads, to extend from the height of the hold beams to the floors so as to receive not less than two bolts in a substantial part of the floors; the number of iron riders to be not less than one on every fourth floor on each side from two feet abaft the mainmast to two feet before the foremast, the size thereof to be not less than  $\frac{3}{4}$  inches by  $\frac{1}{2}$  inches at the joints of the timbers for ships of from 300 to 400 tons, and to be increased one quarter of an inch each way, for every 100 tons of increased size. That all such ships shall also be secured by iron hanging knees to the hold beams, one knee to every alternate hold beam, provided the distance of the said beams from each other does not exceed 4 feet 6 inches, and the tonnage be less than 400 tons; but if the distance exceeds 4 feet 6 inches, or the ship is 400 tons and above, then one to every hold beam. The knees to be connected with the riders or not, at the option or convenience of the owners; but if not so connected, the side arms are to be long enough to receive at least four bolts; the whole to be securely bolted with bolts of sufficient size. In cases of refusal, the words "not fastened as per rule, section 62," will be inserted against the vessels' names.

33. All British North American built ships, which have gone or may go off the list of ships of the first description of the first class, or which may be of an age exceeding the period for which they might have had claims to be put upon that class (whether classed or not), shall, as from time to time they come under examination, be subjected to a careful survey, to be made by one of the surveyors to this society; and no further character shall be assigned them unless a survey shall be held as thus prescribed, and a strake of the planking, either inside or outside, be removed from stem to sternpost (on both sides) immediately above the turn of the bilge in midships, and in such range forward and aft as to expose the timbers of the frame to view; that a special report of the state of these timbers, and of the general state and condition of the upper deck fastenings, water-ways, spiketting, plank-ears, topsides, upper deck with its appendages, lower deck fastenings, wales, counter, plank and treenails outside to the water's edge, rudder, windlass, and capstan, beams, and breasthooks, shall be transmitted by the surveyors to the committee; and on the receipt of such report the classing shall take place. If the diphthong character be then assigned, it shall be continued (subject to an annual survey) for a period not exceeding the number of years originally assigned for the ship's remaining in the first description of the first class; at the expiration of which the character will be discontinued, unless a similar survey and examination of the frame be again submitted to.

34. *Second class ships* will comprise all ships which shall be found on survey unfit for carrying dry

cargoes, but perfectly fit for the conveyance, on any voyage, of cargoes not in their nature subject to sea damage; and they will be designated by the letter E.

35. Subject to occasional inspection, at least once in every two years, ships will continue in this class so long as their condition shall, in the opinion of the committee, entitle them thereto.

36. *Third class ships* will comprise ships that are in good condition, and which shall be found on survey fit for the conveyance, on short voyages (not out of Europe), of cargoes in their nature not subject to sea damage; and they will be designated by the letter I.

37. The bottom of every ship is to be caulked once in every five years, unless wood sheathed and felted, and then once in every seven years, except in the case of teak-built ships, upon which a special survey may have been requested, and the surveyors having ascertained, by the removal of a stroke of sheathing fore and aft under the wales, and a stroke at the first footbook head, and by caulkings listings to be cut out at the wood's ends, that such caulking is not required, the same may then be dispensed with. If any ship shall be stripped within the periods above mentioned, her bottom is to be caulked.

38. In all cases in which it shall satisfactorily appear to the surveyors to this society that doubling of sufficient thickness (not less than two inches) properly wrought and fastened, may be allowed as a substitute for the shifting of plank, either in the wales or bottom, the surveyor is to make a special report thereof, together with his reasons, to the committee, who will determine thereon.

39. *Iron fastened Ships.*—All ships (except those built in India) although iron fastened, shall be classed in the same manner as copper fastened ships, so long as they remain unsheathed with copper, provided they are, in all other respects, constructed in accordance with the rules; but when sheathed with copper over the iron fastenings, the words "coppered over iron fastenings" shall be added to the character in the register book, and continued until the ship be thoroughly copper fastened.

40. Ships built in India, although fastened with iron, shall be permitted to be copper sheathed without any mark being placed in the book, provided the bottom be felted or chunamed, and wood-sheathed, and subject to a careful examination of the iron fastenings on every occasion on which the sheathing is stripped off, for which purpose some of the bolts and nails are to be taken out of the lower part of the bottom, and to be seen by the surveyor; but no such ship shall be permitted to continue either on the A or on the E class for a longer period than one-half the number of years beyond the term originally assigned for her remaining on the first description of the first class, unless the bottom shall have been doubled, or the whole of the iron fastenings taken out or properly secured, and the bottom fastened with copper bolts, or trenails, or both.

#### *Ships' Anchors, Cables, and Stores.*

41. All vessels are required to have their masts, spars, and standing rigging in good order, and sails in sufficient number and good condition; and every ship is to be supplied with a good hempen stream cable or tow line, of sufficient size and length, and with at least one good warp; and all vessels are to be provided with anchors of proper weight, and cables of approved quality, in number and length according to the undermentioned scale:—

42. *Anchors.*—All vessels under 300 tons to have at least two bower anchors; and all vessels of 300 tons and above, to be provided with at least three bower anchors.

	Tons.	Tons.	Fathoms.
44. <i>Cables.</i> —All vessels of	and under 150	150 to have at least 150	if chain.
—	150	250	180
—	250	350	200
—	350	500	240
—	500	700	270
—	700 and upwards		300

45. But in all cases where hempen cables are used, then one-sixth more in length will be required.

46. *Boats.*—All vessels under 150 tons to be provided with one good boat; and every vessel of 150 tons and above to be provided with at least two good boats.

47. The efficient state and condition of ships' anchors, cables, and stores will be designated by the figure 1.; and where the same are found insufficient in quantity, or defective in quality, by the figure 2.

48. In all cases in which the application of the rules must necessarily be regulated by the ship's measurement, the least tonnage (whether the result of the old or new method) is to be adopted.

#### *Ships navigated by Steam.*

49. All sea-going vessels navigated by steam shall be required to be surveyed twice in each year, when a character will be assigned to them, according to the report of survey, as regards the classification of the hull and materials of the vessel.

50. That with respect to the boilers and machinery, the owners are required to produce to the surveyors to this society, at the above-directed surveys, a certificate from some competent master engineer, describing their state and condition at those periods; and to which certificate it is desirable there should be added a description of the particulars of the same as far as may be practicable, in the manner and form directed by the Society; to be appended to the report of survey, and delivered to the committee, who will thereupon insert in the register book the letters "M.C.," denoting that the boilers and machinery have been inspected, and certified to be in good order and safe working condition; but if no certificate of their condition be furnished by the owner or master, then no character can be assigned for the machinery.

51. *Hull.*—The surveyors to this society are directed to examine and report the scantling of timbers, plank, and fastenings, and to state where built, and by whom, in the same manner as directed for sailing vessels.

52. *Scantlings.*—The scantlings for a steam vessel under 300 tons register are to be deemed sufficient, if equal to those required by the scale prescribed in the rules of this society for a sailing vessel of two thirds of the registered tonnage of such steam vessel.

53. But for a steam vessel above 300 tons register, the scantlings are to be equal to those required by the scale for a sailing vessel of three fourths of the registered tonnage of such steam vessel.

54. *Floors.*—Where the vessel is not fitted in solid to the floor heads in the engine room, an exception will be specially made against any reduction of the scantling of the floors, which, in such cases, will not be permitted to be upon the reduced scale of two thirds or three fourths of the dimensions for the scantlings of sailing vessels as before stated; but the floors will then be required to be equal to the dimensions set forth in the rules for ships of the actual registered tonnage of the steam vessel.

55. The surveyors are required to report the number, size, length, fastenings, and mode of arrangement of the engine and boiler sleepers, and the description of timber of which they are composed, and whether diagonally braced with wood or iron, and to what extent; the length, size, and fastening of self-pieces and paddle beams; and whether the vessel be constructed with spencings, and how they are formed; and to give the length and shifting of the plank outside and inside.

56. *Materials and Stores.*—The surveyors are to examine and report the number and description of the masts, sails, anchors, cables, hawsers, warps, and boats, as directed to be done for sailing vessels; but the anchors and cables will not be required to exceed in weight and length those of a sailing vessel of two thirds of the registered tonnage of the steam vessel.

57. The surveyors are to be particular in examining and reporting the condition of the boats of all vessels employed in carrying passengers.

The committee having, in consequence of various applications, given their serious attention to the

peculiarities in the construction of steam vessels, came to a resolution, on the 26th May, 1842, to allow of the following relaxation in favour of vessels of that class, subject to the conditions of survey hereinafter mentioned.

"That fir (to be either pitch pine, Baltic red fir, or American red pine), larch, hackmatack, or juniper, may be used for upper deck beams, to an extent not exceeding one-half the number of beams required, according to the vessel's tonnage.

"That the same materials may be used in the outside planking from the first foothook heads upwards, excepting for the wales, sheartrakes, and plankshears.

"That the same materials be likewise allowed to be used in the inside planking, excepting for the bilge planks, shelf pieces and stringers, and clamps.

"That steam vessels built in all other respects in conformity with the annexed tables shall be classed for the terms of years therein respectively prescribed, subject to the following conditions:—

"That the rule requiring a survey 'twice a year' be rigidly enforced, and that whenever the boilers are taken out, the vessel shall be subjected to a particular and special survey, in order to ascertain her general condition, and particularly the state of the fir, or other materials herein allowed to be used.

"That unless such surveys be held, the characters which may have been assigned to steam vessels shall be struck out annually on reprinting the register book."

In pursuance of this resolution, the characters of such steam vessels as have not been surveyed as prescribed, have this year been struck out accordingly.

By order of the Committee.

CHARLES GRAHAM, *Secretary*.

No. 2, *White Lion Court, Cornhill*,  
London, 1st July, 1843.

#### *Iron Ships.*

Notice is hereby given, that in pursuance of a resolution this day passed by the committee for managing the affairs of Lloyd's Register of British and Foreign Shipping, the character of A 1. will in future be granted to such ships as shall be constructed of iron under the survey of the surveyors to this society, and be reported, on their completion, to have been built of good and substantial materials, and with good workmanship.

Iron ships already built, upon being subject to a careful and minute survey, and being reported to be in a high state of repair and efficiency, will also be classed as above; but if not so reported, they will be allowed such other character as, on a due consideration of their respective claims, they may be found to deserve.

In every instance in which a character may be assigned to ships built of iron, it must be understood that such ships must be subjected to a careful annual survey, and that the continuance or otherwise of the character assigned will depend entirely upon the result of this survey. Vessels not surveyed annually will lose their character.

By order of the Committee.

CHARLES GRAHAM, *Secretary*.

2, *White Lion Court, Cornhill*,  
4th January, 1844.

No one can question the advantages that will result from carrying a plan of this sort completely into execution, or those that have already been derived from the extent to which it has been carried. We confess, however, that we incline to think that the classification of ships should be effected by government agents. It is invidious to impose on one set of merchants and ship owners the task of deciding upon the condition of the ships or other property belonging to others; and, though we have every confidence in the integrity of the gentlemen composing the committee, the most honourable men are liable to be influenced by an *esprit du corps*, and by insensible biases. We, therefore, cannot help thinking that the scheme would have a much better chance of success, and that the classification would be more likely to be correct, were it managed by individuals nowise connected with business. The surveyors, on whose capacity and honesty the whole scheme principally depends, should be quite independent of the good or ill will of those on whose property they have to report. But can that be said to be the case at present? and can it be fairly presumed that merchants or ship owners will deal by the property of their friends and neighbours as it might be dealt with by officers appointed by, and responsible only to, government? We apprehend that both those questions must be answered in the negative; and hence our conviction that this is a matter in which government should interfere. No one can doubt that it is bound to do every thing in its power to promote the safety of navigation, and to preserve the lives of our seamen. In this view it erects lighthouses, and prescribes regulations as to pilotage, &c. But, how indispensable soever, these are not more essential to the interests of navigation than a proper classification of ships; and, if other means should fail fully to effect this desirable purpose, government will certainly neglect a most important duty if it do not interpose. In the mean time, however, the mercantile and shipping interests are deeply indebted to the gentlemen who have done so much to obviate the abuses of the old system. — (For a further discussion of this important question, see the article on the Frequency of Shipwrecks in the 122d number of the *Edinburgh Review*; see also the *Reports of the Commons Committees of 1836 and 1843, on Shipwreck*.)

SHIPS' PAPERS, the papers or documents required for the manifestation of the property of the ship and cargo, &c. They are of 2 sorts; viz. 1st, those required by the law of a particular country—as the certificate of registry, licence, charterparty, bills of lading, bill of health, &c.—(see these titles)—required by the law of England to be on board British ships; and, 2dly, those required by the law of nations to be on board neutral ships, to vindicate their title to that character. Mr. Serjeant Marshall, following Hubner (*De la Saisie des Bâtimens Neutres*, i. 241—252.), has given the following description of the latter class of documents:—

1. *The Passport, Sea Brief, or Sea Letter.*—This is a permission from the neutral state to the captain or master of the ship, to proceed on the voyage proposed, and usually contains his name and residence; the name, property, description, tonnage, and destination of the ship; the nature and quantity of the cargo, the place whence it comes, and its destination; with such other matters as the practice of the place requires. This document is indispensably necessary for the safety of every neutral ship. Hubner says that it is the only paper rigorously insisted on by the Barbary corsairs; by the production of which alone their friends are protected from insult.

2. *The Proofs of Property.*—These ought to show that the ship really belongs to the subjects of a neutral state. If she appear to either belligerent to have been built in the enemy's country, proof is generally required that she was purchased by the neutral before, or captured and legally condemned and sold to the neutral after, the declaration of war; and in the latter case the *bill of sale*, properly authenticated, ought to be produced. Hubner admits that these proofs are so essential to every neutral vessel, for the prevention of frauds, that such as sail without them have no reason to complain if they be interrupted in their voyages, and their neutrality disputed.

3. *The Muster Roll.*—This, which the French call *rôle d'équipage*, contains the names, ages, quality, place of residence, and, above all, the *place of birth*, of every person of the ship's company. This document is of great use in ascertaining a ship's neutrality. It must naturally excite a strong suspicion, if the majority of the crew be found to consist of foreigners; still more, if they be natives of the enemy's country. — (See *SEAMEN*.)

4. *The Charterparty.*—Where the ship is chartered, this instrument serves to authenticate many of the facts on which the truth of her neutrality must rest, and should therefore be always found on board chartered ships.

5. *The Bills of Lading.*—By these the captain acknowledges the receipt of the goods specified therein, and promises to deliver them to the consignee or his order. Of these there are usually several duplicates; one of which is kept by the captain, one by the shipper of the goods, and one transmitted to the consignee. This instrument, being only the evidence of a private transaction between the owner of the goods and the captain, does not carry with it the same degree of authenticity as the charterparty.

6. *The Invoices.*—These contain the particulars and prices of each parcel of goods, with the amount of the freight, duties, and other charges thereon, which are usually transmitted from the shippers to their factors or consignees. These invoices prove by whom the goods were shipped, and to whom consigned. They carry with them, however, but little authenticity; being easily fabricated where fraud is intended.

7. *The Log Book, or Ship's Journal.*—This contains a minute account of the ship's course, with a short history of every occurrence during the voyage. If this be faithfully kept, it will throw great light on the question of neutrality; if it be in any respect fabricated, the fraud may in general be easily detected.

8. *The Bill of Health.*—This is a certificate, properly authenticated, that the ship comes from a place where no contagious distemper prevails; and that none of the crew, at the time of her departure, were infected with any such disorder. It is generally found on board ships coming from the Levant, or from the coast of Barbary, where the plague so frequently prevails.

A ship using false or simulated papers is liable to confiscation. — (Marshall on Insurance, book i. c. 9. § 6.)

SHOES (Du. *Schoenen*; Fr. *Souliers*; Ger. *Schuhe*; It. *Scarpe*; Rus. *Baschmaki*; Sp. *Zapatos*), articles of clothing that are universally worn, and require no description. The shoe manufacture is of great value and importance. The finest sort of shoes is made in London; but the manufacture is carried on upon the largest scale in Northamptonshire and Staffordshire. The London warehouses derive considerable supplies from Nantwich, Congleton, and Sandbach, in Cheshire. During the late war, the contractor for shoes generally furnished about 600,000 pairs annually. — (For an estimate of the value of the shoes annually manufactured in Britain, see *LEATHER*.)

SHUMAC OR SUMACH (Ger. *Schmack*, *Sumach*; Fr. *Sumac*, *Rouvre*, *Roux*; It. *Sonmaco*; Sp. *Zumague*; Rus. *Sumak*). Common shumac (*Rhus Coriaria*) is a shrub that grows naturally in Syria, Palestine, Spain, and Portugal. That which is cultivated in Italy, and is improperly called *young fustic*, is the *Rhus Cotinus*. It is cultivated with great care: its shoots are cut down every year quite to the root; and, after being dried, they are chipped or reduced to powder by a mill, and thus prepared for the purposes of dyeing and tanning. The shumac cultivated in the neighbourhood of Montpellier is called *rédoul* or *roudo*. Shumac may be considered of good quality when its odour is strong, colour of a lively green, is well ground, and free from stalks. Italian shumac is used in dyeing a full high yellow, approaching to the orange, upon wool or cloth; but the colour is fugitive. Common shumac is useful for drab and dove colours in calico printing, and is also capable of dyeing black. — (Bancroft on Colours, vol. ii. p. 100.)

Of 187,029 cwts. of shumac imported in 1840, no fewer than 182,097 cwts. were from Italy. The entries for consumption in 1842 amounted to 184,687 cwts. The price of shumac varies (duty 1s. per ton paid) from 7s. to 12s. a cwt.

Shumac, the produce of Europe, may not be imported for home consumption except in British ships, or in ships of the country of which it is the produce, or from which it is imported, under penalty of confiscation, and forfeiture of 100l. by the master of the ship. — (3 & 4 Will. 4. c. 84. §§ 2. and 23.)

**SIERRA LEONE**, an English settlement, near the mouth of the river of the same name, on the west coast of Africa, lat. 8° 30' N., lon. 13° 5' W.

*Objects of the Colony.* — This colony was founded partly as a commercial establishment, but more from motives of humanity. It was intended to consist principally of free blacks, who, being instructed in the Christian religion, and in the arts of Europe, should become, as it were, a focus whence civilisation might be diffused among the surrounding tribes. About 1,200 free negroes, who, having joined the royal standard in the American war, were obliged, at the termination of that contest, to take refuge in Nova Scotia, were conveyed thither in 1792: to these were afterwards added the Maroons from Jamaica; and, since the legal abolition of the slave trade, the negroes taken in the captured vessels, and liberated by the mixed commission courts, have been carried to the colony. The total population of the colony in 1839 amounted to about 42,000, all black or coloured, with the exception of about 100 whites.

*Success of the Efforts to civilise the Blacks.* — Great efforts have been made to introduce order and industrious habits amongst these persons. We are sorry, however, to be obliged to add, that these efforts, though prosecuted at an enormous expense of blood and treasure, have been signally unsuccessful. There is, no doubt, some discrepancy in the accounts of the progress made by the blacks. It is, however, sufficiently clear, that it has been very inconsiderable, and we do not think that any other result could be rationally anticipated. Their laziness has been loudly complained of, but without reason. Men are not industrious without a motive; and most of those motives that stimulate all classes in colder climates to engage in laborious employments, are unknown to the indolent inhabitants of this burning region, where clothing is of little importance, where sufficient supplies of food may be obtained with comparatively little exertion, and where more than half the necessities and conveniences of Europeans would be positive incumbrances. And had it been otherwise, what progress could a colony be expected to make, into which there have been annually imported thousands of liberated negroes, most of whom are barbarians in the lowest stage of civilisation?

*Influence of the Colony upon the illicit Slave Trade.* — As a means of checking the prevalence of the illicit slave trade, the establishment of a colony at Sierra Leone has been worse than useless. That trade is principally carried on with the countries round the bight of Biafra and the bight of Benin, many hundred miles distant from Sierra Leone; and the mortality in the captured ships during their voyage to the latter is often very great. The truth is that this traffic will never be effectually put down otherwise than by the great powers declaring it to be piracy, and treating those engaged in it, wherever and by whomsoever they may be found, as sea robbers or pirates. Such a declaration would be quite conformable to the spirit of the declaration put forth by the Congress of Vienna in 1824. — (See SLAVE TRADE.) But the jealousies with respect to the right of visitation and search are so very great, that it is exceedingly doubtful whether the maritime powers will ever be brought to concur in any declaration of the kind now alluded to; unless, however, something of this sort be done, we apprehend there are but slender grounds for supposing that the trade will be speedily suppressed.

*Climate of Sierra Leone.* — The soil in the vicinity of Sierra Leone seems to be but of indifferent fertility, and the climate is about the most destructive that can be imagined. The mortality among the Africans sent to it seems unusually great; and amongst the whites it is quite excessive. Much as we desire the improvement of the blacks, we protest against its being attempted by sending our countrymen to certain destruction in this most pestiferous of all pestiferous places. It would seem, too, that it is quite unnecessary, and that blacks may be employed to fill the official situations in the colony. But if otherwise, it should be unconditionally abandoned.

*Commerce of Sierra Leone, and the West Coast of Africa.* — Commercially considered, Sierra Leone appears to quite as little advantage as in other points of view. We import from it about 13,000 loads of teak wood a year, with small quantities of camwood, ivory, palm oil, hides, gums, and a few other articles; but their value is inconsiderable, amounting to not more than from 60,000l. to 100,000l. a year. The great article of import from the coast of Africa is palma oil, and of this we imported, in 1841, 397,076 cwt., of which only 9,336 cwt. came from Sierra Leone. The great bulk of it was furnished by the coast to the west and south of the Rio Volta, many hundred miles from Sierra Leone. We doubt, indeed, whether the commerce with the western coast of Africa will ever be of much importance. The condition of the natives would require to be very much changed before they can become considerable consumers of European manufactures. It is singular, that speculative persons in this country should be so

much bent on prosecuting, without regard to expense, a trade with barbarous uncivilised hordes, while they contribute to the neglect or oppression of the incomparably more extensive and beneficial intercourse we might carry on with the opulent and civilised nations in our immediate vicinity. The equalisation of the duties on Canadian and Baltic timber, and the reduction of the oppressive duties on foreign sugar and brandy, and on French silks and gloves, would do ten times more to extend our commerce, than the discovery of 50 navigable rivers, and the possession of as many forts, on the African coast. If, however, an establishment be really required for the advantageous prosecution of the trade to Western Africa, it is abundantly obvious that it should be placed much further to the south than Sierra Leone. The island of Fernando Po has been suggested for this purpose; but, after the dear-bought experience we have already had, it is to be hoped that nothing will be done with respect to it without mature consideration.

Account of the Quantities of the Articles Imported into the U. Kingdom from the West Coast of Africa in 1841, specifying the Districts whence they were imported, and the Quantities brought from each.

Articles.	Senegal and the Coast from Morocco to the River Gambia exclusive.	Sierra Leone and the Coast from the River Gambia, inclusive, to the River Mesurado.	Windward Coast from the River Mesurado to Cape Apollonia.	Cape Coast Castle and the Field Coast, from Cape Apollonia to the Rio Volta.	Coast from the Volta to the Cape of Good Hope. The total value of the exports of British produce and manufacture to the west coast of Africa, amounted in 1841, to 410,798*l.*; of which cotton goods made 183,622*l.*, hardware and cutlery, 19,378*l.*, brass and copper manufactures, 16,452*l.*, &c. The exports to Sierra Leone did not amount to  $\frac{1}{10}$ th part of the whole, being only 96,092*l.*

*Expenses incurred on account of Sierra Leone.* — The pecuniary expense occasioned by this colony, and our unsuccessful efforts to suppress the foreign slave trade, have been altogether enormous. Mr. Keith Douglas is reported to have stated, in his place in the House of Commons, in July, 1831, that "down to the year 1824, the civil expenses of Sierra Leone amounted to 2,268,000*l.*; and that the same expenses had amounted, from 1824 to 1830, to 1,082,000*l.* The naval expenses, from 1807 to 1824, had been 1,630,000*l.* The payments to Spain and Portugal, to induce them to relinquish the slave trade, amounted to 1,230,000*l.* The expenses on account of captured slaves were 533,092*l.* The expenses incurred on account of the mixed commission courts were 198,000*l.* Altogether, this establishment had cost the country nearly 8,000,000*l.*!"

The prodigality of this expenditure is unmatched, except by its uselessness. It is doubtful whether it has prevented a single African from being dragged into slavery, or conferred the smallest real advantage on Africa. The kings of Spain and Portugal turned their spurious humanity to good account. But there is now, we believe, an end of all attempts to bribe such monarchs to respect the treaties into which they have entered.

For further details with respect to Sierra Leone, and the trade of Western Africa, see the *Report of the Select Committee of the House of Commons, on the West Coast of Africa*, Sess. 1842.

**SILK** (Lat. *Sericum*, from *Seres*, the supposed ancient name of the Chinese), a fine glossy thread or filament spun by various species of caterpillars or larvæ of the *phalena* genus. Of these, the *Phalena atlas* produces the greatest quantity: but the *Phalena bombyx* is that commonly employed for this purpose in Europe. The silkworm, in its caterpillar state, which may be considered as the first stage of its existence, after acquiring its full growth (about 3 inches in length), proceeds to enclose itself in an oval-shaped ball, or cocoon, which is formed by an exceedingly slender and long filament of fine yellow silk, emitted from the stomach of the insect preparatory to its assuming the shape of the chrysalis or moth. In this latter stage, after emancipating itself from its silken prison, it seeks its mate, which has undergone a similar transformation; and

in 2 or 3 days afterwards, the female having deposited her eggs (from 300 to 500 in number), both insects terminate their existence. According to Reaumur, the *phalena* is not the only insect that affords this material,—several species of the *aranea*, or spider, enclose their eggs in very fine silk.

*Raw Silk* is produced by the operation of winding off, at the same time, several of the balls or cocoons (which are immersed in hot water, to soften the natural gum on the filament) on a common reel, thereby forming one smooth even thread. When the skein is dry, it is taken from the reel and made up into hanks; but before it is fit for weaving, and in order to enable it to undergo the process of dyeing, without furring up or separating the fibres, it is converted into one of three forms; viz. *singles*, *tram*, or *organzine*.

*Singles* (a collective noun) is formed of *one* of the reeled threads, being twisted, in order to give it strength and firmness.

*Tram* is formed of 2 or more threads twisted together. In this state it is commonly used in weaving, as the *shoot* or *weft*.

*Thrown Silk* is formed of 2, 3, or more singles, according to the substance required, being twisted together in a *contrary* direction to that in which the singles of which it is composed are twisted. This process is termed *organzining*; and the silk so twisted, *organzine*. The art of throwing was originally confined to Italy, where it was kept a secret for a long period. Stow says it was known in this country since the 5th of Queen Elizabeth, "when it was gained from the strangers;" and in that year (1562), the silk throwsters of the metropolis were united into a fellowship. They were incorporated in the year 1629; but the art continued to be very imperfect in England until 1719. — (See *post*.)

1. *Historical Sketch of the Manufacture*. — The art of rearing silkworms, of unravelling the threads spun by them, and manufacturing the latter into articles of dress and ornament, seems to have been first practised by the Chinese. Virgil is the earliest of the Roman writers who has been supposed to allude to the production of silk in China, and the terms he employs show how little was then known at Rome of the real nature of the article: —

Velleraque ut foliis depectant tenuia Seres. — (*Georg.* lib. ii. lin. 121.)

But it may be doubted whether Virgil do not, in this line, refer to cotton rather than silk. Pliny, however, has distinctly described the formation of silk by the *bombyx*. — (*Hist. Nat.* lib. xi. c. 17.) It is uncertain when it first began to be introduced at Rome: but it was most probably in the age of Pompey and Julius Cæsar; the latter of whom displayed a profusion of silks in some of the magnificent theatrical spectacles with which he sought to conciliate and amuse the people. Owing principally, no doubt, to the great distance of China from Rome, and to the difficulties in the way of the intercourse with that country, which was carried on by land in caravans whose route lay through the Persian empire, and partly, perhaps, to the high price of silk in China, its cost, when it arrived at Rome, was very great; so much so, that a given weight of silk was sometimes sold for an equal weight of gold; at first it was only used by a few ladies eminent for their rank and opulence. In the beginning of the reign of Tiberius, a law was passed, *ne vestis serica viros fœdaret*—that no man should disgrace himself by wearing a silken garment. — (*Tacit. Annal.* lib. ii. c. 33.) But the profligate Heliogabalus despised this law, and was the first of the Roman emperors who wore a dress composed wholly of silk (*holosericum*). The example once set, the custom of wearing silk soon became general among the wealthy citizens of Rome, and throughout the provinces. According as the demand for the article increased, efforts were made to import larger quantities; and the price seems to have progressively declined from the reign of Aurelian. That this must have been the case, is obvious from the statement of Ammianus Marcellinus, that silk was in his time (anno 370), very generally worn, even by the lowest classes. *Sericum ad usum antehac nobilitum, nunc etiam infimorum sine ulla discretione proficiens*. — (*Lib.* xviii. c. 6.)

China continued to draw considerable sums from the Roman Empire in return for silk, now become indispensable to the Western World, till the 6th century. About the year 550, two Persian monks, who had long resided in China and made themselves acquainted with the mode of rearing the silkworm, encouraged by the gifts and promises of Justinian, succeeded in carrying the eggs of the insect to Constantinople. Under their direction they were hatched and fed; they lived and laboured in a foreign climate; a sufficient number of butterflies was saved to propagate the race, and mulberry trees were planted to afford nourishment to the rising generations. A new and important branch of industry was thus established in Europe. Experience and reflection gradually corrected the errors of a new attempt; and the Sogdoite ambassadors acknowledged in the succeeding reign, that the Romans were not inferior to the natives of China in the

education of the insects, and the manufacture of silk. — (*Gibbon, Decline and Fall*, vol. vii. p. 99.)

Greece, particularly the Peloponnesus, was early distinguished by the rearing of silkworms, and by the skill and success with which the inhabitants of Thebes, Corinth, and Argos carried on the manufacture. Until the 12th century, Greece continued to be the only European country in which these arts were practised: but the forces of Roger king of Sicily having, in 1147, sacked Corinth, Athens, and Thebes, carried off large numbers of the inhabitants to Palermo; who introduced the culture of the worm, and the manufacture of silk, into Sicily. From this island the arts spread into Italy; and Venice, Milan, Florence, Lucca, &c. were soon after distinguished for their success in raising silkworms, and for the extent and beauty of their manufactures of silk. — (*Gibbon*, vol. x. p. 110.; *Bibliographie Universelle*, art. *Roger II.*)

The silk manufacture was introduced into France in 1480; Louis XI. having invited workmen from Italy, who established themselves in Tours. The manufacture was not begun at Lyons till about 1520; when Francis I., having got possession of Milan, prevailed on some artisans of the latter city to establish themselves, under his protection, in the former. Nearly at the same period the rearing of silkworms began to be successfully prosecuted in Provence, and other provinces of the south of France. Henry IV. rewarded such of the early manufacturers as had supported and pursued the trade for 12 years, with patents of nobility.

*Silk Manufacture of England.* — The manufacture seems to have been introduced into England in the 15th century. Silk had, however, been used by persons of distinction two centuries previously. The manufacture does not appear to have made much progress till the age of Elizabeth; the tranquillity of whose long reign, and the influx of Flemings occasioned by the disturbances in the Low Countries, gave a powerful stimulus to the manufactures of England. The silk throwsters of the metropolis were united, as already observed, in a fellowship, in 1562; and were incorporated in 1629. Though retarded by the civil wars, the manufacture continued gradually to advance; and so flourishing had it become, that it is stated in a preamble to a statute passed in 1666 (13 & 14 Cha. 2. c. 15.), that there were at that time no fewer than 40,000 individuals engaged in the trade! And it is of importance to observe, that though the importation of French and other foreign silks was occasionally prohibited during the reigns of James I. and Charles I., the Protectorate, and the reign of Charles II., the prohibition was not strictly enforced; and, generally speaking, their importation was quite free.

A considerable stimulus, though not nearly so great as has been commonly supposed, was given to the English silk manufacture by the revocation of the edict of Nantes, in 1685. Louis XIV. drove, by that disgraceful measure, several hundreds of thousands of his most industrious subjects to seek an asylum in foreign countries; of whom it is supposed about 50,000 came to England. Such of these refugees as had been engaged in the silk manufacture established themselves in Spitalfields, where they introduced several new branches of the art. When the refugees fled to England, foreign silks were freely admitted; and it appears from the Custom-house returns, that from 600,000*l.* to 700,000*l.* worth were annually imported in the period from 1685 to 1692, being the very period during which the British silk manufacture made the most rapid advances. But the manufacture was not long permitted to continue on this footing. In 1692, the refugees, who seem to have been quite as conversant with the arts of monopoly as with those either of spinning or weaving, obtained a patent, giving them an exclusive right to manufacture lustrings and *à-la-modes*, the silks then in greatest demand. This, however, was not enough to satisfy them; for, in 1697, Parliament passed an act, in compliance with their solicitations, prohibiting the importation of all French and other European silk goods; and in 1701, the prohibition was extended to the silk goods of India and China.

These facts show the fallacy of the opinion, so generally entertained, that we owe the introduction and establishment of the silk manufacture to the prohibitive system. So far from this being the case, it is proved, by statements in numerous acts of parliament, and other authentic documents, that the silk manufacture had overcome all the difficulties incident to its first establishment, had been firmly rooted, and had become of great value and importance, long before it was subjected to the trammels of monopoly; that is, before the manufacturers were taught to trust more to fiscal regulations, and the exertions of custom-house officers, than to their skill and ingenuity, for the sale of their goods.

The year 1719 is an important epoch in the history of the British silk manufacture; a patent being then granted to Mr. (afterwards Sir Thomas) Lombe and his brother, for the exclusive property of the famous silk mill erected by them at Derby, for throwing silk, from models they had clandestinely obtained in Italy. At the expiration of the patent, Parliament refused the petition of Sir Thomas Lombe for its renewal; but granted him 14,000*l.* in consideration of the services he had rendered the country, in

erecting a machine which, it was supposed, would very soon enable us to dispense wholly with the supplies of thrown silk we had previously been in the habit of importing from Italy : but instead of being of any advantage, it is most certainly true that the establishment of throwing mills in England has proved one of the most formidable obstacles to the extension of the manufacture amongst us. These mills could not have been constructed unless oppressive duties had been laid on thrown or organzine silk ; and the circumstance of their having been erected, and a large amount of capital vested in them, was successfully urged, for more than a century, as a conclusive reason for continuing the high duties !

From this period down to 1824, the history of the silk manufacture presents little more than complaints, on the part of the manufacturers, of the importation of foreign silks ; of impotent efforts on the part of parliament to exclude them ; and of combinations and outrages on the part of the workmen. Among the multitude of acts that were passed in reference to this manufacture, from 1697 to the æra of Mr. Huskisson, we believe it would be exceedingly difficult to point out one that is bottomed on any thing like sound principle, or that was productive of any but mischievous consequences. The French writers estimate the average exportation of silks from France to England, during the period from 1688 to 1741, at about 12,500,000 francs, or 500,000*l.* a year ! In 1763, attempts were made to check the prevalence of smuggling ; and the silk mercers of the metropolis, to show their anxiety to forward the scheme, are said to have recalled their orders for foreign goods ! It would seem, however, either that their patriotic ardour had very soon cooled, or they had been supplanted by others not quite so scrupulous ; for it appears from a report of a committee of the privy council, appointed, in 1766, to inquire into the subject, that smuggling was then carried on to a greater extent than ever, and that 7,072 looms were out of employment. The same committee reported, that though the French were decidedly superior to us in some branches of the trade, we were quite equal, and even superior, to them in others ; but instead of proposing, consistently with their report, to admit French silks on a reasonable duty, a measure which would have proved very advantageous to those branches of the manufacture in which we were superior, or nearly equal, to the French, without doing any material injury to the others, which were already in the most depressed condition, they recommended the continuance of the old system ; substituting absolute prohibitions in the place of the prohibitory duties that formerly existed ! Whatever immediate advantages the manufacturers might have reaped from this measure, the ultimate tendency of which could not fail of being most injurious, were effectually countervailed by the turbulent proceedings of the workmen, who succeeded, in 1773, in obtaining from the legislature an act which, by itself, was quite sufficient to have destroyed even a prosperous trade. This, which has been commonly called the Spitalfields Act, entitled the weavers of Middlesex to demand a fixed price for their labour, which should be settled by the magistrates ; and while both masters and men were restricted from giving or receiving more or less than the fixed price, the manufacturers were liable in heavy penalties if they employed weavers out of the district ! The monopoly which the manufacturers had hitherto enjoyed, though incomplete, had had sufficient influence to render inventions and discoveries of comparatively rare occurrence in the silk trade ; but the Spitalfields Act extinguished every germ of improvement. Parliament, in its wisdom, having seen fit to enact that a manufacturer should be obliged to pay as much for work done by the best machinery as if it were done by hand, it would have been folly to have thought of attempting any thing new ! It is not, however, to be denied that Macclesfield, Manchester, Norwich, Paisley, &c. are under obligations to this act. Had it extended to the whole kingdom, it would have totally extirpated the manufacture ; but being confined to Middlesex, it gradually drove the most valuable branches from Spitalfields to places where the rate of wages was determined by the competition of the parties, on the principle of mutual interest and compromised advantage. After having done incalculable mischief, the act was repealed in 1824. Had it continued down to the present day, it would not have left employment in the metropolis for a single silk weaver.

But, as the effects of this act did not immediately manifest themselves, it was at first exceedingly popular. After 1785, however, the substitution of cottons in the place of silk gave a severe check to the manufacture, and the weavers then began to discover the real nature of the Spitalfields Act. Being interdicted from working at reduced wages, they were totally thrown out of employment ; so that, in 1793, upwards of 4,000 Spitalfields looms were quite idle. In 1798, the trade began to revive ; and continued to extend slowly till 1815 and 1816, when the Spitalfields weavers were again involved in sufferings far more extensive and severe than at any former period.

It appears from this brief sketch of the progress of the English silk trade, that from the year 1695, down to our own times, it has been exposed to the most appalling vicissitudes. The reason is obvious. The monopoly enjoyed by the manufacturers, and the Spitalfields Act, effectually put a stop to all improvement ; so that the ma-

nufacture continued stationary in England, while on the Continent it was rapidly advancing. Whenever, therefore, the markets were, either from the miscalculation of the manufacturers, or a change of fashion, overloaded with silks, there were no means of disposing of the surplus profitably abroad, and the distress became extreme. Notwithstanding the unparalleled advances we had made in other departments of manufacturing industry, it was affirmed, in 1826, by the member for Coventry (Mr. Ellice), in his place in the House of Commons, "that there were in that city 9,700 looms; 7,500 of which were in the hands of operative weavers, who applied their manual labour, as well as their machinery, to the manufacture of ribands. These looms were, for the most part, of the *worst possible construction*; and it would scarcely be believed that the improved loom in France would, in a given time, produce 5 times as much riband as the common loom in England with the same manual labour! He could also state that there existed an improved manufacture in Germany, by which one man could make *forty-eight times as much velvet as could be made in an equal time by an English machine*. What chance was there that the English manufacturer could maintain such a competition?"

Perhaps these statements may have been somewhat exaggerated; but there can be no doubt of their substantial accuracy. Surely, however, no one believes that the inferiority of the machinery used by the English manufacturers was ascribable to any thing except that the protection they enjoyed had made them indifferent to improvements. No one believes that the French or Germans are superior to the English in the construction of machines; on the contrary, their inferiority is admitted by themselves, and by everybody else. That that spirit of invention, which has effected such astonishing results in the cotton manufacture, should have been so long wholly unknown in that of silk, is entirely to be ascribed to the fact of the former never having been the object of legislative protection. The cotton manufacturers were not bribed into the adoption of a routine system; they could not rest satisfied with mediocrity; but being compelled to put forth all their powers—to avail themselves of every resource of science and of art—they have, in a few years, raised the British cotton manufacture from a subordinate and trifling, to the very first place amongst the manufactures, not of this country only, but of the world!

*Change, in 1826, of the Monopoly System.*—At length, however, the impolicy of the system by which the silk manufacture had been so long depressed, became obvious to every intelligent individual. The principal manufacturers in and about London subscribed, in 1824, a petition to the House of Commons, in which they stated that "this important manufacture, though recently considerably extended, is still depressed below its natural level, by laws which prevent it from attaining that degree of prosperity which, under more favourable circumstances, it would acquire." Fortified by this authority, by the experience of 130 years, during which the prohibitive system had been allowed to paralyse the energies of the manufacturers, and by the sanction of parliamentary committees, Mr. Huskisson moved, on the 8th of March, 1824, that the prohibition of foreign silks should cease on the 5th of July, 1826, and that they should then be admitted for importation on payment of a duty of 30 per cent. *ad valorem*. On this occasion Mr. H. observed—"The monopoly had produced, what monopoly was always sure to produce, an indifference with regard to improvement. That useful zeal which gives life to industry, which fosters ingenuity, and which in manufactures occasions unceasing efforts to produce the article in the most economical form, had been comparatively extinguished. *To the prohibitive system it was to be ascribed, that in silk only, in the whole range of manufactures, we were left behind our neighbours!* We have here a proof of that chilling and benumbing effect which is sure to be produced when no genius is called into action, and when we are rendered indifferent to exertion by the indolent security derived from restrictive regulations. I have not the slightest doubt, that if the same system had been continued with respect to the cotton manufacture, it would have been at this moment as subordinate in amount to the woollen as it is junior in its introduction into the country."—(*Speeches*, vol. ii. p. 249.)

We have already alluded to the enormous duties imposed, in 1719, when Sir Thomas Lombe erected his throwing mill at Derby, on foreign organzine silk. These, though subsequently reduced, amounted, in 1824, to no less than 14*s.* 7*d.* per lb. There was also, at the same time, a duty of 4*s.* per lb. on raw silk imported from Bengal, and of 5*s.* 7*d.* per lb. on that imported from other places. Even had the manufacture been otherwise in a flourishing condition, such exorbitant duties on the raw material were enough to have destroyed it. Mr. Huskisson, therefore, proposed, by way of preparing the manufacturers for the approaching change of system, that the duty on foreign thrown silk should be immediately reduced to 7*s.* 6*d.* (it was further reduced to 5*s.* in 1826), and the duty on raw silk to 3*d.* per lb. These proposals were all agreed to; and considerable reductions were at the same time effected in the duties charged on most of the dye stuffs used in the manufacture.

It is to be regretted that Mr. Huskisson did not propose that the reduction of the

duties on raw and thrown silk, and the legalised importation of foreign silks, should be simultaneous and immediate. During the interval that was allowed our manufacturers to make preparations for the change, the French accumulated a large stock of goods to pour into our markets. To quiet the alarm occasioned by this circumstance, a singular device was fallen upon. The French had long been accustomed to manufacture their goods of a certain length: and, in the view of rendering their accumulated stock unfit for our markets, a law was passed in 1826, prohibiting the importation of any silks except such as were of entirely different lengths from those commonly manufactured by the French! No one can regret that this wretched trick, for it deserves no better name, entirely failed of its object. The French manufacturers immediately commenced, with redoubled zeal, the preparation of goods of the legitimate length: and the others, having become unsaleable at any thing like fair prices, were purchased up by the smugglers, and imported, almost entirely, into this country.

But no permanent injury arose from this circumstance; and, on the whole, the effect of the opening of the trade has been such as to justify all the anticipations which the advocates of the measure had formed of its success.

*Effects of the Change of 1826.* — We do not exaggerate, we only state the plain matter of fact, when we affirm that the silk manufacture has made a more rapid progress since the abolition of the prohibitive system in 1826, than it did during the preceding century. The former disparity in quality between goods of French and English make has been materially abated in most articles, while in a few the superiority is now on our side. Some of our readers will, probably, be not a little surprised to learn that the real or declared value of the silk goods of British manufacture exported to France, in 1842, amounted to 181,924*l*.

Most of the machines and processes known on the Continent have been introduced amongst us, and some of them have been materially improved. Nor, after what has taken place, can the least doubt remain in the mind of any one, that had full freedom been given to the silk manufacture 50 years ago, it would now have ranked among the most important and valuable businesses in the kingdom. Though a great step at the time, there can be no doubt that the change of system effected in 1826 was far from being sufficiently complete. The duty then imposed of 30 per cent. on the importation of foreign silks is, at least, more than double what it should be. The expenses of smuggling silk goods into England may, speaking generally, be estimated at about 12 per cent.; so that the high duty, instead of excluding foreign silks, acts as a bounty on their importation through clandestine channels; and occasions, by the temptation which it holds out to gambling adventures, a larger quantity to be imported than if the duty were more nearly proportioned to the expense of smuggling. The widespread corruption of the officers engaged in the collection of the silk duties in the port of London, should satisfy every one of the folly of attempting to levy duties which exceed the risk of loss by smuggling. Were the duties reduced to 12 or 15 per cent. *ad valorem*, the legitimate imports of foreign silk goods would be considerably increased; but their clandestine importation would be more than proportionally diminished; and the apparent protection given to the manufacture being reduced, a new stimulus would be applied to industry and invention. Were such a system adopted, we have little doubt that, in no very long time, perhaps not more than 5 or 6 years, our superiority over France in some important departments of the silk manufacture would be little less decided than in that of cotton.

"I maintain," said Mr. Poulett Thomson (afterwards Lord Sydenham), in his speech on the state of the silk trade (14th of April, 1829), "without fear of contradiction, that the very essence of commercial and manufacturing industry is freedom from legislative interference and legislative protection. Attempt to assist its course by legislative enactments, by fostering care, you arrest its progress, you destroy its vigour. Unbind the shackles in which your unwise tenderness has confined it — permit it to take unrestrained its own course — expose it to the wholesome breeze of competition, — you give it new life, you restore its former vigour. Industry has been well likened to the hardy Alpine plant; self-sown on the mountain side, exposed to the inclemency of the season, it gathers strength in its struggles for existence — it shoots forth in vigour and in beauty. Transplanted to the rich soil of the parterre, tended by the fostering hand of the gardener, nursed in the artificial atmosphere of the forcing-glass, it grows sickly and enervated, its shoots are vigourless, its flowers are inodorous. In one single word lies the soul of industry — competition. The answer of the statesman and the economist to his sovereign inquiring what he could do to assist the industry of his kingdom was, 'Let it take its own way.' Such is my prayer. Relieve us from the chains in which your indiscreet tenderness has shackled us; remove your oppressive protection; give us the fair field we ask; and we demand no more. The talent, the genius, the enterprise, the capital, the industry of this great people will do the rest; and England will not only retain her present position, but she will take a yet more forward place in the race of competition for wealth

and improvement which, by the nature of things, she is destined to run amongst the nations of the world. Place us in that condition, not by any violent change, but by slow and easy transition. Here we shall find security for our enterprise, and reward for our labours.

“ ‘Hic patet ingenuis campus; certusque merenti  
Stat favor; ornatur propriis industria donis.’ ”

It was not, however, to be supposed, that all departments of the silk manufacture would be equally benefited by the change of system from prohibition to duties. — *Non omnia possumus.* The probability is, that the trade, were it placed on a proper footing, would be divided between the English and French. In point of substantial excellence, the plain silk goods manufactured in England are superior to those of France; and the difference in favour of the latter in point of *finish* has become less perceptible; while in all mixed manufactures, of silk and wool, silk and cotton, silk and linen, &c., our ascendancy is admitted by the French themselves. On the other hand, the ribands, figured gauzes, and light fancy goods, manufactured in France, are superior to those of this country. Even in this department we have made a very great progress; and fancy goods are now produced at Spitalfields, Coventry, and other places, contrasting most advantageously, in point of taste and beauty, with those produced previously to the introduction of the new system. Still, however, we are not sanguine in our expectations of our countrymen being able to maintain a successful competition with our neighbours in the manufacturing of this class of articles. The greater attention paid to the art of designing in Lyons, the consequent better tastes of the artists, and the superior brightness and lustre of their colours, give them advantages with which it will be very difficult to contend.

But supposing that the trade is partitioned between the two countries in the way now stated, it is easy to see that the best share will belong to us, and that that share will be incomparably more valuable than the whole manufacture formerly was. The proofs of the accuracy of this statement are at hand. Notwithstanding the decline of the trade at Spitalfields and a few other places, the manufacture, taken as a whole, has greatly increased. During 1821, 1822, and 1823, when the restrictive system was in its vigour, the entries for consumption, of all sorts of raw and thrown silk, amounted at an average to 2,399,000 lbs. a year. But, despite the sinister predictions indulged in with respect to the ruin of the manufacture, the entries amounted, at an average of 1839, 1840, and 1841, to 4,835,898 lbs.; being an increase of more than 100 per cent. upon the quantity entered during the monopoly!

The manufacture of silk in France has, we are glad to say (for we have nothing in common with those who grudge or envy the prosperity of others), been materially improved of late years, and a large increase has taken place in the value of the silks exported, which amounted, in 1841, to about 162,000,000 fr., or about 6,500,000*l.* But it is satisfactory to know that we have been able to make head against this formidable competitor, and that, while the value of the exports of our silk goods amounted, in 1823, when the monopoly system was in full vigour, to only 351,409*l.* it amounted, in 1836, to 917,822*l.*, being an increase in the interval of more than 2½ times! The exports have not, it is true, been quite so large since; but this diminution is wholly owing to the distress that has prevailed in the interim in the U. States and the other leading markets for our silks: in fact, we undersell the French in some of the heavier and more important species of goods in every market equally accessible to both parties. The value of our exports of silk goods to the U. States amounted, in 1839, to 410,093*l.*; and does any one suppose that the Americans would have bought so largely of us, or that they would have bought anything at all, had the French or any other party been able to supply them on lower terms?

What has now been stated renders it obvious, that though the manufacturers of fine and fancy goods might be obliged, were the silk-trade placed on a more liberal and solid foundation, to change their employment, a new, and at the same time a more extensive, secure, and fruitful field would be opened for their exertions. We lament the hardships incident to the transition even from one department of the same business to another, but the suffering thence arising speedily disappears, and when the change has been effected, the manufacturers enter with fresh vigour on a new career of prosperity.

It is to be regretted, that it is not possible either to abandon a routine system, or to introduce new and improved methods of production, without injury to individuals. But because such is the fact — because the bridge cannot be built without displacing watermen, nor the plough introduced without superseding the spade, nor wine brought from abroad without diminishing the demand for ale and beer — is that any reason for proscribing inventions, and denying ourselves gratifications within our reach? To maintain the affirmative, would be evidently absurd, — it would be equivalent to maintaining that the interests of society are best promoted by perpetuating poverty, ignorance, and barbarism! The injury occasioned by the adoption of an improved method of produc-

tion, the reduction of a duty, or the opening of new markets whence cheaper supplies of any article may be obtained, is temporary only, and affects but a very small portion of the community; while the advantage is permanent, and benefits every individual, even those whom it may, in the first instance, force to resort to other businesses.

Those unacquainted with the history of the silk trade, who may have looked into the pamphlets and speeches of those opposed to the alterations in 1825, and to those that are still required, will probably be disposed to think that, though more limited in point of numbers, the condition of the workmen engaged in the trade was better previously to 1825 than it has been since. But those who have looked, however cursorily, into the history of the trade, must know that such is not the fact; and that, speaking generally, the situation of those engaged in it has been materially improved since 1825. We have already adverted to the state of the trade in 1793 and 1816. At the last mentioned period, 7 years before any relaxation of the monopoly had been so much as thought of, the distress in the silk trade was infinitely more severe than it has ever been since the introduction of the new system. In proof of this, we may mention that, at a public meeting held for the relief of the Spitalfields weavers, at the Mansion-house, on the 26th of November, 1816, the secretary stated, that *two thirds* of them were without employment, and without the means of support; "that some had deserted their houses in despair, unable to endure the sight of their starving families; and many pined under languishing diseases brought on by the want of food and clothing." And Sir Fowell Buxton stated, at the same meeting, that the distress among the silk manufacturers was so intense, that "*it partook of the nature of a pestilence, which spreads its contagion around, and devastates an entire district.*" Such was the state of the workmen under that monopoly system that has been the worthless theme of so much eulogy. But such, we are glad to say, is not their state at present. The trade, being now diverted to a considerable extent into those branches in which we have a superiority, is comparatively secure against revulsions: it would, indeed, be an absurdity to imagine, that measures that have about doubled the manufacture, should have reduced the rate of wages, or been otherwise than advantageous to the workmen.

We have already noticed the smuggling of foreign silks carried on in the early part and towards the middle of last century. The evil was not afterwards abated. The vigilance of the custom-house officer was no match for the ingenuity of the smuggler; and at the very moment when the most strenuous efforts were made to exclude them, the silks of France and Hindostan were openly displayed in the drawing-rooms of St. James's, and in the House of Commons, in mockery of the impotent legislation which sought to exclude them. "I have lately," said Mr. Huskisson, in an able speech in vindication of his policy as to the silk trade, "taken some pains to ascertain the quantity of smuggled silks that has been seized inland throughout the kingdom during the last 10 years; and I find that the whole does not exceed 5,000*l.* a year. I have endeavoured, on the other hand, to get an account of the quantity of silk goods actually smuggled into this country. Any estimate of this quantity must be very vague; but I have been given to understand that the value of such goods as are regularly entered at the custom-houses of France, for exportation to this country, is from 100,000*l.* to 150,000*l.* a year; and this, of course, is exclusive of the *far greater supply* which is poured in throughout all the channels of smuggling, without being subjected to any entry. In fact, to such an extent is this illicit trade carried, that there is scarcely a haberdasher's shop in the smallest village of the United Kingdom, in which prohibited silks are not sold; and that in the face of day, and to a very considerable extent.

"The honourable member for Coventry (Mr. Ellice) has mentioned the silk goods from India as those against which anything but prohibition would prove an unavailing protection. Now, in my opinion, it is scarcely possible to conceive a stronger case than those very silks furnish against the honourable member's own argument. I believe it is universally known that a large quantity of Bandana handkerchiefs are sold every year, for exportation, by the East India Company. But does any gentleman suppose that these Bandanas are sent to the Continent for the purpose of remaining there? No such thing! They are sold at the Company's sales, to the number of about 800,000 or 1,000,000 a year, at about 4*s.* each; they are immediately shipped off for Hamburg, Antwerp, Rotterdam, Ostend, or Guernsey, and from thence they nearly all illicitly find their way back to this country.

"Mark, then, the effect of this beautiful system. — These Bandanas, which had previously been sold for exportation at 4*s.*, are finally distributed in retail to the people of England at about 8*s.* each: and the result of this prohibition is to levy upon the consumer a tax, and to give those who live by evading your law a bounty of 4*s.* upon each handkerchief sold in this country!" — (*Speeches*, vol. ii. p. 510.)

This, no doubt, is all very true and very striking. But had Mr. Huskisson been in the House of Commons in 1844, he might have used nearly the same language. He scotched, but did not kill, the snake. The 30 per cent. *ad valorem* duty which he esta-

blished is but little less productive of smuggling than the prohibition which he repealed; and has given rise within the port of London, and, indeed, within the very walls of the Custom-house, to a system of fraud ruinous alike to the interests of the revenue and of the honest dealers. And hence it is that a duty of 12 or 15 per cent., or a duty which should not materially exceed the cost of smuggling, would really afford the manufacturer a more efficient protection than he derives from the existing duty, at the same time that it would place all classes of dealers on the same footing; whereas, the advantage is at present most decidedly on the side of those who engage in fraudulent schemes.

*Regulations as to the Importation of Silks.*—Silk manufactures are not to be imported in any vessel under 70 tons burden, except by licence from the commissioners of the customs to vessels belonging to Dover, to import such manufactures direct from Calais, though such vessels may not exceed 60 tons burden. Silk goods, the manufacture of Europe, not to be imported except into the port of London or the port of Dublin direct from Bordeaux, or the port of Dover direct from Calais.—(3 & 4 Will. 4. c. 52. § 58.; and, p. 663.)

When the shoot or the warp only is of silk, the article is to be considered as composed of not more than one half part of silk, and subject to the *ad valorem* duty of 30 per cent.; but if the shoot or the warp be entirely of silk, and a portion of the other be of silk also, the article is to be considered to be composed of more than one half part of silk, and subject to the rated duties at per lb., or to the *ad valorem* duties, at the option of the officers.—(*Man. Com. Cus.* 14th of August, 1829.) But in all cases where the duties charged by weight upon mixed articles would manifestly exceed 30 per cent., by reason of the weight of the wool, or other ingredient thereof besides silk, the article is to be admitted to entry at value.—(*Man. Com. Cus.* 19th of December, 1831.)

For the regulations as to the smuggling of silks, see SMUGGLING.

I. Account, Illustrative of the Progress of the Silk Manufacture, showing the Quantities of Raw, Waste, and Thrown Silk imported at different Periods.—(*Report of 1833 on Silk Trade*, p. 10., and later *Parl. Papers*.)

	Average Imports.		Raw.	Waste.	Thrown.	Total.
	Lbs.	Lbs.				
1765, 1766, 1767, being the commencement of the absolute prohibition	539,000	-	353,000	-	713,000	-
1768, 1769, 1770	554,000	-	357,000	-	691,000	-

\* In these two sums are included the exports to China in 1832 and 1833.

The silk exported from Canton consists of two leading varieties, known in commerce by the names of Canton and Nanking. The first, which is raised principally in the province of Canton, is divided into 5 sorts. At an average, the picul of Canton silk brought at Canton, in 1831-32, 158 dollars. The Nanking silk, produced in the province of Kiangnan, is divided into 2 sorts, known in commerce by the names of Taitee and Taysam. It is very superior to the other, and usually fetches more than double its price.

East India native silk comes wholly from Bengal. About the year 1760, the East India Company introduced the Italian mode of reeling silk, which was productive of a very great improvement in the quality of the article; but we are not aware that any subsequent improvement has been effected. The silk goods brought from India are not only inferior, in point of quality, to those of Europe, but also to those of China. The quantity imported of late years is specified in the Table No. III.

Turkey silk wholly consisted some years back of what is termed long reel and short reel brutia, a rather coarse description, suited to few buyers, and chiefly used in the ribbon trade of Coventry; but of late it has been imported of a very far superior texture and quality, coming successfully into competition with Italian and China silk. The qualities now known as brutias may be classed as under, and the following are the present (March, 1843) nominal quotations with a dull market:—

	s.	d.	s.	d.
Long reel brutia	-	-	9	6
Short reel brutia	-	-	11	0
Long reel Mestup (being a finer thread than common brutia)	-	-	11	6
Short reel Mestup	-	-	12	0
Selè (a finer sort, generally in loose skeins)	-	-	13	6
Demirdask (a superior kind)	-	-	16	18

At Brussa, the seat of the silk trade in Asia Minor, it is now sold by the oke of 400 drams, and not by the tefee of 610 drams, as formerly: the tefee is, however, still used at Constantinople. The plains of Brussa and the adjacent villages produce different qualities, varying considerably in size, colour, and quality. The village of Demirdask produces the finest, owing to the care taken by the natives in selecting the best cocoons, and attending carefully to the evenness of the thread throughout the process of reeling; consequently this description commands a high price, and is approved by our throwsters.

The water of this place is considered favourable to the brightness and glossiness of the silk, by which it may be distinguished from that of Brussa. The silk at Brussa is taken by the country people in small parcels to the bechstar or customs, where it pays duty. The proprietor, with a broker, then takes it to the silk bazaar, where it is handed round to the different stands and sold to the highest bidder, resembling, in this respect, the mode of selling the ores in Cornwall to the different smelters.

Thus a person buying okes at a time, assort as well as he can the different qualities for packing. It is generally bought by speculators for the Constantinople market, and is forwarded to Ghemlek on camels for shipment per steamers to Constantinople, where it finds its way to the Misam or some broker's room, where it is sold to the different merchants. The finest longs are mostly bought for the French and Russian markets, generally the latter. The long reels are going out of use in this country, as the more modern machinery is not adapted to its use.

The prices of silk at Brussa in September, 1842, were:—	
1st quality Demirdask	\$235 to \$240 per oke of 400 drams.
2nd quality ditto	210 — 215 —
1st Selè	190 — 195 —
2nd Selè	180 — 185 —
Long Mestup	165 —
Long Brussa	150 —
Short Brussa	170 — 175 —

Cost and Charge on Silk bought at Brussa and shipped at Constantinople for London.

1 case 46 tefees = 70 okes 60 drams, at \$216½	\$15,167
Packing charges and commission	428
	\$15,595

Carriage from Brussa to Constantinople	
Loss on gold sent to Brussa	\$28½ per oke,
Bills, lading, and petty expenses	or 2 13½
Inward duty, 70 okes 60 drams, at \$18, and 7 0/10 thereon	per cent.
Export duty, 70 okes 60 drams, at \$6, and 7 0/10 thereon	\$17,710
Carriage of money, 1 per cent.	
Constantinople commission, 3 0/10	531
	\$18,241

Ex. 118. 155L. = 46 at 4½, 194 lbs. = 164. 6d.  
Discount and charge in London 2 3  
— 18s. 3d.

By far the greater part of the raw and thrown silk that comes to us from France is not the growth of that country, but of Italy; being principally conveyed by the canal of Languedoc and the Garonne to Bordeaux, whence it is shipped for England. So much is this the case, that it appears from the official accounts published by the French government, that while the aggregate quantity of the French and foreign raw and thrown silk exported from France in 1841 amounted to 1,074,144 kilog., the portion which was of French origin amounted to only 12,294 kilog. 1.—(Administration des Douanes for 1841, p. 241.)

SILVER (Ger. *Silber*; Du. *Zilver*; Da. *Solv*; Sw. *Silfver*; Fr. *Argent*; It. *Argento*; Sp. *Plata*; Port. *Prata*; Rus. *Serebro*; Pol. *Srebro*; Lat. *Argentum*; Gr. *ἄργυρος*; Arab. *Fazzekeh*). a metal of a fine white colour, without either taste or smell; being in point of brilliancy inferior to none of the metallic bodies, if we except polished

steel. It is softer than copper, but harder than gold. When melted its specific gravity is 10.474; when hammered, 10.51. In malleability, it is inferior to none of the metals, if we except gold. It may be beaten out into leaves only  $\frac{1}{100000}$  of an inch thick. Its ductility is equally remarkable: it may be drawn out into wire much finer than a human hair; so fine, indeed, that a single grain of silver may be extended about 400 feet in length. Its tenacity is such, that a wire of silver 0.078 inch in diameter is capable of supporting a weight 187.13 lbs. avoirdupois without breaking. Silver is easily alloyed with copper by fusion. The compound is harder and more sonorous than silver, and retains its white colour even when the proportion of copper exceeds  $\frac{1}{4}$ . The hardness is at a maximum when the copper amounts to one fifth of the silver. The standard or sterling silver of Britain, of which coin is made, is a compound of 12 $\frac{1}{2}$  parts silver and 1 copper. Its specific gravity is 10.2. The specific gravity of Paris standard silver, composed of 137 parts silver and 7 copper, is 10.175. The French silver coin during the old government was not nearly so fine, being composed of 261 parts silver and 27 copper, or 9 $\frac{3}{4}$  parts silver to 1 part copper. The Austrian silver coin contains  $\frac{1}{10}$  of copper. The silver coin of the ancients was nearly pure, and appears not to have been mixed with alloy. — (*Thomson's Chemistry.*)

The most productive silver mines are in America, particularly in Mexico and Peru. There are also silver mines in Hungary, Saxony, and other parts of Europe, and in Asiatic Russia. — (See PRECIOUS METALS.)

Besides being used as a coin, or money, silver is extensively employed in the arts. The value of the silver plate annually manufactured is very considerable. Large quantities are also used in plating. — (See PLATE.) For an account of the quantity of silver coined at the British mint, since 1790, see *anté*, p. 308.

SINGAPORE, an island and British settlement at the eastern extremity of the Straits of Malacca, the town being in lat. 1° 17' 22" N., lon. 103° 51' 45" E.

The island is of an elliptical form, about 27 miles in its greatest length and 11 in breadth, containing an estimated area of 275 square miles. But the whole British settlement embraces a circumference of above 120 miles; in which is included about 50 desert islets, and the seas and straits within 10 miles of the coast of the principal island. The latter is separated from the main land by a strait of the same name, of small breadth throughout, and scarcely, indeed,  $\frac{1}{2}$  of a mile wide in its narrowest part, which, in the early period of European navigation, was the thoroughfare between India and China. But the grand commercial highway between the eastern and western portions of maritime Asia now passes along the south side of the island, on which the town is built, between it and a chain of desert islands about 9 miles distant; the safest and most convenient channel being so near to the island that ships in passing and repassing come close to the roads. The town is wholly indebted for its rapid rise and growing importance to its position on this strait. This has rendered it not merely a convenient *entrepôt* for the trade between the Western world and India on the one hand, and China on the other; but also for that between the former and the Eastern Archipelago, the Philippines, &c. It is situated on a river, or rather salt creek, navigable by lighters about  $\frac{3}{4}$  of a mile from the sea. Ships lie in the roads, or open harbour, at the distance of from 1 to 2 miles from town, according to their draught of water. The assistance of a number of convenient lighters, which are always in readiness, enables them to load or unload, with scarcely any interruption, throughout the year. The creek is accessible to the lighters, and the goods are taken in and discharged at convenient quays, at the doors of the principal warehouses. — (See *Chart of the Island of Singapore* in the *Mercator's Chart* in this work.)

The climate of Singapore, though hot, is healthy. Fahrenheit's thermometer ranges from 71° to 89°. Being only about 80 miles from the equator, there is, of course, very little variety in the seasons. There is neither summer nor winter; and even the periodical rains are short, and not very well marked — moderate showers of rain falling for about 150 days each year. The settlement of Singapore was formed in February, 1819, and its sovereignty and property, in their present extent, confirmed to the British government in 1825, by a convention with the king of the Netherlands, and a treaty with the Malay princes to whom it belonged. Previously to its being taken possession of by the English, it had been inhabited for about 8 years by a colony of Malays, half fishermen and half pirates. When the first census was taken, in January, 1824, the population was found to amount to 10,683. In 1828, it had increased to 15,834; in both cases, exclusive of troops, camp followers, Indian convicts, and a floating population of about 5,000. In 1837 it amounted to 29,984 of whom 13,749 were Chinese settlers and 9,132 Malays, the Europeans being but few in number; and at present (1843) the population exceeds 45,000, of whom about a half are Chinese.

The principal merchants and agents are Englishmen, of whom also there are a few shopkeepers, auctioneers, &c. There are also some respectable Chinese merchants; and the bulk of the shopkeepers, with the most valuable part of the labouring population, consist of Chinese. About 5,000 adult males

arrive annually from China by the junks; about 1,000 of whom remain at Singapore, the rest dispersing themselves among the neighbouring Dutch, English, and Malay settlements. The boatmen are chiefly natives of the Coromandel coast; and the Malays employ themselves as fishermen, in cutting timber, and in supplying the settlement with the rude produce of the neighbourhood. There are good daily markets, open at all hours, and well supplied with vegetables, fruits, grain, fish, pork, and green turtle; the latter the cheapest animal food that can be procured. There are no export or import duties, nor anchorage, harbour, light-house dues, or any fees; but a register is kept of all exports and imports. Reports must be made to the master attendant by the masters of vessels, and invoices delivered to the superintendent of imports and exports.

Though there are neither duties on imports or exports, nor on the ships frequenting the port, the revenue of Singapore amounted, in 1842-43, to 509,000 rupees, while its expenditure, civil and military, amounted to only 494,029 do.

**Currency, Weights, Language, &c.**—The currency and weights are simple and convenient. Accounts are kept in Spanish dollars, divided into 100 parts, represented either by Dutch dots, or by English copper coins of the same value. The weights in use (and almost every thing is sold by weight, as in China) are the Chinese picul of 100 catties, or 133½ lbs. avoirdupois. Rice (the produce of Siam and the Archipelago) and salt are sold by the coyan of 40 piculs. Gold dust is sold by a Malay weight called the bungkal, which weighs 2 Spanish dollars, or 832 grains Troy. Bengal rice, wheat, and pulses of the same country, are sold by the bag, containing 2 Bengal maunds, or 164½ lbs. avoirdupois. Piece goods, &c. are sold by the corgie or score. English weights and measures are frequently used in reference to European commodities. The mode of transacting business among the European merchants is simple and efficient. Instead of trusting their affairs to native agents, as in other parts of India, they transact them in person, with the occasional assistance of a Chinese creole as an interpreter and broker. The European merchants transact business on their own account; but a great deal of their employment consists in acting as agents for houses in London, Liverpool, Glasgow, Amsterdam, Antwerp, Calcutta, Bombay, Madras, Canton, and Batavia. They are also agents for various insurance offices at Calcutta and elsewhere, and policies of insurance to any extent may be effected without difficulty. The language of commercial intercourse, where any of the natives of the East are concerned, is universally Malay;—a simple and easy dialect, of which all the resident merchants have a sufficient acquaintance to enable them to transact ordinary business. The *Singapore Free Press*, published once a week, contains a price current, an account of the arrivals and departure of shipping, and an official detail of the exports and imports of the preceding week. The administration of justice is entirely English, there being a recorder's court for the settlement, in common with the two neighbouring ones of Penang and Malacca.

**Commodities and Prices.**—Singapore is chiefly an *entrepôt*, having, with the exception of pearl sago manufactured on the spot from the raw material imported from the north coast of Sumatra, implements of agriculture, and some others fabricated by the Chinese from European iron, with gambier and catechu grown and manufactured on the island, few commodities of its own for exportation. The grain produced on the island not being sufficient for the consumption of the inhabitants for a week, their supplies of rice, wheat, &c. are mostly all imported principally from Java and Calcutta.

**Trade of Singapore.**—The following Table has been compiled from the official statements published in the *Singapore Free Press* of the 17th August, 1843.

Abstract Statement of the Trade of Singapore with the undermentioned Places, in the Years 1845-46, and 1846-47.

Countries.	Imports.		Exports.	
	1845-46.	1846-47.	1845-46.	1846-47.
	<i>Company's Rupees.</i>	<i>Company's Rupees.</i>	<i>Company's Rupees.</i>	<i>Company's Rupees.</i>
Great Britain	7,368,525	6,121,819	2,193,405	2,114,078

The following rates of commission and warehouse rent are charged at Singapore, except in cases of special agreement:—

- |  |   |
|--|---|
| <p><b>Commission.</b></p> <ol style="list-style-type: none"> <li>On all sales or purchases, except the following, 5 per cent.</li> <li>On purchases of goods or produce for return, 2½ per cent.</li> <li>On sales or purchases of opium, 3 per cent.</li> <li>On sale or purchase of ships, vessels, houses, or lands, 2½ per cent.</li> <li>On sale, purchase, or shipment of bullion, 1 per cent.</li> <li>On sale or purchase of diamonds, jewels, &amp;c., 4 per cent.</li> <li>On returns in treasure, bullion, or bills, 1 per cent.</li> <li>On all goods consigned and withdrawn, a commission.</li> <li>On sale, purchase, or negotiating of bills not serving for purchase of goods or produce, 1 per cent.</li> <li>On all goods sold by auction by the agents themselves, in addition to the above, 2½ per cent.</li> </ol> | <ol style="list-style-type: none"> <li>On del credere, or guaranteeing sales when specially required, 2½ per cent.</li> <li>Shroffage, 1 per cent. per mille.</li> <li>On all advances of money for the purpose of trade, whether the goods are consigned to the agent or not, and where a commission of 5 per cent. is not charged, ½ per cent.</li> <li>On ordering goods, or superintending the fulfilment of contracts whence no other commission is derived, 2½ per cent.</li> <li>On guaranteeing bills, bonds, or other engagements, and on becoming security for administration of estates, or to government or individuals for contracts, agreements, &amp;c., 4 per cent.</li> <li>On acting for the estates of persons deceased as executors or administrators, 5 per cent.</li> </ol> |
|--|---|

17. On the management of estates for others, on the amount received,  $\frac{2}{3}$  per cent.
18. On procuring freight, or advertising as the agent of owner or commanders, on the amount of freight, whether the same passes through the hands of the agent or not, 5 per cent.
19. On chartering ships for other parties,  $\frac{1}{2}$  per cent.
20. On making insurance, or writing orders for do.,  $\frac{1}{2}$  per cent.
21. On settling insurance losses, total or partial, and on procuring return of premium, 1 per cent.
22. On debts, when a process at law or arbitration is necessary,  $\frac{1}{2}$  per cent.—And if received by such means, 5 per cent.
23. On bills of exchange noted or protested, 2 per cent.
24. On collecting house rent, 5 per cent.
25. On ships' disbursements,  $\frac{1}{2}$  per cent.
26. On negotiating loans on respondentia, 2 per cent.
27. On letters of credit granted for mercantile purposes,  $\frac{2}{3}$  per cent.
28. On purchasing or selling government securities, or on exchanging or transferring the same,  $\frac{1}{2}$  per cent.
29. On delivering up do.,  $\frac{1}{2}$  per cent.
30. On all advances not punctually liquidated, the agent to have the option of charging a second commission, as upon a first advance, provided the charge be only made once in the same year.

31. On transshipping all goods or produce, except the following, 1 per cent.
32. On transshipping whole chests, of camels, camels backs, and seed, camphor, nankeens, and gunny bags, per package, 1 dollar.
33. At the option of the agent, on the amount debited or credited within the year, including interest, and excepting only such items, on which at least  $\frac{2}{3}$  per cent. has been charged, 1 per cent.

This charge is not to apply to paying over a balance due on an account made up to a particular period, unless where such balance is withdrawn without reasonable notice.

#### Warehouses Rent per Month.

Chests of opium or silk, bales of woollens, pipes of wine or brandy, leaguers of arrack, &c., 1 dollar.  
Bales of Indian piece goods, cotton and gunny yarn, 50 cents.  
Cases of European piece goods, trunks of woollens, &c., 25 cents.  
Hogsheds of liquor, 1 chest of wine, &c., 40 cents.  
Pepper, rice, coffee, sugar, saltpetre, &c., 10 per cent.  
Iron, tin, tutenague, spelter, lead, &c., 5 per cent.  
All other goods not mentioned, to pay accordingly, or by measurement, at the rate of, per ton of 50 cubic feet 1 dollar.

**Eastern Ports trading with Singapore.**—As every thing that relates to the trade of the East is now becoming of the greatest importance, we make no apology for laying before the reader the following statements, taken from the *Singapore Free Press*, respecting the Eastern ports from which native ships arrive at Singapore. They are mostly all very imperfectly known even to residents in the settlement; and the names of some of them may now, perhaps, be learned for the first time by the English reader.

We have subjoined some details respecting the trade between Singapore and some of these ports in 1842-43, from the same journal.

Commencing with ports to the northward, those in China, from which junks (which are included among the *native craft*) arrive here, are, CANTON, TEW-CHEW, CHUNG-LIM, and MACAO, in Canton province; AMOY and CHING-WEI in Fokien; and SHANGHAI and NINGPO, large commercial cities, in Che-keang province. They come also from HAILAM or HAINAN, which is subject to Canton. The average number of these vessels (some of which are of large burden, 300 to 400 tons), is 20 arriving here annually. The cargoes they bring are chiefly intended for the consumption of the numerous Chinese who are settled in Dutch and English colonies in these parts, as well as in the native states, and are re-exported thence by smaller vessels, to places where they may be mostly required. The only articles they bring, in any way required by Europeans, are raw silks, nankeens, and teas. These vessels likewise convey a large number of emigrants from China every year, probably from 4,000 to 5,000, most of whom, however, proceed to other places soon after landing here.

The ports in Cochln-China and Cambodia, from which similar vessels arrive, are KAMOKAO and LOKMOI, in Cambodia, and TURON and SAIGON, in Cochln-China Proper. Anom or ANIAM, from which many vessels report themselves to come, is but a general name for either Cochln-China or Tonquin. The average number of vessels arriving from these ports are 40 annually, bringing, principally, sugar, rice, oil, salt, and some other articles of minor importance. These vessels are usually smaller than the Chinese and Siamese junks.

The total imports from Cochln-China during the official year 1842-43 were valued at 564,785 dollars. They consisted of raw silk, 149 piculs; rice, 12,010 piculs; sugar, 37,540 piculs; and salt, 15,190 piculs. The gross exports during this period were dollars 277,848, consisting chiefly of cotton, 1,084 bales and 985 piculs; British cotton goods, 3,588 pieces; opium, 263 chests; and woollens, to the value of 23,378 dollars. During the same time 82 boats, equal to 4,195 tons, arrived here from Cochln-China.

It was noticed in last year's report how extremely liable the Cochln-Chinese boats were to be plundered, and their crews murdered or made slaves of, by Malay and Chinese pirates, in consequence of their being entirely defenceless. During the past year many instances have occurred which too well justify the statement. It is to be hoped that the measures which government are contemplating may have the effect during the approaching season of materially diminishing, if not altogether checking the evil, at least in the vicinity of our shores.

BANKOK and CHANTIBUN are the only two ports in Siam of any note, and from these about 30 to 40 junks and topes arrive annually. They are manned and owned almost entirely by Chinese residing in Siam, and bring, chiefly, sugar, rice, oil, iron pans, sticklac, gamboge, salt, indigo, paddy, tobacco, and sapan-wood.

We have had too frequent occasion to notice the depredations and cruelties which every class of vessels from the places above mentioned have suffered at the hands of pirates every year, on their way to this port, which certainly contributes to check an increase of trade with the countries they come from.

The ports on the east coast of the Peninsula are SUNGORA and CALANTAN, subject to Siam; and TRINGANU, KEMAMAN and PAHANG, independent states. There are other ports on this coast, but of little note; namely, DOONGOON, ENDAU, PAKOH, Sadeelon, and Teloban. The produce usually brought here by pucats and other craft from these first mentioned consists chiefly of tin, gold dust, pepper, Malay saronges and trousers, bees' wax, hides, elephants' teeth. Junks occasionally touch at these ports, and we sometimes have the produce of Siam and China brought here from them. The average number of craft arriving thence may be about 120 or 130 annually.

**BORNEO.**—The imports into Singapore from Borneo in 1842-43 consisted of antimony ore, 7,478 piculs; gold dust, 4,337 bunks, valued at 126,652 dollars; rattans, 9,050 piculs; specie, 7,393 dollars, &c. The antimony ore comes principally from Sarawak, where it is said Mr. Brooke has a monopoly of the trade. The exports for the year 1842-43 amounted to 296,637 dollars, showing a decrease of 22,311 dollars. The most important were British cotton goods, 3,908 corges and 15 dozen; opium, 227 chests; tea, 1,928 boxes and 52 piculs; and specie equal to 34,302 dollars.

During the year 1842-43, 88 boats, equal to 2,701 tons, arrived at this port from Borneo.

The ports in Borneo, from which vessels report themselves, are BANJERMASIN, BALUBANGAN, BURNAL, COTI, MEMPAWA, MATTAN, PONTIANAK, PASSEIR, PEGOTAN, SARAWAK, SAMBAS, SUCCADANA, BRISIL, Baitulchen, Bunccalan, Bintoooloo, Calakak, Coti-ringin, Cooboo, Chinkoh, Kayang, Monterado, Mukah, Mahio, Oyak, Pambuang Sadong, Sampiti, Tekrang, and Tamnah Derat. Some of these ports are well known; but of others we know little except the names. Those with which trade is principally

\* The places mentioned in this statement, of which the names are in capitals, are either well known to Europeans by long report or actual intercourse; while those in italics remain, so far as we have ascertained, not only unvisited by, but are only recently known by name to them: few or none of them earlier than the foundation of this settlement.

carried on are Brunei, or Borneo Proper, Banjermassin, Pontianak, Sembas, Cotti, Passier, Peggotan, and Sarawak. The products commonly brought here from Borneo, are, rattans, birds' nests, bees' wax, tortoiseshell, gold dust and diamonds, biche de mer, pearl and raw sago, camphor, rice and paddy, mother of pearl shells, garro and lakka woods, pepper, seaweed, mats, ebony, and antimony ore. The boats which come from the southern and eastern ports are commonly manned by Bugis, the principal carriers in the Archipelago, and, next to the Chinese, the most enterprising and industrious of the traders in these regions. They are considerably less tainted with piracy than the Malays.

**MANILLA.**—The commerce with Manilla continues to increase. During 1842-43, the gross imports were valued at \$33,933 dollars. The most important articles consisted of hemp and rope, 2,014 piculs; cigars, 30,770,100; sugar, 6,546 piculs; tea, 595 piculs; and sapan wood, 19,306 piculs; it would also appear 5,300 pieces of British piece goods were imported, probably on account of their being unsuitable for the Manilla market. The exports amounted to 137,315 dollars. The chief articles were opium, 49 chests; iron, 3,762 piculs; and British cotton goods, 88 dozen, 60 corges and 4,189 pieces.

**CELEBES** is the parent country of the Bugis, which name, though properly belonging only to one of the tribes on Celebes, is applied generally to all traders from that island, from the east and south-east coasts of Borneo, and from the islands to the southward and eastward of it. Of these tribes, by far the most considerable in point of improvement and numbers are the Bugis of Wajo or Tuwajo, a country near the centre of Celebes, and situated up the Bay of Boni. The ports in Celebes from which prahus arrive here are Bonirati, Bugis Pari-para, Wajok, Bugis Pemana, Kailie, Macassar, Mandhar, and Sangye. They usually bring sarongs — the produce of their own looms — rattans, wax, tortoiseshell, pearl shells, seaweed, biche de mer, coffee, birds' nests, sandal and bookoo woods, and other articles of minor importance. The number of vessels arriving here from the above places averages about 50 or 60 annually.

The islands to the eastward and southward of Celebes, from which the Bugis bring cargoes to this port, are chiefly Bootoon, Enday or Flores, Selayar, Timor, Booroo, Lombok, Sumbawa, Amboya, Ceram, and even from the Aros and Papua. The articles are the same as those from Celebes with the addition of kayu-pooteh, i.e. birds' nests, and wild nutmegs. The vessels arriving from these places may average about 30 every year. The island of Bali, or Bally, contains several ports, from which upwards of 50 prahus annually arrive here: the principal of these are Baliling, Bali Badong, Sasak, Saliparang, and Ampaman.

The imports from these islands in 1842-43 were valued at \$33,495 dollars, being a slight increase over the previous year. They consisted of coffee, 1,010 piculs; rice, 96,311 piculs; and tobacco, 2,449 piculs. The gross value of the exports amounted to \$89,333 dollars. They were, British cotton goods, 6,193 pieces and 177 corges; opium, 217 chests; and copper tokens valued at \$7,079 dollars. The trade during the past official year was carried on chiefly by square rigged vessels. Only 28 native boats arrived, whereas in the year 1841-42 the number was 123.

**SUMATRA**, the various ports on the east coast of which furnish the greatest number of native craft frequenting this port, amounting on an average to between 300 and 400 annually. The names of these ports are, Acheen, Apong, Assahan, Batubara, Bukitbatu, Billah, Ayeretam, Campar, Dellil, Gawang, Indragiri, Jambie, Kitaman, Langkat, Lampung, Manda, Merba, Pulo Padang, Panal, Palembang, Rantow, Rittet, Siac, Suhee, and Tabling Tingle. The greatest portion of boats come from Campar, Jambie, and Siac, bringing coffee, rice, wax, rattans, ivory, gold dust, benzoin, dragons' blood, lakka wood, and a few other articles. From Palembang come the lacquered basons and cerree boxes so much in request among natives; and the best rattan mats are made there. The coast near Siac furnishes in great abundance the *Trubo*, or fish-roe, so universally used, and affords our principal supply of sago, which has now become an article of commerce at Singapore.

The imports from Sumatra, in the year 1842-43, amounted to \$84,001 dollars. They were, bees' wax, 611 piculs; benjamin, 852 piculs; betel nut, 9,324 piculs; coffee, 2,581 piculs; cotton, 3,660 piculs; gold dust, 647 bungsals, valued at 19,705 dollars; rice, 8,153 piculs; pepper, 4,987 piculs; raw sago, 30,910 bungsals; and specie equal to 87,810 dollars, &c. The exports exhibit a decrease of 69,234 dollars, having amounted in 1842-43 to 189,922. The chief were British cotton goods, 5,283 pieces and 336 corges; country ditto, 2,116 corges; China crockery, valued at 9,609 dollars; raw silk, 43 piculs; copper tokens, valued at 24,655 dollars; and specie, equal to 30,866 dollars.

The names of the petty places on the west side of the MALAY PENINSULA, opposite the Sumatra shore, between this and Penang, are — Batu Pahat, Beenook, Beladong, Dooyong, Brooas, Muar, Padang, Pontian, and Panghie; while the principal ports, besides Malacca and her dependencies, are — Perak, Salengore, Lingin, and Lookoot. From the former very few articles, and those only of trifling value, are brought here, consisting chiefly of fowls, cocoa nuts, paddy, fruit, &c.; but the other ports all furnish tin in large quantities, besides several other articles of less importance. The whole of this coast, however, bears a bad name for piracy. The number of prahus arriving here from all the places above named amounts to about 100 every year.

Of the neighbouring islands, RHIO is the one with which we carry on the most extensive and constant trade; the number of boats, or rather trips of a regular set of Chinese boats, called *sampans puats*, employed in the trade, being about 800 a year. They bring chiefly pepper and gambier, the produce of Buitang. The chief imports in 1842-43 were, gambier, 36,558 piculs; pepper, 2,910 piculs; and rice, 4,060 piculs. RHIO is the only place from whence gambier is imported into Singapore; so there would be little difficulty in ascertaining the quantity produced in the island during the past 7 years. The quantity now grown and manufactured is certainly not less than 70,000 piculs. In 1841-42, 93,342 piculs were exported, and 18,644 piculs were imported, leaving 74,695 piculs to be accounted for. In the past official year 148,746 piculs were exported, and 38,595 were imported: showing a difference of 110,151 piculs. It is, however, very probable that a quantity was in hand, or in progress of shipment, when the official returns were made up. The decrease appears to be in opium, sugar, and salt. RHIO may be considered as a free port, as there are neither import nor export duties strictly so called. From LINGIN, or LINGA, also, we have upwards of 70 or 80 boats arriving annually, bringing a great variety of useful produce, but principally pepper, tin, rattans, &c. BILLITON sends about 25 boats yearly, which bring biche de mer, seaweed, tortoiseshell, wax, &c.

**BUNGOBAN** (or Great Natunas) and **SEANTAN** (or N. Anambas) are the next in importance, from which 30 or 40 vessels trade with this settlement. The other islands are — Pulo Awore, Benawang, Condore, Carlmons, Jamaja (or S. Anambas), Pulo Laut, Laboo, Leboc, Meppar, Nongsa, Sarasan, Sinkip, Soobie, Tajam, Timblan, Timling, Tingih, Trong, Carimata, Ungaran, and some others.

**JAVA.**—The trade with this rich and flourishing island is of great importance. The imports of the official year 1842-43 exceed those of the preceding year by \$9,450 dollars, the gross amount being 1,108,373 dollars. The most important items were, birds' nests, 474 piculs; benjamin, 1,181 piculs; coffee, 2,804 piculs; cotton goods, Malay, 2,423 corges and 800 dozens; rice, 194,817 piculs; copper, 673 piculs; mace, 724 piculs; nutmegs, 1334 piculs; cloves, 150 piculs; spirits, valued at 49,411 dollars; sugar, 17,548 piculs; tin, 4,198 piculs; tobacco, 12 corges and 12 piculs; woollens, valued at 46,082 dollars; and specie, equivalent to 196,597 dollars. The exports — 451,056 dollars, showing an increase of 28,379 over the preceding year. The principal articles were, country cotton goods, 9,173 corges and Chinese cotton goods, 152 corges; crockery china, valued at 52,440 dollars; opium, 66 chests; raw silk, 35 piculs; tea, 10,253 boxes and 443 piculs; China paper, valued at 22,520 dollars; and specie, equal to 15,969 dollars. The small quantity of grain produced in Singapore, hardly equal to the consumption of the population for one week, renders it exceedingly desirable to have the means at hand of obtaining a large and constant supply: this Java furnishes us with, and this alone renders our trade with that island of considerable importance and interest. If the returns for 1842-43 are at all correct, 194,817 piculs were imported during

that year, equal to 35,975,600 lbs., which, estimating each adult to consume 730 lbs. per annum, would furnish a supply for 35,983 adults. The whole population of Singapore is supposed to be nearly 60,000.

*Piracy in the Eastern Seas.*—We regret to have to state that piracy has been of late years very frequent in the seas to the eastward of the Straits of Malacca, and even in the Straits themselves. It has always, it is true, prevailed to a less or greater extent in the Eastern Seas; but latterly the number of pirates has rapidly increased, and they have prosecuted their depredations with a boldness and success that require immediate attention. In so far as we can judge from the statements in the Singapore and Canton papers, we seem, to say the least of it, to have manifested the most singular indifference to the spread of this great and growing evil. In 1824, we bound ourselves by treaty with the Dutch to co-operate with them for the suppression of piracy in the Eastern Seas. It is affirmed that, until very recently, we did little or nothing towards the fulfilment of this engagement, though we are far more interested in the suppression of piracy than any other people. Hitherto the trade of Singapore has chiefly suffered from piratical attacks; but, besides waylaying the smaller junks and ships of the Chinese, Siamese, &c., the pirates, emboldened by impunity, have, within these half dozen years, attacked some British ships in the Straits of Malacca, and actually captured some ships in the seas more to the eastward, inflicting the most horrid barbarities on the unhappy passengers and crews. The *Andromache* ship of war destroyed in June, 1836, a nest of pirates: but, without the employment of armed steam-boats to assist the other vessels, the nuisance will not be suppressed; and it is at this moment carried on to a great extent from sundry ports on the coast of Borneo and elsewhere. In fact, so late as June last (1843), H. M. Ship *Dido* fell in with and destroyed a nest of pirates in one of the ports of Borneo. But an example of this sort, if not vigorously followed up, is of little use. This, however, is a matter of more importance, perhaps, than is commonly supposed. We believe we are within the mark when we affirm that from sixteen to eighteen millions' worth of British property (including the trade between India and Canton) is annually conveyed through the Straits of Malacca and the other Eastern Seas infested by pirates. The trade from England to China, already of vast importance, and now increasing more rapidly, perhaps, than any other department of our commerce, is wholly carried on through the channels referred to; and, as we do not hesitate to send powerful squadrons to secure less valuable interests in other quarters, it is not easy to see why we should not send some half-dozen war steamers to protect this great and growing trade, as well as that which we carry on with the Philippine Islands, New South Wales, &c., from the depredations of a piratical banditti. Nothing but the employment of steamers will be able effectually to abate the evil of piracy. The infinite number of small islands in the Eastern Seas, the difficulty of their navigation, and our little acquaintance with any but the principal lines of intercourse, afford the greatest facilities for the escape of pirates from ordinary cruisers. But steam ships of small draught of water could follow them into their haunts; and the pirates would not be able to escape from them, as they frequently do from sailing vessels, by taking to their oars while their pursuers are becalmed. Except when defending our own shores, the navy is never so legitimately employed as in the defence and extension of commerce. Its protection is one of the most important duties which government has to discharge; and, considering the immense naval force at our disposal, it may well excite astonishment that piracy in the Eastern Seas—one of the great highways by which commerce is carried on—should have been allowed to attain to any considerable magnitude, and that the reiterated complaints of the merchants and others, who have suffered by its prevalence, should have been so little attended to. A very little outlay on the part of government might make, in so far at least as piracy is concerned, the navigation of the Eastern Seas quite as safe as that of the Channel; and the advantages thence resulting to our trade would, in a very short period, far more than countervail the little sacrifice required at the outset.

Besides putting down piracy in the Eastern Seas, government should take the necessary measures for obtaining accurate information with respect to them, and the ports and countries to which they afford access. We know *very little* indeed of many, or rather, we should say, of most, of the islands to the east of Malacca; and yet several of them are of great extent, and they all abound in valuable products; and might, it is probable, were we better acquainted with their ports and capabilities, furnish the means of carrying on an advantageous commerce. Had utility been at all attended to in such matters, the exploration of New Guinea, and of the seas and numberless islands in its vicinity, would have taken precedence of many late expeditions. We subjoin

A Statement of the Prices of the Principal Articles of Eastern Produce at Singapore on the 12th of October, 1843, from the *Singapore Free Press* of that Date.

In this port there are no duties on imports and exports, and vessels of every nation are free of all charges.  
Accounts are kept in Spanish dollars, divided into cents. The usual credit on sales is as follows:—Europe goods, 3 months;

Indian and China goods, 2 months; opium, 2 months. The best article is frequently sold for cash. Produce is generally bought for cash.

The common weight is the picul of 135½ lbs. avoirdupois.

divided into 100 catties. Salt and rice are sold by the coyan of 40 piculs. Java tobacco, by the coye of 40 baskets. Bengali rice, wheat, and gram, by the bag containing 4 Bengali maunds. Leading piece goods, by the coye of 20 pieces. Gold and silver thread, by the catty of 36 dollars weight. Gold dust, by the bungal, which weighs dollars, or equal to 832 grains Troy.

Produce of India, China, Java, &c.

**SINOPE**, a town of Asia Minor, on the S. coast of the Black Sea, lat.  $42^{\circ} 2' 30''$  N., lon.  $35^{\circ} 9' 45''$  E. Population uncertain, probably from 8,000 to 10,000. Sinope is situated on a low narrow isthmus, connecting the high rocky promontory of Ada with the main land. Its port, which is the best on this coast, on the south side of the town, is protected from the N. and N.E. gales by the isthmus and promontory already mentioned. Ships anchor within  $\frac{1}{2}$  mile of the town, in from 13 to 17 fathoms; or nearer to it, in from 5 to 7 fathoms. There is a roadstead on the north side of the isthmus, but it is open and exposed. Sinope is one of the principal stations of the Turkish fleet; and there are docks and arsenals for its accommodation and outfit. Its exports are inconsiderable, the principal being timber, salt, cordage, fish oil, &c.

In ancient times, Sinope was a city of great wealth, magnitude, and importance. It was the birthplace of Diogenes the Cynic; and Mithridates made it the capital of his dominions. After its conquest by the Romans under Lucullus, it became the seat of a colony: and continued for a lengthened period to enjoy a good deal of consideration.

Should civilisation and the arts once more revive in the ancient Pontus, and the other countries to the south of the Black Sea, the excellence of its climate could not fail to restore to Sinope some portion of its former grandeur. Even now a considerable intercourse is beginning to take place with the countries E. and S. of Sinope. Diarbeker on the Tigris, in lat.  $37^{\circ} 54'$  N. lon.  $39^{\circ} 53' 45''$  E., is one of the principal seats of Eastern commerce; and caravans set out regularly from it for Aleppo, Smyrna, and Constantinople; but any one who consults a map of Asia Minor, and of the contiguous countries, will see at once that Trebisond and the neighbouring ports on the S.E. coast of the Black Sea are the natural channels through which Armenia, Koordistan, and the north-western parts of Persia may best maintain an intercourse with Europe. We shall afterwards show that the danger to vessels in the roads of Trebisond has been very much exaggerated. — (See **TREBISOND**.) In the event, however, of the commerce with the countries referred to becoming of any considerable importance, Sinope would be an advantageous *entrepôt* to which goods might be brought, and whence they might be conveyed in proper vessels, and at proper times, to the other ports. At all events, it is of material importance that a direct intercourse with the southern coast of the Black Sea should be established, and that the trade with it should not be carried on, as hitherto, through Odessa. — (For further particulars as to Sinope, see *Tournefort, Voyage du Levant*, tom. II. pp. 202-212; and *Norie's Sailing Directions for the Black Sea*. See also the article **TREBISOND**, in this work.)

**SKINS.** The term is applied in commercial language to the skins of those animals, as calves, deer, goats, lambs, &c., which, when prepared, are used in the lighter works of bookbinding, the manufacture of gloves, parchment, &c.; while the term hides is applied to the skins of the ox, horse, &c. which, when tanned, are used in the manufacture of shoes, harness, and other heavy and strong articles. Lamb and kid skins are principally

used in the glove manufacture; 120 skins being supposed to produce, at an average, 18 dozen pairs of gloves.

Account of the Quantities of the different Kinds of Skins imported into the U. Kingdom during each of the 6 Years ending with 1841, specifying the Countries whence they were brought, and the Quantities brought from each.

**SLATE (ROOF).** (Ger. *Schiefer*; Fr. *Ardoise*; It. *Lavagna, Lastra*; Sp. *Pizarra*). a fossil or compact stone (*argillaceous schistus*) that may be readily split into even, smooth, thin laminae. There are several varieties of this valuable mineral, the prevailing colours being grey, blue, and brown. But the tints are very various; and slates are often marked with streaks of a different colour from the ground. Slate is principally used in the covering of houses, for which purpose it is infinitely superior to thatch or tiles, and is far less expensive than lead. Good roofing slate should not absorb water; and it should be so compact as not to be decomposed by the action of the atmosphere. When properly selected, roof slates are of almost perpetual duration; but those which are spongy and imbibe moisture speedily get covered with moss, and require, at no very distant period, to be renewed.

The use of slates in the covering of houses is entirely European. From the Hellespont to China inclusive there is not a single slated house; and this does not arise from any want of slate, which is as abundant in Asia as in Europe.

Slates carried by land have never been subjected to any duty; but those carried coastwise were, until 1831, charged with duties varying according to their size and species. The injustice of this distinction, and the impolicy of laying any duty on an article of this sort, are obvious. The revenue it produced was quite inconsiderable, not exceeding 25,000*l.* a year. It was repealed at the same time as the duty on coal carried coastwise.

Since the repeal of the duty, the consumption of slate has been materially increased; and it is now

extensively employed for various purposes to which it was not formerly made applicable, such as the flooring of warehouses and vaults, the paving of streets, the formation of cisterns, the covering of worn or decayed floors, and of the walls of houses in exposed situations, &c. The slate used for these purposes is cut by the circular saw into pieces of from  $\frac{1}{4}$  an inch to 2 inches thick. Many hundred tons have been used in the course of the last few years in paving, flooring, &c. at the London Docks, and other large establishments.

The principal slate quarries in Great Britain are in Caernarvonshire. Those belonging to Mr. Pennant (formerly Lord Penrhyn's), near Bangor, employ about 1,500 men and boys, and are the most extensive and valuable in the empire. The other quarries in the same county employ about 1,620 men and boys: and there are some in other parts of Wales. There are also extensive quarries at Ulverston, in Lancashire; and others, of inferior magnitude, in various parts of Westmoreland and Cumberland.

The principal slate quarries in Scotland are at Easdale and Balachulish, in Argyleshire. Speaking generally, the Scotch quarries do not afford slates of the size and smoothness of those obtained from the Welsh quarries; and the wood-work of the roofs covered with them requires to be stronger.

Roofing slates are of different sizes, and are denominated Imperials, Queens, Princesses, &c. Their price, supposing their quality to be in other respects equal, depends partly on their size and partly on their weight.

**SLAVES AND SLAVE TRADE.** A slave, in the ordinary sense of the term, is an individual at the absolute disposal of another, who has a right to employ and treat him as he pleases. But the state of slavery is susceptible of innumerable modifications; and it has been usual, in most countries where it has been long established, to limit in various ways the power of the master over the slave. The *slave trade* is, of course, the business of those who deal in slaves.

*Origin of Slavery.*—A great deal of learning has been employed in tracing the history of slavery, though the subject is still far from exhausted. It seems most probable that it originally grew out of a state of war. In rude uncivilised communities, where the passion of revenge acquires a strength unknown in more advanced states of society, captives taken in war are adjudged to belong to the victors, who may either put them to the sword, or reduce them to a state of servitude. In antiquity, the ideas of war and slavery were inseparable. Probably in very remote ages, prisoners were most commonly put to death; but the selfish gradually predominated over the more passionate feelings, and for many ages it was usual to reduce them to the condition of slaves; being either sold by their captors to others, or employed by them as they might think fit.

The practice of reducing men to a state of slavery, having once begun, was extended in various ways. The progeny of slaves or of women in a state of slavery were slaves; men born free might sell themselves as slaves; and parents had authority, in Judæa and Rome, to dispose of their children for the same purpose. — (*Michaelis on the Laws of Moses*, ii. 163. Eng. ed.) It was the law of Rome, and of most other ancient states, that the persons of debtors who had contracted obligations which they could not discharge, should become the property of their creditors. "*Servi*," says Justinian, "*autem aut nascuntur aut fiunt: nascuntur ex ancillis nostris, fiunt aut jure gentium, id est ex captivitate; aut jure civili, cum liber homo major viginti annos ad pretium participandum se vendidit passus est.*" — (*Instit. lib. i. tit. 3.*)

*Treatment of Slaves.*—The treatment of slaves in antiquity, as in more modern times, differed very widely in different countries and periods, and among different classes of slaves in the same country, and at the same time. A great deal also depended on the character of particular masters. Slaves bred up in the house or family of the masters were uniformly treated with greater indulgence than others, and became entitled, by custom, to several important privileges. At Athens, slaves appear to have been better treated than in any other ancient state; and Demosthenes affirms, in his second Philippic, that, "a slave was better off at Athens than a free citizen in many other countries." In republican Rome, the masters had the power of life and death over their slaves, who were often treated with the most detestable barbarity. It was not an uncommon practice to expose old, useless, or sick slaves to starve in an island in the Tiber! We may, as Hume has justly remarked, "imagine what others would practise, when it was the professed maxim of the elder Cato to sell his superannuated slaves at any price, rather than maintain what he esteemed a useless burden." — (*Plutarch, in Vita Catonis*), *Ergastula*, or dungeons, where slaves were confined and chained at night, and where they were sometimes made to work in the day, were common all over Italy. Columella advises that they be always built under ground — (*lib. i. c. 6.*): and remains of them are still seen in the lower stories of ancient buildings in Italy and Sicily. Hundreds of slaves were sometimes put to death for the crime of one only; and they were exposed, when they committed any petty fault, to all the violence of the most capricious and unrestrained despotism.

It was not uncommon in the barbarous ages to immolate captives on the tomb of such chiefs as had fallen in battle; and magnificent games were celebrated on these occasions.\* The gladiatorial exhibitions, so common at Rome after the Punic wars, seem to have grown out of this practice. These were contests between slaves, denominated gladiators, trained to fight in public for the amusement of a ferocious populace, who took the

\* Achilles sacrificed 12 Trojan captives on the tomb of Patroclus. — (*Iliad*, lib. 23.)

greatest delight in their sanguinary combats. Thousands of unfortunate wretches were annually sacrificed in this inhuman sport. After his triumph over the Dacians, Trajan exhibited spectacles, in which no fewer than 11,000 wild beasts of different kinds were killed, and 10,000 gladiators fought!—(*Adam's Roman Antiquities*, p. 317.)

The cruelties inflicted on the slaves occasioned frequent revolts, attended by the most dreadful excesses. Spartacus, a Thracian captive, destined for the profession of a gladiator, headed a rebellion of gladiators and slaves, which continued for 3 years, and required all the force of the republic to suppress. When finally defeated by Crassus, about 6,000 of his followers were nailed to the cross, in double rows, that extended almost from Capua to Rome.—(*Ferguson, Rom. Republic*, c. 16.) No one acquainted with the manners of the Romans can be surprised at the atrocities of so many of the emperors. The worst of them treated the citizens better than the latter treated the slaves. Humanity could not be looked for in the rulers of a state in which human life was held in contempt, and human suffering made the subject of popular sport.

In consequence partly of their ill usage, and partly of its being accounted cheaper to buy than to breed slaves, vast numbers were annually imported into Italy. Thrace and the countries round the Black Sea furnished large supplies of the best slaves; and numbers were obtained from Egypt, Syria, Britain, Gaul, and other countries. The famous island of Delos, in the centre of the Cyclades, was the greatest slave market of antiquity; as many as 10,000 slaves have been sold there in a single day.—(*Strabo*, lib. xiv.)

It should, however, be observed, that slavery among the ancients was very different from the slavery of modern times, at least from the slavery that exists in the U. States, Cuba, &c., and which did till lately exist in our West India islands. Slaves in antiquity were physically identical with freemen, and were discriminated only by peculiar marks\*, or by the character of their employments. It was truly said of them, "*Servi homines sunt, et æque unum lactem biberunt, etiam si illos malus fatus oppresserit.*" (*Petronius ed Burm.* cap. 71.) But modern slaves belong to a different variety of the human race; the distinction between them and their masters being obvious and striking. Owing to this difference between the slaves of ancient and modern times, the influence of slavery at the two periods has been materially different. The freemen of antiquity, who were accustomed to tyrannise over persons in all respects (except their social rank) on a level with themselves, could hardly fail to acquire a ferocity of disposition, and coarseness of manner, that either disappear, or are much softened down in a society where all are equal. But such results do not certainly follow to the same, nor perhaps to any extent, from the practice of modern slavery. In this case the masters do not tyrannise over their equals, but over those who differ from the class to which they belong by the broadest and most distinctly marked characters; and their behaviour towards their slaves is found to have very little influence over their behaviour towards their fellow citizens. The white inhabitants of Virginia, for example, are quite as gentlemanlike in their manners, and observant of the respect due to others, as their countrymen of New York or New England. Indeed, if there be any difference between them, it will probably be found to be in favour of the former.

Although, therefore, there can be no doubt that the slavery that existed in the ancient world had a brutalising influence over the manners of the people, and gave them a degree of ferocity to which happily we have long been strangers, it by no means follows that the slavery which prevails in the new world should have the same influence. In the former case, masters and slaves were of the same variety of the species; but in the latter, the masters belong to one variety, and the slaves to a totally distinct, and most probably lower, variety; so that the domination of the one set, and the subjection of the other, partake in some measure of the character of the supremacy exercised by man over the lower animals; and have comparatively little influence over the morals or conduct of the masters.

There can be no manner of doubt that the slavery that existed in the ancient world was unfavourable to the progress of arts and industry. In the most celebrated nations of antiquity, the greater number of mechanical employments were principally carried on by slaves and the dregs of the free population; so that, while the workmen employed in them were without emulation or invention, the employments themselves were looked upon as mean and servile. To such an extent did this prejudice operate, that in Rome, Sparta, and other celebrated states, agriculture and arms were the only occupations that were reckoned worthy of a freeman, or in which he could engage without being degraded.

But the principal difference between the slavery of the ancient and modern world

\* Slaves wore their beards and hair long; and when manumitted they shaved their head and put on a cap, which has in consequence become the symbol of liberty. Brutus, after the assassination of Cæsar, coined money, on which the figure of a cap was impressed, to indicate that the people had been rendered free.—(See *Adam's Antiquities*, p. 376.; See, also, *Burlamaqui, Principes du Droit des Gens*, iv. 454., where the reader will remark a singular error.)

consists in the fact that in the former freemen were quite as well suited as slaves for carrying on every art and employment; while in the latter the peculiar constitution of the slaves fit them for employments which, though of the highest importance, cannot be carried on by their masters. The greater intelligence of the whites enables them to exercise a decided superiority over the black or coloured natives of the torrid zone, notwithstanding the latter are incomparably better adapted for the prosecution of those laborious occupations which are indigenous, as it were, to the soil they occupy. It is doubtful whether the constitution of the whites will ever be so accommodated to the climate of the Tropics, as to enable them to engage in that field labour, carried on in the lower and hotter districts (*tierras calientes*), which is congenial to the blacks. At all events, no such accommodation has hitherto taken place; and, therefore, it would appear that some modification of slavery, or that a supply of suitable compulsory labour of some sort or other, is necessary to enable civilised man to occupy, and to turn to a useful account, some of the most fertile and extensive regions of the earth. And hence the propriety of inquiring into the policy of institutions like this, of carefully considering the peculiar conditions or circumstances under which they are to be acted upon. Slavery in Europe may be, and we believe is (notwithstanding the opinion of Michaelis to the contrary), in all respects most objectionable; but it is quite another matter with slavery in Louisiana, Cuba, and Brazil; the circumstances under which they are placed are so very different from ours, that an institution exceedingly inexpedient on this side the Atlantic, may be especially suited to them.

The establishment of Christianity contributed more, perhaps, than any thing else, first to mitigate, and finally to suppress slavery in Europe. But, within no very long period after its abolition had been completely effected in this part of the world, it began to be established in America.

*The African Slave Trade* was commenced by the Portuguese, in 1442. It was, however, but of trifling extent till the commencement of the 16th century. In consequence, however, of the rapid destruction of the Indians employed in the mines of St. Domingo or Hayti, Charles V. authorised, in 1517, the introduction into the island of African slaves from the establishments of the Portuguese on the coast of Guinea. The concurrence of the emperor was obtained by the intercession of the celebrated Las Casas, bishop of Chiapa, who laboured to protect the Indians by enslaving the Africans; though, as the latter were certainly more vigorous and capable of bearing fatigue than the former, the measure was not in reality so contradictory as it would, at first sight, appear to be. — (*Robertson's Hist. America*, book iii.)

The importation of negroes into the West Indies and America, having once begun, gradually increased, until the traffic became of great extent and importance. Sir John Hawkins was the first Englishman who engaged in it: and such was the ardour with which our countrymen followed his example, that they exported from Africa more than 300,000 slaves between the years 1680 and 1700; and between 1700 and 1786, 610,000 Africans were imported into Jamaica only; to which adding the imports into the other islands and the continental colonies, and those who died on their passage, the number carried from Africa will appear immense. — (*Bryan Edwards, Hist. West Indies*, ii. 64.) The importations by other nations, particularly the French and Portuguese, were also very great.

We do not intend, though the subject be one of the highest interest, to make any lengthened inquiries as to the legitimacy or illegitimacy, the policy or impolicy, of the slave trade. We may, however, shortly observe that there can be no doubt that slavery has always existed in Africa; and it is sufficiently well known that previously to the commencement of the traffic, such of the captives taken in war as could not be advantageously employed as slaves were most commonly put to death; cannibalism, the exposure of infants, and human sacrifices being then also very frequent. The slave trade, by opening a ready and profitable market for slaves, assisted in putting an end to these enormities, though it be, at the same time, true that the desire of profiting by their sale has tempted the petty princes to make war on each other for the chance of making captives, and has given a stimulus to man-stealing and other atrocities. — (*Geog. Dict. art. Africa*.) There can, however, be no reasonable doubt that civilisation has been, on the whole, advanced by the practice of the trade. At all events, no evidence either has been, or, we believe, can be, produced to show that the state of Africa would have been perceptibly improved had the slave trade never been heard of. But it is quite certain, had such been the case, that there would have been a wide difference in the condition of the West Indies, the Southern States of North America, Brazil, &c. It will, we apprehend, be found that the culture of sugar and other great colonial staples cannot be profitably carried on in these countries, nor, perhaps, anywhere within the Tropics, without a supply of compulsory labour of some sort or other (see *anté*, p. 324.). Neither, we apprehend, can there be a question that the extensive culture of these staples has added greatly to the comforts and conveniences of the

inhabitants of most civilised countries; and, if this addition to their enjoyments has been effected without injury to the slaves, it will not be so easy a matter as has been supposed to show the impolicy of the trade. But those who inquire dispassionately into the subject will probably come to the conclusion, that, instead of being injured, the slaves have gained by being carried from the Old to the New World. Speaking generally, the negroes are in the lowest state of abasement, possessing merely the rudiments of the most indispensable arts, a prey to the vilest superstition and tyranny, without any tincture of learning, and with little or no regard for the future. The circumstances under which they are placed in their native land may, perhaps, account for the low state in which we find them; but, however explained, the genuine negroes of Africa are admitted, even by those least inclined to depreciate them, to be, for the most part, "either ferocious savages, or stupid, sensual, and indolent."—(*Prichard, History of Man*, ii. 338. 3d ed.)—Excepting the violence done to their habits and inclinations, no one who knows any thing of their state in Africa and in the Western hemisphere can possibly doubt that they have gained most materially by their transference to the latter.

But, supposing their character to be such as represented, still it may be contended that their weakness or inferiority gives the whites no right to lord it over them, to convey them to foreign countries, and to reduce them to a state of bondage: and no doubt it is exceedingly difficult to specify in how far the civilised portion of mankind may be entitled to control those that are decidedly less intelligent and advanced than themselves. That they have done so from the earliest ages, is, however, indisputable; and every one who has any acquaintance, however slight, with the history of society, is aware that the consequences of this control have been in the highest degree advantageous; for, though polished nations have too often abused their superior power and intelligence, still it is abundantly certain that but for their dictating to and subjugating others, half the civilised world would at this moment have been immersed in the grossest barbarism. But without entering into any discussion respecting the application of this principle in the case of Africa, it is enough to know that the Europeans did not originate slavery in that continent; the Africans were enslaved and disposed of as other goods and chattels for centuries before they began to be purchased by the former; and the conduct of the whites is to be determined by the nature of the treatment which the slaves received at their hands.

Now, though it be abundantly certain that this has been on the whole indulgent, it is not to be denied that very many enormities have been perpetrated, which the law should have prohibited and severely punished. The crowding of slaves together in their passage across the Atlantic, and the cruelties which some worthless masters have been accustomed to commit, are of this description. But these outrages are not of the essence of slavery; and they might and should, no doubt, have been suppressed. An institution is not to be confounded with its abuse. The object of the slave trade was to procure a supply of compulsory labourers for the service of the colonists in the West Indies and other tropical countries; but it did not, therefore, follow that the colonists were to be under no restraints either as to the methods by which they sought to procure such bondmen, or as to the power which they might exercise over them.

Neither does it follow, because the slave trade may have been for the general advantage of mankind at a particular period, that it should be indefinitely extended. When as large a supply of negroes has been imported as may be necessary to supply its markets with labour, there can be no good reason for allowing their farther importation into a country, at the same time that there seem to be sundry good reasons why it should be put a stop to. By preventing the importation of fresh slaves, the proprietors may find it for their interest to be more attentive to the condition of those already in their possession than they might otherwise be; for it is evident that in such cases they could only look to the natural increase of their slaves for a supply of labour in future; and that they could not expect to supply by foreign importations the place of those who might perish by bad treatment. On these grounds we are inclined to think that the English and Americans acted with quite as much prudence as humanity, in forbidding, in 1807, the farther importation of slaves into their dominions. Cuba, and perhaps also Brazil, might, it is alleged, advantageously follow their example. The slave population in these countries is now probably large enough to furnish, with proper treatment, an adequate supply of labourers, how rapidly soever we may suppose them to advance in the career of industry.

We have ventured to submit these statements to the consideration of the reader, not because we have any desire to extenuate the evils inseparable from a state of slavery, or the cruelties of which slave-dealers and slave-proprietors may be justly accused. But, after making every allowance for these drawbacks, it is evident, if the preceding statements be well founded, that slavery as it exists in modern times, and still more as it might be established, is not the unqualified abuse it has uniformly almost been represented. On

the contrary, we are disposed to regard it as being, under proper modifications all but indispensable to the profitable cultivation of the western countries in which it is at present met with. It is to no purpose to say that free labour is cheaper than slave labour. We more than doubt whether, when applied to them, there be any foundation for such a statement; but that is really immaterial, the fact being, that were slavery abolished, few or no free labourers would be found to engage in the great departments of industry carried on in the slave-holding countries. It would, indeed, be a contradiction and an absurdity to suppose that it should be otherwise. In countries with a fruitful soil and under a tropical sun, the principal wants of the inhabitants are supplied with but little exertion, and the *dolce far niente* is their *summum bonum*. In such situations industry is a sickly plant; and instead of employing their surplus time in the production of articles of ostentation and luxury, the inhabitants most commonly waste it in idleness and apathy. Were the slaves completely emancipated in the U. States, Cuba, and Brazil, it is all but certain that the culture of sugar and cotton would be as completely abandoned in them as in Hayti. And if the change were accompanied by a considerable improvement in the condition of the black population, the sacrifice might not, perhaps, be deemed too great. But where is the ground for supposing that such would be the case? Indeed the fair presumption seems to be the other way. Little, at all events, would be gained by turning a laborious, well-fed slave, into an idle, improvident, and perhaps beggarly freeman.

There may, however, be such a thing in a colony as a *quasi* emancipation of slaves, or, which is the same thing, regulations may be enacted giving the slaves freedom, and at the same time excluding them from the possession of that which can alone make that freedom of any practical value. Speaking generally, the blacks in our colonies have little or no capital; and, therefore, they must live either by occupying patches of land on their own account, or by working for others. And provided they be debarred, by regulations effectual to their object, from acquiring or occupying small portions of land, they will necessarily be compelled, how much soever they may dislike it, to engage as labourers on the estates of others. This, however, is probably the very worst sort of compulsory labour. It gives the blacks enough of freedom to make them in the last degree dissatisfied with the regulations by which it is sought practically to nullify it, and makes them at once discontented, refractory, and idle. But, wretched as it is, we believe that at this moment the obstacles that have been and may be thrown in the way of the blacks obtaining patches of land are the principal dependence of the colonists in our West India islands for the continued culture of colonial staples!

Without entering farther on a subject which would require a long essay for its discussion, we may remark that a good work on the subject of slavery is a desideratum which will not, probably, be speedily supplied. In this country it has been treated as if it were everywhere the same, and as if it were in every case an unmixed evil, and an outrage on humanity. This, however, is to confound the most obvious distinctions, to substitute abuse for reasoning, assertion for inquiry, and prejudice for principle. Those who inquire dispassionately into the matter will, perhaps, see abundant reason for agreeing in opinion with Michaelis and Grotius (*De Jure Belli*, lib. ii. cap. 27.), that while slavery has its evils, it may also have its advantages; and that if there be countries and states of society in which the former very decidedly preponderate, there are those also in which the preponderance is as certainly on the side of the latter.

*Abolition of the Slave Trade.* — Notwithstanding the sanction it received from parliament, and the supineness of the public, the slave trade was frequently denounced by distinguished individuals, in this and other countries, as essentially cruel and unjust.

The first motion with relation to it in parliament was made in 1776; but the subject was not taken up systematically till 1787, when a committee was formed, of which Mr. Granville Sharp and Mr. Clarkson, whose names are imperishably associated with the abolition of the slave trade, were members. This committee collected some highly coloured evidence of the enormities produced by the trade, which they circulated throughout the country, and thereby succeeded in making a great impression on the public mind. After a number of witnesses on both sides had been examined before the privy council, Mr. Wilberforce, on the 12th of May, 1789, moved a series of resolutions condemnatory of the traffic. They were supported by Mr. Burke, Mr. Pitt, and Mr. Fox. But, notwithstanding the resolutions were carried, nothing was done to give them effect. The friends of the trade having obtained leave to produce evidence at the bar of the House, contrived to interpose so many delays that the session passed off without any thing being done. In the following sessions the struggle was continued with various success, but without any definite result. At length the triumph of the abolitionists was finally consummated in 1807; a bill for the total and immediate abolition of the slave trade, having been carried in both Houses by immense

majorities, received the royal assent on the 25th of March, being the last act of the administration of Mr. Fox and Lord Grenville.

America abolished the slave trade at the same time as England.

But notwithstanding what had been done, further measures were soon discovered to be necessary. The Spanish and the Portuguese continued to carry on the trade to a greater extent than ever; and British subjects did not hesitate, under cover of their flags, to become partners in their adventures. An effectual stop was put to this practice in 1811, by the enactment of a law introduced by Mr. (now Lord) Brougham, that made trading in slaves punishable by transportation for 14 years, or by confinement to hard labour for a term of not more than 5 years nor less than 3 years. And since that period the British government has zealously exerted itself for the suppression of the slave trade in every part of the world. But, in defiance of its efforts, considerable numbers of slaves still continue to be carried across the Atlantic to Brazil and Cuba, and it will be no easy matter wholly to suppress the trade. Provided, indeed, the great powers were to concede a mutual right of search, and to make the traffic in slaves piracy, it might be effectually put down; but there are all but insuperable prejudices and jealousies in the way of their consenting to adopt such measures. (Mr. Bantinel's work on the Slave Trade contains the clearest and best exposition that is anywhere to be found of its rise, progress, and suppression; and of the efforts made by the British government to induce other nations to abandon it.)

The British laws relative to the slave trade were consolidated by the act 5 Geo. 4. c. 113. But, as the greater part of this act was superseded by the statute for the extinction of slavery (3 & 4 Will. 4. c. 73.), we shall merely lay before the reader the clauses still in force relating to dealing in slaves.

*Dealing in Slaves in the High Seas, &c. to be deemed piracy.*—And if any subject or subjects of his Majesty, or any person or persons residing or being within any of the dominions, forts, settlements, factories, or territories, now or hereafter belonging to his Majesty, or being in his Majesty's occupation or possession, or under the government of the United Company of Merchants of England trading to the East Indies, shall, except in such cases as are by this act permitted, after the 1st day of January, 1835, upon the high seas, or in any haven, river, creek, or place, where the admiral has jurisdiction, knowingly and wilfully carry away, convey, or remove, or aid or assist in carrying away, conveying, or removing, any person or persons as a slave or slaves, or for the purpose of his, her, or their being imported or brought as a slave or slaves into any island, colony, country, territory, or place whatsoever, or for the purpose of his, her, or their being sold, transferred, used, or dealt with as a slave or slaves; or shall, after the said 1st day of January, 1835, except in such cases as are by this act permitted, upon the high seas or within the jurisdiction aforesaid, knowingly and wilfully ship, embark, receive, detain, or confine, or assist in shipping, embarking, receiving, detaining, or confining, on board any ship, vessel, or boat, any person or persons for the purpose of his, her, or their being carried away, conveyed, or removed as a slave or slaves, or for the purpose of his, her, or their being imported, or brought as a slave or slaves into any island, colony, country, territory, or place whatsoever, or for the purpose of his, her, or their being sold, transferred, used, or dealt with as a slave or slaves; then and in every such case the persons so offending shall be deemed and adjudged guilty of piracy, felony, and robbery, and being convicted thereof shall suffer death without benefit of clergy, — and loss of lands, goods, and chattels, as pirates, felons, and robbers upon the seas ought to suffer. — § 9.

*Persons dealing in Slaves, or exporting or importing Slaves, &c., guilty of Felony.*—And (except in such special cases as are by this act permitted) if any persons shall deal or trade in, purchase, sell, barter, or transfer, or contract for the dealing or trading in, purchase, sale, barter, or transfer of slaves, or persons intended to be dealt with as slaves; or shall, otherwise than as aforesaid, carry away or remove, or contract for the carrying away or removing of slaves or other persons, as or in order to their being dealt with as slaves; or shall import or bring, or contract for the importing or bringing into any place whatsoever, slaves, or other persons, as or in order to their being dealt with as slaves; or shall, otherwise than as aforesaid, ship, tranship, embark, receive, detain, or confine on board, or contract for the shipping, transshipping, embarking, receiving, detaining, or confining on board of any ship, vessel, or boat, slaves or other persons, for the purpose of their being carried away or removed, as or in order to their being dealt with as slaves; or shall ship, transship, embark, receive, detain, or confine on board, or contract for the shipping, transshipping, embarking, receiving, detaining, or confining on board of any ship, vessel, or boat, slaves or other persons, for the purpose of their being imported or brought into any place whatsoever, as or in order to their being dealt with as slaves; or shall fit out, man, navigate, equip, despatch, use, employ, let or take to freight or on hire, or contract for the fitting out, manning, navigating, equipping, despatching, using, employing, letting, or taking to freight or on hire, any ship, vessel, or boat, in order to accomplish any of the objects, or the contracts in relation to the objects, which objects and contracts have herein-before been declared unlawful; or shall knowingly and wilfully lend or advance, or become security for the loan or advance, or contract for the lending or advancing, or becoming security for the loan or advance of money, goods, or effects, employed or to be employed in accomplishing any of the objects, or the contracts in relation to the objects, which objects and contracts have herein-before been declared unlawful; or shall knowingly and wilfully become guarantee or security, or contract for the becoming guarantee or security, for agents employed or to be employed in accomplishing any of the objects, or the contracts in relation to the objects, which objects and contracts have herein-before been declared unlawful, or in any other manner to engage, or contract to engage, directly or indirectly, therein, as a partner, agent, or otherwise; or shall knowingly and wilfully ship, transship, lade, or receive or put on board, or contract for the shipping, transshipping, lading, receiving, or putting on board of any ship, vessel, or boat, money, goods, or effects, to be employed in accomplishing any of the objects, or the contracts in relation to the objects, which objects and contracts have herein-before been declared unlawful; or shall take the charge or command, or navigate or enter and embark on board, or contract for the taking the charge or command, or for the navigating or entering and embarking on board of any ship, vessel, or boat, as captain, master, mate, surgeon, or supercargo, knowing that such ship, vessel, or boat is actually employed, or is in the same voyage, or upon the same occasion, in respect of which they shall so take the charge or command, or navigate or enter and embark, or contract so to do as aforesaid, intended to be employed in accomplishing any of the objects, or the contracts in relation to the objects, which objects and contracts have herein-before been declared unlawful; or shall knowingly and wilfully insure, or contract for the insuring of any slaves, or any property or other subject matter engaged or employed in accomplishing any of the objects, or the contracts in relation to the objects, which objects and contracts have herein-before been declared unlawful; or shall wilfully and fraudulently forge or counterfeit any

certificate, certificate of valuation, sentence or decree of condemnation or restitution, copy of sentence or decree of condemnation or restitution, or any receipt (such receipts being required by this act), or any part of such certificate, certificate of valuation, sentence or decree of condemnation or restitution, copy of sentence or decree of condemnation or restitution, or receipt as aforesaid; or shall knowingly and wilfully utter or publish the same, knowing it to be forged or counterfeited, with intent to defraud his Majesty, or any other person or persons whatsoever, or any body politic or corporate; then, and in every such case the persons so offending, and their procurers, counsellors, aiders, and abettors, *shall be felons, and shall be transported for a term not exceeding 14 years, or shall be confined and kept to hard labour for a term not exceeding 5 or less than 3 years, at the discretion of the court before whom such offenders shall be tried.*—§ 10.

*Seamen, &c. serving on board such Ships guilty of Misdemeanour.*—And (except in such special cases or for such special purposes as are by this act permitted) if any person shall enter and embark on board, or contract for the entering and embarking on board of any ship, vessel, or boat, as petty officer, seaman, marine, or servant, or in any other capacity not herein-before specifically mentioned, knowing that such ship, vessel, or boat is actually employed, or is in the same voyage, or upon the same occasion, in respect of which they shall so enter and embark on board, or contract so to do as aforesaid, intended to be employed in accomplishing any of the objects, or the contracts in relation to the objects, which objects and contracts have herein-before been declared unlawful; then, and in every such case, the persons so offending, and their procurers, counsellors, aiders, and abettors, shall be guilty of a misdemeanour only, and shall be punished by imprisonment for a term not exceeding 2 years.—§ 11.

**Abolition of Slavery.**—We have already alluded (*anté*, p. 324.) to the memorable act of 1833, for the **ABOLITION OF SLAVERY** throughout the British colonies. In enacting this celebrated statute, parliament endeavoured to reconcile the apparently conflicting claims of humanity and justice, by providing for the emancipation of the slaves, without prejudice to the just rights and claims of their proprietors. This was effected by assigning to the latter the sum of *twenty millions* sterling, which was distributed amongst them on their complying with the provisions of the act. This, in perhaps, the greatest pecuniary sacrifice ever voluntarily made by any nation in vindication of the right of property. But it was not too great for the object in view; for had that right been violated in this instance, a precedent would have been set for its violation in others, and the consequences would have been most disastrous. The measure, in fact, reflects quite as much credit on the wisdom and honesty, as on the generosity, of the British nation.

We gave, in the previous edition of this work, an abstract of this celebrated statute, to which we beg to refer the reader who may wish to become minutely acquainted with its provisions. It is sufficient, now, to mention that it enacted that slavery should cease in all our possessions on the 1st of August, 1834; when the slaves were to become apprenticed labourers, their final and complete emancipation taking place partly on the 1st of August, 1838, and partly on the 1st of August, 1840. But a clamour having been raised against the duration of the apprenticeship, its period was shortened, and the blacks became universally free in 1838.

**Distribution of Slave Compensation.**—The commissioners for the apportionment of the 30,000,000*l.* granted by parliament as compensation to slave owners, under the act 3 & 4 Will. 4. cap. 73., issued the following table, showing the average value of a slave in each colony; the number of slaves in each; the total value of the slaves, supposing the annual value of each were realised; and the proportion of the 30,000,000*l.* received by each colony.

Colony.	Average Value of a Slave from 1822 to 1830.	Number of Slaves by the last Registration in this Country.	Relative Value of the Slaves.	Proportion of the 30,000,000 <i>l.</i> to which each Colony is entitled.

**SMALTZ**, or **SMALT** (Ger. *Schmaltz*; Du. *Smalt*; Fr. *Smalt*; It. *Smalto azzurro*, *Smaltino*; Sp. *Esmalte*, *Azul azur*; Rus. *Lasor*), an oxide of cobalt, melted with siliceous earth and potash. It is a sort of glass, of a beautiful deep blue colour; and being ground very fine, is known by the name of powder blue. The colour of smalts is not affected by fire; and it is consequently in great demand in the painting of earthenware. It is also employed in the colouring of paper, and for other purposes in the arts. Beckmann has proved that the process used in the preparation of smaltz was invented about the end of the 15th or the beginning of the 16th century; and that the blue

glass of the ancients owes its colour, not to the presence of cobalt or of smaltz, but to that of iron. — (*Hist. of Inventions*, vol. ii. art. *Cobalt*.)

Smaltz is principally manufactured in Germany and Norway. Of 118,638 lbs. imported into Great Britain in 1840, 97,751 lbs. came from Norway, and the remainder from Germany and Holland. The entries of smaltz for home consumption have latterly decreased. In 1843 they amounted to 145,470 lbs.

**SMUGGLING**, the offence of importing prohibited articles, or of defrauding the revenue by the introduction of articles into consumption, without paying the duties chargeable upon them. It may be committed indifferently either upon the excise or customs revenue.

*Origin and Prevention of Smuggling.* — This crime, which occupies so prominent a place in the criminal legislation of all modern states, is wholly the result of vicious commercial and financial legislation. It is the fruit either of prohibitions of importation, or of oppressively high duties. It does not originate in any depravity inherent in man; but in the folly and ignorance of legislators. A prohibition against importing a commodity does not take away the taste for it; and the imposition of a high duty on any article occasions a universal desire to escape or evade its payment. Hence the rise and occupation of the smuggler. The risk of being detected in the clandestine introduction of commodities under any system of fiscal regulations may always be valued at a certain average rate; and wherever the duties exceed this rate, smuggling immediately takes place. Now, there are plainly but two ways of checking this practice, — either the temptation to smuggle must be diminished by lowering the duties, or the difficulties in the way of smuggling must be increased. The first is obviously the more natural and efficient method of effecting the object in view; but the second has been most generally resorted to, even in cases where the duties were quite excessive. Governments have uniformly almost consulted the persons employed in the collection of the revenue with respect to the best mode of rendering taxes effectual; though it is clear that the interests, prejudices, and peculiar habits of such persons utterly disqualify them from forming a sound opinion on such a subject. They cannot recommend a reduction of duties as a means of repressing smuggling and increasing revenue, without acknowledging their own incapacity to detect and defeat illicit practices; and the result has been, that, instead of ascribing the prevalence of smuggling to its true causes, the officers of customs and excise have almost universally ascribed it to some defect in the laws, or in the mode of administering them, and have proposed repressing it by new regulations, and by increasing the number and severity of the penalties affecting the smuggler. As might have been expected, these attempts have, in the great majority of cases, proved signally unsuccessful. And it has been invariably found, that no vigilance on the part of the revenue officers, and no severity of punishment, can prevent the smuggling of such commodities as are either prohibited or loaded with oppressive duties. The smuggler is generally a popular character; and whatever the law may declare on the subject, it is ludicrous to expect that the bulk of society should ever be brought to think that those who furnish them with cheap brandy, geneva, tobacco, &c. are guilty of any very heinous offence.

“To pretend,” says Dr. Smith, “to have any scruple about buying smuggled goods, though a manifest encouragement to the violation of the revenue laws, and to the perjury which almost always attends it, would, in most countries, be regarded as one of those pedantic pieces of hypocrisy, which, instead of gaining credit with anybody, seems only to expose the person who affects to practise them to the suspicion of being a greater knave than most of his neighbours. By this indulgence of the public, the smuggler is often encouraged to continue a trade, which he is thus taught to consider as, in some measure, innocent; and when the severity of the revenue laws is ready to fall upon him, he is frequently disposed to defend with violence what he has been accustomed to regard as his just property; and from being at first rather imprudent than criminal, he, at last, too often becomes one of the most determined violators of the laws of society.” — (*Wealth of Nations*, p. 406.)

To create by means of high duties an overwhelming temptation to indulge in crime, and then to punish men for indulging in it, is a proceeding completely subversive of every principle of justice. It revolts the natural feelings of the people; and teaches them to feel an interest in the worst characters — for such smugglers generally are — to espouse their cause, and avenge their wrongs. A punishment which is not proportioned to the offence, and which does not carry the sanction of public opinion along with it, can never be productive of any good effect. The true way to put down smuggling is to render it unprofitable; to diminish the temptation to engage in it: and this is not to be done by surrounding the coasts with cordons of troops, by the multiplication of oaths and penalties, and making the country the theatre of ferocious and bloody contests in the field, and of perjury and chicanery in the courts of law; but by repealing prohibitions, and reducing duties, so that their collection may be enforced with a moderate degree of vigilance; and that the forfeiture of the article may be a sufficient penalty

upon the smuggler. It is in this, and in this only, that we must seek for an effectual check to illicit trafficking. Whenever the profits of the fair trader become nearly equal to those of the smuggler, the latter is forced to abandon his hazardous profession. But so long as prohibitions or oppressively high duties are kept up, or, which is, in fact, the same thing, so long as *high bounties* are held out to encourage the adventurous, the needy, and the profligate, to enter on this career, we may be assured that armies of excise, and custom-house officers, backed by the utmost severity of the revenue laws, will be insufficient to hinder them.

*Smuggling in France and England.*—The *Report* of Mr. Villiers (now Lord Clarendon) and Dr. Bowring, on the commercial relations between France and Great Britain, contains some curious and instructive details as to the smuggling carried on between them. They afford the most satisfactory proofs of the incapacity of restrictions and prohibitions to secure a real monopoly of any extensive market; and show that their principal effect is to promote illicit traffic; and to make that ingenuity and invention be exerted in devising means to defeat and elude the law, which, under a more liberal system, would be exerted to improve the methods of production. The introduction of prohibited goods is more easily effected by land than by sea; and smuggling into France is, in consequence, carried on principally through her north and east frontiers. Considerable quantities of prohibited or overtaxed goods are, however, introduced by sea. A regular tariff of risks is established; and persons of undoubted solidity contract, for certain premiums, which for the most part are abundantly moderate, to deliver any prohibited article in any part of France. Owing to the system of *octroi*, or of the collection of duties at the gates of large towns, where an inspection of the goods may also be made, the cost of smuggling into Paris and other populous places is considerably greater than that of smuggling into villages. At an average, however, most foreign goods may be delivered in Paris at a charge of from 25 to 30 per cent. *ad valorem* on their real value.

Notwithstanding the advantage of a sea frontier, a coast guard, and an overgrown Custom-house establishment, the facts embodied by Messrs. Villiers and Bowring in their *Report* show that smuggling about 10 years since, and certainly it has not decreased in the interval, was in quite as flourishing a condition on the shores of England as on the land frontier of France. The premium on the illicit introduction amongst us of prohibited or overtaxed goods varies from 12 to 40 per cent. *ad valorem*, according to the description of the article. The parties employing the smugglers run no risk. The latter, or their agents, attend regularly upon 'Change; and "it is their constant practice to deposit the value of the goods confided to their care in a banker's acceptance, as a security to the owner!"—(*Report*, p. 54.) It could hardly, indeed, have been otherwise. Brandy, which is a favourite article for smuggling speculations, may be bought for shipment in France at from 3*s.* 6*d.* to 5*s.* a gallon. It is highly popular amongst us; but instead of admitting it to consumption under a moderate duty, or even under the high duty of 8*s.* or 10*s.*, we load it with the oppressive and exorbitant duty of 22*s.* 6*d.*; that is, with a duty varying from 450 to 650 per cent. *ad valorem*! Had those who originally imposed this duty, and those by whom it has been kept up, been deeply interested in smuggling adventures, their conduct would have been intelligible; but as no such excuse can be made for them, it has been in the last degree irrational and absurd. The temptation to the illicit introduction of brandy, occasioned by the exorbitancy of the duty, has roused all the energies of the smuggler, who has defeated the utmost vigilance of the revenue officers, and eluded or defied the multiplied pains and penalties of the customs laws! Messrs. Villiers and Bowring estimated, from a comparison of the shipments of different articles from France for England with the imports into the latter, and other authentic data, that the total amount of duties evaded by the fraudulent importation of overtaxed French articles (exclusive of tobacco, whole cargoes of which are sometimes introduced into Ireland) into this country amounts to about 800,000*l.* a year.—(p. 54.) Of this sum, the loss on brandy makes by far the largest item; and is said to be "*considerably more than 500,000*l.**"—(p. 57.) Latterly, however, we incline to think that the smuggling of silks, gloves, ladies' shoes, and such like articles, has been carried to a still greater extent than the smuggling of brandy. But, whether this be so or not, it is plain that duties which exceed the cost of smuggling are practically useless as a means of raising anything like their proper amount of revenue: they are so, however, in a far greater degree than appears even from the above statements; for, in addition to the vast quantity of overtaxed articles clandestinely introduced, and on which a reasonable duty would be paid, they occasion the overloading of the market with spurious, counterfeit articles, by which the public health as well as the revenue is materially injured. Nor is this all. In order to render oppressive duties productive of any revenue, it is necessary to organise and keep constantly on foot a very numerous and costly customs establishment. It is abundantly certain that we lose, by the clandestine importation of silks, brandy, geneva, and tobacco, from France, Bel-

grum, and Holland, above 2,000,000*l.* a year of revenue; and it is admitted, on all hands, that but for the oppressive duties on these articles, a saving of 400,000*l.* a year might be effected in the customs department. Nothing, therefore, can be more futile than to attempt vindicating exorbitant duties on the pretence of their being required to keep up the revenue. In point of fact, such duties are about the most efficient engines that can be devised for its reduction. The revenue derived from coffee was trebled by reducing the duty from 1*s.* 7*d.* to 6*d.* per lb. — (see *COFFEE*); the revenue derived from British spirits was materially increased by reducing the duty from 5*s.* 6*d.* to 2*s.* 6*d.* the wine gallon — (see *SPRITS*); and Mr. Pitt increased the duty derived from brandy, geneva, &c., in 1786, not by adding to, but by taking 50 per cent. from, the duties with which they had previously been loaded! There cannot, indeed, be the shadow of a doubt that the revenue derived from brandy and geneva would be very largely increased by reducing the duties to 8*s.* or 10*s.* a gallon. A measure of this sort, coupled as it should be with a reduction of the duties on silks and tobacco (see the articles on them), would do what neither coast guards, preventive services, revenue cruisers, or customs acts will ever do, — it would go far to annihilate smuggling; and would enable the services of a large number of revenue officers to be dispensed with.

But the demoralising influence of an extensive smuggling system is the worst consequence of oppressive duties and prohibitions. They make the smuggler be regarded as a public benefactor, and procure for him the sympathy of all classes, and the strenuous support of those in the lower walks of life. No one acquainted with the state of the peasantry in extensive districts of Kent and Sussex, will believe that it is easy to exaggerate the evils that spring from this source. The whole body of labourers may be said to be in combination with the smugglers; and numbers of them are every now and then withdrawn from their usual employment to assist in their desperate adventures. Lawless, predatory, and ferocious habits are thus widely diffused; and thousands, who, but for this moral contamination, would have been sober and industrious, are trained to despise and trample on the law, and to regard its functionaries as enemies whom it is meritorious to waylay and assault.

Such being the operation and result of those oppressive duties and absolute prohibitions to which smuggling owes its origin, it is not surely too much to hope that the former may be modified, and the latter repealed. When this has been done, smuggling will cease; but not one moment sooner. Till then it will continue, in despite of all the impotent efforts that may be made for its suppression, to scatter its seeds and spread its roots on all sides; impoverishing the fair and enriching the illicit dealer; corrupting revenue officers, and making even the Custom-house the scene of smuggling transactions; emptying the public treasury of the state, and filling its goals with criminals!

*Smuggling by Dogs.* — The following extract from the *Report of Messrs. Villiers and Bowring* develops one of those ingenious devices by which mischievous customs laws are sure to be defeated.

"The director of the Custom-house made, on the 30th of July, 1831, some very curious statements to the minister of finance on the subject of the fraudulent introduction of articles by means of dogs. He says, that since the suppression of smuggling by horses, in 1826, dogs have been employed; that the first attempts were made in the neighbourhood of Valenciennes, and that it afterwards spread to Dunkirk and Charleville; that it has since extended to Thionville and Strasburg; and, last of all, in 1830, to Besançon.

"In 1823, it was estimated that 100,000 kilogrammes of goods were thus introduced into France; in 1825, 187,315; and in 1826, 2,100,000 kilogrammes; all these estimates being reported as rather under the mark: the calculation has been made at 24 kilogrammes 'pro rata' per dog. The dogs sometimes carry 10 kilogrammes, and sometimes even 12. The above estimate supposes that 1 dog in 10 in certain districts, and in others 1 in 20, is killed; but these calculations must necessarily be very vague. In the opinion of many of the custom-house officers, not more than 1 dog in 75 is destroyed, even when notice has been given, and the dogs are expected.

"Tobacco and colonial produce are generally the objects of this illicit trade; sometimes cotton twist and manufactures. In the neighbourhood of Dunkirk, dogs have been taken with burdens of the value of 600, 800, and even 1,800 francs. Publications hostile to the government have not unfrequently been so introduced.

"The dogs which are trained to these 'dishonest habits' are conducted in packs to the foreign frontier; they are kept without food for many hours; they are then beaten and laden, and at the beginning of the night started on their travels. They reach the abodes of their masters, which are generally selected at 3 or 4 leagues from the frontiers, as speedily as they can, where they are sure to be well treated and provided with a quantity of food. It is said they do much mischief by the destruction of agricultural property, inasmuch as they usually take the most direct course across the country. They are dogs of a large size for the most part.

"The *Report* states, that these carrier dogs, being so tormented by fatigue, hunger, and ill usage, and hunted by the custom-house officers in all directions, are exceedingly subject to madness, and frequently bite the officers, one of whom died in consequence in 1829. They have also been trained to attack the custom-house officers in case of interference." — (p. 47.)

Various efforts have been made to suppress this species of smuggling, but without success. It is idle, indeed, to suppose, seeing the vast extent of the land frontier of France, that any means should ever be adopted capable of excluding cheap foreign products in extensive demand. Nothing short of surrounding the country by Bishop Berkeley's wall of brass could accomplish such an object. The director-general of the French customs informed Messrs. Villiers and Bowring, that smuggling was carried

on to an extent that was *verament effrayants*; and he might truly say so, when he estimated that English bobbinet, though prohibited, was introduced into France to the extent of 10,000,000 fr., or 400,000*l.*, a year; and at present bobbinet, and various other prohibited articles of British produce and manufacture, are everywhere met with.

Thus it is that the greatest and most civilised nations of Europe, by upholding vicious and destructive systems of commercial and financial legislation, mutually injure each other. France and England, by their proximity, and the difference and variety of their products, are fitted to carry on a far more extensive and beneficial commerce than is carried on by any other two nations. But, owing to their jealousy of each other's advancement, and the prevalence of unfounded theories as to the causes of national wealth, their intercourse has been subjected to oppressive fetters, and confined within comparatively narrow limits. Such, however, is their peculiar aptitude for supplying each other's wants, that, as has been already seen (*anté*, p. 656.), the trade with France is rapidly growing in magnitude and importance. And there cannot be a doubt, that but for the exorbitant duties, and the restrictions by which it is weighed down and forced into illegitimate channels, it would in no long time become by far the most extensive branch of commerce carried on between any two countries, and the most fruitful source of civilisation and of wealth. So true it is, as was long ago observed, that *Homines hominum causâ sunt generati ut ipsi inter se aliis prodesse possint. . . Sed ut magnas utilitates adipiscuntur conspiratione hominum ac consensu, sic nulla tam detestabilis pestis est, quam non homini ab homine nascatur.* — (*Cic. De Officiis*, lib. ii. c. 5.)

*Law as to Smuggling in England.* — The penalties imposed on illicit dealing in commodities subject to duties of excise have been specified in the articles on such commodities. The following formidable statute, with its multiplied provisions and penalties, refers entirely to customs duties. The importance of the subject has induced us to give a pretty full abstract of such parts of it as are of general interest.

#### ACT 8 & 9 VICT. c. 87., FOR THE PREVENTION OF SMUGGLING.

*Commencement of the Act.* — To commence and be in full operation from the 4th August, 1845. — § 1.

*Certain Vessels forfeited.* — If any vessel, not being square-rigged, or any boat, either belonging in the whole or in part to H. M.'s subjects, or having half the persons on board subjects of H. M., shall be found or discovered to have been within 100 leagues of the coast of the U. K.; or if any vessel either belonging in the whole or in part to H. M.'s subjects, or having half the persons on board subjects of H. M., or if any foreign vessel not being square-rigged, or any foreign boat, in which there shall be one or more subjects of H. M., shall be found or discovered to have been within 4 leagues of that part of the U. K., which is between the North Foreland on the coast of Kent and Beachey Head on the coast of Sussex, or within 8 leagues of any other part of the coast of the U. K.; or if any foreign vessel or boat shall be found or discovered to have been within 1 league of the coast of the U. K.; or if any vessel or boat shall be found or discovered to have been within 1 league of the islands of Guernsey, Jersey, Alderney, Sark, or Man respectively, or within any bay, harbour, river, or creek of or belonging to any one of the said islands; or any such vessel or boat so found or discovered, having on board or in any manner attached thereto, or having had on board or in any manner attached thereto, or conveying or having conveyed in any manner, any spirits not being in a cask or other vessel capable of containing liquids of the size or content of 30 gallons at the least, or any tea exceeding 6 lbs. weight in the whole, or any tobacco or snuff not being in a cask or package containing 300 lbs. weight of tobacco or snuff at least, or being separated or divided in any manner within any cask or package, or any tobacco stalks, or any cordage or other articles adapted and prepared for alighting or sinking small casks, or any casks or other vessels whatsoever of less size or content than 30 gallons, of the description used for the smuggling of spirits, then and in every such case the said spirits, tea, tobacco, or snuff, and tobacco stalks, together with the casks or packages containing the same, and the cordage or other articles, casks, and other vessels of the description aforesaid, and also the vessel or boat, shall be forfeited. — § 2.

*Any Vessel or Boat arriving within any Port of the U. K., or of the Isle of Man, having prohibited Goods on board forfeited.* — If any vessel or boat whatever shall arrive or shall be found or discovered to have been within any port, harbour, river, or creek of the U. K., or of the Isle of Man, not being driven thereto by stress of weather or other unavoidable accident, having on board or in any manner attached thereto, or having had on board or in any manner attached thereto, or conveying or having conveyed in any manner within any such port, harbour, river, or creek, any spirits not being in a cask or other vessel capable of containing liquids of the size or content of 30 gallons at the least, or any tobacco or snuff not being in a cask or package containing 300 lbs. weight of such tobacco or snuff at least, or being separated or divided in any manner within any cask or package, or any tobacco stalks, every such vessel or boat, and such spirits, tobacco, snuff, or tobacco stalks, shall be forfeited: provided always, that if it shall be made appear to the satisfaction of the commissioners of customs that the said spirits, tobacco, snuff, or tobacco stalks were on board without the knowledge or privity of the owner or master of such vessel or boat, and without any wilful neglect or want of reasonable care on their or either of their behalfs, then and in such case the said commissioners shall and they are hereby authorized and required to deliver up the said vessel or boat to the owner or master of the same. — § 3.

*Certain Cases in which Vessels shall not be forfeited.* — Nothing herein contained shall extend to render any vessel of the burthen of 120 tons or upwards liable to forfeiture on account of any tobacco or snuff coming direct from the East Indies, and being in packages each containing 100 lbs. weight of tobacco or snuff at least, or on account of any cigars being in packages each containing 100 lbs. weight of cigars at least, or on account of any tobacco the produce of Mexico, Columbia, the continent of South America, or of the islands of Saint Domingo, or Cuba, coming direct from those places respectively, or from the warehouse in any British possession in America, in packages, each containing 80 lbs. weight of tobacco at least, or on account of any Negrohead tobacco the produce of and coming direct from the U. States of America, in packages, each containing of such tobacco 150 lbs. weight at least, or on account of any tobacco of the dominions of the Turkish empire, which may be separated or divided in any manner within the outward package, such outward package being a hoghead, cask, chest, or case containing of such tobacco 300 lbs. weight at least, nor to render any vessel of 60 tons burden or upwards liable to forfeiture on account of any tea, or of any spirits in glass bottles, or in stone bottles, not exceeding the size of quart bottles, such tobacco, snuff, cigars, tea, and spirits being really part of the cargo of such vessel, and included in the manifest or other papers of such vessel enumerating or describing the cargo thereof, nor to render any vessel liable to forfeiture on account of any spirits, tea, or tobacco really intended for

the consumption of the seamen and passengers on board during their voyage, and not being more in quantity than is necessary for that purpose, nor to render any vessel liable to forfeiture if really bound from one foreign port to another foreign port, and pursuing such voyage, wind and weather permitting.

—§ 4.

*Vessels throwing overboard any Goods during Chase, forfeited.*—When any vessel or boat belonging in the whole or in part to H. M.'s subjects, or having one-half of the persons on board subjects of H. M., shall be found within 100 leagues of the coast of the U. K., and shall not bring to upon signal made by any vessel or boat in H. M.'s service, or in the service of the revenue, hoisting the proper pendant and ensign in order to bring such vessel or boat to, and thereupon chase shall be given, if any person or persons on board such vessel or boat so chased shall, during the chase, or before such vessel or boat shall bring to, throw overboard any part of the lading of such vessel or boat, or shall stave or destroy any part of such lading to prevent seizure thereof, then and in such case the said vessel or boat shall be forfeited: and all persons escaping from such vessels or boats, or from any foreign vessel or boat, during any chase made thereof by any vessel or boat in H. M.'s service, or in the service of the revenue, shall be deemed and taken to be subjects of H. M., unless it shall be proved to the contrary.—§ 5.

*Certain Vessels from which Goods are thrown overboard to prevent Seizure to be forfeited.*—From and after the passing of this Act every vessel not being square-rigged, and every boat belonging in the whole or in part to H. M.'s subjects, or having on board one or more of H. M.'s subjects, which shall be found or discovered to have been within 4 leagues of that part of the U. K. which is between the North Foreland on the coast of Kent and Beachy Head on the coast of Sussex, or within 8 leagues of any other part of the U. K., from which any part of the lading of such vessel or boat shall have been thrown overboard, or on board which vessel or boat any of the goods on board shall be staved or destroyed, to prevent seizure, shall be forfeited.—§ 6.

*Vessels to bring to on being chased by Vessels or Boats of the Navy or in Preventive Service.*—In case any vessel or boat liable to seizure or examination under any act or law for the prevention of smuggling shall not bring to when required so to do, on being chased by any vessel or boat in H. M.'s navy having the proper pendant and ensign of H. M.'s ships hoisted, or by any vessel or boat duly employed for the prevention of smuggling having a proper pendant and ensign hoisted, it shall be lawful for the captain, master, or other person having the charge or command of such vessel or boat in H. M.'s navy, or employed as aforesaid, (first causing a gun to be fired as a signal,) to fire at or into such vessel or boat; and such captain, master, or other person acting in his aid or assistance, or by his direction, shall be, and he is hereby indemnified and discharged from any indictment, penalty, action, or other proceeding for so doing.—§ 7.

*Vessels in Port with a Cargo, and afterwards found in Ballast, &c.*—If any vessel or boat whatever shall be found within the limits of any port of the U. K. with a cargo on board, and such vessel or boat shall afterwards be found light or in ballast, and the master is unable to give a due account of the port or place within the U. K. where such vessel or boat shall have legally discharged her cargo, such vessel or boat shall be forfeited.—§ 8.

*Regulations as to Vessels sailing from Guernsey, Jersey, &c.*—No vessel or boat belonging wholly or in part to H. M.'s subjects shall sail from Guernsey, Jersey, Alderney, Sark, or Man without a clearance, whether in ballast or having a cargo, and if with cargo the master shall give bond to H. M. in double the value of the vessel or boat and of the cargo, for duly landing the same at the port for which the vessel clears; and every such vessel or boat not having such clearance, or which having a clearance for a cargo shall be found light or with any part of her cargo discharged before delivery thereof at the port specified in the clearance (unless through necessity or for preservation of the vessel or boat, to be proved to the satisfaction of the commissioners of customs), shall be forfeited.—§ 9.

*None of H. M.'s Subjects to hoist in their Vessels the Union Jack or any Pendants, &c.*—Whereas his late Majesty King George the Third, by his royal proclamation, bearing date the 1st of January, 1801, was pleased to order and appoint what ensign or colours should be borne at sea by merchant ships or vessels belonging to any of H. M.'s subjects of the U. K. of Great Britain and Ireland, and of the dominions thereunto belonging, thereby charging and commanding all H. M.'s subjects whatsoever that they should not presume to wear in any of their ships or vessels H. M.'s jack commonly called the Union Jack, nor any pendants nor any such colours as are usually worn by H. M.'s ships, without particular warrant for their so doing from the Lords of the Admiralty for the time being, and also commanding H. M.'s subjects that without such warrant as aforesaid they should not presume to wear on board their ships or vessels any flags, jacks, pendants, or colours made in imitation of or resembling those of H. M., or any kind of pendant whatsoever, or any other ensign than the ensign described in the margin of the said proclamation; be it therefore enacted and declared, that from and after the passing of this Act it shall not be lawful for any of H. M.'s subjects whomsoever to hoist, carry, or wear in or on board any ship, vessel, or fishing boat, or any other vessel or boat whatever, whether merchant or otherwise, belonging to any of H. M.'s subjects, H. M.'s jack commonly called the union jack, or any pendant or any such colours as are usually worn by H. M.'s ships, or any flag, jack, pendant, or colours whatever made in imitation of or resembling those of H. M., or any kind of pendant whatsoever, or any ensign or colours whatever, other than those prescribed by the said proclamation; and that if any person or persons shall nevertheless presume to hoist, carry, or wear in or on board any ship or vessel, fishing boat, or other vessel or boat whatever, belonging to any of H. M.'s subjects, whether the same be merchant or otherwise, H. M.'s jack commonly called the union jack, or any pendant or colours such as are commonly worn by H. M.'s ships, or any jack, flag, pendant, or colours whatever made in imitation of or resembling those of H. M., or any kind of pendant whatever, without such warrant as aforesaid, or any other ensign or colours than the ensign or colours prescribed by the said proclamation to be worn, then and in every such case the master or other person having charge of such ship, vessel, or boat, or the owner or owners thereof being on board the same, and every other person so offending, shall for every such offence forfeit and pay a sum not exceeding 500*l.* to be recovered, with costs of suit, either in the High Court of Admiralty of England, or in any vice-admiralty court in the colonies, or in any of the courts of Queen's Bench or Exchequer at Westminster or Dublin, at the suit of H. M.'s attorney-general, or in the Courts of Session or Exchequer in Scotland respectively; and that it shall be lawful for any officer of H. M.'s navy or marines belonging to any of H. M.'s ships, or any officer of the customs or excise, to enter on board any ship, vessel, or boat so hoisting, wearing, or carrying any jack, flag, ensign, pendant, or colours prohibited by the said proclamation and by this Act to be hoisted, worn, or carried, and to seize and take away the same, and the same shall thereupon become forfeited.—§ 10.

*Vessels, &c. used in Removal of run Goods to be forfeited.*—All vessels and boats made use of in the removal, carriage, or conveyance of any goods liable to forfeiture under this or any other Act relating to the revenue of customs shall be forfeited.—§ 11.

*Boats of Vessels to have thereon the Name of Vessel, Port, and Master.*—The owner of every vessel belonging in the whole or in part to any of H. M.'s subjects shall paint or cause to be painted, upon the outside of the stern of every boat belonging to such vessel, the name of such vessel, and the port or place to which she belongs, and the master's name within the transom, in white or yellow Roman letters, not less than 3 inches in length, on a black ground, on pain of the forfeiture of such boat not so marked, wherever the same shall be found.—§ 12.

*Boat not belonging to Ships to have Name of Owner and Port thereon.*—The owner of every boat not belonging to any vessel shall paint or cause to be painted upon the stern of such boat, in white or yellow Roman letters of 3 inches in length on a black ground, the name of the owner or owners of the boat,

and the port or place to which she belongs, on pain of the forfeiture of such boat not so marked wherever the same shall be found. — § 18.

**Vessels and Boats used on piloting or fishing to be painted Black.**—The owner or owners of every vessel or boat employed on the coasts of the U. K. in piloting or fishing shall paint or tar every such vessel or boat, or cause the same to be painted or tarred, entirely black, except the name or other description required by law to be painted on such vessel or boat; and every such vessel or boat found not so painted or tarred, and every boat so painted as to resemble any boat usually employed for the prevention of smuggling, or in any other employment in H. M.'s service, shall be forfeited: provided always, that nothing herein contained shall extend to prevent any distinguishing mark from being placed on any such vessel or boat, or to prevent any such vessel or boat from being otherwise painted, if the Commissioners of Customs shall think proper to allow the same, and which shall be so expressed in the licence of the said vessel or boat. — § 14.

**British Vessels having secret Places for concealing, &c.**—All vessels and boats belonging in the whole or in part to H. M.'s subjects having false bulk-heads, false bows, double sides or bottoms, or any secret or disguised place whatsoever in the construction of such vessels or boats adapted for the purpose of concealing goods, or having any hole, pipe, or other device in or about such vessels or boats adapted for the purpose of running goods, shall be forfeited, with all the guns, furniture, ammunition, tackle, and apparel belonging to such vessels or boats; and all foreign vessels or boats not being square-rigged coming to or arriving at any port of the U. K. having on board any goods liable to the payment of duties, or prohibited to be imported into the U. K., concealed in false bulk-heads, false bows, double sides or bottoms, or in any secret or disguised place whatsoever in the construction of such last-mentioned vessels or boats, shall be forfeited. — § 15.

[The clauses in this Act from the 16th to the 37th, inclusive, refer to the *licensing of vessels*; and are given under the art. *LICENCES*.]

**Goods unshipped without Payment of Duty, &c.**—If any goods liable to the payment of duties shall be unshipped from any vessel or boat in the U. K. or the Isle of Man (customs or other duties not being first paid or secured), or if any prohibited goods whatsoever shall be imported or brought into any part of the U. K. or the Isle of Man, or if any goods whatever which shall have been warehoused or otherwise secured in the U. K. or the Isle of Man, either for home consumption or exportation, shall be clandestinely or illegally removed from out of any warehouse or place of security, then and in every such case all such goods as aforesaid shall be forfeited, together with all horses and other animals, and all carriages and other things, made use of in the removal of such goods. — § 28.

**Goods concealed on board a Vessel forfeited.**—If any goods which are subject to any duty or restriction in respect of importation, or prohibited to be imported into the U. K., shall be found or discovered to have been concealed in any manner on board any vessel or boat within the limits of any port of the U. K. or the Isle of Man, or shall be found, either before or after landing, to have been concealed in any manner on board such vessel or boat within such limits as aforesaid, then and in every such case all such goods, and all other goods which shall be packed with or used in concealing them, shall be forfeited. — § 29.

**Spirits and Tobacco.**—All spirits and all tobacco for which a permit is by law required which shall be found removing without a legal permit for the same shall be deemed to be spirits or tobacco respectively liable to and unshipped without payment of duty, unless the party in whose possession the same shall be found or seized shall prove to the contrary. — § 30.

**Restricted Goods.**—All goods the importation of which is in any way restricted, which are of a description admissible to duty, and which shall be found or seized in the U. K. or in the Isle of Man under any law relating to the customs or excise, shall, for the purpose of proceeding for the forfeiture of them, or for any proceedings in respect of them, be deemed to be and shall be described in any information exhibited on account of such forfeiture or penalty as goods liable to and unshipped without payment of duties. — § 31.

**Prohibited Goods.**—All goods which are prohibited to be exported shall be put on board any vessel or boat with intent to be laden or shipped for exportation, or shall be brought to any quay, wharf, or other place in the U. K., in order to be put on board any vessel or boat for the purpose of being exported, or if any goods which are prohibited to be exported shall be found in any package produced to the officer or officers of customs as containing goods not so prohibited, then and in every such case not only all such prohibited goods, but also all other goods packed therewith, shall be forfeited. — § 32.

**Vessels, Boats, and Goods may be seized, &c.**—All vessels and boats, and all goods whatsoever, liable to forfeiture under this or any other Act relating to the customs, shall and may be seized in any place, either upon land or water, by any officer or officers of H. M.'s army, navy, or marines, duly employed for the prevention of smuggling, and on full pay, or by any officer or officers of customs or excise duly employed for the authority to seize from the commissioners of customs or excise; and all vessels, boats, and goods so seized shall, as soon as conveniently may be, be delivered into the care of the proper officer appointed to receive them. — § 33.

**Powers given to Officers of Excise by 1 & 2 W. 4. c. 55, extended to Officers of Customs.**—Whereas by the Act 1 & 2 W. 4. c. 55, "An Act to consolidate and amend the Laws for suppressing the illicit Distillation of Malt and Distillation of Spirits in Ireland," officers of excise are authorized to search for private stills, wort, wash, pot ale, low wines, or singlings, or spirits, and corn or grain making into malt, and to arrest and detain persons discovered in the places where private distillation of spirits or making of malt is carrying on: And whereas it is expedient, &c., be it therefore enacted, that all the powers, authorities, and privileges granted to officers of excise by the said recited Act shall and may be exercised by officers of customs as fully and effectually as if the clauses in the said Act had been repeated and re-enacted in the body of this Act, and made to apply to officers of customs. — § 34.

**Penalty on Officers for Collusive Seizures.**—If any officer or officers of the customs or excise, or any officer or officers of the army, navy, or marines, duly employed for the prevention of smuggling, and on full pay, or any other person or persons whomsoever, shall be proved by the prevention of smuggling, shall make any collusive seizure, or deliver up, or make any agreement to deliver up or not to seize any vessel or boat, or any goods liable to forfeiture, or shall take any bribe, gratuity, recompence, or reward, or shall be guilty of any dereliction of his duty, every such officer or other person shall

forfeit for every such offence the sum of 500*l.*, and be rendered incapable of serving H. M. in any office whatever, either civil or military: and every person who shall give or offer, or promise to give or procure to be given, any bribe, recompence, or reward to, or shall make any collusive agreement with any such officer or person as aforesaid, to induce him in any way to neglect his duty, or to do, conceal, or connive at any act whereby to the customs may be evaded, shall forfeit the sum of 200*l.* — § 35.

**Vessels and Persons may be searched.**—It shall and may be lawful to and for any officer or officers of the army, navy, or marines, or any officer or officers of customs, to search, on full pay, or for any officer or officers of customs, producing his or their warrant or deputation (if required), to go on board any vessel which shall be within the limits of any of the ports of the U. K., and to search and to rummage and to search the cargo and all other parts of such vessel for prohibited or uncustomed goods, and to remain on board such vessel during the whole time that the same shall continue within the limits of such port, and also to search any person or persons either on board or who shall have landed from any vessel, provided such officer or officers shall have good reason to suppose that such person or persons hath or have any uncustomed or prohibited goods secreted about his, her, or their person or persons: and if any person shall obstruct any such officer or officers in going or remaining on board, or in entering or searching such vessel or person, every such person shall forfeit and lose the sum of 100*l.* — § 36.

**Before Persons are searched they may require to be taken before a Justice, &c.**—Before any person shall be searched by any such officer or officers as aforesaid, it shall be lawful for such person to require such officer or officers to take him or her before a Justice of the peace, or before the collector, comptroller, or other superior officer of the customs, who shall determine whether there is reasonable ground to suppose that such person has any uncustomed or prohibited goods about his or her person, and it shall appear to such Justice, collector, comptroller, or other superior officer of the customs that there is reasonable ground to suppose that such person has any uncustomed or prohibited goods about his or her person, then such Justice, collector, comptroller, or other superior officer of the customs shall direct such person to be searched in such manner as he shall think fit; but if it shall appear to such Justice, collector, comptroller, or other superior officer of the customs that there is not reasonable ground to suppose that such person has any uncustomed or prohibited goods about his or her person, then such Justice, collector, comptroller, or other superior officer of the customs shall forthwith discharge such person, who shall not in such case be liable to be searched; and every such officer or officers as aforesaid is and are hereby authorized and required to take such person, upon demand, before any such Justice, collector, comptroller, or other superior officer of the customs, detaining him or her in the meantime: provided always, that no person being a female shall be searched by any other person than a female duly authorized for that purpose by the commissioners of customs. — § 37.

**Penalty on Officers for Misconduct in Search.**—If any such officer or officers shall not take such person with reasonable despatch before such Justice, collector, comptroller, or other superior officer of the customs, when so required, or shall refuse to take such person to be searched by him, not having any reasonable ground to suppose that such person has any uncustomed or prohibited goods about his or her person, such officer shall forfeit and pay the sum of 10*l.* — § 38.

**Penalty on Person on board denying having Foreign Goods about them.**—If any passenger or other person on board any vessel or boat shall, upon being questioned by any officer or officers of customs whether he or she has any foreign goods about him or her person, or in his or her possession, deny the same, and any such goods shall, after such denial, be discovered upon his or her person, or in his or her possession, such goods shall be forfeited, and such person shall forfeit the value of such goods. — § 39.

**Officers authorized by Writ of Assistance, and having a Peace Officer, may search, &c.**—It shall and may be lawful for any officer or officers of customs, or persons acting under the authority of the commissioners of customs, holding a writ of assistance under the seal of H. M.'s Court of Exchequer, to take a constable, headborough, or other public officer inhabiting near the place, and in the daytime to enter into and search the house, shop, cellar, warehouse, room, or other place, and in case of resistance to break open doors, chests, trunks, and other packages, there to seize and from thence to bring any uncustomed or prohibited goods, and to put and secure the same in the custom-house warehouse in the port next to the place from whence such goods shall be so taken

*Mina, not being driven thereby by stress of weather or other unavoidable necessity, having on board or in any manner (whether or not on board or in any manner) substantial stores, or conveying or having conveyed in any manner, any spirits not being in a cask or other vessel capable of containing liquids of the size or content of 50 gallons each, or any tobacco or opium not being in a cask or package containing 500 lbs. weight of such tobacco or opium at least, or being separated or divided in any manner within any cask or package, shall forfeit the sum of 100*l.*; and it shall be lawful for any officer or officers of the customs, or any person being duly employed for the prevention of smuggling, and on full pay, or any officer or officers of customs or excise, or other persons acting in his or their aid or assistance, or any employed for the prevention of smuggling, and on full pay, and are hereby authorized, empowered, and required to detain every such person, and to take such person before any justice of the peace in the U. K., or in the Isle of Man, to be dealt with as hereinafter directed. § 65.*

*Forfeiture not liable to Penalties unless concerned in bringing in the goods.*—No person shall be liable to any penalty for, or to be detained on account of any such offence as is hereinafter lastly mentioned, unless he or she shall be proved to be guilty of believing that such person was the owner of such goods, or was concerned in bringing the same into such parts and other places as are hereinafter mentioned, or in concealing the same, or on account of such offence, or in concealing the same, or being in vessels or packages of a content or size permitted by law.—§ 54.

*Persons in H. M.'s Naval Service detained under Revenue Laws to secure the Justice of the Peace.*—Where any persons or persons, being part of the crew of any ship or vessel in H. M.'s employment or service, and liable to detention by any officer or officers of the customs, shall have been detained by any officer or officers of the customs, or any person being duly employed for the prevention of smuggling, and on full pay, or any officer or officers of customs, upon notice thereof given by such officer or officers of customs to the captain or commanding officer of the ship or vessel, shall be placed in security by such captain or commanding officer, and such ship or vessel shall be placed in security by such officer or officers of customs shall have obtained a warrant from a justice of the peace for bringing the said offender or offenders before him or any 2 or more justices of the peace, to be dealt with according to the provisions of the Act, and justice of the peace is hereby authorized and required to grant, upon complaint made to him by such officer or officers of customs, setting the offence for which such person or persons is or are liable to be detained, to the justice of the peace. § 66.

*Persons assembled in the Number of Three or more, to run Spirits, Tea, Tobacco, or Silk, &c. to be sent to House of Correction to Hard Labour.*—All persons assembled, to the number of 3 or more, for the purpose of procuring, conveying, or concealing any spirits or tobacco, or any tea or silk (such tea or silk being of the value of 20*l.* or more) liable to forfeiture under this Act or any other Act or Acts relating to the customs or excise, and every person who shall by any means procure or hire, or shall depute or authorize any other to procure or hire, any person or persons to assemble for the purpose of being concerned in the landing or unshipping, or carrying, conveying, or concealing any goods, which are prohibited to be imported, or the duties for which have not been paid or secured, and every person who shall obstruct any officer or officers of the army, navy, or marine, being duly employed for the prevention of smuggling, and on full pay, or any officer or officers of customs or excise, or any person acting in his or their aid or assistance, or duly employed for the prevention of smuggling, in the execution of his or their duty, or in the due seizure of any goods liable to forfeiture by this Act or any other Act or Acts relating to the customs, or who shall rescue or cause to be rescued any goods which have been duly seized, or who shall attempt or endeavour to do, or who shall before or after any seizure seize, break, or otherwise destroy any goods or prevent the seizure or securing the same, shall be liable upon being duly convicted of any of the said offences before any 2 justices of the peace, be adjudged by such justices for the first offence to be imprisoned in any house of correction, and there kept to hard labour for any term not less than 6 months, and for the second offence for any term not less than 9 months, and for the third offence for any term not less than 12 calendar months.—§ 56.

*Authorizing Magistrate to proceed to Conviction of Smugglers.*—Whenever any person shall have been detained and taken before any justice of the peace for being found or discovered to have been on board any vessel or boat within any port, harbour, river, or creek of the U. K., or of the Isle of Man, such vessel or boat having on board or having had on board spirits or tobacco in such casks or packages as would, under this or any other Act relating to the customs, be liable to forfeiture, or for unshipping, or for aiding, assisting, or being concerned in the unshipping of any spirits or tobacco liable to forfeiture under this or any other Act relating to the customs or excise, or for carrying, conveying, or concealing any goods, or for aiding, assisting, or being concerned in the carrying, conveying, or concealing of any such spirits or tobacco, and it shall appear to such justice that the quantity of spirits in respect of which such person has been so detained does not exceed 1 gallon, or that the quantity of tobacco in respect of which such person has been so detained does not exceed 6 pounds weight, it shall and may be lawful for such justice, and he is hereby authorized to proceed summarily upon the case without any information, and although no direction shall have been given by the commissioners of customs, and to convict such person of such offence, and to adjudge that such person shall, in lieu of any other penalty, forfeit any sum of money not exceeding 5*l.*, and in default of payment of such sum of money to commit such person to any of H. M.'s gaols for any time not exceeding 1 month.—§ 57.

*Where Persons are taken before a Justice for any Offence against the Customs, such Justice may send them to be detained a reasonable Time.*—When any person or persons shall have been detained by any officer or officers of the army, navy, or marine, being duly employed for the prevention of smuggling, and on full pay, or by any officer or officers of customs or excise, or any person or persons acting in his or their aid or assistance, or duly employed for the prevention of smuggling, for any offence against this or any other Act or Acts relating to the customs, and shall have been taken before any justice of the peace, if it

shall appear to such justice that there is reasonable cause to detain such person or persons, such justice may and he is hereby authorized and required to order such person or persons to be detained a reasonable time, and at the expiration of such time to be brought before any 2 justices of the peace, who are hereby authorized and required finally to hear and determine the matter.—§ 58.

*Any Person liable to be arrested making his Escape may be detained by any Officer of the Customs.*—If any person or persons liable to be detained under the provisions of this or any other Act or Acts relating to the customs shall not be detained at the time of so committing the offence for which he or they are so liable, or after detention shall make his or their escape, it shall and may be lawful for any officer or officers of the army, navy, or marine, being duly employed for the prevention of smuggling, and on full pay, or for any officer or officers of customs or excise, or any other person acting in his or their aid or assistance, or duly employed for the prevention of smuggling, to detain such person or persons liable to detention as aforesaid at any time afterwards, and to take him before any justice of the peace, to be dealt with as if detained at the time of committing the said offence.—§ 59.

*Persons making Signals to Smuggling Vessels at Sea may be Detained, and on Conviction, forfoll 100*l.*, &c.*—No person shall be liable to be detained under the provisions of this Act, or to be liable to notice any such signal, and on or from any part of the coast or shore of the U. K., or within 6 miles of any part of such coast or shore, for the purpose of giving any notice to any person on board any smuggling vessel or boat, whether any person so on board of such vessel or boat, or on or from any distance to notice any such signal, and if any person, contrary to the true intent and meaning of this Act, make or cause to be made, or aid or assist in making, any such signal, such person so offending shall be guilty of a misdemeanour, and it shall be lawful for any person to stop, arrest, and detain the person or persons who shall so offend, and to carry and convey such person or persons so offending before any 1 or more of H. M.'s justices of the peace residing in the place of which such offence shall be committed, who, if he sees cause, shall commit the offender to the next county gaol, there to remain until the next court of oyer and terminer, great session, or gaol delivery, or until such person or persons shall be removed by due course of law; and it shall not be necessary to prove on any indictment or information that any vessel or boat was actually in the coast; and the offender or offenders, being duly convicted thereof, shall, by order of the court, be liable to be committed to the next county gaol, there to remain until the next court of oyer and terminer, great session, or gaol delivery, or until such person or persons shall be removed by due course of law; and it shall not be necessary to prove on any indictment or information that any vessel or boat was actually in the coast; and the offender or offenders, being duly convicted thereof, shall, by order of the court, be liable to be committed to the next county gaol, there to remain until the next court of oyer and terminer, great session, or gaol delivery, or until such person or persons shall be removed by due course of law; and it shall not be necessary to prove on any indictment or information that any vessel or boat was actually in the coast; and the offender or offenders, being duly convicted thereof, shall, by order of the court, be liable to be committed to the next county gaol, there to remain until the next court of oyer and terminer, great session, or gaol delivery, or until such person or persons shall be removed by due course of law.—§ 60.

*Proof of a Signal not being intended to lie on Defendant.*—In case any person be charged with or indicted for having made or caused to be made, or for aiding or assisting in making, or for giving any such signal as aforesaid, the burden of proof that such signal so charged as having been made with intent and for the purpose of giving such notice as aforesaid, was not made with such intent and for such purpose shall be upon the defendant against whom such charge is made or such indictment is found.—§ 61.

*Any Person may prevent Signals, and enter upon Lands for that Purpose.*—It shall be lawful for any person whatsoever to prevent any signal being made as aforesaid, and to enter upon any land and upon any lands for that purpose without being liable or subject to any indictment, suit, or action for the same.—§ 62.

*Three or more armed Persons assembled to assist in the illegal Landing of any Goods, &c. to be deemed guilty of Felony.*—If any persons, to the number of 3 or more, armed with firearms, or other offensive weapons, shall, within the U. K., or within the limits of any port, harbour, or creek thereof, be assembled in order to be aiding or assisting in making, landing, running, or carrying away of any prohibited goods, or goods liable to any duties which have not been paid or secured, or in rescuing or taking away any such goods as aforesaid after seizure by the officer of the customs, or any other officer authorized to seize the same, or from any person or persons employed by them or assisting them, or from the place where the same shall have been lodged by them, or in rescuing any person who shall have been apprehended for any of the offences made felony by this or any Act relating to the customs, or in the preventing the apprehension of any person who shall have been guilty of such offence, or in case any persons, to the number of 3 or more, so armed as aforesaid, shall, within the U. K., or within the limits of any port, harbour, or creek thereof, be so aiding or assisting, every person so offending, and every person aiding, abetting, or assisting therein, shall, being duly convicted, be adjudged guilty of felony, and shall be liable, at the discretion of the court, to be transported beyond the seas for the term of 15 years, or to be imprisoned for any term not exceeding 3 years.—§ 63.

*Persons shooting at any Boat belonging to the Navy, or in the Service of the Revenue, deemed guilty of Felony.*—If any person shall maliciously shoot at any vessel or boat belonging to H. M.'s service, or in the service of the revenue, or any other vessel or boat of any part of the coast of the U. K., or shall maliciously shoot at, maim, or dangerously wound any officer of the army, navy, or marine, being duly employed for the prevention of smuggling, and on full pay, or any other officer or officer acting in his or their aid or assistance, or duly employed for the prevention of smuggling, in the due execution of his office or duty, every person so offending, and every person aiding, abetting, or assisting therein, shall be liable, being duly convicted, be adjudged guilty of felony, and shall be liable, at the discretion of the court before which he shall be convicted, to be transported beyond the seas for the term of the natural life of such person, or for any term not less than 15 years, or to be imprisoned for any term not exceeding 3 years.—§ 64.

*Any Person in company with more than Four others having Goods liable to Forfeiture, &c.*—If any person being in company with more than 4 other persons be found with any goods liable to forfeiture under this or any other Act relating to the customs or excise, or in company with 1 other person, within 5 miles of the sea coast, or of any navigable river leading therefrom, with such goods, and carrying offensive arms or weapons,

or disguised in any way, every such person shall be adjudged guilty of felony, and shall, on conviction of such offence, be transported as a felon for the term of 7 years. — § 65.

*Persons assaulting Officers by Force or Violence may be transported.* — If any person shall by force or violence assault, resist, oppose, molest, hinder, or obstruct any officer of the army, navy, or marines, being duly employed for the prevention of smuggling, and on full pay, or any officer of customs or excise, or other person acting in his or their aid or assistance, or duly employed for the prevention of smuggling, in the due execution of his or their office or duty, such person, being thereof convicted, shall be transported for 7 years, or sentenced to be imprisoned in any house of correction or common gaol, and kept to hard labour, for any term not exceeding 3 years, at the discretion of the court before whom the offender shall be tried and convicted as aforesaid. — § 66.

*Commanding Officers of Vessels in the Service may haul their Vessels on shore, &c., without being liable to any Action for so doing.* — § 67.

*Officers of the Army, &c., may patrol the Coasts of the United Kingdom without being liable to Action.* — § 68.

*Officers, if wounded in the Service of the Customs to be provided for.* — § 69.

*Vessels and Goods seized, to be disposed of as Commissioners of Customs direct.* — § 70.

*Rewards to Officers for detaining Smugglers.* — It shall and may be lawful for the commissioners of customs, and they are hereby authorized and empowered, to award to any officer or other person detaining any person liable to detention under this Act, or any other Act relating to the customs, to be paid upon the conviction of such person, any reward they may think fit to direct, not exceeding the sum of 20*l.* for each person. — § 71.

*Rewards to Officers making Seizures.* — It shall and may be lawful for the commissioners of customs, and they are hereby authorized, to order the following reward to be paid to any officer or officers or persons as aforesaid by whose means any penalty or composition is recovered, except in viz. one-third part of the penalty or sum recovered, in the case of seizures of silk goods, in which case the officers or other persons may receive one-half the penalty or sum recovered. — § 72.

*Rewards to Officers making Seizures.* — It shall and may be lawful for the commissioners of customs, and they are hereby authorized to order to be paid in respect of any seizure made under this or any Act relating to the customs, or to trade and navigation, to the person or persons making the same, the following rewards, viz. —

In the case of seizures of spirits or tobacco : —

If all the parties concerned in the act which occasions the seizure, being above the age of 16 years, are detained and convicted, the whole value thereof, such value to be fixed and settled by the lords of the treasury, or by the commissioners of customs, as hereinafter directed :

If 2 or more of such parties, not being the whole, are so

detained and convicted, seven-eighths of such value :

If 1 such party, not being the whole of them, is so detained and convicted, five-eighths of such value :

If 1 such party, not being the whole of them, is detained and convicted, and the vessel or means of conveyance is or are seized and condemned, three-fourths of such value :

If the vessel or means of conveyance is seized and condemned without any person being detained, one-third of such value :

If all the goods are seized, and all the parties concerned as aforesaid are subsequently convicted in consequence of such seizure, and by the exertion of the seizure, one-half of such value :

If the goods only are seized, one-eighth or such other part as the commissioners of the customs shall think proper, not exceeding one-fourth of such value :

In the case of seizures of other goods, not silks : —

If the vessel or other means of conveyance is or are seized and condemned, or if any person is prosecuted to conviction on account of the same, one-half of the produce, exclusive of the duties :

If the goods only, one-fourth of such produce :

In the case of damaged tobacco, snuff, or other goods destroyed, such reward as the lords of the treasury or the commissioners of customs may think proper to direct, not exceeding a moiety of the duty payable on such goods in case the same had been sold for home consumption :

In the case of seizures of silk goods, the whole value of such goods, exclusive of the duty thereon :

In the case of seizures of vessels and boats : —

If sold, a moiety of the produce :

If taken into the public service or broken up, a moiety of the value :

In the case of seizures of cattle and carriages : —

In all cases, three-fourths of the produce of the sale. — § 73.

*Treasury or Commissioners of Customs to fix the Value of Spirits and Tobacco.* — The value of spirits and tobacco seized as aforesaid shall in all cases be deemed and taken to be such as the lords of the treasury or the commissioners of customs may think fit to fix the same at per gallon or per lb. weight, for the purpose of rewarding the said officers, and that all the before-mentioned rewards shall be paid subject to a deduction of 10*l.* per centum on account of law charges and other expenses. — § 74.

Clause 75. enacts that all rewards and seizures payable to officers of army, navy, or marines to be regulated by H. M.'s orders in council.

The remaining clauses in this Act relate principally to the judicial procedure which may take place under it, and do not seem to be of sufficient importance to warrant their insertion.

**SMYRNA**, a large city and sea-port of Asiatic Turkey, on the western side of Asia Minor, lat. 33° 25' 36" N., lon. 27° 6' 45" E. Population, probably, about 120,000; of whom 60,000 may be Turks, 40,000 Greeks, and the remainder Armenians, Franks, Jews, &c. Smyrna is situated at the bottom of a deep gulph; the entrance to which lies between the island of Mytilene on the north, and Cape Carabourun, in lat. 38° 41' 30" N., lon. 26° 21' E., on the south. The woodcut on the next page gives a better idea of the Gulph of Smyrna than could be derived from any description. The dotted line shows the course inwards. The passage between James's Castle (D) on the south and the opposite sand-bank is narrow; but there is from 9 to 10 fathoms water, with a blue clay bottom. Merchant ships anchor abreast of the city in from 7 to 8 fathoms; but the water is so deep that they may come close to the quays. The *inbat*, or sea breeze, blows from morning till evening, and is always waited for by ships going up to the city. There is excellent anchorage in most parts of the gulph, merely avoiding the shoals on the north side. Smyrna is a place of great antiquity. The excellence of its port, and its admirable situation, have made it be several times rebuilt, after being destroyed by earthquakes. On approaching it from the sea, it has the appearance of an amphitheatre: the castle is at the back of the town, which it commands, on the top of the hill; but it is in a state of decay, and could oppose no resistance to an invading force. The interior of the city does not correspond to its external appearance; the streets being, for the most part, narrow, dirty, and ill paved. Owing to the want of cleanliness, and of all sorts of precautions, on the part of the Turks, Smyrna is frequently visited by the plague. In 1814, from 50,000 to 60,000 of the inhabitants are said to have been cut off by this dreadful scourge. The trade of this city is more extensive than that of any other in the Turkish empire. The caravans from Persia are chiefly composed of Armenians. They arrive and depart at fixed periods, which are nearly identical with those of the arrival and departure of most of the foreign ships frequenting the port. Bargains are principally effected by Jew brokers, many of whom have amassed considerable fortunes. The principal articles of import consist of grain, furs, iron, butter, &c. from Odessa and Taganrog; and of cotton stuffs and twist, silk and woollen goods, coffee, sugar, cochineal, and dye woods, iron, tin and tin plates, rum, brandy, paper, cheese, glass, wine, &c. from Great Britain, France, Italy, the United States, &c. The exports consist principally of raw silk, which is the most valuable article, and is daily increasing in importance; cotton, opium, rhubarb, and a variety of fruits, drugs, and gums; olive oil, madder roots, Turkey carpets, valonia, sponge, galls, wax, copper, hare skins, goats' wool, safflower, &c. — (For further details, see *Tournefort, Voyage du Levant*, tome ii. pp. 495—507. 4to ed.; and *Macgill's Travels in Turkey*, vol. i. Letters 5, 6, 7, 8, and 9.)

**References to Plan.**—A, Partridge Island, on the south side of which there is excellent anchorage in from 15 to 7 fathoms, muddy bottom. B, a mud point. C, Pelican Point. D, James' Castle. E, Low narrow islands. Soundings, except where otherwise marked, in fathoms.

*Monies, Weights, and Measures*, same as at Constantinople; which see. Accounts are kept in piastres of 40 paras, or medini. The value of the piastre fluctuates according to the exchange. It has been very much degraded; and is at present (1843) worth about 2d., the exchange being 119 or 119½ piastres per £ sterling. The *oke* is the principal weight used. It is equivalent to 2 lbs. 13 oz. 5 dr. avoirdupois; 45 *okes* = 1 *kintal* = 100 *rotolias* = 127½ lbs. avoirdupois. The *kintal* of Constantinople is only 44 *okes*. A tefte of silk = 4½ lbs. avoirdupois. A cheques of opium = 1½ lbs.; a cheques of goats' wool = ½ lb. Corn is measured by the kilow = 1½ bushel. The pic, or long measure, = 27 Eng. inches: But for an account of what the Turkey weights usually render in England, see post.

**COMMERCE OF SMYRNA.**—The following details with respect to the commerce of Smyrna with Western Europe are copied, except when otherwise stated, from a letter addressed by an intelligent English merchant, established in Smyrna, to his correspondent in London, to whom we are indebted for it. Nothing so complete or satisfactory has ever been published as to the trade of this emporium. It is right, however, to mention, that since 1828, when this paper was drawn up, the commerce of Smyrna has lost some of its importance. Syria, the islands of the Archipelago, the eastern parts of Greece, &c. used formerly to derive a considerable part of their supplies of foreign produce at second hand from Smyrna; but they now, for the most part, are either supplied direct from England, Marseilles, &c., or indirectly from Syria, which is become a considerable *depôt*.

*Charges on Selling and Buying.*—As we conceive that a correct list of selling and buying charges is an essential piece of information for those interested in the commerce of the Levant, we annex the same, including every item of expense, namely:—

On Selling.		On Buying.	
	Per cent.		Per cent.
Freight (according to the rate agreed upon in England)	2	Custom duty (according to the quality of the article)	1 to 3
say	—	Forage (included in the cost of packages, which vary according to the quality of the goods packed).	—
Custom duty (on general goods)	3	House and street brokerage	1½
Forage from 1 to 2 piastres per package (according to the size)	—	Commission (except on figs, which is 6 per cent.)	3
Shroffage	0½	Warehouses rent	0½
House and street brokerage	2		
Commission for effecting sale	2		
These, if proceeds are remitted by bill or specie	½		
Del credere ditto (when required to be charged)	2		
Warehouse rent	0½		

With regard to the cost of packages, those for silk are about 34 piastres each; for galls, 18 do.; gums mastic, tragacanth, &c., 30 do.; scammony, 18 do.; opium, 30 to 36 do.; raisins, 12 to 14 do.; figs, 25 to 30 paras; cotton wool, from 12 to 20 piastres, &c.

We learn from — that your firm deals largely in skins and furs, but he does not state the quality of either; the latter article is, however, of a very limited and ordinary nature with us, and chiefly consists of hare skins, which are abundant, and shipped in considerable quantities for the German and French markets. They are most plentiful during the winter season, when they are also cheaper and keep better than in the hot months of the year. Sheep, goat, lamb, and kid skins are plentiful, and are often in request for America; particularly the 2 latter when in season; which is, for lamb skins, from the middle of March to the beginning of June, and for goat skins from November until April. We have no want of ox and cow hides, both dried and salted, the leather of which is said to be more pliable than those of Europe. They are now and then sent to Marseilles in small parcels; but as it would be difficult to convey, by a written description, the exact quality of those skins, we intend making up a little bale of such kinds as may for the moment be met with, and to forward it by an early vessel to London, when it shall be submitted to your inspection, with an invoice, and remain, if you think proper, at your disposal.

We now proceed to make you acquainted with the manner in which our sales, purchases, and barter are effected, together with the nature of sales made on credit or for cash, &c.

*Sales* are effected in this country between our house's brokers, and what is termed a street or out-door broker; the former receiving their instructions from us, and the latter acting on behalf of the buyer. When the terms are mutually agreed upon, the real buyer and seller personally meet; and a bond or obligatory note stating the terms and amount of the transaction is drawn out and signed by the buyer, and when not much approved of, one or more signatures are required to the bond, who individually and collectively become responsible for the fulfilment of it.

*Purchases* are similarly made, except that the purchaser or agent himself, in the first instance, and his brokers, inspect the goods he is about to treat for: cash down is generally expected; and it is but seldom that a short credit of 1 or 2 couriers is obtained: it not unfrequently happens, also, that ½ or even ¾ of the purchase amount is advanced to the seller, when an insufficient quantity of the article wanted by the buyer is in the place, and which must then be procured from the interior or place of growth. The money advanced (which is to be returned if the quality does not suit) is sent by a confidential person on the part of the purchaser, accompanied either by the seller in person, or by some one representing him.

*Barter* are generally attended with delay, impediments, and sacrifices to the European agent who exchanges his constituents' goods for native produce, and are never completed without his paying a large portion in cash, which is mostly ½, sometimes even ¾, but never less than ½ of the full amount; besides always paying a higher price for the produce than if it were bought for ready money. On the other hand, so far as the agent's transaction goes in goods, the price of which he also advances, it is equal to an advantageous cash sale, deducting a discount; but still he loses, as we have just stated, on that part of the operation which subjects him to the necessity of giving ready money for each part of the produce as remains above the counter-value given in goods, at a higher rate than it is worth in the open market. Thus the advantage is all in favour of this country, and against the agent. Indeed, barter are seldom undertaken unless when a profitable result is anticipated, when European goods are difficult to be placed upon saving conditions, either from the want of demand or a glutted market, or when (which is mostly the case) the holder of such goods has orders from the owners of them to remit them in produce, and thus realise their property, if not upon profitable terms, at least without the risk arising from bad debts: sometimes, also, outstanding bonds are taken in part payment, to the extent occasionally of ½; another ½ is taken in goods at an advance of from 5 to 10 or 12 per cent. above current prices; and the remaining ½ in cash against produce, at from 5 to 10 per cent. more than it fetches in the bazaars. However, it is by barter alone that any extensive transaction ever takes place, or that it can be either readily or safely effected.

*Sales on Credit.*—The terms of credit vary considerably, and depend entirely upon the quality of the goods which the agent sells: for current or demanded merchandise, 3 couriers (or 2 periods of 15 days), and two and three 21 days, are the present terms; which are extended to four, five, and six 21 days for articles not much in request. Couriers mean post days; of which we have 2 in each month: at each

comer, and 31 days, a proportionate payment becomes payable; for instance, on a credit of six 31 days, 4th falls due at the expiration of the first month; and if paid, is noted accordingly on the bond, and so on until the remaining 5 periods are expired: It must, however, be observed, that payments are by no means punctually made, except by a few of our more wealthy bazaar buyers, although for the first 3 or 4 periods of a long credit some regularity is observed; but as the time begins to shorten, payments are proportionably retarded, so that two 31 days on a bond of credit for 6 months may be considered as a fair average of time in addition to the limited term.

*Sales for Cash.*—These very seldom occur, indeed, and then only when money is abundant, or the article sold scarce and in great demand; in fact, not 1 sale in 100 is made on these terms; and in about the same ratio is a discount taken off from a bazaar bond at even an exorbitant rate, however short the period may be that it has to run; occasionally a sale is, however, effected for  $\frac{1}{2}$  cash, and the other  $\frac{1}{2}$  short credit, for some very current goods.

*Character of Dealers.*—Before entering upon the articles of commerce, we are desirous of making you acquainted with the character and customs of our bazaar dealers. The Greek dealers are in general petty shopkeepers, very cunning, and very bad payers. The Jews have similar defects, but are well supported by their brethren, who generally become guarantee for each other. The Armenians are by far the largest traffickers both for buying and selling; and though hard bargainers, are mostly all solvent, and honourable as well as honest. The Turks are, however, as far superior to the foregoing races in all moral qualities, as they are inferior to them in means and commercial abilities; yet they sometimes deal largely, and their bond is as punctually discharged, in general, as the day comes when it falls due. The laws in this country mostly favour the debtor at the expense of the creditor; and so far they encourage dishonesty. The number of insolvent native dealers was at one time excessive, but of late the means of each individual buyer have been so carefully investigated, that at present we are not aware that there is one bazaar dealer who is not able to meet the demands of those from whom he has purchased. The European consuls, who enjoy much consideration by the Turks, protect the interests of their countrymen in disputed points; and, in general, questions of a commercial nature are submitted to the decision of a Turkish tribunal, where very little pleading, but a good deal of plain straightforward justice, goes forward; except that, perhaps, the European is, if any thing, rather less favoured than the native.

We now proceed to offer some observations on the leading articles of our imports and exports for your government, the correctness of which may be relied upon.

#### IMPORTS.

*Coffee.*—This is by far the most current article received here, and is sent from England, France, Holland, Trieste, Marseilles, Leghorn, Genoa, and America; but first, and principally of late years, from the latter country; the vessels of which are frequently laden with coffee, and always partly so: the next in point of quantity comes from England; but is shipped mostly in small parcels at a time of from 200 to 600 sacks, although occasionally that amount is doubled. France follows, but on a less extensive scale; and Austria, Holland, and the small ports in the south of Europe, do not together export more than what is received from England alone. We have 4 different qualities of coffee in our markets; namely, Mocha, St. Domingo, Havannah, and Brazil: the first is sent from Alexandria, and by American vessels, and but seldom from Europe; the consumption is, however, limited, and does not exceed 60,000 oke annually. At Constantinople the consumption is much greater. An Asiatic cannot do without his coffee; and it is well known that in Smyrna alone not less than perhaps 400,000 cups of it are daily drunk, which, computed at the cost price of 2 paras each, amount to 80,000 piastres! St. Domingo and Havannah coffees are preferred to the Brazil, although, when the latter is of a fair round quality, there is not more than 6 per cent. difference in price: the small green West India berry certainly commands a ready sale; but, for the finest sort, not more than 6 or 8 per cent. can be obtained above the middling and sound quality. Coffee is amongst the very few articles which occasionally meet with a partial and entire cash sale and short credit; and is, moreover, from the means and character of the dealers in it, the least liable to risk from insolvency. It is also the easiest through which an advantageous barter can be effected, as a much larger quantity of coffee will be taken in exchange for produce than almost any other item of European merchandise. Annual consumption, about 3,000,000 oke.

*Sugar* is the next in consequence. This article is supplied from the same sources as coffee, and is attended in its disposal with similar results. We receive the following qualities:—White crushed, white Havannah, brown do., white East India, refined in small loaves of 4 lbs. and in large of 8 lbs. each: the 2 latter are mostly shipped from America and England. The brown and ordinary sorts are not so current. Annual consumption, 10,000 kintals.

*Indigo* follows the 2 preceding articles, not so much in extent as meeting a ready sale always, and not unfrequently a profitable one; it is attended likewise with all the advantages and facilities attached to coffee and sugar, and is furnished by Europe and America, but principally by England. The qualities we receive consist of East India purple and copper, ditto common, and Guatemala. The first of the 3 is the kind best adapted for our markets, and is placed sooner and better than the other 2; but, as is the case with coffee, the *very fine* will not pay cost price, and ought therefore never to be sent. The pieces suited for our buyers ought to be good sized, with about an equal proportion of purple and copper in each piece. The few chests on sale are all ordinary, and consequently dull; and the first arrival of 15 or 20 chests (and not more ought ever to be shipped at one time) of fair East India will meet with a ready and favourable sale at 20 piastres per oke. Annual consumption, 80 chests.

*Manufactures.*—This is, in point of amount, the most extensive branch of trade carried on in Turkey. We have, as you will perceive from our price current, a numerous assortment of British and East India cotton goods and English shalloons. The white or unprinted cotton goods are most in demand during the warm weather, and the coloured or printed stuffs during winter, although a considerable quantity of all sorts is regularly and largely sold throughout the whole year. The East Indian manufactures are supplied by America and England exclusively; the latter country also sends fair imitations of the East India loom, in long cloths, seersuckers, &c. The native consumers are exceedingly fastidious in their choice of designs and colours, which ought very frequently to be altered, in order to meet their capricious taste. Manufactured goods are always sold at long credits, but large barterers are often effected through them. A person desirous of entering into this item of our commerce is almost certain ultimately to reap an advantage; but he must have patience, a large capital, and must not be disheartened at the first or second result of his enterprise, should it disappoint his hopes of profit. He must also enter into the thing with spirit, and keep his agent always supplied with the goods he may recommend; and he is to remember that many months must elapse before he can expect a return by bills of exchange, but sooner if he order a barter. The capital employed must also at least be to the amount of 50,000*l.* to do any good; and further, this sum ought to be disbursed by him without any pecuniary embarrassment or inconvenience. For a person willing to undertake such a step, he would require to be regularly furnished with patterns, and advice of the manner in which their ought to be printed and varied; and we again repeat, that with *competent means*, a real desire to follow the branch up firmly, and full information hence of what is required, a most extensive and finally lucrative business would be done; and we recommend the matter strongly to your best consideration. Annual consumption of all kinds (British), about 367,200 pieces.

*Cotton Twist* forms no inconsiderable article in our trade, and is supplied exclusively from England. Mule twist has, however, superseded, in some degree, the demand which formerly existed for water twist, and is consequently more in request. Water twist is nevertheless saleable, and both qualities

sought to be of rather high numbers. This article is often given in barter, but mostly sold at rather long credits, and hardly ever for cash. Annual consumption of water twist, 10,000 oke; ditto of mule ditto, 38,000 oke.

*Iron in Bars*, English, was formerly largely consumed; but, from the buyers being plentifully supplied, it is at present but little demanded, even at the losing price of the day. Barterers are very frequently effected through iron of all descriptions, and command a short credit, and sometimes a cash sale. Annual consumption, 15,000 to 18,000 kintals.

*Iron Plates* are generally employed for building purposes, and store doors.

*Iron Rods* are always saleable.

*Iron Hoops* are most saleable in August, September, and October, for fruit and other export barrels.

*Iron, Russian and Swedish Bars*.—These kinds are sent in rather large parcels, particularly the former, and fetch a higher price than the English, owing to their malleable qualities, which render labour easier, and by that advantage command a preference: though the high price, beyond the English make, puts the two qualities upon a level, and commands a larger consumption of the latter. Annual consumption, 3,500 kintals.

*Tin in Bars* is a good, steady, saleable article; is often given on fair terms in barter, always disposed of on short credit, and now and then placed for cash. It comes from England exclusively. Annual consumption, 830 to 1,000 barrels of 4 cwt. each.

*Tin in Plates* is attended with the foregoing advantages, and is also supplied by England alone. Annual consumption, 1,300 double boxes.

*Lead in Sheets, Pigs, and Shots*.—These 3 items have lately, particularly shot, been sent from Germany, and prove dangerous competitors with the English; in consequence of which, the thing is overdone, and we have more in market than meets the demand at losing prices.

*Lead, Red and White*.—These 2 articles have lately been much in request for the formation of paint. Some large parcels of red have lately arrived, and sell well and currently, but we are altogether without white. The consumption of all sorts of lead has, however, considerably decreased of late years, and no longer forms an item of any great consequence in our trade.

*Rum and Brandy*.—Leeward Island and Jamaica are furnished by America and England; the former particularly in the lower qualities, of which we have a full market at low prices. The better kind and brandy are supplied from England, but do not obtain a proportionate advance compared with the common sorts. Brandy is but of limited demand, and 2 or 3 puncheons are sufficient at a time. It ought, as well as rum, to be deeply coloured. Annual consumption of rum, 300 puncheons.

*Spices* are all saleable in small parcels at a time, particularly pepper and pimento; the latter of which, in small sound berries, is demanded at good prices. Nutmegs are very abundant, and offering very low without finding purchasers. France, America, and England supply us with spices, but France more so in cloves than in other kinds; and it may be remarked that the qualities received from England are preferred. Credit on selling is generally short.

*Cockineal* is a fair article now and then in small quantities; and when in demand, at times fetches good prices, occasionally a cash sale, and always one of the shortest credits. Annual consumption, 4,500 oke.

In concluding our observations on imports, we could wish to impress the conviction, that a poor man's purpose cannot be answered in speculating to this country; for, should his circumstances require a speedy remittance in bills, he must submit to a heavy sacrifice, in order to meet his wants, by selling his property for whatever it may fetch in cash; and such a measure cannot but be attended with very heavy losses. On the contrary, when an opulent person finds that his property cannot be realised at saving prices, he can afford to wait until a more favourable moment presents itself; and such a wait, in less than 12 months, is almost certain to arrive, when he retires his money with an advantage more than equal to any interest he could obtain for it in Europe.

That the rate of exchange has regularly advanced, and will continue to advance, is the natural result of the continual deterioration of the Turkish specie. We remember when the piece of money denominated 'Mahmoudia,' passed at about its value, or nearly so, of 10 piastres: it rose to 25 soon afterwards; and the few which remain are at present worth 38 each. At the period we allude to (1812), the exchange on London was at 26 piastres the pound sterling; and until lately (owing to the great stagnation of trade, and to political events, which have lowered it), the rate has been up to 60! It cannot, however, increase beyond that rate more than 5 per cent., as it then will nearly be on a par with the value of the gold and silver current coin of the realm, when it will be better to remit in specie than by a bill at 63 piastres for 61 days' sight. (This supposition has not been verified; the exchange, partly and principally from the degradation of the coin, and partly from the balance of payments being against Smyrna, is now, February, 1843, 119½ piastres per £ sterling! This shows how dangerous it is to hold property on speculation in Turkey.) The rates of exchange fluctuate considerably, and a difference of ¼ to 1 per cent., occasioned by the abundance or scarcity of paper in the market, often occurs between one post day and another. It is for this reason that the rate always decreases during the fruit season, which takes place at the latter end of August, and continues until the middle of October; when it rises again to meet the limited wants of drawers, and the larger demands of those remitters who did not ship fruit, and invest the funds of their employers in that article. These observations lead us to submit the question of the advantage which a person in Europe has in receiving from this country, instead of sending to it. Late extensive barterers have proved to us, and which we have endeavoured to show you, the unprofitable terms upon which they are conducted, were it only in paying, and that in cash too, for at least ⅓ of the amount, at a higher rate than was current; now this higher rate is, in itself, supposing the produce taken in barter to meet with a saving sale in Europe, of no small consideration;—then you have the advantage of drawing at a high exchange in making a purchase; and again you have the choice of selecting the good part of the produce, and of rejecting the inferior,—a choice which is not allowed in taking it in barter; lastly, the principal advantage in buying over bartering is, that you can avail yourself of a depression in the produce market, and effect your purchase upon easy terms; whereas, when a barter is proposed, it has the immediate effect of producing a general rise in the whole market, and also of engendering the most absurd pretensions on the part of produce holders, who are too conversant with commerce not to see that either the European house, wishing to barter, is in want of procuring returns for his principal, or else that the articles of produce wanted are in great demand in Europe—without which, the European agent would never submit to take produce at so much higher a price than he could procure it for with cash! The only time in which the person sending to this country can calculate upon a profitable return, is during the fruit season; and for that reason he ought to forward his shipments from Europe so as to meet the demand, and to be cashed by the beginning of August. A vessel from England hence is in general from 40 to 50 days in performing her voyage; sometimes much less, and but seldom longer; goods ought, if possible, always to be shipped in a fast and first class ship.

We now continue our remarks on the articles of our trade, and the following are some of them sent hence, and deserving of serious attention.

#### EXPORTS.

*Silk*.—This is the richest raw article in our export trade with Europe in general, but almost exclusively with England, which consumes nearly our entire produce. There are 3 different qualities, viz. fine, middling, and coarse. Bales adapted for the English market are composed of the 3 qualities, but the lesser quantity is of the coarse kind; at one time, all coarse was in request in London, but at present an assortment of the 3 qualities is preferred. When an order is given, it ought to be accompanied by a

description of the quality required; and it is necessary to state that, for all of the finest, without being mixed, a higher price is demanded. A bale contains 40 bales; and, before being packed, is carefully examined and approved of by competent native judges. Silk is produced at Brussa, a large city about 200 miles distant from Smyrna, whence it is forwarded by caravans to the different places of consumption, which are Constantinople and this town. Until very lately, almost the entire crop of silk came for sale to Smyrna, but at present the most considerable part is sent to Constantinople, where the price is higher; we have, therefore, here an advantage, not only in price, but also in our manner of packing, which fetches 5 or 6 per cent. more in England than if packed in the capital. Silk is mostly a ready money article, though it sometimes may be had in small quantities at a short credit; or half cash and half 1 or 2 couriers. It is also now and then given in barter. Annual average produce, 3,500 bales, or about 480,000 lbs. For a recent and authentic account of Turkey silk, see art. "Silk."

*Opium*, in point of value, and as an article of speculation, hardly gives way to silk; but as it is largely shipped by Americans, and sent in smaller quantities to Holland, and the south of Europe, it is subject to much competition and variation of price, although we have invariably observed that the opening price of the new crop is always the lowest, which, however, is in some measure counterbalanced by the decrease in weight which occurs by keeping. This is also a cash article, and indeed subject to the same conditions as purchasing or bartering for silk; it nevertheless has one inferiority which the silk is not liable to — namely, a difference in the quality of the crops: last year, for instance, opium was of a very bad kind, and hardly saleable in England; this year, though small, it is fine. On the Continent and in America, the small sort is preferred to the larger sized. We observe that, in England, the prices of opium fluctuate considerably; but we are not aware that, by holding it, any loss has ever happened, — another reason why a wealthy man only should embark in the Turkey trade. It would be impossible, or at least difficult, and attended with much expense, to obtain a monopoly of the opium crop, as it is produced through some thousands of individuals, each one (and they are all poor) adding his produce; and when collected in sufficient quantities, it is brought to market by the natives, having each of them 1 or 2 baskets for sale. What might be done is this: — Send a person to the place of growth with ready money to purchase a certain but limited quantity, and which he can do easily, if not hurried, to the extent of 50, or even 100 baskets, and upon terms of advantage, from the simple fact that the collectors of it prefer to receive a remunerating price on the spot of growth, rather than perform a long and expensive journey, with the chance of not finding purchasers immediately. Opium is produced at sundry places in the interior, of from 10 to 30 days' distance hence; but that grown at Calassar, about 600 miles from Smyrna, is the most esteemed, from its cleanness and good quality; it comes to market in June, and finishes about December or January. Annual average produce, 3,000 baskets, or about 400,000 lbs.

*Drugs and Gums* form one of our principal branches of commerce, and is almost entirely in the hands of the Jews. At present, gum Arabic and mastic are exceedingly scarce; and it is only when that is the case, or the demand for exportation is very brisk, that much variation exists in the price of drugs. Trieste, and occasionally America, consume a considerable portion of gums, but the largest quantity goes to the English markets. Barbers are often effected through this medium; but it is not attended with much advantage, as they are conducted by a race who never lose in any transaction they undertake. It is impossible to ascertain the quantities of drugs received in Smyrna, and equally so to know the quantity remaining, as they are dispersed all over the city, and consumed so irregularly in Europe, as bids defiance to all regular calculation.

*Spongers* have been and still are, an article of considerable moment, particularly for the English markets, and are found about the islands in the Grecian Archipelago, brought here, and cleaned for exportation. They vary in price from 6 to 90 piastres per oke, according to fineness and quality; the better sort alone answers for speculation, and which, it would appear, from the considerable quantity sent to London, turns to good account. The produce depends so entirely on chance, that no correct estimate of the yearly quantity can be formed; however, we are seldom in want of a moderate supply.

*Galls* are shipped in considerable quantities for the English, German, and French markets; the two former, however, being the largest consumers: for England, the blue galls are those principally sent; though the market there for their sale being dull and low, prices with us, moderate as they are compared to last year, will still further decline, should a demand not spring up, of which there is no appearance. Annual produce of all sorts, 5,500 kintals.

*Cotton Wool*, of which we have several qualities, is chiefly exported to Trieste and Marseilles. Barbers are made to a large extent in cottons. Annual average produce of all sorts, 60,000 kintals.

*Valonia* employs more British shipping for full cargoes of only one article, than any other species of produce, if we except, perhaps, fruit: it is also sent to Dublin and to the German markets in considerable quantities. Almost any supply can be obtained, and it is shipped generally near the places of growth, which are numerous, although there is never any want of it in the Smyrna market. It is much resorted to as a means of making barbers, which perhaps are as easily effected, upon pretty fair terms, as with any other article of produce. The annual produce is sufficient to meet the wants of all Europe. It can be had to any extent, and at all periods.

*Fruit*. — This is an article which occupies the attention of all Smyrna, more or less, and produces, during the season, great interest and activity. Figs come to market early in September, and raisins are ready for shipping early in October; the former are procurable only at Smyrna, where the latter in all their qualities may be procured; but the shipments are generally made at Ceaná, Vouria, Carabourná, Usbeck, &c., from which ports the name of the raisin takes its origin. Large sums are frequently gained in fruit speculations; and when the demand in England is brisk, and the prices and quality fair with us, it is very seldom happens, indeed, that any loss is sustained: it is, however, attended with risk; must be shipped dry; and ought only to go in a very fast, sound vessel, as much depends upon a first, or at least an early arrival, which obtains in general a higher price than the later arrivals. The quantity produced is always uncertain.

For the remaining articles of exports hence, we refer you to our price current. Carpets are produced to the extent of about 80,000 to 100,000 pikes a year. Oil (olive), to the amount of 10 to 15 middling sized cargoes, from the islands of Mytilene, Candia, &c., is generally shipped for America and France; seldom for England: the season commences in September, but the crops of olives fluctuate exceedingly in point of quantity; hence arise dear and cheap years: last year was a high one, and it is expected to be lower this. Copper, old and new, may be computed at 30,000 okes, which are generally bought up as soon as offered, for Europe. Hare skins are computed at from 350,000 to 400,000 annually. Madrier roots at 12,000 kintals. Eleotons, at 12,000 to 15,000 cheques. Goats' wool of all kinds may be calculated per year at 45,000 to 50,000 cheques; sheep's wool at 25,000 kintals. Wax (yellow), 1,600 kintals.

We have now finished our general remarks on the exports and imports of the place; and in concluding them, we beg to state that, upon an average of all of them, (with the exception of fruit from, and of iron to, Turkey,) the selling charges may (excluding *del credere* commission) be calculated at about 12 per cent., and on purchasing at about 8 per cent.

Prices of various Articles at Smyrna, 9th February, 1843.

	Price.	Costing on board in Sterling. Exchange \$118.	Freight to London.

Of the 129 arrivals of British ships at Smyrna in 1841, 65 were in ballast, 15 laden with coal, 38 had general cargoes of British produce, 1 manufactures, 2 part cargoes from England, 1 coffee, 5 iron, 1 bones, and 1 boxwood.

**SNUFF** (Ger. *Schnupftaback*; Fr. *Tabac en poudre*; It. *Tabacco da naso*; Sp. *Tabaco de polvo*; Rus. *Носовой табак*), a powder in very general use as an errhine. Tobacco is the usual basis of snuff; but small quantities of other articles are frequently added to it, to vary its pungency, flavour, scent, &c. Though substantially the same, the kinds and names of snuff are infinite, and are perpetually changing. There are, however, 3 principal sorts: the first, granulated; the second, an impalpable powder; and the third, the bran or coarse part remaining after sifting the second sort. Unless taken in excess, no bad consequences result from its use.

Dealers in tobacco and snuff are obliged to take out a licence, renewable annually, which costs 5s. They are also obliged to enter their premises, and have their names written in large legible characters over their door, or on some conspicuous part of their house, under a penalty of 50*l*. The dyeing of snuff with ochre, amber, or any other colouring matter except water tinged with colour, is prohibited under a penalty of 100*l*.; and its intermixture with fustic, yellow ebony, touchwood, sand, dirt, leaves, &c. is prohibited under a penalty of 100*l*. and the forfeiture of the article. — (1 & 2 Geo. 4. c. 109.) If snuff be found to contain 4 per cent. of any substance, not being tobacco, and other than water only, or water tinged with colour, or flavoured only, such snuff shall be deemed adulterated, and shall be forfeited, and the parties subjected to a penalty of 100*l*. over and above all other penalties and forfeitures. — (16.) No quantity of snuff weighing above 2 lbs. shall be removed by land or water without a permit. — (39 Geo. 3. c. 68.) — (See **TOBACCO**.)

**SNUFF-BOXES** are made of every variety of pattern, and of an endless variety of materials. We only mention them here for the purposes of giving the following details, not to be met with in any other publication, with respect to the manufacture of Laurencekirk or Ayrshire boxes. These are made of wood, admirably jointed, painted, and varnished.

These beautiful boxes were first manufactured at the village of Laurencekirk, in Kincardineshire, about 50 years since. The original inventor was a cripple hardly possessed of the power of locomotion. Instead of curtains, his bed (rather a curious workshop) was surrounded with benches and receptacles for tools, in the contrivance and use of which he discovered the utmost ingenuity. The inventor, instead of taking out a patent, confided his secret to a joiner in the same village, who in a few years amassed a considerable property; while the other died, as he had lived, in the greatest poverty. The great difficulty of the manufacture lies in the formation of the hinge, which, in a genuine box, is so delicately made as hardly to be visible. Peculiar, or, as they are called, secret tools, are required in its formation; and though greatly improved by time and experience, the mystery attached to their preparation is still so studiously kept up, that the workmen employed in one shop are rigorously debarred from having any communication with those employed in another.

About the beginning of this century, an ingenious individual belonging to the village of Cumnock, in Ayrshire, of the name of Crawford, having seen one of the Laurencekirk snuff-boxes, succeeded, after various attempts, by the assistance of a watchmaker of the same village, who made the tools, in producing a similar box; and by his success greatly enriched his native parish and province. Unfortunately, however, he did not improve his own fortune by his ingenuity; and died early in the present year (1844) in very poor circumstances. For a while, the Laurencekirk boxes were most in demand; but Crawford and his neighbours in Cumnock not only copied the art, but so improved and perfected it, that in a very few years, for every box made in the north there were, probably, 30 made in the south. In 1826, the Cumnock trade was divided amongst 8 master manufacturers, who employed considerably more than 100 persons. But we are sorry to say that it has greatly declined in the interval; and that at present (1844) it does not employ more than 22 individuals. Mauchline is now the principal seat of the manufacture, and about 160 hands are there engaged in it. The manufacture is also carried on, though to a very limited extent, at Carline, Auchinleck, and some other places. Plane is the wood in common use, and the cost of the wood in an ordinary sized box does not exceed 1*d*.; the paints and varnish are rated at 2*d*.; and though something is lost by selecting timber of the finest colour, the whole expense of the raw material falls considerably short of  $\frac{1}{2}$  per cent. on the return it yields, which consists almost wholly of the wages of labour.

The snuff-box manufacture, like most other departments of industry, has been greatly facilitated by the division of labour; and in all workshops of any size 2 classes of persons are employed, — box-makers, painters, and checkers or polishers; the wages of which may at present amount, the 1st class from 14s. to 16s. per week; the 2d from 15s. to 25s., and the 3d from 10s. to 12s. per do. When Crawford first commenced business, he obtained almost any price he chose to ask; and many instances occurred, in which ordinary sized snuff-boxes sold at 2l. 12s. 6d., and ladies' work-boxes at 25s. But as the trade increased, it became necessary to employ apprentices, who first became journeymen, and then masters; and such have been the effects of improvement and competition, that articles such as those specified above may be obtained at the respective prices of *two and sevenpence shillings*; while common boxes, which in 1637 sold for 18s. a dozen, may now (1844) be bought for 8s. 1 By means of the *Penicilligraph*, which is much employed, the largest engravings are reduced to the size most convenient for the workman, without injury to the prints; so that a snuff-box manufacturer, like a Dunfermline weaver, can work to order by exhibiting on wood his employer's coat of arms, or any object he may fancy within the range of the pictorial art. Some of the painters display considerable talent, and, when they put forth their strength, produce box-lids worth being preserved as pictures. At first, nearly the whole subjects chosen as ornaments were taken from Burns's poems; and there can be no doubt that the "Cotter's Saturday Night," "Tam O'Shanter," "Willie brewed a peck o' maut," &c. &c. have penetrated in this form into every quarter of the habitable globe. Now, however, the artists take a wider range; the studios of Wilkie, Landseer, &c. have been laid under contribution; landscapes are as often met with as figures; and there is scarcely a celebrated scene in the country that is not pictured forth more or less perfectly on the lid of an Ayrshire snuff-box. We regret to say that the trade has been for some years past in a languishing state. But it is probable, from the extremely low prices at which boxes are now produced, that the demand for them may be again extended. The principal markets for snuff-boxes are London, Liverpool, Glasgow, and Edinburgh; but considerable numbers are exported. Some very wretched imitations of Ayrshire boxes have been produced in different parts of England; but they can deceive no one who ever saw a genuine box. The hinge, as well as the finishing, is clumsy in the extreme.

\* The article on this curious manufacture in our former edition was written by our esteemed friend, John McDiarmid, Esq., editor of the *Dumfries Courier*; but the business has materially changed during the last 10 years. The statements in the present article have been derived from Mauchline and other seats of the manufacture.

**SOAP** (Ger. *Seife*; Fr. *Savon*; It. *Sapone*; Sp. *Jabon*; Rus. *Milo*; Lat. *Sapo*). The soap met with in commerce is generally divided into 2 sorts, *hard* and *soft*: the former is made of soda and tallow or oil, and the latter of potash and similar oily matters. Soap made of tallow and soda has a whitish colour, and is, therefore, sometimes denominated *white soap*: but it is usual for soap makers, in order to lower the price of the article, to mix a considerable portion of rosin with the tallow; this mixture forms the common *yellow soap* of this country. Soap made of tallow, &c. and potash does not assume a solid form; its consistence is never greater than that of hog's lard. The properties of soft soap as a detergent do not differ materially from those of hard soap, but it is not nearly so convenient to use. The alkali employed by the ancient Gauls and Germans in the formation of soap was potash; hence we see why it was described by the Romans as an unguent. The oil employed for making soft soap in this country is whale oil. A little tallow is also added, which, by a peculiar management, is dispersed through the soap in fine white spots. The soap made in countries which produce olive oil, as the south of France, Italy, and Spain, is preferable to the soap of this country, which is usually manufactured from grease, tallow, &c. — (*Thomson's Chemistry*.)

Account of the Quantities and Values of the Soap and Candles exported during each of the 5 Years ending with 1841, specifying the Countries to which they were exported, and the Quantity and Value of those sent to each.

The use of soap as a detergent is well known: it may, in fact, be considered as a necessary of life. Its consumption in most civilised countries is immense. Pliny informs us, that soap was first invented by the Gauls; that it was composed of tallow and ashes; and that the German soap was reckoned the best. — (*Lib. xviii. c. 61.*)

*Regulations as to the Manufacture.*—Soap is charged with a duty of excise, and its manufacture is consequently regulated by several provisions intended for the protection of the revenue. No person is permitted to make soap within the limits of the herd office of excise in London, unless he occupy a tenement of 102 s. a year, and is assessed to and pays the parish rates; nor elsewhere, unless he is assessed and pays to church and poor; and every soap-maker is required to take out a licence to be renewed annually, for which he is to pay 4s., but persons in partnership require only 1 licence for 1 house. They are also required to provide sufficient wooden covers for all coppers and other utensils wherein they boil hard soap; which covers are to be locked and sealed down by the officer whenever any soap is left in the same; and the furnace door, cover, and the ash-burn door is also to be locked and sealed at all times except when the same is at work. Regulations are also made for preventing the

neered annually, for which he is to pay 4s., but persons in partnership require only 1 licence for 1 house. They are also required to provide sufficient wooden covers for all coppers and other utensils wherein they boil hard soap; which covers are to be locked and sealed down by the officer whenever any soap is left in the same; and the furnace door, cover, and the ash-burn door is also to be locked and sealed at all times except when the same is at work. Regulations are also made for preventing the

use of any private conveyances or pipes; empowering officers to break up the ground to search for the same, and cut them up if found; if not, the officers must make compensation for the injury done. On cleansing or taking soap out of the copper, the makers are required to give notice; and certain spaces of time are limited in respect to the cleansing and taking out of the soap, according to the kind of soap, and the number of frames into which the same is put. Copper and other utensils must be cleansed once in every month. The frames used in making hard soap, for cleansing and putting the same into when taken out of the vessel when boiled and prepared, must be either square or oblong, and the bottom, sides, and end of such frames are to be 2 inches thick and not more than 45 inches long, and 15 inches broad, the same being marked and numbered at the expense of the soap-maker. The making of yellow or mottled soap is regulated by 59 Geo. 3. c. 90., by which every maker is required, as soon as the same is cleansed or taken out of the vessel in which it has been made, to add and put into the copper or vessel all the fob and skimmings taken out of the same, and also grease, in the proportion of at least 10 cwt. of grease for every ton of yellow or mottled soap which the copper or vessel shall be by the officer computed as half or make, and immediately run out such grease in the pre-

sence of the officer of excise. No less than the making of soap may be manufactured for sale; nor may any barilla be ground or pounded for sale; nor when ground or pounded be sold exceeding the weight of 28 lbs. of such barilla at one time. In the removal of soap exceeding the quantity of 28 lbs., the word "soap" must be painted or marked in large letters of at least 2 inches long on every chest, basket, box, cask, or package containing the same; and the same word must be painted or marked in letters of at least 5 inches in length on every wagon, cart, or other carriage carrying more than 28 lbs., in some conspicuous and open part of the same, unless it is carried by a person being a known and public or common carrier of goods and merchandise from one part to another; officers may inspect the soap and the accompanying certificate. Soap-makers are also to keep books, and enter therein all quantities of soap sold exceeding 28 lbs. Every barrel of soap must contain 256 lbs. avoirdupois; every 4 barrel 128 lbs.; every caskin 64 lbs.; and every 64 lbs. a barrel 128 lbs.; besides the weight and tare of the cask. Soap-makers must keep scales and weights, and assist the excise officers in the use of them, and must weigh their materials for making soap before the officer, on penalty of 50*l.*—(*Chitty's Com. Law*, vol. II. pp. 418-420.)

**Duty.**—The direct duty charged on hard soap, which is by far the most extensively used, amounted, till June 1833, to 3*d.* per lb., or 3*s.* per cwt., while the price of soap duty paid rarely exceeded 6*d.* per lb., or 6*s.* per cwt., so that the direct duty was fully 100 per cent. 1 But besides this enormous duty, the substance of which soap is made, viz. tallow, barilla, and turpentine, or resin, were respectively charged with duties of 3*s.* 4*d.* 3*d.*, and 4*s.* 4*d.* a cwt.; and taking these indirect taxes into account, it may be truly stated that soap was taxed from 120 to 180 per cent. *ad valorem*. The imposition of so exorbitant a duty on an article indispensable to the prosecution of many branches of manufacture, and to the comfort and cleanliness of all orders of persons, was in the last degree inexpedient. During the 5 years ending with 1832, the consumption of duty-paid soap was nearly stationary; though there can be little doubt, from the increase of manufactures and population during that period, that it would have been very considerably extended, but for the increase of smuggling. This practice is facilitated by the total exemption which Ireland enjoys from this duty; for it not unfrequently happens that the soap made in this country, and sent to Ireland under a drawback, is again clandestinely introduced into Great Britain. It is, perhaps, needless to say that nothing but the effectual reduction of the duty could put a stop to the smuggling and fraud that had been so generally practised. So long as the profit to be made by breaking the law was so high as 120 or 130 per cent., so long was it sure to be broken, in despite of the multiplication of penalties and the utmost activity and vigilance of the officers. But since the duty has been reduced 50 per cent., the temptation to smuggle has been most materially diminished. And the increased consumption that has followed the reduction of duty, has hindered the revenue from declining more than 4*th* part, or 25 per cent. Hence the advantages resulting from the diminished temptation to smuggling and fraud, and the influence of the reduced price of the article, in facilitating manufacturing industry, and in promoting habits of cleanliness, have been obtained without any very considerable sacrifice.

The entire repeal of the soap duty would be a popular measure; but, seeing that a large amount of revenue must be raised, and that those taxes only are productive which affect all classes of the community, we should not be disposed to recommend such a measure. It is not the tax itself, but the oppressive extent to which it was carried, that made it objectionable. Instead of proposing its repeal, we think it ought to be extended to Ireland. The exemption of one part of the empire from a duty of this sort imposed on another part, is contrary to all principle, and is fraught with pernicious results. It will be impossible to get rid of smuggling so long as this unjust distinction is suffered to exist. Were the duty extended to Ireland, the necessity for granting drawbacks on the soap exported to it, and of laying countervailing duties on that imported from it, would, of course, fall to the ground. And we feel pretty confident that, though a still further deduction were made from the rate of duty, its productiveness would not, under such circumstances, be impaired even in England.

**SPICES** (Ger. *Spezereyen* ; Du. *Speceryen* ; Fr. *Epiceries, Epices* ; It. *Spezi, Specierie* ; Sp. *Especies, Especerías* ; Port. *Espiciaria* ; Rus. *Prünüe korenja*). Under this denomination are included all those vegetable productions which are fragrant to the smell and pungent to the palate ; such as cloves, ginger, nutmegs, allspice, &c. These will be found under their proper heads.

**SPIRIT OF WINE.** See **ALCOHOL**.

**SPIRITS.** All inflammable liquors obtained by distillation, as brandy, rum, geneva, whisky, gin, &c., are comprised under this designation. The term *British spirits* is applied indiscriminately to the various sorts of spirits manufactured in Great Britain and Ireland. Of these, gin and whisky are by far the most important.

The manufacture of spirits is placed under the *surveillance* of the excise, and a very large revenue is obtained from it. The act 6 Geo. 4. c. 80. lays down the regulations to be followed by the distillers in the manufacture, and by the officers in charging the duties. This act is of great length, having no fewer than 151 clauses ; it is, besides, exceedingly complicated, and the penalties in it amount to many thousand pounds. It would, therefore, be to no purpose to attempt giving any abstract of it in this place. Every one carrying on the business of distillation must have the act in his possession, and be practically acquainted with its operation.

1. *Spirit Duties.* *Consumption of British Spirits in Great Britain and Ireland.*—There are, perhaps, no better subjects for taxation than spirituous and fermented liquors. They are essentially luxuries ; and while moderate duties on them are, in consequence of their being very generally used, exceedingly productive, the increase of price which they occasion has a tendency to lessen their consumption by the poor, to whom, when taken in excess, they are exceedingly pernicious. Few governments, however, have been satisfied with imposing moderate duties on spirits ; but, partly in the view of increasing the revenue, and partly in the view of placing them beyond the reach of the lower classes, have almost invariably loaded them with such oppressively high duties as have entirely defeated both objects. The imposition of such duties does not take away the appetite for spirits ; and as no vigilance of the officers or severity of the laws has been found sufficient to secure a monopoly of the market to the legal distillers, the real effect of the high duties has been to throw the supply of a large proportion of the demand into the hands of the illicit distiller, and to superadd the atrocities of the smuggler to the idleness and dissipation of the drunkard.

During the latter part of the reign of George I., and the earlier part of that of George II., gin-drinking was exceedingly prevalent ; and the cheapness of ardent spirits, and the multiplication of public houses, were denounced from the pulpit, and in the presentments of grand juries, as pregnant with the most destructive consequences to the health and morals of the community. At length, ministers determined to make a vigorous effort to put a stop to the further use of spirituous liquors, except as a cordial or medicine. For this purpose, an act was passed in 1736, the history and effects of which deserve to be studied by all who are clamorous for an increase of the duties on spirits. Its preamble is to this effect :—“Whereas the drinking of spirituous liquors, or strong water, is become very common, especially among people of lower and inferior rank, the constant and excessive use of which tends greatly to the destruction of their health, rendering them unfit for useful labour and business, debauching their morals, and inciting them to perpetrate all vices ; and the ill consequences of the excessive use of such liquors are not confined to the present generation, but extend to future ages, and tend to the destruction and ruin of this kingdom.” The enactments were such as might be expected to follow a preamble of this sort. They were not intended to repress the vice of gin-drinking, but to root it out altogether. To accomplish this, a duty of *twenty shillings* a gallon was laid on spirits, exclusive of a heavy licence duty on retailers. Extraordinary encouragements were at the same time held out to informers, and a fine of 100*l.* was ordered to be rigorously exacted from those who, were it even through inadvertency, should vend the smallest quantity of spirits which had not paid the full duty. Here was an act which might, one should think, have satisfied the bitterest enemy of gin. But instead of the anticipated effects, it produced those directly opposite. The respectable dealers withdrew from a trade proscribed by the legislature ; so that the spirit business fell almost entirely into the hands of the lowest and most profligate characters, who, as they had nothing to lose, were not deterred by penalties from breaking through all its provisions. The populace having in this, as in all similar cases, espoused the cause of the smugglers and unlicensed dealers, the officers of the revenue were openly assaulted in the streets of London and other great towns ; informers were hunted down like wild beasts ; and drunkenness, disorders, and crimes increased with a frightful rapidity. “Within 2 years of the passing of the act,” says Tindal, “it had become *odious and contemptible*, and policy as well as humanity forced the commissioners of excise to mitigate its penalties.”—(*Continuation of Rapsin*, vol. viii. p. 358, ed. 1759.) The same historian mentions (vol. viii. p. 390.), that during

the 2 years in question, no fewer than 12,000 persons were convicted of offences connected with the sale of spirits. But no exertion on the part of the revenue officers and magistrates could stem the torrent of smuggling. According to a statement made by the Earl of Cholmondeley, in the House of Lords—(*Timberland's Debates in the House of Lords*, vol. viii. p. 388.), it appears, that at the very moment when the sale of spirits was declared to be illegal, and every possible exertion made to suppress it, upwards of SEVEN MILLIONS of gallons were annually consumed in London, and other parts immediately adjacent! Under such circumstances, government had but one course to follow—to give up the unequal struggle. In 1742, the high prohibitory duties were accordingly repealed, and such moderate duties imposed, as were calculated to increase the revenue, by increasing the consumption of legally distilled spirits. The bill for this purpose was vehemently opposed in the House of Lords by most of the bishops, and many other peers, who exhausted all their rhetoric in depicting the mischievous consequences that would result from a toleration of the practice of gin-drinking. To these declamations it was unanswerably replied, that whatever the evils of the practice might be, it was impossible to repress them by prohibitory enactments; and that the attempts to do so had been productive of far more mischief than had ever resulted, or could be expected to result, from the greatest abuse of spirits. The consequences of the change were highly beneficial. An instant stop was put to smuggling; and if the vice of drunkenness was not materially diminished, it has never been stated that it was increased.

But it is unnecessary to go back to the reign of George II. for proofs of the impotency of high duties to take away the taste for such an article, or to lessen its consumption. The occurrences that took place in the late reign, though they would seem to be already forgotten, are equally decisive as to this question.

*Duties in Ireland.*—Perhaps no country has suffered more from the excessive height to which duties on spirits have been carried than Ireland. If heavy taxes, enforced by severe fiscal regulations, could make a people sober and industrious, the Irish would be the most so of any on the face of the earth. In order to make the possessors of property join heartily in suppressing illicit distillation, the novel expedient was here resorted to, of imposing a heavy fine on every parish, town land, manor land, or lordship in which an unlicensed still was found; while the unfortunate wretches found working it were subjected to *transportation for seven years*. But instead of putting down illicit distillation, these unheard-of severities rendered it universal, and filled the country with bloodshed, and even rebellion. It is stated by the Rev. Mr. Chichester, in his valuable pamphlet on the *Irish Distillery Laws*, published in 1818, that “the Irish system seemed to have been formed in order to perpetuate smuggling and anarchy. It has called the evils of both savage and civilised life, and rejected all the advantages which they contain. The calamities of civilised warfare are, in general, inferior to those produced by the Irish distillery laws; and I doubt whether any nation of modern Europe, which is not in a state of actual revolution, can furnish instances of legal cruelty commensurate to those which I have represented.”—(Pp. 92—107.)

These statements are borne out to the fullest extent by the official details in the *Reports of the Revenue Commissioners*. In 1811, say the commissioners (*Fifth Report*, p. 19.), when the duty on spirits was 2s. 6d. a gallon, duty was paid in Ireland on 6,500,361 gallons (Irish measure); whereas, in 1822, when the duty was 5s. 6d., only 2,950,647 gallons were brought to the charge. The commissioners estimate, that the annual consumption of spirits in Ireland was at this very period not less than TEN MILLIONS of gallons; and, as scarcely three millions paid duty, it followed, that seven millions were illegally supplied; and “taking one million of gallons as the quantity fraudulently furnished for consumption by the licensed distillers, the produce of the unlicensed stills may be estimated at *six millions of gallons*.”—(*Id.* p. 8.) Now, it is material to keep in mind that this vast amount of smuggling was carried on in the teeth of the above barbarous statutes, and in despite of the utmost exertions of the police and military to prevent it; the only result being the exasperation of the populace, and the perpetration of revolting atrocities both by them and the military. “In Ireland,” say the commissioners, “it will appear, from the evidence annexed to this Report, that parts of the country have been absolutely disorganised, and placed in opposition not only to the civil authority, but to the military force of the government. The profits to be obtained from the evasion of the law have been such as to encourage numerous individuals to persevere in these desperate pursuits, notwithstanding the risk of property and life with which they have been attended.”

To put an end to such evils, the commissioners recommended that the duty on spirits should be reduced from 5s. 6d. to 2s. the wine gallon (2s. 4d. the Imperial gallon), and government wisely consented to act upon this recommendation. In 1823, the duties were accordingly reduced; and the following official account will show what has been the result of this measure:—

An Account of the Quantities of Corn Spirits made in Ireland, which have paid the Duties of Excise for Home Consumption; stating the Rate of Duty paid, and also the Nett Amount of Revenue received in each Year, since 1820.—(Furnished by the *Excise*.)

1839	10,415,108	<i>Idem.</i>	1,261,741	17	0
1840	7,401,051	2s. 4d. and 2s. 8d.	935,632	19	4
1841	6,485,443	2s. 8d.	864,105	10	2
1842	5,290,630	2s. 8d. and 3s. 8d.	904,780	0	8
1843	5,546,483	3s. 8d. and 2s. 8d.	852,206	15	10

It may appear, on a superficial view of this Table, as if the consumption of spirits in Ireland had been nearly trebled in consequence of the reduction of the duty in 1823; but, in point of fact, it was not in any degree increased. The reduction of the duties substituted legal for illicit distillation, and freed the country from the perjuries and other atrocities that grew out of the previous system; but it would be wholly erroneous to say that it increased drunkenness. We have already seen that the commissioners, who had the best means of obtaining accurate information, estimated the consumption of spirits in Ireland, in 1823, at ten millions of gallons; and when greatest, in 1838, 13 years after, the consumption was only 12,296,342 gallons. No doubt, therefore, the measure deserves to be considered as having been in every point of view most successful. It will be seen that the increase of duty from 2s. 10d. to 3s. 4d., in 1830, perceptibly diminished the quantity of spirits brought to the charge; and as it was found to give a considerable stimulus to illicit distillation, which had previously been nearly extinct, the duty was reduced to 2s. 4d. in 1835. The extraordinary decrease in the consumption of spirits since 1839, though in some degree, perhaps, ascribable to the addition of 4d. a gallon made to the duty in 1840, is no doubt principally owing to the exertions of Father Mathew, and the spread of temperance societies; and notwithstanding the loss of revenue it has occasioned, the change has certainly been of great public advantage; and provided it be maintained, it is not easy to suppose that any thing should have occurred better fitted to improve the physical and moral condition of the people. The ill-advised addition of 1s. a gallon made to the duty in 1842 was repealed in 1844; for while it gave a powerful stimulus to clandestine distillation, it was pretty obvious it would not have added anything to the revenue, or given any additional impetus to the temperance movement.

*Duties in Scotland.*—The experience of Scotland is hardly less decisive as to this question. The exorbitancy of the duties produced nearly the same effects there as in Ireland. Mr. John Hay Forbes, formerly sheriff-depute of Perthshire, now one of the Lords of Session, stated in evidence before the commissioners, that, according to the best information he could obtain, the quantity of illegally distilled spirits annually produced in the Highlands could not amount to less than two millions of gallons. In corroboration of this, he stated that, in 1821, only 298,138 gallons were brought to the charge in the Highlands; and of these, 254,000 gallons were permitted to the Lowlands, leaving only 44,000 gallons for the consumption of the whole country;—a supply which, we are well assured, would hardly be sufficient for the demand of 2 moderately populous parishes. In a letter of Captain Munro of Teaninich to the commissioners, it is stated that, “at Tain, where there are upwards of 23 licensed public houses, not one gallon had been permitted from the legal distilleries for upwards of twelve months,” though a small quantity of smuggled whisky had been purchased at the excise sales, to give a colour of legality to the trade. The same gentleman thus expresses himself in another part of his letter:—“The moral effects of this baneful trade of smuggling on the lower classes is most conspicuous, and increasing in an alarming degree, as evidenced by the multiplicity of crimes, and by a degree of insubordination formerly little known in this part of the country. In several districts, such as Strathconon, Strathcarron, &c., the excise officers are now often deforced, and dare not attempt to do their duty; and smuggled whisky is often carried to market by smugglers escorted by armed men, in defiance of the laws. In short, the Irish system is making progress in the Highlands of Scotland.”

To arrest the progress of demoralisation, government, pursuant to the judicious advice

of the commissioners, reduced the duties on Scotch to the same level as those on Irish whisky; and the consequences were equally salutary. The subjoined official statement shows the consumption and rate of duty since 1821.

An Account of the Quantities of Corn Spirits made in Scotland, which have paid the Duties of Excise for Home Consumption; stating the Rate of Duty paid, and also the Nett Amount of Revenue received in each Year, since 1820. — (Furnished by the Excise.)

Years.	Number of Gallons.	Rate per Imperial Gallon.	Nett Amount of Revenue.	
	<i>Imperial Measure.</i>		£	s. d.
1821	2,385,495	6s. 2d.	737,347	3 1
1822	2,225,124	Ditto.	686,508	15 11
1823	2,538,266	6s. 2d. and 2s. 4½d.	656,948	18 3

1826	5,988,758	2s. 10d.	565,126	16 9
1827	4,732,199	Ditto.	672,450	6 6
1828	5,716,180	Ditto.	809,509	6 7
1829	5,777,280	Ditto.	818,172	4 2
1830	6,007,651	2s. 10d., 3s., and 5s. 6d.	939,826	6 0
1831	5,700,682	3s. 4d.	1,002,303	0 10
1832	5,405,439	Ditto.	900,806	10 0
1833	5,988,556	Ditto.	998,053	3 5
1834	6,045,043	Ditto.	1,007,506	10 0
1835	6,013,932	Ditto.	1,002,303	0 10
1836	6,620,826	Ditto.	1,105,450	3 4
1837	6,124,055	Ditto.	1,020,569	15 10
1838	6,225,711	Ditto.	1,043,180	18 4
1839	5,188,582	Ditto.	1,031,113	10 3
1840	6,180,138	3s. 4d. and 5s. 6d.	1,087,949	3 11
1841	6,989,905	3s. 6d.	1,098,118	1 11
1842	5,595,186	Ditto.	1,025,743	15 7
1843	6,995,798	Ditto.	1,025,506	1 6

This table sets the influence of the reduction of the duty in 1823 in the most striking point of view, the consumption of duty-paid spirits having more than doubled in the course of two years, at the same time that illicit distillation was all but suppressed. The addition of 6d. made to the duty in 1830 gave a check to the consumption from which it did not speedily recover; and revived, though happily to no great extent, the dormant energies of the smuggler. The influence of the 4d. added to the duty in 1840 is also most perceptible.

*Duties in England.*—Previously to the reduction of the duty on Irish and Scotch spirits, the duty on English spirits had been as high as 11s. 8d. a gallon. This high duty, and the restrictions under which the trade was placed, were productive of the worst effects. They went far to enable the distillers to fix the price of spirits, “and consequently” (we quote the words of the commissioners of excise inquiry) “to raise it much beyond that which was sufficient to repay, with a profit, the cost of the manufacture and the duty advanced to the Crown.” And, in proof of this, the commissioners mention, that in November, 1823, “when corn spirits might be purchased in Scotland for about 2s. 3d. a gallon, raw spirits could not be purchased in England for less than 4s. 6d. ready money, and 4s. 9d. credit, omitting, in both cases, the duty.” In consequence of this state of things, the adulteration of spirits was carried on to a great extent in England; and the large profits made by the smuggler occasioned clandestine importation in considerable quantities from Scotland and Ireland. To obviate these inconveniences, and at the same time to neutralise the powerful additional stimulus that the reduction of the duties in Scotland and Ireland would have given to smuggling, had the duties in England been continued at their former amount, the latter were reduced, in 1826, to 7s. a gallon, facilities being at the same time given to the importation of spirits from the other parts of the empire. Many complaints have been made of the influence of this measure in increasing drunkenness; but nothing can be imagined more completely destitute of foundation. The commissioners estimated the consumption of British spirits in England and Wales, in 1823, at 5,000,000 gallons — (*Supp. to Fifth Report*, p. 8.); and it appears from the subjoined account, that it amounted, for the year ending 5th of January 1844, to 7,719,458 gallons; producing 3,023,445*l.* of revenue; so that, making allowance for the increase of population since 1823, and for the check given to adulteration and smuggling, and considering, also, that the consumption of foreign spirits was not greater in 1843 than in 1823, it may be safely affirmed that the practice of spirit-drinking has not increased in England during the last 20 years. No doubt, however, it is still a great deal too prevalent, and large sums of money are wasted by the poor on gin, which had far better be expended on other things. But how much soever we may deplore the prevalence of gin-drinking, we may be assured that the evil is not one that can be cured, or even mitigated, by increasing, to any considerable extent, the existing duties on spirits. Such increase would substitute illegitimate for legitimate channels of supply; it would injure the public revenue; and diffuse among the populace the idle, disorderly, and predatory habits that mark the character of the smuggler; and it would do all this without lessening in any degree the vice of drunkenness.

Account of the Quantities of Corn Spirits made in England, which have paid the Duties of Excise for Home Consumption, stating the Rate of Duty paid, and also the Nett Amount of Revenue received in each Year, since the Year 1820. — (Furnished by the Excise.)

Years.	Number of Gallons.	Rate per Imperial Gallon.	Nett Amount of Revenue.
1821	4,136,616	11s. 9½d.	£ 419,280 18 6

Trade in Spirits. — No spirits made in England, Scotland, or Ireland shall be conveyed from England to Scotland or Ireland, or from Scotland or Ireland to England, otherwise than in casks containing twenty gallons at the least, and in vessels of not less than fifty tons burden.

All persons who receive, or deliver, or compound, or compounders, having more than twenty gallons of spirits in

their possession, shall be deemed dealers in spirits, and subject to the survey of the officers of excise, and to all the regulations, penalties, &c. to which such persons are liable. — (6 Geo. 4. c. 80. sect. 122.)

Desires in British spirits are prohibited selling or having in their possession any plain British spirits, except spirits of wine of any strength exceeding the strength of 25 per cent. above

hydrometer, or of any strength below 17 per cent. under hydrometer proof, or any compounded spirits, except shrub, of any greater strength than 17 per cent., under hydrometer, under pain of forfeiting all such spirits, with the casks, &c. — Sect. 124.

Dealers in foreign and British spirits are to keep them separate, in cellars, vaults, or other places specially entered for that purpose, under a heavy penalty; and any person mixing, selling, or sending out any British spirits mixed with foreign or colonial spirits, shall forfeit 100*l.* for every such offence. — Sect. 126.

No retailer of spirits, or any other person licensed or unlicensed, shall sell or send out from his stock or custody any quantity of spirits exceeding 1 gallon, unless the same be accompanied by a true and lawful permit, under pain of forfeiting 500*l.*; and any rectifier, compounder, or dealer in spirits, receiving the same into their stock, or allowing any one else to receive it, and any carrier, boatman, or other person knowingly carrying the same, shall forfeit the sum of 200*l.*, which the boat, horse, cart, &c. used in the carriage. — Sect. 116.

No licence to be granted for retailing spirits within gaols, houses of correction, or workhouses for parish poor; nor are spirits to be used there, except medicinally prescribed by a regular physician, surgeon, or apothecary. Penalty for a first offence of this sort committed by gaolers, &c., 100*l.*; a second offence to be deemed a forfeiture of their office. — Sect. 124.

Persons hawking spirits to forfeit them and 100*l.*; and if the penalty be not immediately paid, they are to be committed to the house of correction for 3 months, or until paid. — (Sect. 128.) Any person is authorised to detain a hawker of spirits, and give notice to a peace officer, who is to carry the offender before a justice. — Sect. 140.

Any officer of excise, or other person employed in the excise, taking any sum of money or other reward from, or entering into any collusive agreement with, any person, to act contrary to his duty, to forfeit 500*l.*, and be incapacitated, and any person offering such reward or proposing such agreement, to forfeit 500*l.*. — Sect. 145.

For the regulations as to the importation, &c. of foreign spirits, see BRANDY, GERRY, and RUM.

**SPONGE** (Ger. *Schwamm*; Fr. *Eponge*; It. *Spugna*; Sp. *Espanja*), a soft, light, very porous, and compressible substance, readily imbibing water, and as readily giving it out again. It is found adhering to rocks, particularly in the Mediterranean Sea, about the islands of the Archipelago. It was formerly supposed to be a vegetable production, but is now classed among the zoöphytes; and analysed, it yields the same principles as animal substances in general. The inhabitants in several of the Greek islands have been trained from their infancy to dive for sponges. They adhere firmly to the bottom; and are not detached without a good deal of trouble. The extraordinary clearness of the water facilitates the operations of the divers. Smyrna is the great market for sponge. The price varies from 6 to 16 piastres per oke for ordinary and dirty, and from 80 to 100 piastres per oke for fine and picked specimens. Sponge is also fished for in the Red Sea. — (*Ure's Dictionary*; *Savary's Letters on Greece*, Eng. ed. p. 109.; and *private communications*.)

Sponge is used in surgery, and for a variety of purposes in the arts. The duty on sponge when brought from a foreign country, is 6*d.*, and when brought from a British possession, 1*d.* per lb. Now, as the far greater portion comes from the former, and as the duty produced, in 1840, 1,932*l.*, the entries may be partly presumed to have amounted in that year to about 78,500 lbs. No deduction is made from the duty on account of sand or dirt, unless it exceed 7 per cent., and then only for the excess above 7 per cent.

**SQUILL** (Ger. *Meerzwiebel*; Fr. *Scille*, *Oignon marin*; It. *Scilla*, *Cipolla marina*; Sp. *Cebolla albarrana*), or, as it is sometimes denominated, the *Sea onion*, is a plant with a large bulbous root, which is the only part that is used. It grows spontaneously on sandy shores in Spain and the Levant; whence we are annually supplied with the roots. They should be chosen large, plump, fresh, and full of a clammy juice: some are of a reddish colour, and others white; but no difference is observed in the qualities of the 2 sorts. The root is very nauseous, intensely bitter, and acrimonious; much handled, it ulcerates the skin. The bulbs are brought to England, preserved fresh in sand. The acrimony of the roots, on which their virtue depends, is partially destroyed by drying and long keeping, and is completely destroyed by exposure to heat above 120°. Squill is one of the most powerful and useful remedies in the materia medica. (*Lewis's Mat. Med.*; *Thomson's Dispensatory*.)

**STADE**, a small city of Hanover, on the Schwinge, 23 miles W. by N. of Hamburg, lat. 53° 36' 32" N., lon. 9° 28' 34" E. It has very little trade; and would be quite unworthy of notice in a work of this sort, except for the circumstance that a toll or duty, charged by the Hanoverian government on all goods imported into Hamburg, whether for consumption or transit, is paid at the castle of Brunshausen, contiguous to this town. The duty is generally about  $\frac{1}{2}$  per cent. *ad valorem*. It is rated according to a tariff; and is computed from the ship's manifest, bills of lading, cockets, &c., which must be left at Brunshausen for that purpose. The duties are paid in Hamburg; and no vessel is allowed to unload, till a receipt, subscribed by the Hanoverian authorities in that city, be produced for the duties. We have already — (see HAMBURG) — expressed our surprise that an obstruction of this sort should have been tolerated for so long a period. The duties fall heavily on certain descriptions of goods; particularly on some manufactured articles; and are, at an average, decidedly higher than the duties charged in Hamburg. They are most objectionable, however, from their requiring many troublesome regulations to be complied with; the unintentional deviation from any one of which exposes the cargo to confiscation, and never fails to occasion a great deal of delay, trouble, and expense. As the principal part of the foreign trade of the Elbe is in our hands, we are, of course, principally affected by the Stade toll; and considering the source of the nuisance, it is not a little astonishing it should not have been abated long ago. The sum which the Hanoverian government derives from the duties is but trifling compared with the injury they inflict on our trade; it would, consequently, be good policy for the former to sell, and for the British government to buy, an exemption from so vexatious a duty; and few things would do more to extend our trade with Hamburg than the completion of an arrangement of this sort. We believe, however,

that the negotiations which have been for some time on foot with respect to this matter are in a fair way of being brought to a satisfactory conclusion, and that the merchants engaged in the trade to Hamburg may expect, at no distant period, to be relieved from the annoyance of the Stade duties.

Previously to 1736, English ships passing up the Elbe had to come to an anchor opposite Brunshausen: but they were then allowed, under certain conditions, to pass on to Hamburg. The proclamation to this effect, and which contains an epitome of the regulations that have still to be observed, is subjoined.

1. That all English vessels be exempted from coming to an anchor before the river Schwinge, and allowed to sail directly up to Hamburg.
2. Each English vessel shall be obliged, at their approach, within about 1 of a league thereof, to hoist their colours, to lower their sails, and only to drive, till the legitimization is made at the king's frigate lying there.
3. The master of the ship, or a proper person fully provided with the necessary documents, is to go on board the frigate, and afterwards to the Custom-house at Brunshausen and Stade; and there to produce an exact manifest, and the original bills of lading, cocketts, &c.
4. The documents being produced, the accounts shall be stated, and all duties must be paid at Brunshausen, Stade, or Hamburg.
5. The clearance shall be given at Brunshausen to the person sent thither by the master of the vessel; by whom it must be delivered to the king's commissary in Hamburg, together with the documents of the cargo, and a specification of the parcels, bales, casks, &c. which were received on board at the port of lading, whether designed for Hamburg or other place.
6. Bulk must not be broken till all this has been performed, except the king's commissary in Hamburg permits, in urgent cases, the unloading.
7. The vessel being thus allowed to pass the frigate without being searched, in case of suspecting any fraud, the masters shall be obliged to sign a proper oath; and the merchants in

Hamburg, who receive effects by those vessels, shall make an exact report thereof, and give a certificate in lieu of an oath — that they neither have received nor expected more goods than have been specified, — which must be delivered to his Majesty's commissary in Hamburg, to enable him to examine the report made by the master.

8. No master is to depart from Hamburg before he has taken a certificate from his Majesty's commissary, proving that all has been duly performed; which is to be sent to the king's frigate, near Brunshausen.

9. The signals mentioned in the second article are likewise to be made when the ship repasses Stade.

10. The taking cognizance of, and punishing misdemeanours, frauds, and mismanagements, as well as the neglecting of the preceding articles, remains in the Court of the King's Customs at Stade; so that both merchants and masters of ships, who may be called to an account, shall, when summoned, appear before the said court, and submit to its decisions; but they have the liberty of appeal to the superior courts for a revision and relief.

11. As to all other points not expressly mentioned in the foregoing articles, they shall be observed at the king's Custom-houses at Brunshausen, Stade, and Hamburg, according to the regulations and customs heretofore practised.

12. This gracious concession is hereby granted only *durante bene placito* the king reserving to himself and his successors in his German dominions the right of revoking it, and making any alterations or new orders, whenever they shall see reason.

**STARCH** (Ger. *Amidan*; Fr. *Amidon*; It. *Amodi*, *Amito*; Sp. *Amidon*, *Almidon*; Rus. *Kruchmal*), a substance obtained from vegetables. It has a fine white colour, and is usually concreted in longish masses; it has scarcely any smell, and very little taste. When kept dry, it continues for a long time uninjured, though exposed to the air. It is insoluble in cold water; but combines with boiling water — forming with it a kind of jelly. It exists chiefly in the white and brittle parts of vegetables, particularly in tuberos roots, and the seeds of the gramineous plants. It may be extracted by pounding these parts, and agitating them in cold water; when the *parenchyma* or fibrous parts will first subside; and these being removed, a fine white powder, diffused through the water, will gradually subside, which is the starch. Or the pounded or grated substance, as the roots of potatoes, acorns, or horse chestnuts, for instance, may be put into a hair sieve, and the starch washed through with cold water, leaving the grosser matters behind. Farinaceous seeds may be ground and treated in a similar manner. Oily seeds require to have the oil expressed from them before the farina is extracted. Potato starch goes a good deal further than wheat starch — a less quantity of it sufficing to form a paste of equal thickness with water. It has a very perceptible crystallised appearance, and is apparently heavier than common starch. — (*Thomson's Chemistry*; *Ure's Dictionary*.)

Starch was charged, down to 1834, with an excise duty of 2½d. per lb.; but the injurious influence of the duty, the nett produce of which did not exceed 85,000*l.*, having been forcibly pointed out by the Commissioners of Revenue Inquiry, it was repealed in the course of the above year. In 1833, duty was paid on 3,070,096 lbs. starch. The manufacture has since, however, been greatly extended.

**STEAM VESSELS.** We have already laid before the reader an account of the number of steam vessels belonging to the different ports and divisions of the U. Kingdom (*ante*, p. 1109.); and we believe we shall be doing an acceptable service to the bulk of our readers by laying before them the following extracts from a letter by the Secretary to the Treasury of the U. States, prepared in pursuance of a resolution of the House of Representatives, of the 20th of June, 1838. It communicates many interesting particulars with respect to the employment of steam engines and steam vessels in the U. States, and the accidents that have happened to the latter.

*Number of Steam-boats, and other Steam Engines in the U. States.* — “The whole number of steam engines, of every kind, in the U. States, reckoning one to each boat, is estimated to be 3,010. Of these, 2,653 have been ascertained, and 357 are estimated, in places from which the returns are either defective or not received at all. Of this whole number, about 800 are supposed to be employed in steam-boats, of which 700 are ascertained, and 100 estimated. About 350 are employed in locomotives upon railroads. Of these, 337 are ascertained and 13 estimated. The residue, being 1,860, are used in manufactories of various kinds. Of these, 1,616 are ascertained and 244 estimated.”

*Number of Accidents to Steam Engines.* — “The number of accidents occasioning loss of life or much injury to property, which have occurred in the use of steam engines of every kind in the U. States, is computed to have been about 260. Of these, 253 are

ascertained, and the rest are estimated. Such accidents, by explosions and other disasters to steam-boats, appear to have constituted a great portion of the whole, and are supposed to have equalled 230, of which 215 are ascertained. The first of these is believed to have occurred in the *Washington*, on the Ohio river, in 1816.

"Since the employment of steam-boats in the U. States, it is computed that quite 1,300 have been built here. Of these, about 260 have been lost by various accidents, as many as 240 worn out, and the rest are now running.

"The first steam-boat used for practical purposes here (or indeed in any part of the world) was in 1807, on the Hudson River, in the *State of New York*. She was built by *Fulton*, called the *North River*, with an engine of only 18-horse power, and made the passage between Albany and New York in thirty-three hours. Though with a steam engine manufactured abroad by *Boulton and Watt*, yet no boat was launched in Europe that proved successful in practice, till five years after, by *Mr. Bell*, at *Glasgow*, in 1812. At that time, the *Car of Neptune*, built in 1808, the *Paragon*, in 1811, and the *Richmond*, in 1812, were all, in addition to the boat first built, running from New York. *Rumney* is known to have made experiments on a small scale as to steam-boats, in Virginia, as early as 1787; but they were not reduced to any practical use. Both he and *Fitch* commenced trials in this country as early as 1783 and 1784, and *Oliver Evans* in 1785 and 1786. They had been preceded in France, in 1762, by the *Marquis d'Jeauffrey*; and the idea of applying steam in boats had been suggested in England as early as 1736, by *Jonathan Hulls*.

"The whole number of steam-boats ascertained and estimated to be now in this country, is 800. In England, in 1836, the whole number is computed to have been 600. On the Western and South-western waters alone, near 400 are now supposed to be running, where none were used till 1811, and where, in 1834, the number was computed to be only 234. Of these 400, about 141 are estimated. On the Ohio river alone, in 1837, about 413 different steam-boats are reported to have passed through the *Louisville and Portland Canal*, besides all below and above, which never passed through. But it deserves notice, that of those 413, near 60 went out of use by accidents, decay, &c., within that year; and several of the others, viz., 104, were new, and many of them probably were destined to run on other rivers. As an illustration of the rapid increase of business in steam-boats on the Ohio, the number of passages by them through the *Louisville canal* increased from 406, in 1831, to 1,501, in 1837, or nearly fourfold in six years. About 70 boats were running the present year on the North-western lakes, where a few years since the number was very small, having been in 1835 only 26. Of the 800 steam-boats now in the U. States, the greatest number ascertained to be in any State is 140, in the *State of New York*.

"It is a matter of surprise that so few of these are sea-going vessels, considering that the first steam-boat which ever crossed the Atlantic was built in New York, so long ago as 1819, and went from *Savannah* (the place after which she was called) to *Liverpool* in 26 days; and that the *Robert Fulton*, as early as 1822, made several trips to *New Orleans* and *Havannah*. A similar remark applies to the circumstances that only one of the whole number is a public vessel of war, when the first steam vessel of that kind ever launched was the *Fulton*, and was built in this country, so long ago as 1815. The Government of the U. States never owned but two steam vessels of war — both called the "*Fulton*." The first was lost by accident, in 1829; and now there is only the other before alluded to, built in 1838. It has, however, 13 other steam vessels, employed in the war department, on the public works, and in the transportation of troops and stores.

"Of the whole number of locomotives in the U. States propelled by steam, being about 350, the most which have been ascertained in any State is 96, in the *State of Pennsylvania*.

"None of them were introduced here till 1831, though they now run on nearly 1,500 miles of railroad. The first, it is believed, was in the *State of Delaware* on the *New-castle railroad*; the second, in *Maryland*, on the *Baltimore and Ohio railroad*; and the third, between *New Orleans* and *Lake Pontchartrain*, in the *State of Louisiana*. They had been tried in this country, by *Oliver Evans*, as early as 1804, and in England as early as 1805; but not reduced to useful practice in the latter till 1811 for freight, and in 1830 for passengers and speed. One succeeded on a common road, from *London* to *Bath*, in 1829. Of the whole number of other steam machines in the U. States, (being about 1,860), the state of *Pennsylvania* has the most, being 583. The number in some States is not accurately ascertained; but near 300 are ascertained and computed to exist in *Louisiana* alone. The introduction of them here, and especially with the high pressure machinery, was much promoted by *Oliver Evans*, about 1804. The first of them in use in the U. States was put up in 1787, in the *State of New Jersey*, for raising water and earth from mines. The next were about 1791, in a cotton factory at *Kensington*, near *Philadelphia*; and soon after in saw-mills, and iron slitting

and rolling mills, at Pittsburg. The power has been known in England to be applicable to mechanical uses since the experiments of the Marquis of Worcester, in 1663. It is said by some that he was preceded in France (and a pamphlet published on the subject as early as 1615,) by Solomon de Caus. But the views of the latter, like many who preceded him in the knowledge of steam as a moving power, are supposed to have been rather theoretical than practical. Several machines were made in England as early as 1720; and Watt's first patent was taken out, for improvements in them, as early as 1769. But they were not, even there, very extensively and successfully applied to mills and manufactories, till 1785, though 18 large engines were employed in the mines of Cornwall as early as 1770; and a flour mill, with 20 pairs of stones, was moved by steam in London in 1784.

"The greatest employment of these in the South is in the sugar manufacture, and in cleaning and pressing cotton; in the West, in grist and saw mills, and in various manufactures of iron machinery and tools; and in the East, in mills, in printing, in cotton manufactories, and the public works at navy yards and armouries.

"The government of the U. States owns 17 of these; they being employed at their navy yards, to empty docks, saw timber, &c.; and at some arsenals and armouries, in manufacturing arms.

"The tonnage of all the steam-boats in the U. States is computed to exceed 155,473. Of this, 137,473 is in boats ascertained or reported. By the official returns, the whole tonnage would now, probably, equal near 160,000 tons, having been, in 1837, equal to 153,660. Many boats included in those returns have been lost or worn out, and several new ones built since. In England, the tonnage is estimated to have been 67,969 in 1836. The tonnage of each boat here averages about 300; and the estimates, where the returns have been defective, were made on that basis. The power employed in all the steam engines in the U. States is ascertained and estimated at 100,318 horse-power: of this, 12,140 only is in engines estimated and not returned. In the aggregate, all this new mechanical force would be equal to the power of 601,808 men. Of this force, 57,019 horse-power is computed to be in steam-boats; 6,980 in railroads; and the rest, being 36,319, in other engines. This averages about 70 horse-power to each boat, or one horse to between two and three tons, and less than 20 horse-power to each of the other engines. It is a striking fact, that the steam-power employed in standing engines is equal to about two-thirds of all that is used in steam-boats. The largest boat in the U. States is supposed to be the *Natches*, of 860 tons, and near 300 horse-power, destined to run between New York and Mississippi; the *Illinois* and the *Madison*, on Lake Erie, are the next in size, the former being 755, and the latter 700 tons; the *Massachusetts*, in Long Island Sound, is the next largest, being 626 tons; and the *Buffalo*, on Lake Erie, next, being of 613 tons. The largest boats passing Louisville, in 1837, were the *Uncle Sam*, of 447 tons, and the *Mogul*, of 414 tons; though below Louisville, the *Mediterranean*, of 490 tons, and the *North America*, of 445 tons, on the Ohio, and the *St. Louis*, of 550 tons, on the Mississippi, are running. The greatest loss of life well authenticated on any one occasion in a steam-boat appears to have been by collision, and consequent sinking, in the case of the *Monmouth*, in 1837, on the Mississippi, by which 300 lives were lost. The next greatest were by explosions: of the *Oronoka*, in 1838, on the same river, by which 130, or more, lives were lost; and of the *Moselle*, at Cincinnati, Ohio, by which 100 to 120 persons were destroyed. The greatest injury to life by accidents to boats from snags and sawyers appears to have been 13 lost, in 1834, in the case of the *St. Louis*, on the Mississippi river. The greatest by shipwreck was in the case of the *Home*, in 1837, on the coast of North Carolina, where 100 persons were lost. The greatest by fire happened in the *Ben Sherrod*, on the Mississippi river, in 1837, when near 130 perished. The number of steam-boats built in the U. States in 1834 was 88; but in 1837 it was 184; or had increased over 200 per cent. in three years. The places where the greatest number of steam-boats and other steam machines appear to have been constructed in this country, are Pittsburg, Cincinnati, and Louisville, on the Western waters; and New York, Philadelphia, and Baltimore, on the Atlantic. At Louisville alone, from 1819 to 1838, there appear to have been built 244 steam engines; of which 62 were for boats. The fuel originally used in steam-boats in the U. States was wood; but of late years bituminous coal has, in many instances, been substituted; and, in several, anthracite coal: the latter, from the small space it occupies, would seem to possess a decided advantage in sea-going vessels, as well as in locomotives.

"Some steam-boats made of iron are believed to be in use in Georgia, if not in other parts of this country, though none of that material have been manufactured here; but it is computed that their cost is less than those of wood; and as they draw less water with the same freight, they are more useful on shallow streams."

STEEL (Fr. *Acier*; Ger. *Stahl*; It. *Acciajo*; Lat. *Chalybs*; Rus. *Stal*; Sp. *Acero*; Sw. *Stål*) is iron combined with a small portion of carbon; and has been, for that

reason, called carburetted iron. The proportion of carbon has not been ascertained with much precision. It is supposed to amount, at an average, to  $\frac{1}{15}$ th part. Steel is so hard as to be unmanageable while cold; or at least it acquires that property by being immersed, while ignited, in a cold liquid: for this immersion, though it has no effect upon iron, adds greatly to the hardness of steel. It is brittle, resists the file, cuts glass, affords sparks with flint, and retains the magnetic virtue for any length of time. It loses this hardness by being ignited, and cooled very slowly. It is malleable when red hot, but scarcely so when raised to a white heat. It may be hammered out into much thinner plates than iron. It is more sonorous; and its specific gravity when hammered is greater than that of iron—varying from 7.78 to 7.84. Steel is usually divided into 3 sorts, according to the method in which it is prepared; as *natural steel*, *steel of cementation*, and *cast steel*. The latter is the most valuable of all, as its texture is the most compact, and it admits of the finest polish. It is used for razors, surgeons' instruments, and similar purposes. Steel is chiefly employed in the manufacture of swords, knives, and cutting instruments of all sorts used in the arts; for which it is peculiarly adapted by its hardness, and the fineness of the edge which may be given to it. — (*Thomson's Chemistry*; and see *Iron*.)

STETTIN, a city of Prussia, on the left bank of the Oder, about 36 miles from its mouth, in lat.  $53^{\circ} 23' 20''$  N., long.  $14^{\circ} 33'$  E. It is well built, strongly fortified, and had a population, in 1838, of 31,100.

Stettin is the seat of an extensive and growing commerce; and is now, indeed, the principal port of importation in Prussia. She owes this distinction mainly to her situation. The Oder, which flows through the centre of the Prussian dominions, is navigable as far as Ratibor, near the extreme southern boundary of Prussian Silesia; and is united, by means of canals, with the Vistula, the Elbe, the Spree, &c. Stettin is, consequently, the principal emporium of some very extensive and flourishing countries; and is not only the port of Frankfort-on-the-Oder, Breslaw, &c., but also of Berlin. A railway from the latter to Stettin is nearly (1843) completed. Hence, at the proper seasons, its wharfs are crowded with lighters that bring down the produce of the different countries traversed by the river, and bring back colonial products, and other articles of foreign growth and manufacture. Vessels of considerable burden, or those drawing above 7 or 8 feet water, load and unload, by means of lighters, at the mouth of the river, at Swinemunde, the out-port of Stettin, on the east coast of the Isle of Usedom, in lat.  $53^{\circ} 55'$  N., long.  $14^{\circ} 15' 15''$  E. Formerly there were not more than 7 feet water over the bar adjacent to Swinemunde; but the harbour of the latter has recently been so much improved, by the construction of piers and breakwaters, dredging, &c., that it is now the best on the Prussian coast, and admits vessels drawing from 18 to 19 feet water. A lighthouse has been erected at the extremity of the eastern pier. Stettin is a free port; that is, a port into and from which all sorts of goods may be imported and re-exported free of duty. If goods brought through the Sound be imported at Stettin, and entered for home consumption in the Prussian states, they are charged with  $\frac{1}{2}$  per cent. less duty than if they had been imported through any other channel. This is intended to reimburse the merchant for the Sound duties, and to encourage importation by this direct route in preference to that carried on through Hamburg and Lunden. There is a great wool fair in the month of June each year.

*Mosie, Weights, and Measures*, same as at Danzig, which see. The Bank of Berlin has a branch at Stettin, and there is also an insurance office.

*Imports and Exports.*—The principal articles of import at Stettin are sugar, coffee, dye-woods, wine, iron, and hardware, oil, tallow, cotton and cotton goods, bearings, spirits, linseed, coal, salt, &c. The principal exports are corn, especially wheat; spirits, reprocessed, spelter, timber, &c.; bones, manganese, fruits, &c.

*Account of charges incurred by a British ship, of about 200 tons burden, at Swinemunde and Stettin:—*

*Navigation.*—Stettin is the principal shipping port in the Prussian dominions. In 1841 there belonged to it 300 ships, of the burden of 49,892 tons, being about a third part of the shipping belonging to Prussia.

*Port Regulations.*—All vessels are prohibited entering Swinemunde, unless forced by stress of weather, without previously heaving-to fire, and receiving, a pilot on board. But when compelled to enter without a pilot, the master is to observe the signals made from the beacons erected on the eastern and western moles as follows:—

#### Notice.

1. When pilots cannot put to sea, and captains of ships are nevertheless resolved to enter the harbour, a red flag will be hoisted on the direction beacon of the eastern mole.
2. The captains will then steer until they find themselves, S.E. by S. on the compass, from the lighthouse placed on the utmost point of the east mole, taking care to keep the eye-earmost great white buoy, situate on the end of the western ground in a depth of 16 feet, on the starboard, and the next black buoy, in an oblique line towards the lighthouse, on the larboard.
3. In that situation of the vessel the two new beacons cover themselves in the direction of S. S. E., of this course, keeping

the two beacons completely covered, the captains sail into the port up to the second landing berth of the eastern mole, four cables' length beyond the lighthouse, keeping off the mole half a cable's length.

4. At that place, the captains taking care to remain a little South, are expected by the pilots to go on board of their vessels.

5. On entering the port all the white flags are to remain on the starboard side of the vessel (see 2.).

6. For facilitating the finding and keeping the directions given in this instruction in case the buoys should have been removed by sea, or taken up on account of the advanced season, signals will be given with a red flag from the direction beacon on the eastern mole.

7. The captains must follow the signals in so far as to steer to that part where the flag is hoisted perpendicularly.

8. Should there be no pilot at sea, and no flag hoisted on the beckoning beacon, the captains must not attempt to enter the port at all, but either anchor in the roads or remain at sea.

Stettin, November 12, 1835.

The following regulations apply to all the Prussian ports:—  
*Notifications to Captains of Ships respecting Importation and Exportation by Sea in the Prussian Dominions:—*

As soon as a ship arrives in the road, and has complied with the police regulations of the port (which are communicated to her), the captain repairs to the custom-house, and delivers a complete list or manifest of cargo. This list bears the title of chief declaration or manifest, and in preparing it, the following conditions are to be observed:—

If the whole cargo be not destined for the port, that part which is to proceed further with the ship, is to be placed under a distinct division.

The goods accompanied with bills of lading are entered in totation after each other for every bill of lading.

The account (or statement) is made out in kind and quantity, agreeable to those measures and divisions adopted in the tariff for the payment of duties.

If there be a number of packages of similar articles, and each package contains an equal quantity, they may be entered summarily, according to their number and size; and a general statement of the contents will suffice.

If the contents of the packages be different, then the contents of each must be specified.

The baggage of the passengers must be marked as such in the report. If it consist of general travelling luggage, it will be enough to state the particular boxes or parcels; but if it consist of goods, then must these be stated, according to number and kind.

The individual property of the captain, with the exception of the provisions, is stated like other traders' property, with

omission of the declaration of a receiver; and it is also stated in the declaration what articles remain on board of the ship's hold.

If the captain have not brought with him a report, he may have one completed in the port, by a customs officer; in which case he gives up all his papers to the said officer, who then stamps and numbers them, the last number being marked as such. The captain, at the same time, informs the officer of the property belonging to himself and passengers, of which there are no accounts; who thereupon makes out a list thereof, which is signed by the captain, and returned, in order to be used in preparing the report.

In case the report has to be prepared on shore, it must be delivered up in 24 hours, at latest, after the arrival of the captain in the road; if not, possession is taken of the ship, at his expense, which, according to the judgment of the customs, may take place even sooner, but free of expense.

Respecting the provisions, if they consist of articles which pay a consumption duty, a distinct or separate report must be given in duplicate. One is returned to the captain after a general revision, in order that he may take with him an equal quantity of the articles specified in it when he sails. If this does not happen, or if the departure does not take place within a twelvemonth, then the consumption duty is to be paid on the articles remaining on hand. The captain is, however, at liberty to deposit the provisions, subject to the consumption duty, at the custom-house, until he sails.

Other articles, not properly belonging to the cargo, are in so far admitted, that they undoubtedly belong to the ship's inventory, and are taxable for the voyage. Articles which are not counted as such are taxed if they are subject to a consumption tax, or, in order to take them again away, they are deposited at the custom-house.

If the captain have in the road, and do not enter the harbour, but convey there the cargoes by lighters, the consumption in the road is tax-free. A report of the provisions suffices, and further control over it only takes place when, in particular cases, it is considered necessary.

If the captain have another destination, and only visits the harbour through necessity, then, in order to the security of the vessel and cargo, a general inspection only takes place, so that no part of the cargo may be sold or disposed of. When, however, such security has been given, a report is made of the cargo, in as far as the ship's papers and the knowledge of the captain admit.

Respecting the further treatment of the business, the custom-house will take such other measures, according to circumstances, viz. whether the cargo remain untouched, or whether the same must be wholly or partly discharged for the repair of

the ship, so that the cargo may be exported in its original state.

The cargo of vessels which put in to winter must be announced as soon as possible, in as far as the ship's papers give information and the knowledge of the captain extends upon the subject. The inspection of the external parts of the vessel, and the articles contained thereon, takes place directly, and the entrances to the ship's hold are locked. Until the declaration, inspection, and locking up of the vessel take place, she is guarded at the expense of the captain; which guard, in particular cases, may last as long as the customs department may deem necessary.

Vessels which only anchor in the roads, and do not enter a port, are out of control of the customs officers; they must not, however, hold any intercourse with the shore or the port, otherwise they must give in reports beforehand, and present their papers.

If the vessel remain in the roads longer than 24 hours after declaration is made, before proceeding to put in or unload, if the one or the other be not prevented by stress of weather, then an officer remains to the ship, examines the decks and the articles thereon, and locks up the entrances, &c. to the hold.

To the officers who are ordered for service on board the vessel is afforded a proper maintenance or treatment, the same as is given to travellers of the trading class.

If the occupation of the vessel takes place at the cost of the captain, he is then obligated to give the officers the daily pay of their rank, as regulated, and to provide for their return to the selling-place.

If it happen that officers, owing to an interrupted communication with the shore, are forced to remain beyond 2 days on board, then the captain must give them their meals, on their paying for the same; and if any difficulty arises about the charge, it is to be decided by the police authorities.

In all cases, the captain must bow back the officers from the road to the harbour.

The direction of the officers, touching the discharge of the vessel, in order that they may be able to exercise properly the duties of their office, must be followed.

If a captain has a well-founded complaint to make about the conduct of the officers, he must present it at the head custom-house; and may, after previous examination, expect, without delay, their dismissal (absetzung). To every captain, after clearing out, the register of complaints (which, according to a 107. of the regulation of taxes, must be in every custom-house) is presented, in order that he may enter therein his name, and whatever complaint he may have to make.

Table of Fees payable to the Brokers of Stettin, as fixed the 8 January, 1834.

On Goods, Bills of Exchange, and Money.	Doll. Sil. Pf. Gros.		Doll. Sil. Pf. Gros.
On the negotiation of bills of exchange, per mille	1 0 0		
On changing money, or papers considered as money, per mille	0 13 0		
On every description of business in goods, excepting the corn trade, per cent.	0 7 6		
On the corn trade, viz. —			
Wheat, rye, peas, and linseed (in so far as the latter is sold by the wharf), per cent.	0 7 6		
Barley, oats, and malt, per cent.	0 13 0		
N.B. — The items 1 to 4, inclusive, are to be paid both by the buyer and the seller.			
On sales by auction, from the seller, per cent.	0 15 0		
If the same be withdrawn previous to the fixed period, as remuneration	1 0 0		
On certificates or extract of the journal, exclusive of the stamp	0 20 0		
<b>Fees payable to Ship Brokers.</b>			
For freightage vessels reckoned according to Prussian normal last, payable by the owner as well as the affreighter, per last	0 1 6		
For the charter-party from both parties, the affreighter and charterer	1 0 0		
The stamp is to be paid separately by the parties interested.			
For reporting a vessel arriving with cargo, per Prussian normal last.	0 4 0		
		(Without distinction as to the number of persons interested in the cargo, or whence the vessel comes.)	
		For reporting an outward-bound ship with cargo, per Prussian normal last	0 2 0
		For reporting a vessel in ballast coming in or going out, per Prussian normal last	0 0 10
		<i>Note.</i> — If a vessel, coming in or going out, be only partly laden, such cargo is reduced to Prussian normal last, in proportion to the number of lasts stated in the ship's register, and according to this the duties are calculated. The items 5, 4, 5, the broker has to charge to the ship.	
		For procuring money on bottomry, payable by the lender as well as the borrower, for every 100 dollars	0 3 9
		For sales of ships or single shares, from both parties, buyer and seller, whether by auction or privately, per cent. of the price	0 7 6
		If the sale be not effected within the fixed period, on whole vessels	3 0 0
		on shares	2 0 0
		For certificates and extracts from the ship papers, statements of averages, or from the log book, exclusive stamp	0 20 0

Of the total value of the imports, amounting, in 1842, to 1,624,400*l.*, goods valued at 515,660*l.* were shipped by England. These consisted principally of iron, salt, coal, herrings, sugar, and other colonial products.

STOCKHOLM, the capital of Sweden, situated at the junction of the lake Mælar with an inlet of the Baltic, in lat.  $59^{\circ} 20' 31''$  N., lon.  $17^{\circ} 54'$  E.; a well-built, handsome city. Population, in 1839, 83,885. The entrance to the harbour is intricate and dangerous, and should not be attempted without a pilot; but the harbour itself is capacious and excellent, the largest vessels lying in safety close to the quays. Stockholm possesses from a third to a half the foreign trade of Sweden; but this is confined within comparatively narrow limits. The government has long been accustomed to endeavour to promote industry by excluding foreign products; latterly, however, this system has been considerably relaxed, with great advantage to the trade of the country, and the well-being of the people. Iron, timber, and deals form the great articles of export. Swedish iron is of very superior quality, and is rather extensively used in Great Britain; the imports of it amounting, in ordinary years, to about 16,000 tons exclusive of 600 tons of steel. In addition to the above leading articles, Stockholm exports pitch, tar, copper, &c. The timber is inferior to that from the southern ports of the Baltic. The imports principally consist of colonial products, cotton, dye stuffs, salt, British manufactured goods, hides, fish, wine, brandy, wool, fruit, &c. In seasons of scarcity corn is imported, but it is generally an article of export.

*Pilotage.*—Vessels bound for Stockholm take a pilot at the small island of Oja. Lands-bort Light-house is erected on the southern extremity of this island, in lat.  $59^{\circ} 44' 30''$  N., lon.  $17^{\circ} 52' 15''$  E. It is painted white, and is furnished with a fixed light, elevated 158 feet above the level of the sea, which may be seen, under favourable circumstances, 6 leagues off. The signal for a pilot is a flag at the fore-top-mast head, or firing a gun.

Account of the principal Articles Imported into and exported from Stockholm in 1841.

Imports.				Exports.			
Rum and other spirits	kann.	108,293	Hides	lbs.	1,486,024	Iron, bar	shippounds 250,365
Coffee	lbs.	5,041,365	Herrings	barrels	37,366	Iron, nail	5,888
Indigo	-	50,617	Salt	-	60,472	Copper	4,307
Raw sugar	-	7,504,308	Coals	-	60,442	Steel	3,506
Tobacco, leaf	-	520,434	Hemp	shippounds	2,323	Tar	5,328
stems	-	891,553	Tallow	lipounds	78,525	Barrels	23,532
Cotton	-	248,568	Fish, dried	-	66,294	Planks and boards	dozars 25,872
Cotton yarn (white)	-	465,780				Refined sugar	lbs. 1,012,759

There belonged to the port, in 1841, 149 ships, measuring 25,566 tons.

**Money.**—Accounts are kept here, in fiontenburg, and generally throughout Sweden, in paper money, consisting of riksdollars banco; 1 riksdollar being equal to 48 skilling, and 1 skilling to 12 rundestycks. The exchange with London is at about 12 riksdollars banco per £1, so that the riksdollar is worth about 1s. 4d. sterling. Riksdollars banco may be exchanged for specie riksdollars at the rate of 93 for 100 of the latter. But there are very few coins, except of copper, in circulation; the currency consisting almost wholly of notes, varying from 5 skilling to 500 riksdollars banco.

**Weights and Measures.**—The victual or commercial weights are punds, liipunds, and skipunds; 40 punds being equal to 1 liipund, and 20 liipunds = 1 skipund; 100 lbs. Swedish commercial weight = 93½ lbs. avoirdupois = 4½ kilog. = 87½ lbs. of Hamburg.

The iron weights are 3-6ths of the victual or commercial weights; 80 marks = 1 mark pund; 90 mark punds = 1 skipund; and 7½ skipunds = 1 ton English. Hence, 100 punds Swedish iron weight = 75 lbs. avoirdupois, and 100 lbs. avoirdupois = 133 1/3 lbs. Swedish iron weight.

In corn measure :—  
4 Quarts = 1 Spann.  
½ Spann = 1 Tun or barrel

1 Tun = 4 1-6th Winch. bush.  
A last of rye from Riga = 18 Tuns.  
Ditto Doebau = 19½ —  
Ditto Mettin = 22½ —  
Ditto Stralsund = 24 —

The tun of 3½ kappor contains 4 1-6th Winchester bushels.

In liquid measure :—  
2 Nup = 1 Kanna.  
15 Kanner = 1 Anker.  
½ Ankers = 1 Elmer.  
2 Elmers = 1 Ahm.  
1 Ahm = 1 Osthoft.  
2 Osthoft = 1 Pipe.

The pipe = 12½ English wine gallons; and, consequently, the ahm = 41 5-12ths ditto, and 100 kanner = 69 1-5th ditto. The Swedish foot = 11 6/8th English inches; the ell or alna = 2 feet; the fathom = 3 ells; the rod = 8 ells.

In estimating by last :—  
1 Last of pitch, sahes, &c. = 18 barrels.  
1 ditto tar, oil, &c. = 13 ditto.  
1 Last of hemp, flax, tallow, &c. = 6 skipunds.  
1 Ton of Liverpool common salt = 7 tuns Swed.

#### Shipping of Sweden in 1841.

Employed in the foreign trade . . . . . 771 ships of 117,628 tons.  
Interior and coasting trade . . . . . 1,411 ships of 62,210 tons.  
Belonging to private individuals . . . . . 54 steamers of 2,010 horse power.

**Regulations as to the working of Mines in Sweden.**—The mines of Sweden, though inconsiderable as compared with those of this country, are a considerable source of national wealth. They are principally situated in the central provinces, which have no fewer than 261 out of the 586 mines said to exist in the kingdom. Swedish iron is of a very superior quality, and that of the Danemora mines is especially well fitted for conversion into steel; but, owing to injudicious restrictions and the want of coal, the production in Sweden is not supposed (including what is licensed and what is made for home consumption without a licence) to exceed 85,000 or 90,000 tons bar iron, of which about 70,000 are exported. In 1839 we imported 17,049 tons of Swedish iron. The copper mines produce, in all, only about 750 tons a year; the metal is not so good as that of England, and is impregnated with iron. Fahlun, the chief mine, has long been in a declining state, the number of workmen at present employed not exceeding 500. The works of this mine are conducted entirely by water power, and are remarkable for their completeness; connected with them is a manufactory of sulphuric acid. The smelting furnaces and iron works are licensed to produce certain quantities, some being as low as 50 tons, and others as high as 400 or 500 tons; and some fine bar iron works have licences for 1,000 tons each. These licences are granted by the College of Mines, which has a control over all iron works and mining operations. The iron masters make annual returns of their manufacture, which must not exceed the privileged or licensed quantity, on pain of the overplus being confiscated. The college has established courts of mines in every district, with supervising officers of various ranks. All iron sent to a port of shipment must be landed at the

public weigh-house, the superintendent of which is a delegate of the college; so that it is impossible for an iron master to send more iron to market than his licence authorises. It is true that sales are made to inland consumers at the forges, of which no returns are made out, and in so far the licences are exceeded; but it is not supposed that the quantity so disposed of exceeds a few thousand tons a year. Every furnace and forge pays a certain annual duty to the crown. Its amount is fixed by the college when the licence is granted; and care is taken not to grant the licence to any one unless he have the command of forests equal to the required supply of charcoal without encroaching on the supply of this material required for the existing forges in the neighbourhood. As the supply of pig-iron is limited to the quantity licensed to be made, the college, in granting new licences to bar-iron works, always takes into consideration how far this may be done without creating a scarcity of pig-iron. Hence, the erection of new forges depends—1st, on having a supply of charcoal, without encroaching on the forests which supply your neighbours; and 2d, on the quantity of pig-iron which the college knows to be disposable. The courts of the mines decide all disputes that arise among the iron masters regarding the exceeding of their licences, encroachments, &c.; an appeal to the college lying from their decision, and ultimately to the king in council, or to the supreme court of the kingdom.

It is needless to dwell on the impolicy of such regulations. No doubt it is quite right for government to interfere to prevent the waste and destruction of the forests; but, having done this, it should abstain from all other interference, and leave every one at liberty to produce as much iron as he may think proper. Mines of any importance are usually held by a society of shareholders. Some of them are only worked occasionally; and, as the labour is performed by peasants, who live ostensibly by husbandry, it is impossible to form any correct estimate of the numbers engaged in mining industry.

STOCKINGS, as every one knows, are coverings for the legs. They are formed of only one thread entwined, so as to form a species of tissue, extremely elastic, and readily adapting itself to the figure of the part it is employed to cover. This tissue cannot be called cloth, for it has neither warp nor woof, but it approaches closely to it; and for the purposes to which it is applied, it is very superior.

1. *Historical Sketch of the Stocking Manufacture.*—It is well known that the Romans and other ancient nations had no particular clothing for the legs. During the middle ages, however, hose or *leggings*, made of cloth, began to be used; and at a later period, the art of knitting stockings was discovered. Unluckily, nothing certain is known as to the individual by whom, the place where, or the time when, this important invention was made. Howell, in his *History of the World* (vol. iii. p. 222.), says, that Henry VIII. wore none but cloth hose, except there came from Spain by great chance a pair of silk stockings; that Sir Thomas Gresham, the famous merchant, presented Edward VI. with a pair of long silk stockings from Spain, and that the present was much taken notice of; and he adds, that Queen Elizabeth was presented, in the third year of her reign, with a pair of black knit silk stockings, and that from that time she ceased to wear cloth hose. It would appear from this circumstantial account, that the art of knitting stockings, or at least that the first specimens of knit stockings, had been introduced into England from Spain about the middle of the 16th century; and such seems to have been the general opinion, till an allusion to the practice of knitting, in the pretended poems of Rowley, forged by Chatterton, made the subject be more carefully investigated. The result of this investigation showed clearly that the practice of knitting was well known in England, and had been referred to in acts of parliament, a good many years previously to the period mentioned by Howell. But it had then, most probably, been applied only to the manufacture of woollen stockings; and the general use of cloth hose shows that even these had not been numerous. There is no evidence to show whether the art is native to England, or has been imported.—(See *Beckmann's Inventions*, vol. iv. art. *Knitting Nets and Stockings*.)

It is singular that the stocking frame, which, even in its rudest form, is a very complex and ingenious machine, that could not be discovered accidentally, but must have been the result of deep combination and profound sagacity, should have been discovered so early as 1589, before, in fact, the business of knitting was generally introduced. The inventor of this admirable machine was Mr. William Lee, of Woodborough, in Nottinghamshire. He attempted to set up an establishment at Calverton, near Nottingham, for the manufacture of stockings, but met with no success. In this situation he applied to the queen for assistance; but, instead of meeting with that remuneration to which his genius and inventions so well entitled him, he was discouraged and discountenanced! It need not, therefore, excite surprise that Lee accepted the invitation of Henry IV. of France, who, having heard of the invention, promised him a magnificent reward if he would carry it to France. Henry kept his word, and Lee introduced the stocking frame at Rouen with distinguished success; but after the assassination of the king, the concern got into difficulties, and Lee died in poverty at Paris. A knowledge of the machine was brought back from France to England by some of the workmen who had emigrated with Lee, and who established themselves in Nottinghamshire, which still continues to be the principal seat of the manufacture.—(See *Beckmann's Inventions*, vol. iv. pp. 313—324.; and *Letters on the Utility and Policy of Machines*, Lond. 1780.)

During the first century after the invention of the stocking frame, few improvements were made upon it, and 2 men were usually employed to work 1 frame. But in the course of last century, the machine was very greatly improved. The late ingenious Mr. Jedediah Strutt, of Derby, was the first individual who succeeded in adapting it to the manufacture of *ribbed stockings*.

*Statistical View of the Stocking Trade.*—We subjoin, from a paper by Mr. Felkin, of Nottingham, who is advantageously known by his statistical researches, the following view of the state of the British hosiery trade in 1832.

Worsted hosiery is chiefly made in Leicestershire; silk hosiery in Derby and Nottingham; and cotton hosiery throughout the counties of Nottingham and Derby, at Hinckley, and at Farnborough. The analysis furnished by Blackner, in 1812, may be, perhaps, modified as follows, so as to show the kinds and qualities of goods which the frames are now employed upon, viz.—

Plain cotton, 14 to 22-gauge, 1,600; 24 to 26-gauge, 1,600; 30 to 34-gauge, 2,790; 36 to 60-gauge, 1,600 frames — 7,590  
 Cassa, 560; gloves and caps, 1,090; drawers, 500; sundries, 560 — 2,660  
 Wide frames, making cut-ups and various other kinds, 6,030  
 Worsted, 12 to 90-gauge, 4,400; 28 to 26-gauge, 5,600; 28 to 34-gauge, 1,400 frames — 9,450

Angora, 1,550; lambs' wool, 1,900; shirts, 500 frames — 5,750  
 Wide frames, on with worsted goods — 580  
 Silk, 2,500; gloves, 550; and knots, 550 — 3,000  
 Total of frames — 33,000

The following statement, it is believed, presents a sufficiently accurate approximation to the annual amount in quantity and value of the goods manufactured in this trade, to answer all practical purposes:—

Each narrow cotton frame produces about 40 dozen of hose a year, if of women's size; wide cotton frames, 300; narrow worsted, 75; wide worsted, 150; and silk, 30. There are —

Frames.		Dzns.	Lbs.		£	£	£	£
10,300	fashioned cotton hose	420,000	880,000	cotton yarn	75,800	120,000	52,000	325,000
6,000	cut up, &c.	1,960,000	2,940,000	—	178,000	285,000	98,000	555,000
9,500	fashioned worsted	710,000	2,940,000	worsted	284,000	215,000	41,000	310,000
1,000	cut up, &c.	100,000	400,000	—	40,000	50,000	10,000	80,000
1,500	Angora	85,000	338,500	—	45,000	40,000	19,000	104,000
1,000	lambs' wool	135,000	639,500	—	80,000	50,000	16,000	146,000
3,000	silk	90,000	105,000	silk	130,000	108,000	15,000	241,000
33,000		3,510,000	8,137,000		814,000	944,000	229,000	1,991,000

According to this calculation, the value of the cotton hosiery annually made is 880,000*l.*; that of worsted, &c. is 870,000*l.*; and that of silk is 241,000*l.*—To produce these goods, it is probable that 4,581,000 lbs. of raw cotton wool, value 153,000*l.*, are used; and 140,000 lbs. of raw silk (2-5ths China and 3-5ths Novil), value 91,000*l.*; also, 6,518,000 lbs. of English wool, value 316,000*l.*. The total original value of the materials used is, therefore, 560,000*l.*, which, it appears, becomes of the ultimate cost value of 1,991,000*l.*, in this manufacture.

There are employed in the various processes, as follows, viz.—

In cotton spinning, doubling, &c., 3,000; worsted carding, spinning, &c., 2,500; silk winding, throwing, &c., 1,000 — 6,500  
 In making stock-bus, 15,000 men, 10,000 women, and 10,000 youths; and women and children in sewing, winding, &c., 27,000 — 60,000  
 In embroidering, mending, bleaching, dyeing, dressing, putting-up, &c., probably about — 6,500  
 Total persons employed — 73,000

The capital employed in the various branches of the trade may be thus estimated, taking the machinery and frames at neither their original cost, nor actual selling price, but at their working value, and the stocks of hosiery on an average of years:—

The capital in mills and machinery, for preparing cotton, is — 70,000  
 — — — worsted, &c. — 52,000  
 — — — silk — 18,000  
 Fixed capital in mills, &c. — 140,000  
 — — — in frames — 245,000  
 Total of fixed capital — £385,000

In wool and yarn in process and stock — 85,000  
 — — — — — 150,000  
 — — — — — 85,000  
 Floating capital in spinning, &c. — £270,000

Capital in narrow cotton frames — 62,000  
 — wide — 60,000  
 — narrow worsted frames — 16,000  
 — wide — 11,000  
 — silk frames — 36,000

Fixed capital in frames — £215,000

In goods in process and stock — 350,000  
 — — — — — 345,000  
 — — — — — 85,000

Floating capital in making hose — 780,000  
 — — — in spinning, &c. — 270,000  
 Total of floating capital — £1,050,000

We have no more recent account of the manufacture, on which any reliance can be placed; but we are informed by Mr. Felkin, that the number of frames may at present (1843) be taken at 36,000, and that wages, though low, are rising.

According to the above estimate of the total value of the stocking manufacture in 1833 (1,991,000*l.*), it would not give more than 2*s.* 5*d.* for the average expenditure on stockings of each individual of the then existing inhabitants of Great Britain. There can, however, be little or no doubt that this sum is decidedly under the mark; and its insufficiency will appear the more striking when it is recollected that a large portion of the hosiery whose value is included in the above estimate, does not consist of stockings, but of woollen and cotton shirts and drawers, gloves, mitts, night-caps, shawls, &c. Perhaps we shall not be far wrong in estimating the total average expenditure per individual of the population of Great Britain on stockings and other articles of hosiery, at 4*s.* each; which, taking the population at 18,500,000, would give 3,700,000*l.* for the total value of the manufacture. And this estimate, we incline to think, will be found to be pretty near the mark.

In the estimate given above, by Mr. Felkin, no notice is taken of the hosiery made in Westmoreland and Cumberland, and in Scotland, where, however, it is rather extensively produced. In fact, there are at present (1843) between 600 and 700 stocking frames at work in Dumfries and its vicinity, and about 1,300 in Hawick, exclusive of a farther number in Aberdeen, &c., and of the knitted stockings made in the Orkney and Shetland islands.

In our customs returns, cotton hosiery and lace are mixed up together, so that the value of the exports of each cannot be separately specified. The exports of both have, however, increased considerably of late years, and we are well assured that the increase has been as great in the hosiery as in the lace branch. The Germans, it is true, have succeeded in disposing of considerable quantities of hosiery in South America, particularly in Brazil; a consequence, partly, of the low price at which the goods are produced in the cottages of peasants who derive the principal part of their subsistence from other

sources; but more, we are informed, from the German stockings being better adapted to the taste of the people to whom they are offered, the English stockings being all too long. This, however, is a defect that, one should think, might be easily obviated; and if so, English hosiery would have the same preference in Brazil that it has in most other markets.

**STORAX.** See **BALSAM.**

**STORES, MILITARY AND NAVAL,** include arms, ammunition, &c. It is enacted, that no arms, ammunition, or utensils of war, be imported by way of merchandise, except by licence, for furnishing his Majesty's public stores only. — (6 Geo. 4. c. 107.)

**STORES,** in commercial navigation, the supplies of different articles provided for the subsistence and accommodation of the ship's crew and passengers.

It is laid down, in general, that the surplus stores of every ship arriving from parts beyond seas are to be subject to the same duties and regulations as those which affect similar commodities when imported as merchandise; but if it shall appear to the collector and controller that the quantity of such stores is not excessive, nor unsuitable, under all the circumstances of the voyage, they may be entered for the private use of the master, purser, or owner of such ship, on payment of the proper duties, or be warehoused for the future use of such ship, although the same could not be legally imported by way of merchandise. — (3 & 4 Will. 4. c. 52. § 35.)

A List, by which to calculate the Amount of Stores, of the estimated Average Number of Days' Duration of a Voyage from the U. Kingdom to the different Ports enumerated, and back.

For such places as are not included in the List, the same allowance should be granted as is given to the place nearest thereunto.

No stores shall be shipped for the use of any ship bound to ports beyond the seas, nor shall any goods be deemed to be such stores, except such shall be borne upon the victualling bill. — (3 & 4 Will. 4. c. 52. sect. 16.)

Goods delivered into the charge of the searchers to be shipped as stores, may be so shipped without entry or payment of any duty, for any ship of the burden of 70 tons at least bound upon a voyage to foreign parts, the probable duration of which out and home will not be less than 40 days: provided such stores be duly borne upon the ship's victualling bill, and be shipped in such quantities, and be subject to such directions and regulations, as the commissioners of customs shall direct and appoint. — (3 & 4 Will. 4. c. 57. sect. 16.)

Rum of the British plantations may be delivered to the searcher, to be shipped as stores for any ship, without entry or payment of any duty; and any surplus stores of any ship may be delivered to the searcher, to be re-shipped as stores for the same ship, or for the same master in another ship, without entry or payment of any duty, — such rum and such surplus stores being duly borne upon the victualling bills of such ships respectively; and if the ship, for the future use of which any surplus stores have been warehoused, shall have been broken up or sold, such stores may be so delivered for the use of any other ship belonging to the same owners, or may be entered for payment of duty, and delivered for the private use of such owners or of any them, or of the master or owner of the ship. — Sect. 17.

The searchers in London, on clearance of vessels coastwise to take in cargoes for foreign parts, are to apprise the collectors and comptrollers at the outports where the vessels may be bound, of the quantity and description of the goods which may have been shipped as stores on board such vessels, and that bond has been given by the masters of the vessels that no part of such stores shall be consumed by the crews, or any package opened or altered, until the vessels have actually been cleared on their foreign voyages; and the collectors and comptrollers at the out-ports are in like manner to cause a similar communication to be made to the ports where the outward cargoes are to be taken on board, and the officers at such ports are to take care to ascertain that the several goods so shipped are actually on board the vessels on their arrival, and have neither been consumed or run on shore during the coasting voyage; and if so, to report the same to the Board. — (*Min. by Com. of Customs*, 19th of Feb. 1835.)

*List of Foreign Goods allowed to be shipped as Stores, from the bonded Warehouses free of Duty.* — (*Customs Minute*, 25th of Nov. 1834.)

*Tes.* 4 oz. of an oz.; coffee or cocoa, 1 oz. per day for each person on board, with the option to ship the entire quantity required for the voyage of either species of these articles, half an oz. of tea being considered equal to one oz. of coffee or cocoa; the tea to be shipped in the original packages in which it was imported.

*Wine*, 1 quart per day for the master, each mate, and cabin passenger.

Wine bottled in the bonded warehouses for exportation may be shipped as stores, in packages containing not less than 3 doz. reputed quart, or 6 doz. reputed pint bottles.

*Spirits*, viz. brandy, geneva, rum (British plantation),  $\frac{1}{2}$  pint per day for each person on board.

British plantation rum to be in the proportion of  $\frac{1}{2}$  of the whole quantity of spirits shipped. Each description of spirits intended as stores to be shipped in one cask capable of containing the entire quantity of brandy, or of geneva or rum, allowed for the voyage, or in casks containing not less than 40 gallons of brandy or geneva, or 20 gallons of British plantation rum, as the case may be: provided that if spirits shall have been imported in bottles, or bottled in the bonded warehouses for exportation, the same may be shipped as stores, in packages containing not less than 3 doz. reputed quart, or 6 doz. reputed pint bottles.

*Rare Sugar and Molasses (together or separate)*, 2 oz. per day for each person on board.

*Dried Peas*, 2 lbs. per week for each person on board.

*Rice*,  $\frac{1}{2}$  lbs. per week for each person on board.

*Foreign Segars*,  $\frac{1}{2}$  oz. per day for the master, each mate, and each cabin passenger.

The entire quantity of foreign segars allowed as stores for each voyage to be shipped in one package.

*A List of British manufactured Goods to be allowed to be shipped as Stores on the usual Duty or Drawback.*

*British refined Sugar*, 3 oz. per day for the master, each mate, and each cabin passenger.

*British manufactured Tobacco*,  $\frac{1}{2}$  oz. per day per man.

*British excisable Goods*, viz. beer, ale, and porter (together or separate), 1 quart per day for the master, each mate, and each passenger.

*Vinegar*,  $\frac{1}{2}$  pint per week for each person on board.

*Soap*,  $\frac{1}{2}$  oz. per day for each person on board. The same indulgence, in respect of the shipment of stores, which has been granted to merchant vessels under the 2 & 3 Will. 4. c. 84., and by subsequent orders, is granted to transports under the following conditions, viz.: — On a certificate being produced for each vessel from the office of a comptroller for victualling and transport services, setting forth the destination of the vessel, and the number of the crew and passengers on board, who are not to be messaged by the victualling ship by the public; and as respects soldiers embarked on board in ships chartered for the transportation of convicts, on a certificate being produced from the proper department, specifying the number of soldiers to be embarked in each case; but no indulgence can be granted in regard to the article of soap. — (*Trans. Order*, 6th of March, 1833; see also *Ellis's British Tariff*.)

**STRANDING**, in navigation, the running of a ship on shore, or on the beach.

It is the invariable practice to subjoin the following memorandum to policies of insurance executed by private individuals in this country: — "*N. B.* — Corn, fish, salt, fruit, flour, and seed are warranted free from average, unless general, or the ship be stranded; sugar, tobacco, hemp, flax, hides, and skins are warranted free from average under 5l. per cent.; and all other goods, also the ship and freight, are warranted free of average under 3l. per cent., unless general, or the ship be stranded."

It is, therefore, of the greatest importance accurately to define what shall be deemed a stranding. But this is no easy matter; and much diversity of opinion has been entertained with respect to it. It would, however, appear that merely striking against a rock, bank, or shore, is not a stranding; and that, to constitute it, the ship must be upon the rock, &c. for some time (how long?). — Mr. Justice Park has the following observations on this subject: — "It is not every touching or striking upon a fixed body in the sea or river that will constitute a stranding. Thus Lord Ellenborough held, that in order to establish a stranding, the ship must be *stationary*; for that merely striking on a rock, and *remaining there a short time* (as in the case then at the bar, about a minute and a half), and then passing on, though the vessel may have received some injury, is not a stranding. Lord Ellenborough's language is important. — *Ex vi termini* stranding means lying on the shore, or something analogous to that. To use a vulgar phrase, which has been applied to this subject, if it be *touch and go* with the ship, there is no stranding. It cannot be enough that the ship lie for a few moments on her beam ends. Every striking must necessarily produce a retardation of the ship's motion. If by the force of the elements she is run aground, and becomes stationary, it is immaterial whether this be on piles, on the muddy bank of a river, or on rocks on the sea shore; but a mere *striking* will not do, *wherever* that may happen. I cannot look to the consequences, without considering the *causa causans*. There has been a curiosity in the cases about stranding not creditable to the law. A little common sense may dispose of them more satisfactorily."

This is the clearest and most satisfactory statement we have met with on this subject; still, however, it is very vague. Lord Ellenborough and Mr Justice Park hold, that to constitute a stranding, the ship must be *stationary*; but they also hold, that if she merely remain upon a rock, &c. for a *short time*, she is not to be considered as having been stationary. Hence every thing turns upon what shall be considered as a short time. And we cannot help thinking that it would be better, in order to put to rest all doubts upon the subject, to decide either that every striking against a rock, the

shore, &c., by which damage is done to the ship, should be considered a stranding; or that no striking against a rock, &c. should be considered as such, provided the ship be got off within a *specified time*. Perhaps a *tide* would be the most proper period that could be fixed.

The insurance companies exclude the words, "*or the ship be stranded*," from the memorandum. — (See *INSURANCE, MARINE*.)

**STURGEON FISHERY.** The sturgeon is a large, valuable, and well-known fish, of which there are several species, viz. the sturgeon, properly so called, or *Accipenser sturio*; the beluga, or *Accipenser huso*; the sevruga, or *Accipenser stellatus*, &c. The sturgeon annually ascends our rivers, but in no great number, and is taken by accident in the salmon nets. It is plentiful in the North American rivers, and on the southern shores of the Baltic; and is met with in the Mediterranean, &c. But it is found in the greatest abundance on the northern shores of the Caspian, and in the rivers Wolga and Ural; and there its fishery employs a great number of hands, and is an important object of national industry. Owing to the length and strictness of the Lents in the Greek Church, the consumption of fish in Russia is immense; and from its central position, and the facilities afforded for their conveyance by the Wolga, the products of the Caspian fishery, and those of its tributary streams, are easily distributed over a vast extent of country. Besides the pickled carcases of the fish, caviar is prepared from the roes; and isinglass, of the best quality, from the sounds. The caviar made by the Ural Cossecks is reckoned superior to any other; and both it and isinglass are exported in considerable quantities. The belugas are sometimes of a very large size, weighing from 1,000 to 1,500 lbs., and yield a good deal of oil. The seal fishery is also pretty extensively prosecuted in the Caspian. The reader will find a detailed account of the mode in which the fishery is carried on in the Caspian, and in the rivers Wolga and Ural, in *Tooke's Russia*, vol. iii. pp. 49—72. We subjoin the following official statement of the produce of the Russian fisheries of the Caspian and its tributary streams in 1828 and 1829:—

Year.	Number of Persons employed.		Number of Fish taken.					Products of Sturgeon.		
	In Fishing.	In hunting Seal.	Sturgeon.	Sevruga.	Beluga.	Semna. (Carp).	Seals.	Caviar.	Fish Cartilage.	Isinglass.
1828	8,887	254	45,035	653,161	25,069	8,353	98,584	Poods. Sh. 34,860 1	Poods. Sh. 1,707 38	Poods. Sh. 1,225 27
1829	8,760	257	68,325	697,716	30,391	8,940	69,571	38,420 7	1,175 36	1,862 22

**SUCCORY.** See *CHICORY*.

**SUGAR** (Fr. *Sucre*; Ger. *Zucker*; It. *Zucchero*; Russ. *Sachar*; Sp. *Azucar*; Arab. *Sukhir*; Malay, *Sooka*; Sans. *Sarkarā*), a sweet granulated substance, too well known to require any particular description. It is every where in extensive use; and in this country ranks rather among the indispensable necessities of life, than among luxuries. In point of commercial importance, it is second to very few articles. It is chiefly prepared from the expressed juice of the *arundo saccharifera*, or sugar cane; but it is also procured from an immense variety of other plants, as maple, beet-root, birch, parsnep, &c.

1. *Species of Sugar.* — The sugar met with in commerce is usually of 4 sorts;—brown, or muscovado sugar; clayed sugar; refined, or loaf sugar; and sugar candy. The difference between one sort of sugar and another depends altogether on the different modes in which they are prepared.

1. *Brown, or Muscovado Sugar.* — The plants or canes being crushed in a mill, the juice, having passed through a strainer, is collected in the clarifier, where it is first exposed to the action of a gentle fire, after being "tempered" (mixed with alkali), for the purpose of facilitating the separation of the liquor from its impurities. It is then conveyed into the large evaporating copper, and successively into two others, each of smaller size; the superintending boiler freeing it, during the process, from the scum and feculent matters which rise to the surface. The syrup then reaches the last copper vessel, called the "striking tache," where it is boiled till sufficiently concentrated to be capable of granulating in the cooler, whence it is transferred with the least possible delay, to prevent charring. Here it soon ceases to be a liquid; and when fully crystallised, is put into hogsheds (called "potting"), placed on their ends in the curing-house, with several apertures in their bottoms, through which the molasses drain into a cistern below. In this state they remain till properly cured, when the casks are filled up, and prepared for shipment.

2. *Clayed Sugar* is prepared by taking the juice, as in the case of muscovado sugar, when boiled to a proper consistency, and pouring it into conical pots with the apex downwards. These pots have a hole at the lower extremity, through which the molasses or syrup is allowed to drain. After this drain has continued for some time, a stratum

of moistened clay is spread over the surface of the pots; the moisture of which, percolating through the mass, is found to contribute powerfully to its purification.

3. *Refined Sugar* may be prepared from muscovado or clayed sugar, by redissolving the sugar in water, and, after boiling it with some purifying substances, pouring it, as before, into conical pots, which are again covered with moistened clay. A repetition of this process produces *double refined* sugar. But a variety of improved processes are now resorted to.

4. *Sugar Candy*. — Solutions of brown or clayed sugar, boiled till they become thick, and then removed into a hot room, form, upon sticks or strings put into the vessels for that purpose, into crystals, or candy.

II. *Historical Notice of Sugar*. — The history of sugar is involved in a good deal of obscurity. It was very imperfectly known by the Greeks and Romans. Theophrastus, who lived about 320 years before the Christian era, the first writer whose works have come down to us by whom it is mentioned, calls it a sort of "honey extracted from canes or reeds." Strabo states, on the authority of Nearchus, Alexander's admiral, that "reeds in India yield honey without bees." And Seneca, who was put to death A. C. 65, alludes to sugar in a way which shows how little was then known respecting it (Epist. 84.): — *Asunt, says he, inveniri apud Indos mel in arundinum foliis, quod aut ros illius calti, aut ipsius arundinis humor dulcis et pinguior gignat.*

Of the ancients, Dioscorides and Pliny have given the most precise description of sugar. The former says, it is "a sort of concreted honey, found upon canes, in India and Arabia Felix; it is in consistence like salt, and is, like it, brittle between the teeth." And Pliny describes it as "honey collected from canes, like a gum, white and brittle between the teeth; the largest is of the size of a hazel nut: it is used in medicine only." — (*Saccharum et Arabia fert, sed laudatius India; est autem mel in arundinibus collectum, gummiis modo candidum, dentibus fragile, amplissimum nucis avellanae magnitudine, ad medicina tantum usum.* — Lib. xii. c. 8.)

It is evident, from these statements, that the knowledge of the Greeks and Romans with respect to the mode of obtaining sugar was singularly imperfect. They appear to have thought that it was found adhering to the cane, or that it issued from it in the state of juice, and then concreted like gum. Indeed, Lucan expressly alludes to Indians near the Ganges, —

*Quique bibunt teneri dulces ab arundine succos.* — (Lib. iii. l. 237.)

But these statements are evidently without foundation. Sugar cannot be obtained from the cane without the aid of art. It is never found native. Instead of flowing from the plant, it must be forcibly expressed, and then subjected to a variety of processes. It is not, however, quite so clear as has been generally supposed that the Romans were wholly unacquainted with the mode of procuring sugar. The remarkable line of Statius —

*Et quas percoquit Ebusia cannas* — (Sylv. lib. i. v. 15.)

has been conjectured, apparently on good pretty grounds, to refer to the boiling of the juice of the cane. But the passage has been differently read, and is too enigmatical to be much depended on.

Dr. Moseley conjectures, apparently with much probability, that the sugar described by Pliny and Dioscorides, as being made use of at Rome, was sugar candy obtained from China. This, indeed, is the only sort of sugar to which their description will at all apply. And it would seem that the mode of preparing sugar candy has been understood and practised in China from a very remote antiquity; and that large quantities of it have been in all ages exported to India, whence, it is most probable, small quantities found their way to Rome. — (*Treatise on Sugar*, 2d edit. pp. 66—71. This, as well as Dr. Moseley's *Treatise on Coffee*, is a very learned and able work.)

Europe seems to be indebted to the Saracens not only for the first considerable supplies of sugar, but for the earliest example of its manufacture. Having, in the course of the 9th century, conquered Rhodes, Cyprus, Sicily, and Crete, they introduced into them the sugar cane, with the cultivation and preparation of which they were familiar. It is mentioned by the Venetian historians, that their countrymen imported, in the 12th century, sugar from Sicily at a cheaper rate than they could import it from Egypt. — (*Essai de l'Histoire du Commerce de Venise*, p. 100.) The crusades tended to spread a taste for sugar throughout the Western world; but there can be no doubt that it was cultivated, as now stated, in modern Europe, antecedently to the era of the crusades; and that it was also previously imported by the Venetians, Amaliphitans, and others, who carried on a commercial intercourse, from a very remote epoch, with Alexandria and other cities in the Levant. It was certainly imported into Venice in 996. — (See the *Essai*, &c. p. 70.)

The art of refining sugar, and making what is called loaf-sugar, is said, by Dr. Moseley, to be a modern European invention, the discovery of a Venetian about the

end of the 15th or the beginning of the 16th century. — (*Moseley*, p. 66.) But this is doubtful, for Le Grand D'Aussy has shown that white or, as he calls it, refined sugar (*sucre blanc ou raffiné*) had been introduced into and used in France for more than a century and a half previously to the date assigned for the discovery of the process of refining in Venice.\* — (*Vie Privée des François*, ii. 198. ed. 1815.) This sugar was imported from Egypt principally by Italians; and the probability is, that the latter were the first Europeans who practised the art, which, however, would appear to have originated in the East.

The cane had, as already seen, been introduced into Sicily, and its culture practised, previously to the middle of the 12th century. It also was carried to Spain and cultivated by the Saracens soon after they obtained a footing in that country. The first plantations were at Valencia; but they were afterwards extended to Granada and Murcia. Mr. Thomas Willoughby, who travelled over great part of Spain in 1664, has given an interesting account of the state of the Spanish sugar plantations, and of the mode of manufacturing the sugar.

Plants of the sugar cane were carried by the Spaniards and Portuguese to the Canary Islands and Madeira, in the early part of the 15th century; and it has been asserted by many, that these islands furnished the first plants of the sugar cane that ever grew in America.

But though it is sufficiently established, that the Spaniards early conveyed plants of the sugar cane to the New World, there can be no doubt, notwithstanding Humboldt seems to incline to the opposite opinion (*Essai Politique sur la Nouvelle Espagne*, liv. iv. c. 10.), that this was a work of supererogation, and that the cane was indigenous both to the American continent and islands. It was not for the plant itself, which flourished spontaneously in many parts when it was discovered by Columbus, but for the art of making sugar from it, that the New World is indebted to the Spaniards and Portuguese: and these to the nations of the East. — (*See Lafitau, Mœurs des Sauvages*, tome ii. p. 150.; *Edwards's West Indies*, vol. ii. p. 238.)

Barbadoes is the oldest settlement of the English in the West Indies. We took possession of it in 1627; and so early as 1646 began to export sugar thence to England. The trade of Barbadoes attained its maximum in 1676, furnishing, it is said, employment, at that period, for 400 sail of vessels, averaging 150 tons burden: but this statement is most probably exaggerated.

Jamaica was discovered by Columbus, in his second voyage, and was first occupied by the Spaniards. It was wrested from them by an expedition sent against it by Cromwell in 1656; and has since continued in our possession, forming by far the most valuable of our West Indian colonies. At the time when it was conquered, there were only 3 small sugar plantations upon it. But, in consequence of the influx of English settlers from Barbadoes and the mother country, fresh plantations were speedily formed, and continued rapidly to increase.

The sugar cane is said to have been first cultivated in St. Domingo, or Hayti, in 1506. It succeeded better there than in any other of the West Indian Islands. Peter Martyr, in a work published in 1590, states that, in 1518, there were 28 sugar-works in St. Domingo established by the Spaniards. "It is marvellous," says he, "to consider how all things increase and prosper in the island. There are now 28 sugar presses, where-with great plenty of sugar is made. The canes or reeds wherein the sugar growth are bigger and higher than in any other place; and are as big as a man's wrist, and higher than the stature of a man by the half. This is more wonderful, that whereas in Valencia, in Spain, where a great quantity of sugar is made yearly, whenever they apply themselves to the great increase thereof, yet doth every root bring forth not past 5 or 6, or at most 7 of these reeds; whereas in St. Domingo 1 root beareth 30, and oftentimes 30." — (*Eng. trans. p. 172.*)

Sugar from St. Domingo formed, for a lengthened period, the principal part of the European supplies. Previously to its devastation, in 1790, no fewer than 65,000 tons of sugar were exported from the French portion of the island.

III. *Sources whence the Supply of Sugar is derived.* — The West Indies, Java, Brazil, Bengal, Mauritius, Siam, the Isle de Bourbon, and the Philippines, are the principal sources whence the supplies required for the European and American markets are derived. The quantities exported from these countries, exclusive of molasses, may be estimated as follows: —

	Test Tons
British Colonies. — West Indies (1847) . . . . .	160,000
Mauritius . . . . .	50,000
British India (1846-47) . . . . .	70,000†
	— 280,000

\* But white sugar is not necessarily, as Le Grand D'Aussy seems to suppose, refined; it may be merely clayed, like Havannah sugar, which is as white as refined sugar.

† This includes the exports, not merely to the U. Kingdom. but to all countries.

Loaf or lump sugar is unknown in the East, sugar candy being the only species of refined sugar that is made use of in India, China, &c. The manufacture of sugar candy is carried on in Hindostan, but the process is extremely rude and imperfect. In China, however, it is manufactured in a very superior manner, and large quantities are exported. When of the best description, it is in large white crystals, and is a very beautiful article. Two sorts of sugar candy are met with at Canton, viz. Chinchew and Canton; the former being the produce of the province of Fokien, and the latter, as its name implies, of that of Canton. The Chinchew is by far the best, and is about 50 per cent. dearer than the other. Chinese sugar candy is extensively consumed by Europeans at the different settlements throughout the East. The exports of sugar candy from Canton in 1846 for British India and Australia amounted to 28,584 piculs, or 2,326 tons. Within the last 4 or 5 years raw sugar has begun to be rather largely exported from China to England, the shipments for the latter in 1846 having amounted to 18,520 tons. But the speculation did not turn out well; and it is doubtful whether the sugar of China will be able to withstand the competition of that of Brazil and Cuba.

*Consumption of Tropical Sugar.*—It is exceedingly difficult, or rather we should say quite impossible, to get any correct information with respect to the consumption of sugar in most countries. In as far, however, as regards this country, the subjoined tables furnish ample information. It appears from them that at an average of the 3 years ending with 1844, the consumption of sugar in the U. Kingdom amounted to about 200,000 tons a year, exclusive of about 10,000 tons of bastard or inferior sugar, obtained from boiling molasses. In the course of the ensuing year, Sir Robert Peel reduced the duties on British colonial muscovado sugars from 2*s.* 2*d.* to 1*s.* a cwt., a considerable reduction being made, at the same time, in the duty on foreign sugar the produce of free labour. In consequence of this reduction the entries of sugar for home consumption increased from 206,472 tons in 1844 to 242,830 tons in 1845, exclusive in both years of molasses equivalent to about 15,000 tons. In 1846 farther changes were made in the duties by the admission of foreign slave grown sugar at a reasonable rate; and in 1847 the consumption (including that used in breweries and distilleries) amounted to 290,281 tons; to which may be added 20,000 tons as the equivalent of molasses.

The statements given by Schnitzler (*Statistique de la France*, i. 296.) show that at an average of 1840 and 1841 the consumption of colonial and foreign sugars amounted in France to 73,139,000 kilog., or 71,425 tons, a year; and adding to this quantity the produce of the beet-root plantations for these years, amounting to about 30,000,000 kilog., the whole consumption would be about 103,000,000 kilog., exclusive of the quantity surreptitiously introduced. But the home supply of sugar has increased in the interval: and it farther appears from the official accounts, published by the French customs, that, in 1847, 97,452,150 kilog., or 95,801 tons, of colonial and foreign sugar were entered for consumption.

The Low Countries, Germany, and Austria are supplied through Holland, the Hanse Towns, the ports on the south shore of the Baltic, and Trieste. Most part of the produce of the Dutch colonies is imported into Holland, and considerable quantities are also imported from other countries; so that, on the whole, the imports into the Dutch ports may be fairly estimated at from 95,000 to 105,000 tons a year. The imports into Hamburg and Bremen amount, at an average, to about 40,000 tons a year; and those into Antwerp to above 13,000 tons. There is also a considerable importation of sugar into Stettin and other Baltic ports belonging to Germany and Prussia. The imports at Trieste amounted, at an average of the 3 years ending with 1846, to 32,016 tons a year; and, allowing for the quantities introduced through Venice and other channels, perhaps we shall not be far wrong in estimating the imports for consumption by the Austrian ports on the Adriatic at about 35,000 tons.

The consumption of sugar in Spain has been estimated by Montveran (*Statistique des Colonies*, p. 92.) at 41,050 tons. But, despite the considerable consumption of cocoa in Spain, and the moderation of the duties on sugar, we have little or no doubt that this estimate is considerably beyond the mark. Probably, were the consumption stated at 36,000 tons, it would be quite as much as it amounts to. On the like grounds we may, perhaps, estimate the consumption of Portugal at about 10,000 tons.

Duty is paid in Russia on about 34,000 tons of raw sugar, exclusive of what is clandestinely imported, and exclusive, also, of the clandestine imports of refined sugar.

During the year ending the 30th June, 1845, the U. States imported (principally

from Cuba and Porto Rico) 115,664,840 lbs., of which 13,799,651 lbs. were re-exported, leaving 101,865,189 lbs., or nearly 45,500 tons, for the consumption of the Union. But in addition to these imports of foreign sugar, which during the above year were below the average, the U. States draw the principal portion of their supply from the plantations in Louisiana, the produce of which has increased very rapidly of late years. In 1845 it amounted to 186,650 hhd. of 10 cwt. each, or to 93,325 tons. The crop, however, fluctuates very greatly in different years, and may, perhaps, be estimated at about 80,000 tons at an average. The exports of this sugar are inconsiderable: the whole shipments of native raw and refined sugar from the Union during the year ended the 30th of June, 1845, having amounted to only 2,193,997 lbs., or about 980 tons. (*Papers* published by Congress, 8th December, 1845, p. 28. and 32.) The States further derive a supply of 10,000 or 12,000 tons of sugar from the maple.

On the whole, therefore, we shall not perhaps be far wrong in estimating the consumption of exported colonial and tropical sugar as follows:

	Tons.	Tons.
The U. Kingdom (1848, inclusive of distilleries, &c.)	-	310,000
France	-	100,000
The Netherlands, Belgium, Germany, Prussia, Austria, Hungary, and Austrian Italy,	-	-
per Dutch ports, deducting re-exports to Russia and other countries	65,000	-
— Hanse Towns	40,000	-
— Antwerp	15,000	-
— Rostock, Stettin, Königsberg, and other ports on the Baltic, excluding the im-	-	-
ports from Holland and the Hanse Towns	8,000	-
Trieste, Venice, Fiume, &c.	25,000	-
		161,000
Spain	-	35,000
Portugal	-	10,000
Russia	-	35,000
Denmark and Sweden	-	13,000
Italy, Sicily, Malta, Turkey, Greece, and the Levant generally	-	50,000
U. States	-	50,000
Canada, Australia, Cape of Good Hope, &c.	-	30,000
		797,000

Now, supposing these statements to be reasonably correct, it would appear that the aggregate supply of sugar exceeds the demand by about 90,000 tons, so that the fair presumption is, that the giving of full permission to employ sugar in our distilleries and breweries will have no lasting influence over its price. It is, no doubt, true that the demand for sugar is rapidly increasing in this and most other countries; but, as the power to increase its supply (so long, at least, as Cuba, Brazil, and Louisiana are supplied with slave labour) is all but illimitable, no permanent rise of prices can at present be anticipated.

Taking the price of tropical sugar at the rate of 1*l.* 2*s.* a cwt., or 22*l.* a ton, the prime cost of the article to the people of Europe and the U. States will be 17,534,000*l.* sterling; to which adding 50 per cent. for duty, its total cost will be 26,301,000*l.* This is sufficient to prove the paramount importance of the trade in this article. Exclusive, however, of sugar, the other products of the cane, as rum, molasses, treacle, &c., are of very great value. The revenue derived by the British treasury from rum only, amounted, in 1847, to 1,316,140*l.* nett, but it has sometimes been much greater.

*Progressive Consumption of Sugar in Great Britain.*—We are not aware that there are any authentic accounts with respect to the precise period when sugar first began to be used in England. It was, however, imported in small quantities by the Venetians and Genoese in the 14th and 15th centuries\*: but honey was then, and long after, the principal ingredient employed in sweetening liquors and dishes. Even in the early part of the 17th century, the quantity of sugar imported was very inconsiderable; and it was made use of only in the houses of the rich and great. It was not till the latter part of the century, when coffee and tea began to be introduced, that sugar came into general demand. In 1700, the quantity consumed in Great Britain was about 10,000 tons, or 22,400,000 lbs.; and in 1844 the consumption amounted (bastards excluded) to above 180,000 tons, or more than 400,000,000 lbs.; so that sugar forms not only one of the principal articles of importation and sources of revenue, but an important necessary of life.

Great, however, as the increase in the use of sugar has certainly been, it may, we think, be fairly presumed that the demand for it is still a good deal below its natural limit; and now that the duties have been reduced, and the trade placed on a proper footing, we confidently anticipate that the consumption of sugar, and, also, the revenue derived from it, will be largely increased.

During the first half of last century, the consumption of sugar increased five-fold. It amounted, as already stated—

\* In Marin's *Storia del Commercio de Venetiani* (vol. v. p. 306.), there is an account of a shipment made at Venice for England in 1319, of 100,000 lbs. sugar, and 10,000 lbs. sugar candy. The sugar is said to have been brought from the Levant.

in 1700, to 10,000 tons	-	or 22,000,000 lbs.	In 1754, to 53,270 tons	or 119,320,000 lbs.
1710, - 14,000	-	31,369,000	1770-75, - 72,540 (average)	- 162,500,000
1724, - 42,000	-	94,080,000	1786-90, - 81,000	- 181,500,000

In the reign of Queen Anne, the duty on sugar amounted to 3s 5d. per cwt. Small additions were made to it in the reign of George II.; but in 1780 it was only 6s. 8d. In 1781 a considerable addition was made to the previous duty; and in 1787 it was as high as 12s. 4d. In 1791 it was raised to 15s.; and while its extensive and increasing consumption pointed it out as an article well fitted to augment the public revenue, the pressure on the public finances, caused by the French war, occasioned its being loaded with duties, which, though they yielded a large return, would, there is good reason to think, have been more productive had they been lower. In 1797, the duty was raised to 17s. 6d.; 2 years after, it was raised to 20s.; and, by successive augmentations in 1803, 1804, and 1806, it was raised to 30s.; but in the last mentioned year it was enacted, that, in the event of the market price of sugar in bond, or exclusive of the duty, being for the 4 months previous to the 5th of January, the 5th of May, or the 5th of September, below 49s. a cwt., the Lords of the Treasury might remit 1s. a cwt. of the duty; that if the prices were below 48s., they might remit 2s.; and if below 47s., they might remit 3s., which was the greatest reduction that could be made. In 1826, the duty on West India sugar was declared to be constant at 27s., without regard to price; the duty on sugar from the Mauritius being then also reduced to 27s. In 1830, the duty was reduced to 24s. on West India and Mauritius sugar, and to 32s. on East India sugar; and in 1836, the duty on the latter was reduced to the same level as that on the former.

of the duty, have been deducted.

\* To White Clayed.

of the duty, have been deducted.

\* To White Clayed.

We had occasion, in a former edition of this work, to remark on the impolicy and injustice of charging sugar from our possessions in the East Indies with a higher rate of duty than was laid on sugar from the West Indies. But, as already seen, this distinction was suppressed in 1836, and the sugar of our various colonial possessions and dependencies is now admitted for consumption on the same terms.

Previously to 1845 the duty on sugar from a British possession was decidedly too high, being no less than 25s. 2d. (24s. + 5 per cent.) per cwt. But whether this were so or not, there cannot, we apprehend, be so much as the shadow of a doubt that the duty on foreign sugars was then more than twice as great as it should have been. This duty, which amounted for a lengthened period to 63s. a cwt. was, in fact, intended to be prohibitory; and so long as our foreign dependencies furnished so much sugar as not only to supply the markets of the U. Kingdom, but to furnish, besides, a considerable excess for exportation to others, there was little to object to in the magnitude of the duty. Latterly, however, it became most oppressive in its operation. In consequence, as already seen, of the measures connected with the emancipation of the slaves, the imports of sugar from the West Indies declined from 4,103,746 cwts. in 1831, to 2,857,703 cwts. in 1845. Owing to the immigration of hill-coolies, and other circumstances, the emancipation of the slaves in the Mauritius has not been nearly so injurious as in the West Indies; and with the exception of 1843, in which they fell off considerably, the imports of sugar from that island have not declined. But despite this circumstance and the large increase of the imports from India since 1840, the deficiency occasioned by the decrease in the imports from the West Indies was not fully compensated, and there was, of course, a proportional diminution of the total supply. On the one hand, therefore, we had a rapidly increasing population, and on the other we had that population confined by an oppressive duty to a market for sugar, the supply of which had been diminished! The consequences have been such as every man of sense must have anticipated from the outset. The business of refining for the foreign market, and our export trade in sugar, were all but annihilated, while the average gazette price of muscovado sugar admissible to the English markets amounted during the 3 years ending with 1844 to about double the price of foreign sugar in bond, of equal or superior quality! We beg, in illustration of what is now stated, to subjoin an

Account of the Quantities of Sugar retained for Consumption, of the Nett Produce of the Duties thereon, and of the Prices of British Sugar (ex Duty), and Brazil Sugar in Bond, in 1842, 1843, and 1844, with the Average of these 3 years.

Years.	Quantities.	Nett Revenue from Duties on Sugar.	Average Prices of British Muscovado Sugar.	Average Prices of Brazil sugar (Brown and Yellow).
	Cwt.	£	s. d.	s. d.
1842 - -	3,508,457	4,674,312	36 11	18 5
1843 - -	4,026,307	5,075,526	33 9½	17 2
1844 - -	4,123,994	5,803,572	33 3	17 0
Total -	11,658,758	15,553,410	103 11½	42 12 5
Average of 3 Years -	4,008,912½	5,061,453½	34 7½	17 5½

Now, it appears from this statement, that while the price of British sugar (exclusive of duty) amounted during the 3 years ending with 1844 to 34s. 7½d. per cwt., the price of Brazil (and Cuba) sugar was only 17s. 5½d. per do. And hence it follows, that, had the late prohibitory duty of 63s. on foreign sugar been reduced to the same rate (25s. 2d., or 24s. + 5 per cent.) as the late duty on British sugars, the people of the U. Kingdom might have bought the same quantity of sugar for 17s. 5½d. that cost them 34s. 7d., that is, they might have got about 2 lbs. of sugar for the same sacrifice it cost them to get 1 lb. The aggregate loss to the public from this preposterous arrangement of the sugar duties, during the period in question, was quite enormous. It appears from the above account that the average consumption of sugar, during each of the three years ending with 1844, amounted to 4,008,912½ cwts., which at 34s. 7½d. cost 6,944,605l. 14s. 5d. But had we been allowed to go into the foreign market for sugar, we might have got the same quantity for 3,502,230l. 13s., being a saving in 1 year of no less than 3,442,375l. 1s. 5d., and on 3 years, of 10,327,125l. 4s. 3d. But it may, perhaps, be said, that had our ports been open to the free importation of Brazilian and other foreign sugars, the price of the latter would have been raised: and so probably it would; though, considering the vast extent and productiveness of the field from which sugar may be brought, we doubt whether this effect would be very sensible. But, supposing that the opening of our ports had raised the price of foreign sugar from 17s. 5½d. to 22s. a cwt., still the saving would have amounted to 2,534,801l. 15s. 9d. a year!

Under these circumstances there could no longer be a doubt that the reduction of the old prohibitory duty of 66s. a cwt. on foreign sugar was imperatively required;

this was partially effected in 1844, when the duty on foreign sugar, if produced by free labour, was reduced to 35s. 8½d. a cwt., and when, in 1845, the duty on British colonial sugars was reduced to 14s. a cwt., that on foreign free labour sugar was further reduced to 23s. 4d. a cwt. We subjoin

A Table showing the Imports of the various Descriptions of Sugar in each of the 5 Years ending with 1845; with the Quantities entered for Consumption, the Rates of Duty on the same, the Prices, &c.
